"(10)(A) Notwithstanding any other provision of this subsection, the Secretary may impose a limitation on the acreage planted to upland cotton if the Secretary determines that the total supply of upland cotton will, in the absence of such limitation, be excessive taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency. Such limitation shall be achieved by applying a uniform percentage reduction to the upland cotton acreage base for each cotton-producing farm. Producers on a farm who knowingly produce cotton in excess of the permitted cotton acreage for the farm shall be ineligible for cotton loans and payments with respect to that farm. The acreage base for any farm for the purpose of determining any reduction required to be made for any year as the result of a limitation imposed by the Secretary under this subparagraph shall be the average planted on the farm to upland cotton for harvest (including any acreage which the producers were prevented from planting to cotton or other nonconserving crop in lieu of cotton because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the crop year immediately preceding the year for which the determination is made or, at the discretion of the Secretary, the average acreage planted to upland cotton for harvest in the two crop years immediately preceding the year for which the determination is made. The Secretary may make adjustments to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base. A number of acres on the farm determined by dividing (i) the product obtained by multiplying the number of acres required to be withdrawn from the production of upland cotton times the number of acres actually planted to such commodity, by (ii) the number of acres authorized to be planted to such commodity under the limitation imposed by the Secretary (hereinafter in this subsection referred to as 'reduced acreage') shall be devoted to construction uses, in accordance with regulations issued by the Secretary, which will assure protection of such acreage from weeds and wind and water erosion. However, the Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of the reduced acreage to be devoted to sweet sorghum, hay and grazing, or the production of guar, sesame, safflower, sunflower, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, oats, rye, or other commodity, if the Secretary determines that such production is needed to provide an adequate supply of such commodities, is not likely to increase the cost of the price support program, and will not adversely affect farm income.

"(B) The Secretary may conduct a land diversion program and make land diversion payments to producers of upland cotton if the Secretary determines that such payments will assist in obtaining necessary adjustments in the total acreage of upland cotton. If a land diversion program is in effect under this subsection, the Secretary may also require that producers participate in such program as a condition of eligibility for loans and payments authorized by this subsection. Land diversion payments shall be made to a producer on a farm who devotes an acreage of cropland on the farm to conservation uses approved by the Secretary in accordance with a land diversion contract entered into with the Secretary. The amounts payable to a producer under a land diversion contract shall be determined by such means as the Secretary determines appropriate, including the submission of bids for such contracts. In determining the acceptability of a contract offer, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producer and the productivity of the acreage diverted. The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as to affect adversely the economy of the county or local community;

"(C) The reduced acreage and the diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies.

"(11) An operator of a farm desiring to participate in the program conducted under this subsection shall execute an agreement with the Secretary providing for such participation no later than such date as the Secretary may prescribe. The Secretary may, by mutual agreement with the producer, terminate or modify any such agreement entered into under this subsection if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

"(12) The Secretary shall provide for the sharing of payments made under this subsection for any farm among the producers on the farm on a fair and equitable basis.

"(13) The Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers.

"(14) In any case in which the failure of a producer to comply fully with the terms and conditions of the program formulated under this subsection precludes the making of loans and payments, the Secretary may, nevertheless, make such loans and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure. The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet such other requirements does not adversely affect the operation of the program.

"(15) The Secretary may issue such regulations as the Secretary determines necessary to carry out the provisions of this subsection.

"(16) The Secretary shall carry out the program authorized by this subsection through the Commodity Credit Corporation.

"(17) The provisions of subsection 8(g) of the Soil Conservation and Domestic Allotment Act (relating to assignment of payments) shall apply to payments under this subsection.

"(18) Notwithstanding any other provision of law, compliance on a farm with the terms and conditions of any other commodity program may not be required as a condition of eligibility for loans or payments under this subsection.

"(19) In order to encourage and assist producers in the orderly ginning and marketing of their cotton production, the Secretary shall make loans available to such producers on seed cotton in accordance with authority vested in the Secretary under the Commodity Credit Corporation Charter Act.".

EXTENSION OF COMMODITY CREDIT CORPORATION SALES PRICE RESTRICTIONS

SEC. 503. Section 603 of the Food and Agriculture Act of 1977 (91 Stat. 939) is amended by striking out "July 31, 1982" and inserting in lieu thereof "July 31, 1986".

MISCELLANEOUS COTTON PROVISIONS

SEC. 504. (a) Section 408(b) of the Agricultural Act of 1949 (7 U.S.C. 1428(b)) is amended by striking out the period at the end of the first sentence and inserting in lieu thereof a colon and the following: "And pro-

vided further, That for the 1982 through 1985 crops of upland cotton a cooperator shall be a producer on a farm who has limited the acreage planted in accordance with paragraph (10)(A) of section 103(g).".

(b) Sections 103(a) and 203 of the Agricultural Act of 1949 (7 U.S.C. 1444 and 1446d) shall not be applicable to the 1982 through 1985 crops.

SKIPROW PRACTICES

SEC. 505. Section 374(a) of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1374) is amended by striking out "1981" and inserting in lieu thereof "1985".

PRELIMINARY ALLOTMENTS FOR 1986 CROP OF UPLAND COTTON

SEC. 506. Section 606 of the Food and Agriculture Act of 1977 (7 U.S.C. 1342 note) is amended by striking out "1982") and inserting in lieu thereof "1986".

PRICE SUPPORT ADJUSTMENTS

SEC. 507. Section 403 of the Agricultural Act of 1949 (7 U.S.C. 1423) is amended by adding at the end thereof the following: "Beginning with the 1982 crop of upland cotton, the quality differences (premiums and discounts for grade, staple and micronaire) for the loan program shall be established by the Secretary by giving equal weight to (1) loan differences for the preceding crop and (2) the market differences for such crop in the nine designated United States spot markets.

The Secretary shall establish a study committee of ten members, eight of whom shall be representatives of cotton producers, selected to equally represent each of the four major geographic regions which produce and market upland cotton, and one of whom shall be a representative of cotton merchants and one of whom shall be a representative of the textile manufacturers. The committee shall study alternative methods of establishing values of premiums and discounts for grade, staple, and micronaire for the upland cotton loan program that will accurately represent true relative market values and reflect actual market demand for upland cotton produced in the United States. The committee shall submit the results of such study to the Secretary at the earliest practicable date together with such recommendations as the committee considers appropriate. The Secretary may, prior to the announcement of loan rate differences for the 1982 crop of upland cotton, review the procedures and criteria, including the recommendations made by the study committee and the formula provided for in the fifth sentence of this section, used for determining quality differences, including the loan differentials for grade, staples, and micronaire for the upland cotton loan program and, on the basis of such review, revise such procedures and criteria to accurately reflect the actual market value of upland cotton produced in the United States.

## TITLE VI—RICE

REPEAL OF PROVISIONS RELATING TO NATIONAL ACREAGE ALLOTMENTS, ALLOCATIONS, APPORTIONMENT, MARKETING QUOTAS, AND PENALTIES

SEC. 601. (a) Effective beginning with the 1982 crop of rice, sections 352, 353, 354, 355, and 356, of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1352, 1353, 1354, 1355, and 1356) are repealed.

(b) Effective beginning with the 1982 crop of rice, section 377 of such Act (7 U.S.C. 1377) shall not be applicable to rice acreage.

LOAN RATES, TARGET PRICES, DISASTER PAYMENTS, RICE ACREAGE REDUCTION PROGRAM, AND LAND DIVERSION FOR THE 1982 THROUGH 1985 CROPS OF RICE

SEC. 602. Effective only for the 1982 through 1985 crops of rice, section 101 of the Agricultural Act of 1949 (7 U.S.C. 1441) is amended by adding at the end a new subsection (i) as follows:

"(i) Notwithstanding any other provision of law—

"(1) For the 1982 through 1985 crops of rice, the established price shall not be less than $10.73 per hundredweight for the 1982 crop, $11.23 per hundredweight for the 1983 crop, $11.73 per hundredweight for the 1984 crop, and $12.23 per hundredweight for the 1985 crop. Any such established price may be adjusted by the Secretary as the Secretary determines to be appropriate to reflect any change in (i) the average adjusted cost of production per acre for the two crop years immediately preceding the year for which the determination is made from (ii) the average adjusted cost of production per acre for the two crop years immediately preceding the year previous to the one for which the determination is made. The adjusted cost of production for each of such years may be determined by the Secretary on the basis of such information as the Secretary finds necessary and appropriate for the purpose and may include variable costs, machinery ownership costs, and general farm overhead costs, allocated to the crops involved on the basis of the proportion of the value of the total production derived from each crop.

"(2) The Secretary shall make available, to cooperators in the several States of the United States, loans and purchases for each of the 1982 through 1985 crops of rice at a level that bears the same ratio to the loan level for the preceding year's crop as the established price for such crop bears to the established price for the preceding year's crop. If the Secretary determines that loans and purchases at such a level for any of the 1982 through 1985 crops would substantially discourage the exportation of rice and result in excessive stocks of rice in the United States, the Secretary may, notwithstanding the foregoing provisions of this paragraph, establish loans and purchases for any such crop at such level, not less than $8 per hundredweight, as the Secretary determines necessary to avoid such excessive stocks. The loan and purchase level for each of the 1983, 1984, and 1985 crops of rice shall be established on the basis of the loan and purchase level established for the preceding crop year before the application of the preceding sentence. The established price and the loan and purchase level for each crop shall be announced not later than March 1 of each calendar year for the crop harvested in that calendar year.

"(3) The Secretary shall make available to cooperators payments for each of the 1982 through 1985 crops of rice grown in the several States of the United States at a rate equal to the amount by which the established price for the crop of rice exceeds the higher of—

"(A) the national average market price received by farmers during the first five months of the marketing year for such crop, as determined by the Secretary, or

"(B) the loan level determined under paragraph (2) for such crop.

"(4) The payments for each such crop of rice shall be computed by multiplying (i) the payment rate by (ii) the form program acreage for the crop by (iii) the yield established for the farm. In no event shall payments be made under this paragraph for any crop on a greater acreage than the average actually planted to rice. The yield for the farm for any year shall be determined on the basis of the actual yields per harvested acre for the three preceding years. The actual yield shall be adjusted by the Secretary for abnormal yields in any year caused by drought, flood, other natural disaster, or other condition beyond the control of the cooperators.

"(5) The total quantity on which payments would otherwise be payable to a producer on a farm for any crop under this paragraph shall be reduced by the quantity on which any disaster payment is made to the producer for the crop under paragraph (6) of this subsection.

"(6)(A) Except as provided in subparagraph (C) of this paragraph, effective only with respect to the 1982 through 1985 crops of rice, if the Secretary determines that the producers on a farm are prevented from planting any portion of the acreage intended for rice to rice or other nonconserving crops because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make a prevented planting disaster payment to the cooperators on the number of acres so affected but not to exceed the acreage planted to rice for harvest (including any acreage which the producers were prevented from planting to rice or other nonconserving crop in lieu of rice because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the immediately preceding year, multiplied by 75 per centum of the farm program payment yield established by the Secretary times a payment rate equal to 33⅓ per centum of the established price for the crop.

"(B) Except as provided in subparagraph (C) of this paragraph, effective only with respect to the 1982 through 1985 crops of rice, if the Secretary determines that because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the total quantity of rice which the producers are able to harvest on any farm is less than the result of multiplying 75 per centum of the farm program payment yield established by the Secretary for such crop by the acreage planted for harvest for such crop, the Secretary shall make a reduced yield disaster payment to cooperators at a rate equal to 33⅓ per centum of the established price for the crop for the deficiency in production below 75 per centum for the crop.

"(C) With respect to the 1982 through 1985 crops of rice, cooperators on a farm shall not be eligible for disaster payments under this paragraph if crop insurance is available to them under the Federal Crop Insurance Act with respect to their rice acreage.

"(D) Notwithstanding the provisions of subparagraph (C) of this paragraph, effective only for the 1982 through 1985 crops of rice, the Secretary may make disaster payments to producers on a farm under this paragraph whenever the Secretary determines that—

"(i) as the result of drought, flood, or other natural disaster, or other condition beyond the control of the producers, producers on a farm have suffered substantial losses of production either from being prevented from planting rice or other nonconserving crop or from reduced yields, and that such losses have created an economic emergency for the producers;

"(ii) Federal crop insurance indemnity payments and other forms of assistance made available by the Federal Government to such producers for such losses are insufficient to alleviate such economic emergency, or no crop insurance covered the loss because of transitional problems attendant to the Federal crop insurance program; and

"(iii) additional assistance must be made available to such producers to alleviate the economic emergency.

The Secretary may make such adjustments in the amount of payments made available under this subparagraph with respect to individual farms so as to assure the equitable allotment of such payments among producers taking into account other forms of Federal disaster assistance provided to the producers for the crop involved.

"(7)(A) The Secretary shall proclaim a national program acreage for each of the 1982 through 1985 crops of rice. The proclamation shall be made not later than January 31 of each calendar year for the crop harvested in that calendar year. The Secretary may revise the national program acreage first proclaimed for any crop year for the purpose of determining the allocation factor under subparagraph (B) of this paragraph if the Secretary determines a revision necessary based upon the latest information, and the Secretary shall proclaim such revised national program acreage as soon as it is made. The national program acreage for rice shall be the number of harvested acres the Secretary determines (on the basis of the weighted national average of the farm established yields for the crop for which the determination is made) will produce the quantity (less imports) that the Secretary estimates will be utilized domestically and for export during the marketing year for such crop. If the Secretary determines that carryover stocks of rice are excessive or an increase in stocks is needed to assure desirable carryover, the Secretary may adjust the national program acreage by the amount the Secretary determines will accomplish the desired increase or decrease in carryover stocks.

"(B) The Secretary shall determine a program allocation factor for each crop of rice. The allocation factor for rice shall be determined by dividing the national program acreage for the crop by the number of acres that the Secretary estimates will be harvested for such crop. In no event may the allocation factor for any crop of rice be more than 100 per centum nor less than 80 per centum.

"(C) The individual farm program acreage for each crop of rice shall be determined by multiplying the allocation factor by the acreage of rice planted for harvest on the farms for which individual farm program acreages are required to be determined, except that the rice acreage on a farm eligible for payments shall not be further reduced by application of the allocation factor if the producers reduce the acreage of rice planted for harvest on the farm from the previous year by at least the percentage recommended by the Secretary in the annual proclamation of the national program acreage. The Secretary shall provide fair and equitable treatment for producers on farms on which the acreage of rice planted for harvest is less than for the preceding year, but the reduction is insufficient to exempt the farm from the application of the allocation factor. In establishing the allocation factor for rice, the Secretary may make such adjustment as the Secretary deems necessary to take into account the extent of exemption of farms under the foregoing provisions of this paragraph.

"(8)(A) Notwithstanding any other provision of this subsection, the Secretary may impose a limitation on the acreage planted to rice if the Secretary determines that the total supply of rice will, in the absence of such limitation, be excessive taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency. Such limitation shall be achieved by applying a uniform percentage reduction to the rice acreage base for each rice-producing farm. Producers on a farm who knowingly produce rice in excess of the permitted rice acreage for the farm shall be ineligible for rice loans, purchases, and payments with respect to that farm. The acreage base for any farm for the purpose of determining any reduction required to be made for any year as the result of a limitation imposed by the Secretary under this subparagraph shall be the acreage planted on the farm to rice for harvest (including any acreage which the producers were prevented from planting to rice or other nonconserving crop in lieu of rice because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the crop years immediately preceding the year for for which the determination is made or, at the discretion of the Secretary, the average acreage planted to rice for harvest in the two crop years immediaely preceding the year for which the determination is made. In determining the acreage planted to rice in any previous year for purposes of this subparagraph, the Secretary may make adjustments to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base. A number of acres on the farm determined by dividing (i) the product obtained by multiplying the number of acres required to be withdrawn from the production of rice times the number of acres actually planted to rice, by (ii) the number of acres authorized to be planted to rice under the limitation imposed by the Secretary (hereinafter in this subsection referred to as the 'reduced acreage') shall be devoted to conservation uses, in accordance with regulations issued by the Secretary, which will assure protection of such acreage from weeds and wind and water erosion. However, the Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of the reduced acreage to be devoted to sweet sorghum, hay and grazing or the production of guar, sesame, safflower, sunflower, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, oats, rye, or other commodity, if the Secretary determines that such production is needed to provide an adequate supply of such commodities, is not likely to increase the cost of the price support program, and will not adversely affect farm income.

"(B) The Secretary may conduct a land diversion program and make land diversion payments to producers of rice if the Secretary determines that such payments will assist in obtaining necessary adjustments in the total acreage of rice. If a land diversion program is in effect under this subsection, the Secretary may also require that producers participate in such program as a condition of eligibility for loans, purchases, and payments authorized by this subsection. Land diversion payments shall be made to a producer on a farm who devotes an acreage of cropland on the farm to conservation uses approved by the Secretary in accordance with a land diversion contract entered into with the Secretary. The amounts payable to a producer under a land diversion contract shall be determined by such means as the Secretary determines appropriate, including the submission of bids for such contracts. In determining the acceptability of a contract offer, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producer and the productivity of the acreage diverted. The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county or local community:

"(C) The reduced acreage and the additional diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies.

"(D) An operator of a farm desiring to participate in the program conducted under this subsection shall execute an agreement with the Secretary providing for such participation no later than such date as the Secretary may prescribe. The Secretary may, by mutual agreement with the producer, terminate or modify any such agreement entered into under this subsection if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

"(9) The Secretary shall provide for the sharing of payments made under this subsection for any farm among the producers on the farm on a fair and equitable basis.

"(10) The Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers.

"(11) In any case in which the failure of a producer to comply fully with the terms and conditions of the program formulated under this subsection precludes the making of loans, purchases, and payments, the Secretary may, nevertheless, make such loans, purchases, and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure. The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet such other requirements does not adversely affect the operation of the program.

"(12) The Secretary may issue such regulations as the Secretary determines necessary to carry out the provisions of this subsection.

"(13) The Secretary shall carry out the program authorized by this subsection through the Commodity Credit Corporation.

"(14) The provisions of subsection 8(g) of the Soil Conservation and Domestic Allotment Act (relating to assignment of payments) shall apply to payments under this subsection.

"(15) Notwithstanding any other provision of law, compliance on a farm with the terms and conditions of any other commodity program may not be required as a condition of eligibility for loans, purchases, or payments under this subsection.

DEFINITION OF COOPERATOR

SEC. 603. Effective only with respect to the 1982 through 1985 crops of rice, the third proviso in the first sentence of section 408(b) of the Agricultural Act of 1949 (7 U.S.C. 1428(b)) is amended to read as follows: *Provided further*, That for the 1982 through 1985 crops of rice, a cooperator shall be a producer on a farm who has reduced the acreage base planted to rice as required under section 101(1)(8) of this Act.".

The PRESIDING OFFICER. I recognize the majority leader.

Mr. BAKER. Mr. President, will the Senator yield to me?

Mr. DOLE. I yield to the distinguished majority leader.

Mr. BAKER. Mr. President, I thank the Senator.

The Senate will remain in session perhaps until 6 o'clock and it is my distinct hope we can still finish this bill tonight. I think we can. So I urge the Senators to remain on the floor and close by. I expect a number of votes will still occur between now and 6 o'clock.

The PRESIDING OFFICER. The Chair recognizes the Senator from Kansas.

Mr. DOLE. Mr. President, I do not know that it is necessary to make a prolonged statement because I know many Members have many things they would rather do than listen to those of us who have spoken on this outstanding amendment repeat what we said earlier.

But let me make one point since many Senators are on the floor now who were

not here earlier. There have been a number of us who have been working together on legislation and I would say——

Mr. MOYNIHAN. Mr. President, may we have order? The Senator is speaking on a very important point.

The PRESIDING OFFICER. The Senator from New York properly questions the Chair as to whether there is order and that the Chair should restore order in the Chamber.

Order having been restored, the Senator from Kansas is recognized.

Mr. DOLE. The bottom line is whether we are going to have a farm bill. I have been personally assured at the highest levels of the administration that the present bill will be vetoed if we do not put the budget genie back into the bottle by cutting $360 million out of the wheat and rice sections. I have coughed on the tobacco vote and gone along with the sugar vote and gone along with the peanut vote. This is a commodity that affects my State.

This Senator is convinced that unless we adopt this amendment we are putting the bill in jeopardy. It is just that simple. It is not that we think we have done enough for the farmer or not enough for the farmer. One way not to do enough for the farmer is to keep spending more money than we have. I hope we would have the support of those who are concerned about getting a farm bill.

It is my understanding, and I have talked to the chairman of the House committee, that they hope to take this bill up in the House and pass it—this bill.

Again I can pledge to all the Senators in this room that this Senator is going to be a conferee, I am going to fight for the sugar provisions, I am going to fight for the peanut provisions, I am going to fight for the cotton and rice provisions, and all the other provisions in the bill.

I think my word is good. I am not breaking faith with any coalition. As I have said a couple of times, the coalition is so loose you cannot locate it. You look at the voting record of some in the coalition, if there was a coalition. What I am concerned about is getting a farm bill and getting it passed hopefully today. This is the last major amendment on this bill. I know some feel we ought to do more for farmers. We ought to cut inflation, we ought to cut interest rates, and we would do a great deal more for farmers, as the Senator from Mississippi pointed out. It is a good figure that he had about $1.5 billion for every point of inflation, if we could do something about inflation or interest rates or both.

So this Senator suggests that what we are voting on now is an amendment to reduce the cost of this program by $360 million. It is a $10.5 billion bill. So do not say we are not doing anything for the American farmer. We are trying to get the budget genie back in the bottle.

I hope we might adopt this amendment and then proceed to work on the other amendments that may be pending.

But I say to those from consuming States this is an opportunity to whittle $360 million off the farm bill. I would say to those from farm States that this is an opportunity to get a farm bill. I hope that those of us who have spoken who are from States where this has the greatest impact, that it has no impact on corn or feedgrains, $1 million over the life of the bill. It has absolutely no dollar impact on cotton. It does not affect sugar, it affects rice by about $270 million. But in that case we are talking about a $10.73 versus a $10.98 loan target price per hundredweight.

On wheat we are going to lower it from $4.10 to $4.

It is the view of this Senator that most farmers in wheat-producing States and rice-producing States are hoping we are going to get a farm bill.

I appreciate the cooperation we have had from the distinguished Senator from Kentucky and the chairman of this committee, Senator HELMS. I hope we can proceed to vote up or down, if possible, on this amendment and dispose of it very quickly.

Mr. ANDREWS. Mr. President, will the Senator yield?

Mr. DOLE. I yield.

Mr. ANDREWS. I appreciate the Senator's yielding.

I have participated in, I think, it was, four farm bills. I have never voted to lower price supports on any commodity or anything else. But let me also add one other thing. I have been a farmer all my life, so has my father and so has my grandfather. Every now and then we take a look at the crop that is out in the field and we decide it might be a wise choice to buy some hail insurance. That hail insurance costs us a premium of 5 or 6 percent.

As I understand the amendment of my colleague from Kansas, if his amendment passes we will be dropping the target price on cotton and rice and wheat and feedgrains by about 5 percent, is that not essentially true, 5 or 6 percent?

Mr. DOLE. Not 5 percent.

Mr. ANDREWS. Five percent, from $4.10 to $4.

Mr. DOLE. Two-and-a-half percent.

Mr. ANDREWS. Well, yours is an even better deal than my insurance agent gives me.

Mr. DOLE. We do not figure it that way in the Finance Committee.

Mr. ANDREWS. The present chairman of the Finance Committee is quicker with figures than I am when I use them in farming.

The point we should look at and which should be understood by the Members is that the distinguished Senator from Kansas and the chairman of the great Agriculture Committee can assure the membership that the administration will back the farm bill in toto if this amendment is adopted.

For that insurance policy, we are paying a 2½ to 3 percent premium, probably one of the better bargains that we might get into in these days of budget cuts and austerity programs.

I would suggest that even for those of us who have never, ever contemplated voting to lower the price support provision for agriculture, this might be a wise insurance policy to take out, looking at the importance of this bill.

Mr. President, I yield back the remainder of my time.

Mr. DOLE. I thank the Senator from North Dakota.

Mr. JEPSEN. Mr. President, I ask unanimous consent that I be listed as a cosponsor of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN addressed the Chair.

The PRESIDING OFFICER. The Senator from New York.

Mr. MOYNIHAN. Mr. President, I thank the Chair. I rise to state that I found the observations of the Senator from Kansas persuasive, and those of his colleagues. But I would also want briefly to draw attention of the Chamber, while Members are present, to an amendment which I will be offering sometime this afternoon which takes off from that provision presented in the President's first address to the joint session of Congress on February 18, when he said:

> The taxing power of Government must be used to provide revenues for legitimate governmental purposes but must not be used to regulate the economy or bring about social change.

I shall offer a simple amendment that says that it is the sense of the Congress that the taxing power of Government should not be used to regulate the agriculture economy or bring about social change in farming through the use of tax moneys to distort the natural working of the marketplace in agricultural products or to provide the subsidies for the creation of special privileges or exclusive rights.

Mr. President, we are going to have a long autumn in which matters of concern in the social agenda of our country and to the urban areas of our country are going to come before this body and the ruling doctrine will be that which the President announced, that the taxing power of Government on taxes must never be used to bring about social change.

Now, social change takes many forms. Social change protects small growers. Is there any proposition that has been more repeatedly enunciated in these Halls than the importance of the family farm? I expect not. I happen to live on a farm. I happen to understand the problems. Keep the family farm; prevent its disappearance into corporate structure. How? By using the taxing power of Government to maintain prices, to provide acreage allotments, to provide insurance, to provide a whole series of Government interventions in the economy.

The Senator from Kansas has just said that this is only a $10.8 billion bill. We read in this morning's paper that there will be no more revenue sharing for the towns and cities of America. But, to prevent the social change that might take place if the free market in agriculture were allowed to continue, we must spend $10.8 billion.

I do not expect anyone to change his vote. I do not speak in any anger or hostility. But the Members, especially on the other side of the aisle, must surely recognize the inconsistency of a position that says: Use tax money to prevent or bring about social change in one sector of the economy, in one region of the Nation, but not others. Now, either we are all one country or we are going to be badly divided.

Is it not the case that those who stand up and vote for this legislation, as they will do, are voting to use the powers of the Federal Government to intervene in the economy in the eyes of a desirable purpose as judged by them? If that is so, then surely they ought not to deny the legitimacy of that idea.

They can dispute the particulars of a particular proposal, but let us, for the remainder of the year, not too much hear about the dread phenomenon of Government intervention in the economy, of Government concerned with the jobs of people who do not own farms, of Government concerned with the welfare of people who have no crops, much less no crop insurance, and of Government concerned with sources of production other than in the soil.

There is a principle at stake which we are asserting in this legislation, the principle that Government has a legitimate role in this society. If peanuts matter, people matter. If cotton must be grown, so must children. And if rice has to be protected, so, as the Chinese say, the rice bowl.

I must ask for a moment's reflection as you rise to vote for the intervention of the Government in your economy, that you are agreeing with a principle which can be abused and which can be applied in adequate or wrong ways but which is not, per se, a principle alien to the deliberations, much less the actions, of this body.

I thank the Chair for his courteous attention.

The PRESIDING OFFICER (Mr. ABDNOR). The Senator from Arkansas.

Mr. PRYOR. Mr. President, just for one or two moments I would like to make an observation or two about the so-called Dole amendment offered by the distinguished Senator from Kansas.

The distinguished Senator is right. This amendment does not affect peanuts, it does not affect tobacco, it does not affect corn, and it does not affect, to a very large degree, wheat.

But, if I may—and you may think this is a parochial interest and you better believe it is a parochial interest—it does affect rice.

As I mentioned a few moments ago on this floor, there are five States that produce rice. Our State, fortunately, is that State that produces enough rice to lead the other four States in rice production. In fact, our State—the State of Arkansas—produces enough rice to satisfy the needs and the consumption of the U.S. population demand.

But, Mr. President, the Dole amendment, very simply, does this: It takes the savings that the U.S. Department of Agriculture wants to obtain in this legislation and it does not take it anywhere else, with the exception of one crop—rice. I know we may be somewhat defenseless, five little States sitting out here, the States of Arkansas, Louisiana, Mississippi, California, and Texas. There are only 10 of us represented in this body that can speak for those five rice-producing States.

But, Mr. President, rice is a unique crop from any other crop that we have voted on or against during this week of discussion on the agriculture bill. Rice, yes, has a loan rate; rice has a target price. But rice must be grown under the most opportune circumstances, Mr. President. And those opportune circumstances to create the production of rice must be had and had only under circumstances that necessitate a tremendous, absolutely tremendous expenditure of money for the rice farmers of those five States.

The rice crop today is already depressed. And here we are, out of a projected savings from the amendment offered by the distinguished Senator from Kansas, a projected savings of some $360 million—I hope my colleagues will listen to this—of that $360 million, $272 million is going to come from where? You guessed it—out of rice. And it is coming out of rice because our numbers are so few.

I would just like to say to my colleagues in the Senate that I have attempted, during these 27 markup sessions in the Committee on Agriculture. to work with every other Senator with every regard and every bit of sensitivity that I can for those crops and those concerns that you have.

I am asking, and I am asking humbly, the Members of the Senate this afternoon to consider what we are about to do to one crop which has meant not only so much to this country, but also to our export markets throughout the free world.

Mr. President, I urge defeat of the Dole amendment because I think it is singling out one particular crop and I am very proud about the fact that my good friend from Kansas has chosen this particular crop to single out. I certainly support the colleagues we have today voting on this measure, who recognize what this amendment is, what it is all about, and the results that will grow from it.

I yield back the remainder of my time.

Mr. EXON addressed the Chair.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. EXON. Mr. President, I am sure that my colleagues are weary of having the Senator from Nebraska on the floor, but I am going to be standing here harassing every time something like this comes up because I think I have a duty and a responsiiblity to do so.

In the first place, I doubt if there are five Senators in this body who know what the amendment by the Senator from Kansas is all about.

If I could have his attention, or someone else's attention who purports to know something about what he is trying to do, I would like to set it on the record so that we know what is happening.

Obviously, my friend and colleague from Arkansas is somewhat misinformed because other things than rice are affected by this bill. I suspect that wheat and corn are affected by this bill.

But since we did not hear the amendment read, and since there were evidently a very few who got together and heard what this is all about, let us set it out so that the Members of the body when they vote after a while at least know what they are voting on.

Is there someone on the majority side who could answer some questions that I have about the amendment offered by the distinguished Senator from Kansas?

Mr. JEPSEN. Mr. President, I would be pleased to respond.

Mr. EXON. I will yield for an answer. May I pose the question?

Mr. JEPSEN. Please.

Mr. EXON. I would inquire first, what commodities are affected by the Dole amendment?

Mr. JEPSEN. Wheat, corn, cotton, and rice.

Mr. EXON. Wheat, corn, cotton, and rice.

And if I understood the Senator from Kansas correctly, he said that his amendment was designed to save some $360 million.

Mr. JEPSEN. That is correct, $72 million a year.

Mr. EXON. Now let us go down on at least two of these commodities. Let us take wheat, for example, and try and find out where we are. If I understand this right, and please correct me if I am wrong because I am not sure that I fully understand it, the target price for wheat that came out of the Agriculture Committee for the year 1982 was set, was it not, at $4.20?

Mr. JEPSEN. $4.10.

Mr. EXON. I will rephrase my question once again so it will be understood. After the Agriculture Committee went through all of their hearings, all of their markups, and before we adjourned for the recess, they reported out what was called the bill from the Senate Agriculture Committee to the Senate floor. In that bill, and please correct me if I am wrong, I believe that the target price for wheat was set for 1982—and I am talking about 1982—at $4.20. Is that not correct?

Mr. JEPSEN. The Senator is correct.

Mr. EXON. After we returned from the recess and after the administration recognized that their economic recovery program was built on a house of sand, they started looking around for additional savings, and, of course, they looked to agriculture, where they always look. After a meeting on Wednesday, Thursday, and Friday of last week, as I understand it, or some Wednesday, Thursday, and Friday, the first 3 days that we were back from recess, there was a "compromise" bill that was reported out by a minority of the Agriculture Committee, as I understand it, which reduced that wheat figure from $4.20 by 10 cents, to $4.10. Is that correct?

Mr. JEPSEN. That is correct. Except it was by a majority, not a minority.

Mr. EXON. A bare majority.

Then, as I understand it, this Dole amendment, contrary to what has been said on the floor, reduces the per-bushel price for targets an additional 10 cents so that if the Dole amendment is accepted which would be down to a target price of $4. Is that correct?

Mr. JEPSEN. That is correct.

Mr. EXON. Likewise, when we look at the loan rates for wheat, we find that at the present time the loan rate that originally came out of the committee before the recess was $3.50 a bushel. Is that correct?

Mr. JEPSEN. That is correct.

Mr. EXON. And the Dole amendment on wheat makes no change in the loan rate for wheat?

Mr. JEPSEN. That is correct.

Mr. EXON. So, at the present time, we are at a loan rate of $3.50, which was the original position of the committee. Is that correct?

Mr. JEPSEN. That is correct.

Mr. EXON. Now let us turn to corn. Corn, as it came out of the committee originally before the recess was set at a target price of $2.80. Is that correct?

Mr. JEPSEN. That is correct.

Mr. EXON. And after the magic compromise was reached, it was reduced a nickel and it came to the floor in the final form at $2.75.

Mr. JEPSEN. That is correct.

Mr. EXON. And the Dole amendment, as I understand it, does not reduce that target price further. So if the Dole amendment is accepted, we would be at $2.75 on corn.

Mr. JEPSEN. That is not correct. $2.70.

Mr. EXON. He is taking out 5 cents?

Mr. JEPSEN. That is correct.

Mr. EXON. I thank my friend from Iowa. The information I had received is wrong.

So the net effect, then, is that the $2.80 on corn that originally came out of committee before the recess, with the 5 cents reduction in the "compromise," and the additional 5 cent compromise suggested in this Dole amendment for a total of 10 cents, would reduce the corn target price to $2.70. Is that correct?

Mr. JEPSEN. That is correct.

Mr. EXON. Now let us go to the loan rate on corn.

Mr. JEPSEN. To save time——

Mr. EXON. I would rather not save time. I would rather go right down the line so there is no misunderstanding.

Mr. JEPSEN. I am glad you do.

Mr. EXON. The loan rate on corn as set in the original committee action and by the "compromise," magic or otherwise, would indeed be reduced by 10 cents if the amendment by the Senator from Kansas is accepted. Therefore, if it is accepted, we would have a loan rate on corn of $2.50. Is that correct?

Mr. JEPSEN. That is correct.

Mr. EXON. I thank my friend from Iowa. I think that I understand basically what is trying to be done here now. Of course, I staunchly oppose it and I hope we can prevent the further emasculation of the agriculture program.

Mr. President, what this would do is make it more difficult for the family farmers of America, who, at this very time, are suffering the highest sustained interest rates in their history. They are seeing one of the most dramatic plunges in commodity prices in their history. Yet, we propose here to make a second weakening of the already weak bill that came out of the Senate Committee on Agriculture before the recess. I think it is a mistake and I think we should oppose it.

Mr. President, I am a little weary and think it is somewhat cowardice on our part not to take the action that the Senator from Nebraska or the Senator from Iowa or anyone else thinks is necessary on the subject because it may be vetoed downtown. I suggest to all that there is a certain separation of powers which is fundamental under our system of government. It is our job to pass legislation by majority vote that we can agree on. I cannot believe that, as the Senator from Kansas has indicated, if we do not go along with this cut and save an estimated $360 more, the President of the United States is going to say, "I don't care what you think down on the Hill, I am going to veto this bill." I think that is a coward's way out and I do not think that that excuse should be used in supporting the Dole amendment.

I think that by a majority vote, we should send down to the White House what we, in our collective wisdom or otherwise, think is proper and let the President of the United States do what he thinks is proper in his judgment. That is the way it should work.

Mr. President, I heard the Senator from Kansas talk about the fact that this is a $10.8 billion bill. I suspect that there are some who immediately became concerned that that was the cost of this bill for the next fiscal year. Just to make the record clear, that total $10.8 billion cost that my friend from Kansas referred to is the 4-year overall cost of this bill, which amounts to something in the neighborhood of between $2.5 billion and $3 billion per year.

I agree with the statements that have been made by my colleague from Arkansas that rice should not be picked out and penalized. But all through the considerations on this bill, we have seen certain commodities shunted aside, those commodities that were not in a position to have Members of the House of Representatives to wheel and deal with the President on his success in getting passed in the House of Representatives the budget and the tax cut bill. I think we shall rule the day, Mr. President, that we have seen the wheeling and dealing by the President of the United States with individual Members of the House of Representatives, essentially from the Sun Belt areas of this country.

Wheeling and dealing with him on getting the budget and tax bills passed—we have seen that carried over into the consideration of the agriculture bill that is before us. I suspect that that has not been done before. I hope it will never happen again.

Once again, I decry the fact that the original coalition, which stood firmly together to try to get an acceptable agriculture bill passed, has totally broken down and been fractured, essentially—by accident or by design—by the actions of the administration. We all know that the Secretary of Agriculture has been hovering around the U.S. Senate almost like the 101st Member of this body in an adjacent wing, making arrangements—"arrangements," I said and that is a high-class word for it—to get what the administration wants out of this bill.

I am saying that I certainly am not satisfied with the bill that came out of the Senate Committee on Agriculture. But, Mr. President, many of my colleagues and I were prepared to accept that, as bad as it was, because we knew that the farmers of the United States were prepared to make their part of the sacrifice to help balance the family budget.

I think it is crying crocodile tears, indeed, to hear statements on this floor that if we will go along with this $360 million cut, somehow, magically, we are going to be able to reduce the interest rates for the farmer. At least there are some people on this floor who are finally becoming concerned about interest rates. They were not concerned when we passed the tax and budget bills. They were only concerned after they came back from the August recess and had heard from the people back home. They began to wake up to the folly of their ways.

Mr. President, I suggest that, regardless of what we do with the Dole amendment, the $360 million saving here is not going to make one whit of difference on the interest rates that are now killing the farmers and the small businessmen of this Nation.

I hope that we will vote down the amendment offered by the Senator from Kansas. I think that he would agree that it is the White House's amendment. I have supported the White House on many occasions. I do not support them in this instance. I hope that a sufficient number of my colleagues will agree with me.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. ZORINSKY addressed the Chair.

Mr. DOLE. Mr. President, I still have the floor. I shall take just 1 minute.

Can I assume the Senator from Nebraska is for the bill in its original state?

Mr. EXON. The Senator is asking a question. I think it would be unfair to say that the Senator from Nebraska is for the bill in its original state. I shall clarify it once again.

Mr. DOLE. Without my amendment, he is going to vote for it, is that it?

Mr. EXON. Without the Senator's amendment, I shall make a consideration of whether I shall vote for it or not. There are some other amendments coming up. I suspect that the Senator from Kansas would like to get me on record now. I am not ready to go on record.

Mr. DOLE. Mr. President, I think we can put the Senator down as undecided. then.

That is the point. He is not for the bill whether my amendment is adopted or not. I think that is the point the rest of us have to consider. Some of us want a farm bill. This Senator wants a farm bill.

The Senator has been Governor of the great State of Nebraska and he has had sometimes to talk to the State legislature, even though they have a strange system in Nebraska—not strange, but different. They have a unicameral system in Nebraska and sometimes the Governor has to lean on the legislature, just as some Presidents have to lean on us in

Congress. So I am certain the Senator, as former Governor, is aware that those things do happen.

Mr. President, we have a real problem. I went home to Kansas and I talked to the farmers. They were saying we have to cut programs. They did not say exempt agriculture. We have to cut programs. We have $360 million today, $360 million tomorrow, $360 million for the next program. In a week, that is what? Over $2 billion. It adds up pretty fast. If this were the only bill that is going to exceed the budget, I think the administration would say that is fine. But this is not the only bill that is going to exceed the budget. We have already exceeded the budget with the HUD appropriations and I assume it is going to be vetoed.

Mr. President, we talk about farmers, what we are going to do for the farmers. Let us get off their backs. Let us lower the interest rate, let us stop inflation. Here we can make one little start. Let them make a contribution to the recovery of the economy in this country.

I bet if we took a poll among American farmers now, in my State or the Senator's State or any other State, we would find they are not quarreling that they are going to lose $72 million in a wheat program over 4 years or $270 million-some in a rice program in 4 or 5 years. They want us to stop spending. They are willing to make a contribution—not a sacrifice, a contribution.

Mr. President, I think the choice is rather clear. Call it a White House amendment—I went back to the RECORD of April 28 and found that that was the amendment offered in the Committee on Agriculture on wheat on April 28—$4 target price. That is what I am suggesting today, several months later—$4, $4.20, $4.40, and $4.60.

The Senator suggests that that is not much of a difference over the period of several months. No one knows what the economy is going to do. No one knows whether we can artificially prop up farm prices enough to help our farmers out of the great difficulty they are having now.

Again I urge those whose programs have been taken care of—the sugar producers, the peanut producers—you are home free now, if we can adopt this amendment.

We are going to have a farm bill. If we want to do it all over in a couple of months, we can do it.

I have the greatest respect for the Senator from Nebraska, and I do not underestimate his knowledge of agriculture one bit. But I suggest and I pledge to the Senator from Nebraska that this Senator will be a conferee and is going to stick to the Senate position. He will find that in every case I have stuck with the coalition, except this one, when we are discussing commodities that affect this Senator, with the exception of rice.

Mr. President, I am prepared to vote on this amendment. I believe it is the last major amendment. We can still finish this bill by 6 o'clock tonight, and I know that is the wish of most Senators.

Again I say to my consumer-oriented colleagues that this is $360 million less. To those who are concerned about a farm bill, I say that we are going to have a farm bill if we can adopt this amendment. It is going to be a good farm bill.

I do not see many people fussing too much about the farm bill, except perhaps the dairy producers, and they have had a pretty good program for a long time. We have been shelling out about $2 billion a year for dairy. That is a lot of money.

The cost of this program is $10.8 billion over that period, but it would be well to point out that the cost in 1982 is about $4 billion. It is a fairly expensive program which protects farm income. It is necessary. We should adopt it, and we should do it today.

Mr. MELCHER. Mr. President, will the Senator yield for a question?

Mr. DOLE. I yield.

Mr. MELCHER. Is the $10.8 billion that the Senator has mentioned over the life of the bill? Is that correct?

Mr. DOLE. I beg the Senator's pardon.

Mr. MELCHER. Is the $10.8 billion that the Senator has mentioned the cost of the bill over the life of the bill?

Mr. DOLE. Yes. The Senator is correct, and the Senator from Nebraska was correct when he made that statement.

Mr. MELCHER. Can the Senator from Kansas advise us how much of that cost is outlay in loans which will be recovered normally?

Mr. DOLE. I can try to obtain that for the Senator, if he will give me a few minutes.

Mr. MELCHER. I would thank the Senator if he would do that.

Mr. DOLE. When we look at that cost figure, they do not take into account possible deficiency payments in some of those outyears, and that figure could be very small if deficiency payments are necessary.

This year, for example, in wheat areas, because of low prices, because of the embargo imposed in January of 1980, deficiency payments are going to be made. So this is possibly a very conservative estimate, the $10.8 billion.

Mr. ZORINSKY. Mr. President, I take the floor to associate myself with the comments made by the junior Senator from Nebraska. JIM EXON probably knows as much, if not more, about agriculture as does anyone else in this Chamber at present.

I have lived in Nebraska all my life. I know farmers very well, even though I come from a large community.

People are people, and the needs and wants of people throughout this Nation are very similar. One of the needs and wants is the adequate production of food at an affordable price.

It saddens me to hear the Senator from Kansas threaten this body with a veto on Pennsylvania Avenue, as if he already has been informed that there will be one. But when he refers to a HUD bill, he says he assumes that that bill will be vetoed. Evidently, he has more knowledge about the veto of the agriculture bill than any other; and if he does, that is a sad commentary upon the manner in which we base decisions in this body.

I have talked to farmers starting at 8 o'clock this morning—our phones have been ringing off the hooks in our office—and they are very disturbed. In fact, many of them are irate.

They do not like to be blackmailed. They do not like to be told that they cannot do this or that because if this happens, it is going to be vetoed. They accept vetoes, but they want to see the veto happend from the people who are in a position to make the veto happen, not from spokesmen in this body who do not have the legislative authority or capability to make those vetoes. There is only one individual, the Chief Executive of our Nation, according to our Constitution, who has the ability to create that veto.

So for anybody to stand in this body and intimidate or threaten—this is what the farmers are concerned about. They are not worried about taking their lumps or being treated equitably in the cutting of their budget. But Americans do not like blackmail, and they do not like to be threatened, and that is tantamount to what is happening in this body today—that if this does not happen, there is going to be a veto. Fine. That is the American way. But let the individual who has the capability and the capacity to issue that veto make that veto, not spokesmen or surrogates on his behalf.

There is a rumor around here right now that if this bill is passed, there will be a quid pro quo, possibly, for the reserve being opened for the farmers of America. Great. That should have happened with or without this bill. That should be predicated upon the economy of the Nation and how it affects people in agriculture.

There are many Senators in this Chamber today who will vote as though they do not eat food, but I say to Senators that this is a black Friday, if this bill is passed—not that $360 million will make or break America. I have seen billions fall through cracks between the desks in this Chamber at many opportunities. But I say that at a time when agriculture, which is the backbone industry of America, is in trouble, as are many businesses, they want to take their lumps along with anybody else. They just took their lumps from a prior administration, with a grain embargo; and even that valve has been opened, it does not mean that the economy corresponds with the resumption of the shipment of grain to other nations.

So I ask my colleagues to consider very seriously what they do to people and that they not say that agriculture is a big budget. It is a big budget, but nobody says how much of it is food stamps. That is a nonrecoverable item. That is a dollar of outlay which will not come back. Loan support prices do come back, and that is also a large percentage and portion of our budget.

Mr. JEPSEN. Mr. President, will the Senator from Nebraska yield?

Mr. ZORINSKY. I yield.

Mr. JEPSEN. The grain reserve program that the Senator alluded to about possibly being opened—I point out to the Senator that the grain reserve program for wheat was opened up and does exist. It was opened in a timely fashion

prior to our going home during the recess, and I believe that certainly is indicative of the sensitivity that this administration and the Department of Agriculture have for the people about whom the Senator from Nebraska is most concerned. It is my understanding—the reports are—that they were very appreciative of that, and it has been very helpful.

So, to make it clear for the Record, with respect to the allusion or the innuendo that this administration was insensitive to the people about whom the Senator from Nebraska is concerned most, the wheat farmers, I point out that is the only grain reserve program that is open.

Mr. ZORINSKY. Mr. President, I acknowledge the statement of the Senator from Iowa. I do not mean to imply that the administration has not been sensitive to agriculture.

However, my comments today are intended to illustrate that agriculture has taken more than its fair share of cuts in the budget.

If Senator DOLE would like to get me on record as to whether I would support the agriculture bill, I certainly will go on record. I will support the bill we had, through the democratic process—Senator JEPSEN, Senator DOLE, Senator HELMS, and all of us who serve on the Senate Agriculture Committee—before we went home in August, a bill that took us 5½ months to evolve.

Farmers spent a great deal of their personal money to come to Washington to testify at hearings.

We had their input. Many of us on the committee had hearings back home in our home States. We received the input. Through the democratic process, we voted. We evolved this farm bill. We left on the August recess thinking we had a bill, one which the White House would support because it was within their budgetary allotments. Then we come back from the August recess and find that we need $18 billion in additional budget cuts. That was not the farmers' fault. That was the fault of these geniuses that came out of college and are given bureaucratic jobs, estimate interest rates for a year hence and find out they are wrong during the recess and that the budget needs to be cut additionally in order to support the original $42 billion deficit in our budget for next year.

So I will go along with our Senate bill that came out, and Senator ANDREWS from North Dakota was there. Some items we agreed on; some we did not. But a bill did come out of that Agriculture Committee, and certainly many of us think it is inadequate, but I go on record as supporting that as the least amount of support that we could give to agriculture.

Does the Senator from North Dakota wish to have the floor?

Mr. ANDREWS. Mr. President, I appreciate the Senator's yielding to me.

Mr. ZORINSKY. I yield.

Mr. ANDREWS. Mr. President, as to some of the debate that has just occurred I think it is important to point out that as far as this Senator is concerned, my support for the Dole compromise is not based on yielding to a blackmail threat from the White House. And my minimum high regard for Mr. Dave Stockman would indicate that I am not sure that his figures are always accurate either.

I pointed out a little earlier that this 2½ percent cut in wheat, feedgrains, cotton, and rice—yes, it is about 2½ percent across the board—is in fact a pretty reasonable insurance policy for us to pay not to get necessarily White House support, although I understand we will get that White House support. I am sure as a member of the Budget Committee, Senator EXON, the senior Senator from Nebraska, is a member of the Budget Committee as well, and I am sure he remembers the figure that we put out of that Budget Committee. This is not a White House figure. This is the Senate of the United States passing it out and we all voted on it. Some of us voted for it and some voted against it. The majority of us voted for that budget figure.

Mr. EXON. Mr. President, will the Senator yield?

Mr. ANDREWS. I am glad to yield.

Mr. EXON. I voted against it.

Mr. ANDREWS. As I am looking at it now, I think the Senator from Nebraska may have had a little more good judgment than the rest of us.

Mr. EXON. I have on this bill, and I hope Senators will listen.

Mr. ANDREWS. The point is that we were the ones who created this budget figure. The budget figure that I wish to share with my colleagues for the next year adopted by the Senate is $2.135 billion.

Nothing happened at the White House in the interim while we were at home. What happened is that the Sun shone on the cornfields in Iowa, and it even made the wheat fields in North Dakota yield to the point where we outyielded Kansas. North Dakota this year is the biggest wheat-producing State in this Nation. We are proud of it.

But it altered the figures of input and as a result of that altered figures of input, we come up with a cost figure of the package that we originally passed of $2.234 billion average per year.

By adopting the 2½-percent cut proposed by the Dole amendment, we come up with a $2.162 billion average, which is just a whale of a lot closer to the $2.135 billion figure, and that is why we have an insurance policy that it might move through as a completed package.

Again let me say that it is not blackmail from down the street so much as complying with our own budget package that some of us voted for, and I urge my colleagues to support this insurance policy so we can in fact have a farm bill this year that complies with our budget restraints and with that enjoy the support of the White House.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DIXON. Mr. President, I wish to make this final point when we talk about facts.

When we were in committee on the last three markups that constituted a total of 27 markups on this bill, the administration, my dear friend, the Secretary of Agriculture, who is a fine man, and others, came in and talked about cutting target prices and, of course, that is some of the difference of opinion here, and then they talked about the loan rate.

I point out to Senators that in the amendment by my distinguished friend, the Senator from Kansas, the loan rate on wheat remains at $3.50 a bushel as it was in the Senate bill. As it was in our modified bill, so it is in the administration bill.

However, for corn—now listen to this—for corn in our Senate bill it was $2.60 a bushel. The administration suggested $2.50. We modified it in committee and kept it at $2.60 and Senators know why.

I hold here in my hand the administration's own figures from the Department of Agriculture. Do Senators know how much it costs under our bill, the modified Senate agriculture bill, for $2.60 rate for corn? $1.719 billion for 5 years. The administration's amendment costs $1.718? billion for 5 years.

Do Senators know what it saves under the amendment of the Senator from Kansas for corn for 4 years, the life of this bill, to drop it a dime a bushel? $800,000.

This administration is asking us for $200,000 a year to insult the corn farmers of the United States by dropping the loan rate a dime a bushel.

Imagine that. I can understand how they have accommodated my colleague in respect to the loan rate on wheat, and I have no objection to that. And I hear my colleague when he talks about the problems of our country, and I am concerned about that.

But have we come to the place where in the 4-year life of the bill we drop the loan rate on corn a dime a bushel for $200,000 a year? This is the administration's figures, not mine.

So I say this is an excellent and apt demonstration why the work product of the committee thoughtfully done over 8 months in 27 markups makes better sense.

I say to the Senate that I will be happy to return to my State to say that I voted against dropping the loan rate for corn a dime a bushel, for $200,000 a year for the next 4 years of my service in this Senate.

I think this is an outrageous act without any justification. I think a vote for this amendment contrary to what was done in the work product of the committee for 27 meetings, contrary to what was done at the entreaty of the administration, contrary to what was done at the entreaty of the Secretary of Agriculture is a final message to the farmers of our lack of care as we meet here in these final hours to write a farm bill that the administration will sign.

As we meet here in these final hours to write a farm bill that the administration will sign whether this amendment is adopted or not, I yield my expertise to the expertise of the Senator from Kansas who has served for many years here and who is a fine leader. I am a new man here. But I have been in Government

for 31 years and in politics that long, and I do not believe this administration will reject this bill if this amendment is rejected, and I hope we will support the motion to table.

The PRESIDING OFFICER. The question is on agreeing to——

Mr. BAUCUS. Mr. President, I have an amendment at the desk and I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment is not at the desk.

Mr. BAUCUS. I send an amendment to the desk.

Mr. COCHRAN. Mr. President, I make the point of order that the amendment would be in the third degree.

The PRESIDING OFFICER. The pending amendment is a first-degree amendment.

Mr. COCHRAN. I withdraw my point of order.

The PRESIDING OFFICER. The amendment the Senator sent to the desk is an amendment to the bill not to the amendment that is pending, so it would not be in order.

Mr. BAUCUS. Parliamentary inquiry, Mr. President—I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAUCUS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 396

(Purpose: To increase the loan level for wheat for the 1982 crop of wheat)

Mr. BAUCUS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Montana (Mr. BAUCUS) proposes an unprinted amendment numbered 396 to the Dole unprinted Amendment 395:

On page 138, line 13, strike out "$3.50" and insert in lieu thereof "$3.60".

Mr. BAUCUS. Mr. President, the debate on wheat price support levels has centered on target prices to this point. At the very heart of the farm bill this time around, is the concern over the budget, and impacts on Government spending. While I share this concern over our budget deficit, I am also concerned about our Nation's most vital sector shouldering more than its share of the burden.

The amendment I am offering will actually decrease the budget exposure of the wheat support program. Minimizing risks as they call it in business circles.

My amendment would raise the loan rate for wheat to $3.60 per bushel from the current level of $3.50. This is still only a little over 50 percent of parity, when our wheat growers need 75 percent of parity—minimum.

The cost of Government loans to farmers for wheat are negligible. In fact, in fiscal year 1979, $367 million worth of new loans were made under the program, while $867 million were received by the Government in repayment. I ask unanimous consent that the table containing these figures from the USDA's Agricultural Statistics of 1980 be inserted in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE 709.—COMMODITY CREDIT CORPORATION: LOAN TRANSACTIONS FOR FISCAL YEAR 1979, BY COMMODITIES[1]

[Dollar amounts in thousands, quantity in thousands of units]

| Commodity | Unit | Loans outstanding Oct. 1, 1978[2] | New loans made | Repayments | Collateral acquired in settlement | Loan written off[3] | Loan outstanding Sept. 30, 1979 | |
|---|---|---|---|---|---|---|---|---|
| | | | | | | | Value[2] | Quantity collateral remaining pledge |
| Basic commodities: | | | | | | | | |
| Corn | Bushel | $1,280,363 | $1,379,535 | $1,192,990 | $161,988 | $4,251 | $1,300,670 | 665,61 |

[1] Loans made directly by Commodity Credit Corporation.
[2] Book value of outstanding loans; includes face amounts and any charges paid.
[3] Includes transfers to accounts receivable.

Source: Agricultural Stabilization and Conservation Service.

Mr. BAUCUS. Mr. President, with the interest rate now set by the Secretary at up to a percentage point above the cost to the Government, there will be absolutely no cost to the taxpayers of the country beyond administrative costs. There is no subsidy, merely the Government providing a capital market for farmers.

I would like to echo the sentiments of Senators MELCHER, ZORINSKY, and BOREN regarding the cost of the commodity price support loans:

The commodity price support loans are a recoverable cost. A distinction should be made between these loans, which will be repaid with interest, and other federal program outlays, which once extended never return to the Treasury. To continue to calculate the cost of these programs on the basis of low outlays in any given year, rather than the net cost of the loan program, vastly overestimates actual expenditures. If we continue this practice, then we can expect to continue to be forced to legislate farm programs which are far from the fair, well-reasoned programs our nation's producers deserve.

Mr. President, my amendment actually reduces the risk of the Government facing target payments, which are direct expenditures.

The loan rate sets a floor beneath the market price of wheat. By raising this floor, the market price will be closer to the target price, reducing the amount of potential deficiency payments the Government must make.

Remember, this is a worst case scenario. I hope the market never falls below the target price as it is now. And I

certainly hope farmers will never need to take out a loan on a crop because of poor market prices.

If Secretary Block is doing his job and follows through with his promise to develop our export markets, we will never need to worry about the market price falling below target.

There can be no argument against my amendment based on cost to the Government. The only possible objection to be raised is the free market, philosophical question. Since we are dealing with the farm bill, I call that argument hog wash.

There is no free international market today for grain. I ask unanimous consent that the table I have showing the ranking of producer prices by country for wheat be entered in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

RANKING OF PRODUCER PRICES FOR WHEAT, OCTOBER 1980

[U.S. dollars per metric ton]

| Rank | Country | 1980 producer price | 1979 producer price | Precent increase 1979–80 |
|---|---|---|---|---|
| 1 | Japan | 830 | 725 | 14.5 |
| 2 | Switzerland | 576 | 613 | —.6 |
| 3 | Nigeria | 407 | 343 | 18.6 |
| 4 | Korea | 401 | 459 | —12.6 |
| 5 | Norway | 396 | 352 | 12.5 |
| 6 | Finland | 394 | 291 | 3.9 |
| 7 | Morroco | 329 | 269 | 22.3 |
| 8 | South Africa | 293 | 234 | 25.2 |
| 9 | Ecuador | 291 | 220 | 32.2 |

| 42 | Canada | 130 | 107 | 21.4 |
| 43 | Romania | 83 | NA | 0 |

Prepared by the Colorado Department of Agriculture from USDA, FHS information.

Mr. BAUCUS. Mr. President, there are 43 countries on this table, the United States ranks 40th. Japanese producers receive over five times the price as that of U.S. farmers. This is because the Japanese and other foreign grain producers are heavily subsidized by their government. Is this the free market we want to throw our wheatgrowers into?

I can understand the administration wanting to move to a truly free market for farm commodities. But they are putting the cart before the horse. As soon as I see serious negotiations between all grain producing countries for multilateral agreements on grain marketing and prices, I will come to Congress and ask to abolish target prices and the loan program. Until then, we need to keep a floor under the marketplace to protect the American farmer and the American economy as a whole. Anything less is an abandonment of our Nation's farmers.

Again, my amendment presents no cost to the Government and has the potential to save money from our already beleaguered budget.

The cost of production for America's wheat farmers has gone up 15.4 percent this year and went up 15 to 19 percent last year. Yet under my amendment we are barely maintaining the price of wheat at 50 percent of parity. Farmers cannot be expected to continue in business under these circumstances. It is absolutely essential that we give them a reasonable floor under the market price for wheat. I ask that the Senate support my amendment and this minimal increase in the loan rate for wheat.

Mr. President, the discussion in the last hour or so has generally revolved around the Dole amendment and, to some degree, around the Lugar amendment to totally eliminate target prices. The immediate discussion has been around the Dole amendment.

I very strongly oppose the Dole amendment for the reasons many Senators, including my distinguished colleagues from Nebraska and Oklahoma, have articulated.

Basically, it is unfair and it is a slap at the farmers.

I think that despite the well-reasoned analysis and opposition to this bill that the other side of the aisle, in conjunction with the administration, may have the votes to pass the Dole amendment. For that reason we offer a very, very modest amendment to increase the loan rate on wheat from $3.50 to $3.60. This amendment, therefore, will help those Senators who know the Dole amendment is not good for agriculture to at least do something to help some segment of American agriculture at little cost to the taxpayer.

This amendment will raise the floor ever so slightly from $3.50 to $3.60 for wheat. It is not going to make that much difference in the costs, but it certainly will make some difference to wheat producers in America.

I reiterate, it does not cost the Government one thin dime, the amount this amendment will increase the loan rate. In fact, for wheat alone, the loan program has cost our counrty only $600,000 total over a 10-year period of time. These are largely administrative costs that will not increase with the 10-cent change in the program.

So I strongly suggest that here is the way for Senators to show that at least they have some sympathy for agriculture. Here is an opportunity to show at least they are going to help the farmers cover some of their increasing costs.

I need not remind Senators how much the costs to farmers have risen in past years. A 15-percent increased cost of production last year, 15- to 20-percent increase in the prior year, and yet we are standing here today by the Dole amendment, and telling farmers they have to get by with less.

I strongly suggest that you support this modest increase to help a very important segment of agriculture and our Nation's economy.

Mr. President, I ask unanimous consent that my senior colleague from Montana be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BOREN. Mr. President, will the Senator yield?

Mr. BAUCUS. I yield.

Mr. BOREN. Will the Senator from Montana be agreeable to adding me as a cosponsor?

Mr. BAUCUS. I would be delighted.

Mr. BOREN. I want to commend him for offering this amendment. I believe he is on the right track. This will help stabilize the price of wheat in our country and will do so without direct cost to the Government because, after all, the Government will have an asset of value for the loan that is rendered. The Senator has made a very constructive addition to this proposal, and I commend him for it.

Mr. BAUCUS. I thank the Senator from Oklahoma.

Mr. DOLE. Mr. President, I move to the table the amendment and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Kansas to lay on the table the amendment of the Senator from Montana. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Nevada (Mr. LAXALT), the Senator from Alaska (Mr. MURKOWSKI), the Senator from Vermont (Mr. STAFFORD), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from New Jersey (Mr. BRADLEY), the Senator from Arkansas (Mr. BUMPERS), the Senator from California (Mr. CRANSTON), the Senator from Connecticut (Mr. DODD), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Hawaii (Mr. INOUYE), the Senator from Florida (Mr. CHILES), the Senator from Maine (Mr. MITCHELL), and the Senator from Massachusetts (Mr. TSONGAS), are necessarily absent.

The PRESIDING OFFICER (Mr. DANFORTH). Are there any other Senators in the Chamber desiring to vote?

The vote was announced—yeas 59, nays 28, as follows:

[Rollcall Vote No. 269 Leg.]

YEAS—59

| | | |
|---|---|---|
| Armstrong | DeConcini | Heinz |
| Baker | Denton | Helms |
| Bentsen | Dixon | Jepsen |
| Biden | Dole | Johnston |
| Boschwitz | Domenici | Kasten |
| Byrd, Harry F., Jr. | Durenberger | Kennedy |
| Byrd, Robert C. | East | Long |
| Cannon | Garn | Lugar |
| Chafee | Goldwater | Mathias |
| Cochran | Grassley | Mattingly |
| Cohen | Hatch | McClure |
| D'Amato | Hatfield | Moynihan |
| Danforth | Hawkins | Nunn |
| | Hayakawa | Packwood |

| | | |
|---|---|---|
| Pell | Sarbanes | Symms |
| Percy | Schmitt | Thurmond |
| Proxmire | Simpson | Tower |
| Quayle | Specter | Wallop |
| Roth | Stennis | Warner |
| Rudman | Stevens | Williams |

NAYS—28

| | | |
|---|---|---|
| Abdnor | Hart | Metzenbaum |
| Andrews | Heflin | Nickles |
| Baucus | Huddleston | Pressler |
| Boren | Humphrey | Pryor |
| Burdick | Jackson | Randolph |
| Eagleton | Kassebaum | Riegle |
| Exon | Leahy | Sasser |
| Ford | Levin | Zorinsky |
| Glenn | Matsunaga | |
| Gorton | Melcher | |

NOT VOTING—13

| | | |
|---|---|---|
| Bradley | Hollings | Stafford |
| Bumpers | Inouye | Tsongas |
| Chiles | Laxalt | Weicker |
| Cranston | Mitchell | |
| Dodd | Murkowski | |

So the motion to lay on the table UP amendment No. 396 was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. JEPSEN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question recurs on agreeing to the amendment of the Senator from Kansas. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announced that the Senator from Pennsylvania (Mr. HEINZ), the Senator from Nevada (Mr. LAXALT), the Senator from Alaska (Mr. MURKOWSKI), the Senator from Vermont (Mr. STAFFORD), the Senator from Texas (Mr. TOWER), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

I further announce that, if present and voting, the Senator from Pennsylvania (Mr. HEINZ) and the Senator from Texas (Mr. TOWER) would each vote "yea."

Mr. ROBERT C. BYRD. I announce that the Senator from New Jersey (Mr. BRADLEY), the Senator from Arkansas (Mr. BUMPERS), the Senator from Florida (Mr. CHILES), the Senator from California (Mr. CRANSTON), the Senator from Connecticut (Mr. DODD), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Hawaii (Mr. INOUYE), the Senator from Maine (Mr. MITCHELL), and the Senator from Massachusetts (Mr. TSONGAS) are necessarily absent.

I further announce that, if present and voting, the Senator from Arkansas (Mr. BUMPERS) would vote "nay."

The PRESIDING OFFICER. Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 46, nays 39, as follows:

[Rollcall Vote No. 270 Leg.]

YEAS—46

| | | |
|---|---|---|
| Andrews | Danforth | Hayakawa |
| Armstrong | Denton | Helms |
| Baker | Dole | Humphrey |
| Biden | Domenici | Jepsen |
| Byrd, Harry F., Jr. | East | Long |
| | Garn | Lugar |
| Cannon | Goldwater | Mathias |
| Chafee | Gorton | Mattingly |
| Cochran | Hatch | McClure |
| Cohen | Hatfield | Moynihan |
| D'Amato | Hawkins | Packwood |
| Pell | Rudman | Symms |
| Percy | Schmitt | Thurmond |
| Proxmire | Simpson | Wallop |
| Quayle | Specter | Warner |
| Roth | Stevens | |

NAYS—39

| | | |
|---|---|---|
| Abdnor | Glenn | Melcher |
| Baucus | Grassley | Metzenbaum |
| Bentsen | Hart | Nickles |
| Boren | Heflin | Nunn |
| Boschwitz | Huddleston | Pressler |
| Burdick | Jackson | Pryor |
| Byrd, Robert C. | Johnston | Randolph |
| DeConcini | Kassebaum | Riegle |
| Dixon | Kasten | Sarbanes |
| Durenberger | Kennedy | Sasser |
| Eagleton | Leahy | Stennis |
| Exon | Levin | Williams |
| Ford | Matsunaga | Zorinsky |

NOT VOTING—15

| | | |
|---|---|---|
| Bradley | Heinz | Murkowski |
| Bumpers | Hollings | Stafford |
| Chiles | Inouye | Tower |
| Cranston | Laxalt | Tsongas |
| Dodd | Mitchell | Weicker |

So Mr. DOLE's amendment (UP No. 395) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HELMS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

SCHEDULE OF AMENDMENTS

Mr. BAKER. Mr. President, I continue to hope—and I believe—that we can finish this bill tonight, and I am prepared to ask the Senate to remain in session past 6 o'clock—until 6:30 or perhaps 7.

Let me recite the amendments I know of, and then we will see if other Senators wish to declare their intentions.

There is an Eagleton amendment dealing with tobacco. I understand that will be offered.

There is a Melcher amendment that may be accepted by the managers of the bill, I am told.

There is a Levin amendment. Does the distinguished Senator from Michigan intend to offer his amendment? I do not see the Senator in the Chamber. I have it on my list, with the notation that it may be offered and withdrawn after a colloquy.

Mr. LEVIN. Senator SIMPSON and I will offer this amendment and then withdraw it. We need only about 5 minutes.

Mr. HEFLIN. I may have an amendment to offer. It just goes to the title—to be called the Farm Bankruptcy Act of 1981. [Laughter.]

Mr. BAKER. I do not believe I will include that on the list.

There is an amendment to be offered by the Senator from Montana and the Senator from Idaho.

Mr. President, it is clear to me that if there are no other amendments beyond those, if we get on with the business at hand, we can do it promptly.

Mr. MOYNIHAN. I have an amendment which should not take more than a few minutes.

Mr. BAKER. Mr. President, I am about to put a unanimous-consent request, and I hope Senators will listen to this.

First, I urge all Members now to stay in the Chamber. If we are going to finish this bill tonight, we do not have time to engage in delay and wait for Members to come to debate. So I urge Members to stay in the Chamber.

Mr. President, I have never done this before. I ask unanimous consent that rollcall votes from this point forward be not more than 10 minutes in length.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. BAKER. Mr. President, the distinguished Senator from Oregon (Mr. PACKWOOD) is not in the Chamber, and I was not able to check with him on this subject. He is usually very concerned about it. I may ask the Senator to vacate that later. I hope he is within hearing of this announcement. I believe it is necessary to do that in order to finish this bill.

I yield the floor.

UP AMENDMENT NO. 397

(Purpose: To express the sense of the Congress with respect to the use of the taxing power of the government to regulate or control the agricultural economy)

Mr. MOYNIHAN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from New York (Mr. MOYNIHAN) proposes an unprinted amendment numbered 397.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 235, between lines 17 and 18, insert the following new section:

SENSE OF THE CONGRESS RELATING TO THE USE OF THE TAXING POWER TO REGULATE AGRICULTURE OR THE MARKET PLACE

SEC. 1112. It is the sense of the Congress that the taxing power of government should not be used to regulate the agricultural economy or bring about social change in farming through the use of tax monies to distort the natural working of the market place in agricultural products, or to provide subsidies, or for the creation of special privileges, or exclusive rights.

Mr. MOYNIHAN. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. MOYNIHAN. I thank the Chair.

Mr. President, I will be brief, if I am heard, and I hope I will be heard.

This is a simple amendment which declares it to be the sense of Congress that the taxing power of Government should not be used to regulate the agricultural economy or to bring about social change in farming through the use of tax moneys to distort the natural working of the marketplace in agricultural products, or to provide subsidies, or for the creation of special privileges, or exclusive rights.

Mr. President, I make this point with great seriousness. This is not a frivolous intervention. I hope it will not be taken as such.

At the outset of this Congress, we heard from our President, whom we love and

admire; we heard from spokesmen for the administration, for whom we have differing levels of attachment; and we have heard on this floor and throughout the Nation that fundamentally new principles of Government were now in place. Yet, it developed—or so it appears to me, and it might to others—that there was a very selective application of these new principles.

Early in this Congress, this Senate chose to abolish title IV of the Social Security Act, which provides an entitlement to assistance in maintenance of living for orphans in foster care, an occasion that evoked a most moving response from the senior Senator from West Virginia, who is in the Chamber today.

We have seen the proposition that food stamps were somehow an indulgence of the unworthy. We have seen education cut. We have seen it now proposed that social security payments will be postponed. We hear that revenue sharing will be abolished. We have learned that it is wrong ever to have done some of the things that have been part of the social compact of our country for a half century.

Yet, today, we are concluding an exercise of the most detailed intervention into the economy, the agricultural economy, of the practice that originated about the same half century ago, of the social security system, and for the same reason, to protect individuals from a market that was often so large and impersonal that they could not reasonably be expected to control all the misfortunes that come their way.

A generation of Americans that established insurance established feedgrain price supports. A generation of Americans that established social security for widows and children established acreage allotments for peanut farmers. A generation of Americans said we care about all Americans, and it seems to me that it would be wrong now to assert otherwise in this selective manner.

I only wish to draw the attention of my friends in the Senate to the disparity in our behavior, and I hope it will not persist as it has done in the recent past.

Mr. BIDEN. Mr. President, will the Senator yield for a question?

Mr. MOYNIHAN. I am happy to yield.

Mr. BIDEN. Mr. President, if I understand the Senator's amendment, those of us who believe that use of the power of Government to intervene on behalf of people—farmers and nonfarmers alike—those of us who believe that the tax code is a means by which social change can be implemented, and those of us who believe that the President is dead wrong in his assertion to the contrary, I assume those of us who hold that view should vote against the Senator's amendment, and those who suggest that the President is in fact right should support the Senator's amendment.

Am I correct in that assertion?

Mr. MOYNIHAN. The Senator is discerning and precisely correct.

I shall vote against this amendment. I shall vote against the proposition that is contained in the address on February 18 that the taxing power of Government must not be used to regulate the economy or bring about social change.

Mr. BIDEN. I compliment the Senator on his amendment, and I compliment the Senator on, as they say in the southern part of my State, "flushing these good old boys out." I like to see us all get out there in the open and everyone say what they mean and mean what they say and vote what they think.

I hope we are going to get a chance to do this today because I am anxious to see how my friends who share that somewhat pernicious philosophy, in this Senator's opinion, of our President that somehow the Government need not be involved any longer, I am anxious to see that they stand up on the farm bill and let everyone know that they are equally as opposed to "subsidizing farmers," who I might add need the help, as they are opposed to subsidizing folks who do not have enough food to eat in the center cities, and do not have enough heat in their homes because of the price of oil, and do not have jobs because of the depressed economy, and a whole range of other things.

I compliment the Senator. As usual he is able to put these issues in perspective in a way better than most in this Chamber.

Mr. MOYNIHAN. I thank the Senator from Delaware.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. MOYNIHAN. I am happy to yield to the Senator from Arizona.

Mr. GOLDWATER. I am very interested in the Senator's comments, but I just wish to remind my friend that we have helped bail out New York City and we helped build a new highway around New York City, and I think people can eat some of that cement if we give it to them in food.

Mr. MOYNIHAN. I say to my beloved friend and chairman of the Committee on Intelligence that I propose to vote against this amendment simply to make the point that we are all Americans and they can help each other, and a person who loses a job in Detroit because of the price of oil set in the Gulf of Oman and the farmer wiped out by a dust storm or a world market over which he himself has no control are equally deserving of a measure of concern.

We can overdo and no doubt we have overdone at times, but there is a principle of Government serving people and recognizing the inevitability of choice in what we do is at issue here.

I very much acknowledge the support of the Senator from Arizona in so many measures. I hope I have reciprocated.

Mr. President, I speak no longer save to make one remark.

There are persons abroad in this city today who are to conservatives as anarchists are to liberals.

We have heard the most distinguished conservative in this age speak on that subject this week and with admiration we heard and read his remarks.

There is a place for conservatives. There is a place for liberals. But we unite in a belief in Government and concern at the seeming proposition that it has no place in our lives when in fact it is the single most precious of our human institutions.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. MOYNIHAN. I thank the Chair and my friend from Arizona for his comments.

Mr. STENNIS. Mr. President, if I may have the indulgence of the body for a minute to make a 1-minute statement on an extraneous matter, it is simply this:

I had understood that we would not legislate after 6 p.m. I have an important matter that I have to take care of. I understand that no other amendments will be proposed, unless there is one on tobacco. I simply wish to announce that I am having to leave under those circumstances but will stay until very near 6 p.m.

Mr. President, I will vote for the bill in its form on final passage and commend the committee for the great work they have done.

Mr. DOLE. Mr. President, the Senator from New York proposes an intriguing amendment. The difficulty is, the language of the amendment is so broad that it is hard to tell just what it means, or what impact it might have if adopted.

The Moynihan amendment purports to express the sense of Congress that power of the Government to tax should not be used "to regulate the agricultural economy or bring about social change in farming." The amendment further states the sense that we should not use tax moneys to "distort" agricultural markets or grant subsidies, special privileges, or exclusive rights.

Mr. President, it is not at all clear whether this amendment is aimed at the power to tax or the power to spend. The text speaks of the power to tax, but it really seems to be aimed at the purposes for which tax revenues might be used. If the amendment does purport to limit the taxing power, then there are several questions that ought to be answered before we consider it.

Does the Senator mean that no tax law should be adopted that has a particular impact on agriculture? If so, it would be difficult to continue the special valuation provisions for estate taxes that benefit farm property. It would be difficult to justify any kind of excise or other Federal tax aimed at agricultural commodities, including, for example, excise taxes on tobacco.

I am not sure those are the results intended by the Senator from New York. But I am not sure what his intention is, and I hope he will confide in us what he hopes to achieve with the amendment. The amendment itself certainly does not reveal its purpose. The investment tax credit for farm equipment certainly has an impact on agriculture: Does the Moynihan amendment purport to eliminate that credit? If we are going to fence off one sector of the economy from tax and budget policies applied elsewhere, we ought to understand why we are being asked to do so.

Mr. President, perhaps the essence of this amendment is more properly found in its attempt to avoid special privileges in farming. The use of tax moneys must refer to any Federal spending at all in the area of agriculture. Any Federal agricultural program, of course, involved Federal moneys, if only for administrative purposes. Are we to conclude that the Senator from New York believes we should have no farm programs or policy at all? If so, we should all go home. We would have no need for this legislation in the first place.

Every Government program arguably creates subsidies in the broadest sense of the word. That is why we should not use such careless language in trying to express the sense of Congress. The entire national defense program does, in a sense, subsidize defense-related industries. That is not a good argument for having no national defense. Similarly, when Federal moneys are used to support the school lunch program—which, to the best of my knowledge, still involves the provision of agricultural products—arguably there is a subsidy to agriculture. Does Senator MOYNIHAN want to call an absolute halt to the school lunch program? It seems that his resolution is aimed at that goal. If not, I am not sure what meaning the amendment has.

Mr. President, it is possible—just barely possible—that this amendment is designed to make a certain ironic point. The Senator from New York has been known to do that. The Senator may be suggesting that we should take a hands-off approach to the agricultural economy. And he may be further suggesting that that is appropriate because the President wants to free the economy from Government interference.

If so, the point is off the mark. The President has asked us to minimize Government intervention in the economy. But he knows, and we ought not to forget, that our job as legislators is to set policy for the Nation. That means we must recommend that the Government act in some areas, and that those actions will have an impact, economic and otherwise. No one is asking that the Government shut down. All we want to do is limit the Government to those actions it can do best, or most efficiently, or which only the Government can do for the Nation as a whole. The rest should be left to the private sector.

Mr. President, in short, we are here to make choices, and to try to strike the proper balance. If the Government has had too large a role in the past, that does not mean it should have no role at all. We were trying, with this legislation, to strike a balance in agricultural policy. This amendment, I fear, diverts us from that purpose. Rather than spend time on the Moynihan amendment, we ought to get back to the legislation at hand. That amendment purports to express the sense of Congress, but it really makes no sense at all.

UP AMENDMENT NO. 397 (MODIFIED)

Mr. MOYNIHAN. Mr. President, if the majority leader will indulge me one moment, I wish to send an amendment to the desk for the simple purpose of clarification and do so.

Mr. HUDDLESTON. If the Senator clarifies that one, I wish to hear it.

Mr. MOYNIHAN. Mr. President, perhaps the clerk will have a chance to read it. It is a one sentence amendment. I so modify the amendment.

The PRESIDING OFFICER. Without objection, the amendment is modified.

The amendment will be stated.

Mr. BAKER. Mr. President, the clerk has not stated the modification.

Mr. HUDDLESTON. Will the clerk state the modification, please?

The PRESIDING OFFICER. The modification will be stated.

The legislative clerk read as follows:

On page 235, between lines 17 and 18, insert the following new section:

Section 1112:

It is the sense of the Congress that the taxing power of government should not be used to regulate the agricultural economy or bring about social change in farming.

ORDER FOR TIME LIMITATION ON VOTES

Mr. BAKER. Mr. President, after consultation with the minority leader and other Senators, I modify my previous unanimous-consent request so that the vote which is about to occur will be 15 minutes in length and each succeeding vote then will be 10 minutes with the exception of final passage which will be 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 397 (MODIFIED)

The question is on agreeing to the amendment, as modified, of the Senator from New York.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. ARMSTRONG (when his name was called). Present.

Mr. HARRY F. BYRD, JR. (when his name was called). Present.

Mr. DENTON (when his name was called). Present.

Mr. EXON (when his name was called). Present.

Mr. NICKLES (when his name was called). Present.

Mr. RIEGLE (when his name was called). Present.

Mr. STEVENS. I announce that the Senator from New York (Mr. D'AMATO), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Kansas (Mrs. KASSEBAUM), the Senator from Nevada (Mr. LAXALT), the Senator from Alaska (Mr. MURKOWSKI), the Senator from Vermont (Mr. STAFFORD), the Senator from Texas (Mr. TOWER), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

On this vote, the Senator from New York (Mr. D'AMATO) is paired with the Senator from Texas (Mr. TOWER).

If present and voting, the Senator from New York would vote "yea" and the Senator from Texas would vote "nay."

Mr. ROBERT C. BYRD. I announce that the Senator from New Jersey (Mr. BRADLEY), the Senator from Arkansas (Mr. BUMPERS), the Senator from Florida (Mr. CHILES), the Senator from California (Mr. CRANSTON), the Senator from Connecticut (Mr. DODD), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Hawaii (Mr. INOUYE), the Senator from Maine (Mr. MITCHELL), the Senator from Massachusetts (Mr. TSONGAS), and the Senator from Louisiana (Mr. JOHNSTON) are necessarily absent.

The PRESIDING OFFICER (Mr. GORTON). Are there any Senators in the Chamber desiring to vote who have not voted?

The result was announced—yeas 22, nays 54, as follows:

[Rollcall Vote No. 271 Leg.]

YEAS—22

| | | |
|---|---|---|
| Baucus | Heflin | Percy |

| Dodd | Laxalt | Weicker |

So Mr. MOYNIHAN's amendment (UP No. 397, as modified), was rejected.

Mr. MOYNIHAN. I move to reconsider the vote by which the amendment was rejected.

Mr. HELMS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Missouri.

UP AMENDMENT NO. 398

(Purpose: To authorize adjustments in the price support levels for different kinds of tobacco in order to make such kinds more competitive in the world markets)

Mr. EAGLETON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from Missouri (Mr. EAGLETON) proposes an unprinted amendment numbered 398.

Mr. EAGLETON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill insert the following:

AUTHORITY OF SECRETARY OF AGRICULTURE TO ESTABLISH MINIMUM PRICE SUPPORT ON CERTAIN KINDS OF TOBACCO

SEC. 1112. The Agricultural Act of 1949 is amended by adding after section 106 the following new section:

"SEC. 106A. (a) Notwithstanding any other provision of law, whenever the Secretary determines that a kind of tobacco or a grade of such kind of tobacco for which marketing quotas are in effect or have not been disapproved by producers will be in excess domestic supply or will be noncompetitive in the world market, the Secretary may establish the price support level for such kind of tobacco at such level as the Secretary determines will encourage the exportation of such kind or grades of such kind of tobacco and not encourage excessive domestic supplies except that the Secretary may not establish an average price support level under this section for any crop of any kind of tobacco below 75 percent of the price support level established for the 1982 crop of such kind of tobacco.

(b) Provisions of subsection (a) of this section shall be effective with respect to tobacco crop years 1983, 1984, and 1985."

Mr. EAGLETON. Mr. President, this is, to use the nomenclature, a tobacco amendment.

Mr. GLENN. Mr. President, may we have order so we may hear the Senator's comments?

The PRESIDING OFFICER. The Senate will be in order that the Senator may be heard. He is entitled to be heard.

The Senator from Missouri.

Mr. EAGLETON. Mr. President, the Senate has debated and tabled two amendments having to do with the tobacco price-support program. These amendments, which were offered by the Senator from Oregon (Mr. HATFIELD) and a later one by myself, were tabled by rather narrow margins. Virtually every conceivable argument that could have been offered against those amendments were, in fact, offered—ranging from the need of earnings from allotments to support higher education in the South to the destruction of the American family.

These amendments were not offered in the spirit of destroying tobacco as a farm commodity in the United States. Neither the Senator from Oregon nor I are Carrie Nations. While we do not want to encourage the consumption of this commodity, we recognize that people will continue to smoke, chew, and sniff tobacco, irrespective of what we do here on the floor of the Senate and in the Congress of the United States.

My amendment, the one that lost last night, was designed to provide the Secretary with some minimal freedom in establishing price supports for tobacco. That amendment, which was tabled by three votes, simply would have given the Secretary the authority to reduce price supports—but not less than the adjusted cost of production—if certain grades, types, or kinds of tobacco were deemed by the Secretary to be in excessive supply and noncompetitive in the world marketplace.

In the amendment now before us, Mr. President, I have substantially—and I do not say that tongue in check—I have substantially modified last night's amendment.

First of all, the effective date of the amendment now before us would be tobacco crop year 1983 instead of 1982. Instead of the language in the amendment last night that caused the particular trouble, for instance, to my colleague, Senator HUDDLESTON of Kentucky, where we said that the adjusted cost of production would be the floor for price supports, we have changed that in this amendment to make it crystal clear that the minimum price support in this amendment would be 75 percent of the 1982 price support level.

So we varied it in two very significant respects. Not just minuscule, little changes but two very significant respects.

If there be a criticism of this amendment, I think the criticism would be that it is now not nearly strong enough, and certainly not as strong as that which was rejected by three votes last night.

In conclusion, Mr. President, let me say this: We heard all day about what occurred during the August recess insofar as the revamping and restructuring of the farm bill. We heard that during the August recess basic commodity programs that had been agreed to after some 27 markup sessions prior to the August recess were cut back, all the basic commodity programs—wheat, corn, feed grains, dairy, and the like.

Earlier in this debate we made changes in the peanut program. Now here is tobacco. If this amendment be defeated, we will go on record as saying, "We will cut back on wheat, cut back on corn, cut back on dairy, cut back on every major commodity crop in this country, cut back on peanuts, but not touch one hair on the head of sacred tobacco."

If that is consistent agricultural policy, then I think I do not know the use of the English language. If we are going to make the kind of cuts that the White House is dictating with respect to the basic commodities, why do we have the stunning silence from the White House with respect to tobacco?

If money can be saved on wheat, corn, dairy, and peanuts, why are not the dollars that can be saved from the Federal Treasury just as significant with respect to tobacco?

The Department of Agriculture has done various cost estimates which were presented to the International Trade Commission, some of which have been put into the record, as to how much the Government can save by modifying and moderating the tobacco program.

If savings is the name of the game in this era of budget cutting, why are not dollar savings in the millions just as useful if we take them out of the antiquated tobacco program as they were deemed to be useful early this afternoon with respect to wheat, corn, dairy, and the day before with respect to peanuts?

I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. BAKER. Mr. President, is there a time limitation on this amendment?

The PRESIDING OFFICER. There is no time limitation.

Mr. HUDDLESTON. Mr. President, I think it is somewhat regrettable that here at this late hour, 15 minutes after the time we intended to finish deliberations on this bill, that we are confronted with yet another attempt to seriously modify the tobacco price-support program. All the arguments have been made, as the Senator from Missouri has already indicated.

No matter whether you are for or against tobacco, no matter whether you are for or against the tobacco price-support program, you can vote to reject this amendment in good conscience because I do not think there is anybody here, and even those of us who have lived with and supported and worked with the tobacco program almost since its inception, can tell you what this amendment will do and what the impact will be.

It is confusing. It would bring about instability, to say the least, in what is now a stable marketing system. Whatever modifications we have to make now and in the future in the tobacco program, this is not a very sound approach to make.

Just to correct the statement made by the Senator from Missouri, tobacco farmers are assuming the cost previously borne by the Government of grading and inspection. Rates on loans that go for the purchase of tobacco are being increased to eliminate any cost to the Government for that particular program.

Mr. President, before we finish debate on the farm bill, it would be remiss of me if I did not note that we all must recognize that this omnibus farm bill would not have been possible without the tenacious efforts and fair leadership of Senator HELMS, my good friend and chairman of the Committee on Agriculture, Nutrition, and Forestry.

Senator HELMS has worked diligently with each Senator on the Agriculture Committee to insure that all points of view of each issue have been considered; and he chaired two dozen legislative drafting sessions during April and May. Senator HELMS has been an effective spokesman for responsible action. I thank Senator HELMS for his work on the bill.

With respect to the pending motion, all of the reasons we talked about yesterday and all of the discussion on this program all still apply even more so to this particular amendment.

Unless someone else wants to speak, on behalf of the committee chairman and floor manager of the bill, the Senator from North Carolina, and myself, I move to lay on the table this amendment by the Senator from Missouri so that we can get on and possibly finish this bill tonight.

Mr. EAGLETON. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Missouri (Mr. EAGLETON). The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SPECTER (after having voted in the negative). Mr. President, on this

vote I have a pair with the Senator from Mississippi (Mr. STENNIS). If he were present, he would vote "yea." I have already voted "nay." Therefore, I withdraw my vote.

Mr. STEVENS. I announce that the Senator from New York (Mr. D'AMATO), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Nevada (Mr. LAXALT), the Senator from Alaska (Mr. MURKOWSKI), the Senator from Vermont (Mr. STAFFORD), the Senator from Texas (Mr. TOWER), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

I further announce that, if present and voting, the Senator from New York (Mr. D'AMATO) and the Senator from Texas (Mr. TOWER) would each vote "yea."

Mr. ROBERT C. BYRD. I announce that the Senator from New Jersey (Mr. BRADLEY), the Senator from Arkansas (Mr. BUMPERS), the Senator from Florida (Mr. CHILES), the Senator from California (Mr. CRANSTON), the Senator from Connecticut (Mr. DODD), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Hawaii (Mr. INOUYE), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Maine (Mr. MITCHELL), the Senator from Mississippi (Mr. STENNIS), and the Senator from Massachusetts (Mr. TSONGAS) are necessarily absent.

On this vote, the Senator from South Carolina (Mr. HOLLINGS) is paired with the Senator from Maine (Mr. MITCHELL).

If present and voting, the Senator from South Carolina would vote "yea" and the Senator from Maine would vote "nay."

I further announce that, if present and voting, the Senator from New Jersey (Mr. BRADLEY) would vote "nay."

The PRESIDING OFFICER. Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 41, nays 40, as follows:

[Rollcall Vote No. 272 Leg.]

YEAS—41

So the motion to lay on the table Mr. EAGLETON's amendment (UP No. 398) was agreed to.

UP AMENDMENT NO. 399

(Purpose: To authorize and confirm administrative jurisdiction in the Secretary of Agriculture over certain lands and for other purposes)

Mr. MELCHER. Mr. President, I have an amendment at the desk, and I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Montana (Mr. MELCHER) proposes an unprinted amendment numbered 399.

Mr. MELCHER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Add a new section at the end of Title XIII as follows:

SEC. 1437. Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That it is the intent of Congress that dual administration and jurisdiction by the Departments of Agriculture and the Interior over certain lands currently administered by the Secretary of Agriculture should be avoided. Therefore, the Secretary of Agriculture is to have the sole administrative jurisdiction of the following described lands:

(1) The United States Sheep Experiment Station in Idaho and Summer Range in Montana. These lands, containing a total of 45,013 acres of land, more or less, were withdrawn by Executive Orders 3767, dated December 19, 1922; 2268, dated October 30, 1915; 2491, dated November 21, 1916; 3141, dated August 6, 1919; and 3165 dated September 3, 1919, for agricultural experiment purpose.

Mr. MELCHER. Mr. President, the amendment being offered today by Senators BAUCUS, MCCLURE, SYMMS, and myself will solve a matter of longstanding confusion and recent urgency regarding the administrative jurisdiction of certain lands on the Montana-Idaho border.

Specifically, the area comprises 26,650 acres now used as a sheep experiment station operated by the Science and Education Administration/Agricultural Research Office of the Department of Agriculture.

This acreage is contiguous to lands administered by the Bureau of Land Management and previously designated by BLM as the centennial mountains primitive area.

The BLM proposes to study this area—including the acreage of the sheep experiment station—for possible inclusion in the National Wilderness Preservation System. This is where the problem arises.

The sheep experiment station lands were withdrawn by Executive order of President Harding in 1922 for use by the Department of Agriculture for experimental sheep grazing. Over the intervening years that use had provided valuable scientific information with widespread benefit to American agriculture. For the most part, no serious conflicts arose between the Agriculture Department and the BLM, who cooperated for various reasons in the actual management of the lands.

However, the prospect of having these lands designated as wilderness created great differences between the agencies. While any actual designation of the lands as wilderness would of course have to be done by Congress, the mere act of categorizing the lands as suitable for wilderness study would mean the BLM would manage them in the interim and until Congress decided otherwise according to rules that would preserve the wilderness character of the area and prevent uses that threatened those characteristics.

Everyone involved seems to agree that the sheep experiment station activities have not degraded the quality of the lands, nor are there any new activities planned that would do so.

But designation of the lands as a wilderness study area would effectively transfer management authority for the lands to the BLM, who would then have the final word on all proposed uses by the sheep experiment station, all of which would have to be evaluated by the necessarily strict terms of the Wilderness Act and the compatible interim regulations.

In the best of all possible worlds, the cooperation between BLM and SEA/AR could be so excellent as to produce no problems at all. It seems fair to suspect, however, that such an ideal situation would more likely be replaced by delays, redtape, conflict, and in a deteriorating situation, paralyzing acrimony.

The work of the sheep experiment station is simply too important to take that risk.

Last year, Senator MCCLURE and I explained this situation to the Senate and won approval for my amendment providing temporary relief. The Senate and House agreed to deny BLM funds in last year's appropriation to continue any work toward including the sheep experiment station lands in a wilderness study area.

Discussions between the two departments have continued since then, but no permanent satisfactory agreement seems likely. The BLM feels obligated by their instructions in the Federal Land Policy and Management Act to proceed with the study. The USDA continues to foresee conflicts and problems in administering the station under wilderness management.

Thus we come today to offer a permanent solution which will believe the BLM of their perceived responsibility and formalize the Secretary of Agriculture as the administrator of sole jurisdiction over these lands. This amendment will not affect any progress toward studying the remaining 68,226 acres of the centennial mountains area for possible wilderness classification. It will insure the continued opportunity for the sheep ex-

periment station to do its work without unnecessary interference.

Mr. HELMS. Mr. President, this amendment will confirm that the Secretary of Agriculture has sole administrative jurisdiction of the U.S. Sheep Experiment Station in Idaho and Summer Range in Montana. This will assure that these lands will remain available for agricultural experiment purposes, as they have for nearly 60 years.

I understand that this amendment is supported by Senator MELCHER from Montana and by Senator MCCLURE and Senator SYMMS from Idaho. I see no reason why this amendment should not be accepted and offer my full support.

Mr. McCLURE. Mr. President, I strongly support this amendment, and I second everything the Senator from Montana has said.

I appreciate the consideration of the committee with respect to this amendment, and I hope it will be adopted.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 399) was agreed to.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HELMS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 400

(Purpose: To limit the making of deficiency payments under the programs for wheat, feed grains, upland cotton, and rice)

Mr. LEVIN. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Michigan (Mr. LEVIN) proposes an unprinted amendment numbered 400.

Mr. LEVIN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 222, line 19, strike out "$50,000" and insert in lieu thereof "$25,000".

Mr. LEVIN. Mr. President, this amendment, which is offered by Senator SIMPSON and me, lowers the maximum deficiency payment for a farm from the present maximum of $50,000 to $25,000.

Deficiency payments were devised in 1970 as part of the changes made in our farm programs. As my colleagues recall, our farm policy had previously depended on acreage restrictions, allotments, marketing quotas, and other programs that kept prices up but which, unfortunately, kept American farmers out of international markets. As support prices were lowered to make American agriculture competitive on the world market, it was deemed necessary to create a program that would supplement farm incomes without raising commodity prices. That is the deficiency payment and target price program.

This program has been successful in protecting farm incomes during the change from supplying domestic markets to competing internationally. We should preserve this program while we eliminate some of the inefficiencies in it. Let me give you a few examples.

This program provides disproportionate amounts of assistance to large farms. For example, the smallest 30 percent of farms eligible for assistance receive only 4 percent of the benefits. And while those small family farms were trying to scratch out a living, 10 percent of eligible farms received 46 percent of the money allocated through deficiency payments. Given all the rhetoric we have heard about the hard-working small family farmer in the past few days, it seems that no one would want this program to continue in its present form.

Reducing the maximum deficiency payment to $25,000 does not guarantee that all the inefficiencies and inequities of the program will be resolved. But it does significantly reduce the likelihood of their occurring. By reducing the total any given farm can receive we will at least change the pattern whereby large farms have gotten so much while small family farms have gotten so little.

To be frank, I would have preferred to offer an amendment or supported the proposals of my colleagues that went further and made more structural changes in our farm program. We have focused all our attention on budgetary outlays and have not addressed specifically which farmers benefit the most from these farm programs. My interest is in making sure that support goes to those farms and farmers who need it the most—and this amendment is a step in that direction.

In 1978, when the deficiency payments were 52 cents, a farmer would have had to raise 96,154 bushels to qualify for the top amount of $50,000. This year, when the target price is $3.81 and the Agriculture Department is estimating a market price between $3.65 and $3.67, a farmer would have to raise 357,142 bushels to meet the limit of $50,000. Such a farmer would have grossed more than $1,310,000 to reach the limit of $50,000. Even if a third of his payments were from diversion rather than deficiency payments, the farmer would still have to gross more than $374,000 before the limit would touch him. If we assume that the average wheat farm in the United States is around 300 acres, my amendment would affect very few farms or farmers.

I want to assure my colleagues that this amendment does not modify any other programs that may be available to farmers. It does not modify the qualifications for loans or Government purchases or disaster assistance. It does not change target prices or loan prices. All it does is reduce—reduce, not eliminate—the amount of money farmers can receive in deficiency payments.

I also want to mention why I am offering this amendment. While my home State of Michigan is primarily known as a car producing State, it has a large and important agricultural community as well. Michigan ranks first in the production of dry beans, blueberries, red tart cherries, pickling cucumbers and Eastern soft white winter wheat. It ranks second in rhubarb and third in apples, asparagus, celery, and mushrooms.

In addition, it ranks in the top 10 in 30 other crops including sweet corn, field corn, and tomatoes, indicating the wide diversity of our agricultural base. In the contacts that I have had and that my staff has had with Michigan farmers they have consistently indicated that they very much want an agricultural program that provides for reasonable prices and loan programs, but they are uncomfortable as a matter of principle—with the present system of direct payments where so few farmers get such large Federal subsidies.

I am concerned about the structure in our country, as I know many of my colleagues are. There are indications that programs, like deficiency payments, have lowered risks and therefore have encouraged farms to grow larger than is necessary to capture all economies of scale, to become more capital intensive, and to produce less diversified mixes of crops. We have a responsibility to analyze the effects of our farm program and adjust it where necessary. Although I cannot argue that my amendment will solve all these problems and protect the ideal of the yeoman farmer, it can serve as an indication of our commitment to concentrating farm programs on family farms.

In these times of budget cutting, we must target our Federal dollars more carefully. We cannot be sending Federal checks of $50,000 to a few thousand people while millions are struggling or going under because of cuts in farm programs and other domestic programs.

In the last year when there were significant deficiency payments, 1978, about 900,000 farms participated in the program. Two thousand eight hundred of those farms, or less than 1 percent, received more than $25,000. This amendment, in other words, affects few but says much in terms of targeting Federal dollars.

Senator SIMPSON and I have discussed this matter with Senator COCHRAN. Senator COCHRAN has indicated that he will be willing to hold hearings on it in his appropriations subcommittee in the near future.

I, therefore, intend to withdraw this amendment after either he or anyone else, including Senator SIMPSON if he is in the Chamber, might wish to add a word to this discussion.

Mr. COCHRAN. Mr. President, I thank the Senator from Michigan for indicating to the Senate his intention to withdraw this amendment. It is an important amendment with very serious and meaningful ramifications which should be considered by the Committee on Agriculture or the Appropriations Subcommittee.

I make a commitment to him to have hearings on this subject and to review the payment limitation situation.

The attempt to reduce this limitation substantially, of course, would affect very adversely the impact protection provided to farmers by target prices.

Furthermore, it could be counter to the changes that we are seeing around the country in the cost of production.

Nonetheless, whatever the merits of the amendment may be, we certainly are interested in taking careful look at it through the hearing process, and the Senator from Michigan has a commitment from me that such hearings will be held promptly and we will carefully review this proposal.

Mr. LEVIN. Mr. President, I thank my friend from Mississippi.

I thank Senator SIMPSON for strong support of this matter.

I withdraw my amendment at this time.

The PRESIDING OFFICER. The amendment is withdrawn.

UP AMENDMENT NO. 401

(Purpose: To provide surplus commodities to nutrition projects operating under the authority of the Older Americans Act and to child nutrition programs)

Mr. MELCHER. Mr. President, I have an amendment at the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Montana (Mr. MELCHER), for himself, Mr. PROXMIRE, Mr. PRYOR, Mr. DECONCINI, Mr. CHILES, Mr. BRADLEY, Mr. PRESSLER, Mr. BAUCUS, and Mr. EAGLETON, proposes an unprinted amendment numbered 401.

Mr. MELCHER. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 136, between lines 9 and 10, insert the following new section 107:

"DISTRIBUTION OF SURPLUS COMMODITIES

"SEC. 107. Notwithstanding any other provision of law, whenever government stocks of surplus commodities acquired under the price support programs under sections 210 and 416 of the Agricultural Act of 1949 exceed amounts needed to fulfill requirements for distribution to domestic commodity programs and commitments for food aid under the Agricultural Trade Development and Assistance Act of 1954, and amounts anticipated to be purchased by the commercial trade under the Commodity Credit Corporation's unrestricted resale program, such commodities shall be made available without charge or credit to nutrition projects under the authority of the Older Americans Act of 1965 (42 U.S.C. 3001 et seq.) and to child nutrition programs providing food service. Such distribution may include bulk distribution to congregate nutrition sites and to providers of home delivered meals under the Older Americans Act. The Commodity Credit Corporation is authorized to use available funds to operate the program under this section and to further process products to facilitate bonus commodity use."

Mr. MELCHER. Mr. President, this is a simple amendment that will do two things. It will help the Commodity Credit Corporation eliminate storage costs on surplus commodities, and it will provide more food to school children and the elderly at a time when other kinds of Federal assistance to them is being cut back.

Our schools are in a tight and difficult position financially. In addition to cutbacks in Federal educational assistance, we have cut the school lunch program 40 percent this year—reducing per meal assistance from 21½ cents to 11 cents, and cutting program costs by about $1½ billion.

Additional commodities will help the schools cope with these cuts. They will allow many meal programs for children to remain open, while at the same time helping farmers and cutting Federal storage costs.

For the past three years, USDA has provided bonus dairy commodities to schools, serving some school lunches free of charge, except for transportation costs.

My amendment requires USDA to make bonus commodities available to schools, and it extends the bonus program for the elderly to include all 416 price support commodities.

The bonus program will only operate when there are surpluses of commodities.

Commodity support for the elderly is required by title III of the Older Americans Act of 1965. USDA buys commodities for the elderly feeding program—about 634,000 meals a day. States have the option of receiving cash, commodities or a combination of both.

During fiscal 1980, 23 State agencies chose to receive a combination of cash and commodities, 28 chose cash, and 7 chose commodities only.

This amendment would provide bonus commodities no matter which formula a State chooses to follow.

Generally, the same commodities available through the school lunch program are provided to the elderly.

Our senior citizens on fixed incomes with limited economic resources are often at a nutritional risk. Even those who are served by Government food assistance programs are often financially pressed to purchase high protein, high nutrient foods so important to vitality and good health.

Managers of congregate meal sites are finding themselves in the middle of the inflationary-dwindling resources squeeze. As food prices and labor and overhead costs escalate, all consumers find themselves searching for the best food values, our elderly citizens and the managers of the elderly congregate meal sites are not an exception.

It is most essential that as pennies are pinched, that quality foods are not sacrificed. Good nutrition must not be eroded by economic pressures.

The bonus commodity program has been working successfully and schools are finding the tight financial strings just a little easier to tie because of the free bonus dairy products. The Federal Government has been picking up the costs for the actual cost of the butter, cheese, and nonfat dry milk and the costs are borne by the State and/or school food service system. It boils down to low costs for the schools receiving the dairy products, but it is also low cost for the Government as well.

The dairy price support program mandates Federal purchases of dairy products when production is in excess of supply. In other words, the Federal Government already owns the dariy stocks, and right now owns more than it can use in its normal distribution channels for domestic feeding programs.

Considering the shelf-life of the products which can range from 6 months to 2 years for stable shelf-life and the costs of cold storage for the dairy products, the Government is in much better shape financially to move these nutritious products into proper use channels than to watch the butter, cheese, and nonfat dry milk continue to mount in storage.

My amendment would include not only dairy products but all of the commodities now distributed.

Two weeks ago, the Department of Agriculture issued new meal pattern regulations that will allow schools to absorb some of the huge cuts we made in the school lunch program by serving poorer meals, with less milk, vegetables, and protein.

Instead of providing one-third of a child's daily nutritional needs, a school lunch must now only provide 25 percent.

The regulations will save the schools $350 million a year in food costs, but in areas where the school lunch provides children with their only decent meal of the day, these cuts will be serious.

This amendment will help schools keep more nutritionally important foods on the lunch table even in the face of Federal budget cutting.

Surpluses could develop in a number of agricultural commodities this year. It only makes sense that those commodities be eaten by our schoolchildren and the elderly, rather than having the Government pay the high cost of keeping them in storage.

Mr. President, I urge the adoption of my amendment.

Mr. President, this is a rather important amendment, but it is one that I believe is going to be accepted without a vote.

It deals with providing for both the schoolchildren and the elderly any surplus commodity that we have over and above what might be sold or otherwise used such as for food for peace.

It is a desire to help on these nutrition programs with the surpluses that we have that are staggering in some respects, for instance, in dairy, to get the food out where it can be used and save on storage cost.

It is an amendment that I have a great deal of interest in, and I think the schools and the senior citizens throughout the United States have a great deal of interest in.

I hope it can be accepted.

Mr. HELMS. Mr. President, I am somewhat apprehensive about the cost of this, but as the Senator from Montana has said, we get all sorts of figures around this place.

I am prepared to accept it on the basis that we will take it to conference.

Mr. MELCHER. Might I inquire to hear what the Senator from North Carolina was saying?

Mr. HELMS. We will accept it.

Mr. HUDDLESTON. We accept it on this side.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Montana.

The amendment (UP No. 401) was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HUDDLESTON. Mr. President, I move to lay that motion on the table.

The PRESIDING OFFICER. The motion to lay on the table was agreed to.

The bill is open to further amendment. Is there further amendment to be proposed?

Mr. HELMS. Mr. President, we have technical amendments.

The PRESIDING OFFICER. The Senator from North Carolina is recognized.

UP AMENDMENT NO. 402

(Purpose: To make technical corrections to S. 884)

Mr. HELMS. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes an unprinted amendment numbered 402.

Mr. HELMS. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 133, in the Table of Contents, after the item "Sec. 1517. Approval of plans." insert the following:

"Sec. 1518. Authorization of appropriations.
"Sec. 1519. Report.
"Sec. 1520. Authorization for use of volunteers.
"Sec. 1521. Status as Federal employees.
"Sec. 1522. Authorization for appropriations.
"Sec. 1523. Purpose.
"Sec. 1524. Definitions.
"Sec. 1525. Resource conservation and development program.
"Sec. 1526. Selection of new designated areas.
"Sec. 1527. Authority of the Secretary.
"Sec. 1528. Agreements; terms and conditions.
"Sec. 1529. Resource Conservation and Development Policy Board.
"Sec. 1530. Evaluation of the program.
"Sec. 1531. Regulations.
"Sec. 1532. Limitation on provision of assistance.
"Sec. 1533. Supplemental authority of the Secretary.
"Sec. 1534. Authorization for appropriations.
"Sec. 1535. Short title.
"Sec. 1536. Findings, purpose, and definitions.
"Sec. 1537. Agricultural and protection policy.
"Sec. 1538. Conformation of existing policies.
"Sec. 1539. Report.
"Sec. 1540. Statement of limitations.
"Sec. 1541. Prohibition.
"Sec. 1542. Effective date."

On page 218, line 9, strike out "ot" and insert "to".

On page 221, strike out lines 14 through 19, renumber the remaining section of title X, and revise the Table of Contents accordingly.

On page 224, line 24, insert quotation marks immediately before the word "Provided".

On page 230, line 13, insert "(a)" immediately after "Sec. 1108.".

On page 230, between lines 21 and 22, insert the following: "(b) The provisions of this section shall become effective 180 days after the date of enactment of this Act."

On page 230, line 24, strike out the words "Revised Statutes, title 91, page" and insert "91 Stat.".

On page 231, line 15, strike out the comma following the word "term".

On page 241, line 12, after "for" insert "cotton." and strike the remainder of the sentence.

On page 246, line 1, strike out "Subsection" and insert "Section".

On page 260, line 2, strike out "orgnizations" and insert "organizations".

On page 260, line 20, strike out the word "operations" and insert "operation".

On page 266, line 17, strike out "Agriultura" and insert "Agricultural".

On page 274, in the item following line 5, insert a period immediately after the close quotation marks.

On page 277, line 16, strike out "625" and insert "624".

On page 290, line 16, immediately following the word "after" insert "Sec. 1470. Rules and regulations".

On page 290, following line 17, delete "Sec. 1470. Rules and regulations."

On page 295, following line 6, strike out the item "Sec. 1481. Rangeland research program." and insert in lieu thereof "Sec. 1481. Rangeland research grants."

On page 302, line 3, strike out the word "federal" and insert "Federal".

On page 312, line 2, strike out the dash following the word "Small".

On page 312, line 2, strike out the dash following the word "Medium".

On page 312, line 8, strike out the dash following the word "small".

On page 312, line 8, strike out the dash following the word "medium".

On page 315, line 4, strike out the word "to" and insert "To".

On page 327, line 6, strike out the comma following the word "volunteers".

Mr. HELMS. Mr. President, this amendment is strictly a technical amendment. It does three things: First, it corrects a number of technical and typographical errors in the text of S. 884 as reported by the Committee on Agriculture, Nutrition, and Forestry. Second, it deletes section 1004 of the bill which relates to farm storage facility loans. This section is deleted since the identical provision was adopted in the Omnibus Reconciliation Act of 1981. Third, the effective date of section 1108 of S. 884 is delayed from October 1, 1981, to 180 days after date of enactment. Section 1108 would amend the U.S. Grain Standards Act to allow States which were not inspecting export grain on July 1, 1976, to be delegated authority to inspect such grain. In view of a variety of changes in the internal structure of the Federal Grain Inspection Service, they have requested the extension and all interested parties have agreed.

This amendment has been cleared with the minority side. Therefore, I move the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from North Carolina.

The amendment (UP No. 402) was agreed to.

Mr. HELMS. I thank the Chair.

Mr. President, staff have brought to my attention that there are some technical errors in amendment No. 545 as modified and adopted.

As the Chair will recall, this amendment was finalized following last-minute discussions and apparently a few technical corrections need to be made.

Mr. HAYAKAWA. Mr. President, may we have order?

Mr. HELMS. Mr. President, at the suggestion of the distinguished Senator from Alabama, I lay aside what would have been a unanimous-consent request.

UP AMENDMENT NO. 395

Mr. HELMS. Mr. President, I am advised by staff that when the amendment of the able Senator from Kansas (Mr. DOLE), UP amendment No. 395, was offered, it was intended to include the language of unprinted amendment No. 366 of the Senator from North Dakota relating to malting barley which had already been agreed to by the Senate.

Therefore, I ask unanimous consent that the language of the Andrews amendment be included at the appropriate place in the Dole amendment.

This has been cleared with both sides.

Mr. HUDDLESTON. Mr. President, I accept the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, Senator HEFLIN is endeavoring to check one item in the technical amendment to which I alluded a moment ago.

I ask Senators to bear with us until he returns to the Chamber. It will not be long.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 403

Mr. HELMS. I send an amendment to the desk with respect to technical changes to which I alluded and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes an unprinted amendment numbered 403:

On page 4, lines 8 and 9, strike out "farm to which it was most recently leased." and insert in lieu thereof "person to whom it was most recently leased, provided such person has adequate tillable cropland to produce such poundage.".

On page 5, line 17, immediately following "were less than" strike out "the" and insert in lieu thereof "such".

On page 5, line 25, immediately following "acreage on the farm to peanuts in" strike out "the" and insert in lieu thereof "such".

On page 6, line 2, strike out "would" and insert in lieu thereof "should".

On page 15a, line numbered 9, strike out "April 30" and insert in lieu thereof "April 1".

On page 19, in the language inserted between line 10 and line 11, strike out "of farm poundage quotas and in excess".

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from North Carolina.

The amendment (UP No. 403) was agreed to.

STATEMENT CONCERNING UP AMENDMENT NO. 400

Mr. SIMPSON. Mr. President, I wish to say for the record that I did join in the effort of my colleague from Michigan (Senator LEVIN) who offered an amendment to lower the limitation on deficiency payments so that no person could get more than $25,000 in Federal payments out of that program. That amendment later was withdrawn under the good auspices of Senator THAD COCHRAN who has promised to hold hearings on that important issue.

I know that Senator DOLE and Senator HELMS have both expressed an interest in seeing that those hearings are held. I think at one time it was a good program but now it has gone awry and is misused. I do want the record to indicate that Senator LEVIN has my support in that proposal. We will give new and fresh attention to that issue.

THE 1981 FARM BILL

Mr. BAUCUS. Mr. President, I personally believe this farm bill to be inadequate for American agriculture.

Has our economic situation changed so rapidly over the past month that we had to modify the already compromised version of the farm bill originally reported out by the Agriculture Committee? If so, we should have adopted a farm program that floats—or sinks—as our economy worsens or improves.

The modifications were made to represent changes in cost estimates over the last month or 2 months. This is a 4-year farm bill—or will that be modified, too?

Is the administration admitting a no-growth economy?

What happens when we adopt the farm support levels recommended by the administration? Will economic factors change as much in the next 4 years as they supposedly have in the last 2 months? I hope not.

There is no way I can accept the bill as modified by the administration. The cuts in support levels for our farm programs are hard enough to swallow without further weakening amendments to the original committee bill. I plan to vote against final passage of this bill, as I am sure a number of my farm State colleagues will.

Farmers are already doing their part to "tighten their belts" and help reduce Government spending. They are only asking for a little consistency from the administration and from Congress—farmers want to know what to expect for farm programs.

I have not been able to see any consistency in the administration's farm proposals. The only consistency they can claim is wanting to cut more from support levels and add more costs to the farmers.

Almost every major farm organization has reluctantly supported the reduced levels of support contained in S. 884, the committee bill. They did so only with the strong message that they could not accept any further reductions—the committee bill was their bottom line.

Now the administration has seen all of their amendments adopted, amendments that weakens an already mediocre set of price support levels. I simply cannot support any further weakening of our farm programs.

Net farm income dropped from $31 billion in 1979 to $22 billion in 1980, a decrease of 29 percent in nominal terms. The first segment of agriculture to be hit by low income will be our small family farms. They simply will not be able to stay in business.

Yet the path we are heading down does nothing to help these small farmers continue their operations. What happens when these small farmers, who are price takers in the marketplace, are replaced by gigantic agribusiness who will be price setters in a monopolistic agricultural market? Will we have an abundance of food and fibers at reasonable prices to consumers? I do not think so.

I hate to think of the consequences in this country if our farmers were to go on strike. They will not go on strike, however, because they are committed to feeding the Nation and being the foundation of our economy. Farmers have to put up with increasing interest rates and inflation just like everyone else in this country. However, when you look at the increase of 30 cents in the loan rate for wheat you see the meager 10-percent increase as the floor price for wheat.

If an accurate cost/benefit analysis could be done on our agricultural support programs, I think we would see that the food we receive from farmers is well worth the investment we make. Everyone hopes and expects the market to be stable enough to keep Government expenditures to a minimum. However, if the market does not provide a reasonable return to the producer, I think the Government can well justify the pittance it takes to keep a strong agricultural sector going.

Farm price supports are not costly. I challenge the administration and any of my colleagues to look at the subsidies to the nuclear industry in this country and tell me that support for any one commodity is exorbitant. Look at our foreign aid budget. Look at our military budget—what good does a strong military do us if we cannot feed the troops? I wish someone would tell Secretary Haig that he cannot starve the Russians into submission.

I hope the American people will take a close look at the administration's priorities when it comes to their budget cutting fervor. If all Government spending must be cut, so be it. But why is agriculture being targeted—agriculture that provides a full 20 percent of our GNP?

Mr. President, I opposed any weakening amendments that were offered to S. 884. In fact, I would have liked to see stronger support levels for some commodities and offered an amendment which would have raised the loan rate for wheat to $3.60 from the $3.50 level presently in the bill. A small increase, but one that would more accurately reflect the increased costs to farmers for producing a bushel of wheat. The parity price for wheat is over $5 a bushel, so I hoped that this small increase in the loan rate would have absolutely no effect. By that I mean that I hope the price of wheat never stagnates around the $3.60 per bushel level. We needed to give the producer this stabilizing price so he would be able to stay in operation through these rough economic times.

The Secretary of Agriculture, to a large extent, has control over the market price of wheat. He has discretion over set-asides and he can develop our export markets to stabilize prices. I asked the administration to put confidence in Secretary Block and override the stagnating effects of Secretary Haig on export market development. They would have no reason to fear additional costs to the Government for farm supports if they would do this.

I urged the Senate, at the very minimum, to return to the original version of S. 884. I saw anything less as an abandonment of the best interests of our agricultural sector; an agricultural sector that is the foundation of our economy and can lead us to new prosperity.

Mr. President, I ask unanimous consent that the following letters from the Governor of the State of Montana and from most of the major farm organizations in my home State be printed in the RECORD following my statement.

The Governor and the farm leaders know what the real plight of the farmer is. I had hoped my colleagues would be as convinced by their logic as I was.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

SEPTEMBER 9, 1981.

Hon. RONALD REAGAN,
*The White House,*
*Washington, D.C.*

DEAR MR. PRESIDENT: The enclosed letter, signed by the leadership of several major Montana farm organizations and commodity groups, underscores the gravity of the agricultural situation. As a Northeast Montana grain producer myself, I understand and support their concern.

American agriculture is extremely capital intensive. Because our farmers and ranchers must depend on that "one big paycheck" from the harvest, they must operate day-to-day on borrowed capital. Current interest rates, coupled with the inflationary prices of fuel, fertilizer, machinery, etc., have left our farmers and ranchers in a precarious financial condition. Unable to pass on their increased costs, producers have "dug deeper in their pockets" and continue to live off their equity and depreciation . . . a shortsighted and dangerous situation for any business.

The proposed loan rates for wheat will not begin to cover the variable costs of production, as evidenced by the U.S. Department of Agriculture's own studies. The loan rate set by the United States establishes the floor on world wheat prices. Developing countries, as well as major importing countries, are perplexed at our continuing "cheap food policy" when revenues from our agriculture exports are the single most important contributor on the positive side of our trade balance ledger.

I urge you to give full consideration to an increased wheat loan rate which adequately reflects the cost of production today.

Without minimum price protection, we are forcing older producers to "cash in" on their equity. At the same time, we are forc-

ing a generation of young farmers to leave the land to seek employment in our overcrowded cities. It is ironic that young farmers are being forced to leave at a time when the productivity of American agriculture is one of the highest in our economy. American farmers and ranchers are praised and envied as the most efficient producer of foods in the world.

If we want to get America back to work, we should support legislation that offers incentives and rewards for extra efforts. A fair farm bill can offer those incentives.

Sincerely,

TED SCHWINDEN,
*Governor.*

---

AUGUST 20, 1981.

Hon. TED SCHWINDEN,
*Governor of Montana, Helena, Mont.*

DEAR GOVERNOR SCHWINDEN: The following members of the Montana Agricultural Coalition, representing Montana Women Involved In Farm Economics, Montana Grain Growers Association, Montana Farmers Union, Montana National Farmers Organization, and Montana State Grange, hereby agree that:

We cannot accept either the House, Senate, or administration's proposal for wheat in the 1981 farm bill.

We further agree that: The loan rate on wheat must be at least 75 percent of parity, with an escalator clause to adjust the loan on wheat yearly, according to the cost of production.

Respectfully submitted by,

ESTHER D. RUUD,
*President,*
*Montana Women Involved in Farm Economics.*
TERRY MURPHY,
*President,*
*Montana Farmers Union.*
DALE SCHNEIDT,
*President,*
*Montana Grain Growers Association.*
DON JOHANNSEN,
*President,*
*Montana National Farmers Organization.*
FOREST FARRIS,
*Master,*
*Montana State Grange.*

MEAT IMPORTS, EXPORTS, AND INSPECTION

Mr. BAUCUS. Mr. President, I originally intended to introduce my Meat Labeling and Inspection Act. S. 524, as an amendment to the farm bill. However, to accommodate the administration's objections to S. 524, I withhold my amendment.

I am still convinced that my legislation presents a reasonable approach in dealing with our persistent problems with the quality of imported meat—without presenting unfair trade barriers. The study I am now proposing is a first step in finding a workable solution to problems such as the recent kangaroo and horse meat shipments we received from Australia that were labeled "beef."

I ask unanimous consent that two articles describing the recent kangaroo and horse meat shipments from Australia be entered in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Post, Aug. 22, 1981]

KANGAROO MEAT FOUND IN "BEEF" DESTINED FOR U.S.

CANBERRA, AUSTRALIA, August 21.—"Beef" destined for American fast food lovers was loaded with kangaroo meat, endangering Australia's $565-million meat export trade with the United States, an Australian Cabinet minister said today.

Federal Primary Industry Minister Peter Nixon said kangaroo meat was found in samples from a Melbourne company already under investigation for allegedly substituting horse meat for beef going to the United States.

Nixon said the findings clearly demonstrated a serious fraud.

He said the scandal placed Australia's beef trade with the United States in jeopardy and he vowed to "throw the book" at those found guilty and review meat inspection procedures.

Australia is the largest exporter of beef to the United States and expects to sell 300,000 tons this year.

Much of the boneless beef is used for hamburger by American fast food restaurants.

Federal police and Bureau of Animal Health inspectors began an intensive investigation into beef fraud after horse meat was found earlier this month in a consignment of Australian beef in California.

The "beef" was traced to Profreeze, a Melbourne-based company, authorities said.

Australian officials have impounded 1,609 cartons of meat bearing Profreeze markings, and exports by the company have been suspended, Nixon said.

He said 100 cartons have been tested thus far and in one set of samples taken from 25 cartons, horse meat was found in 24, kangaroo meat in 16 and beef in only five.

The results indicated some cartons contained a mixture of meats, Nixon said.

The minister did not say whether any kangaroo "beef" had been shipped to the United States.

But he said cartons packed at Profreeze under Bureau of Animal Health supervision contained only beef, indicating the substitution had occurred after the final export inspection.

---

[From the Christian Science Monitor, Sept. 11, 1981]

KANGAROO-FOR-BEEF SCANDAL MAKES AUSTRALIA HOPPING MAD AT EXPORTERS

(By David Solomon)

CANBERRA.—A few weeks ago the "great meat scandal," as it has come to be known in Australia, attracted little concern and a great deal of humorous comment.

The discovery by United States authorities that some frozen beef sent by Australian exporters to the American market in fact contained horsemeat seemed unlikely to have very great consequences.

However, more recent revelations have produced criticism of Australia's federal police, senior government administrators, and the federal minister for primary industry. Substitution of kangaroo and donkey meat for prime beef has been acknowledged as well.

The scandal has affected the nation's exports of meat to the Middle East and to Singapore, and resulted in stringent new inspection conditions on the continuing (but temporarily reduced) Australian meat trade to the U.S. The Australian government announced this week it will appoint royal commission to investigate the meat substitutions.

Government sources confirm that rackets involving meat substitution have been operating for about five years and largely have been ignored by federal authorities.

The government suspended the export license of one Melbourne meat packer and is investigating several others. Police expect to launch prosecutions soon for the false labeling.

Federal Police Commissioner Sir Colin Woods this week criticized previous investigations of the meat industry, saying that if they had been pursued with more vigor they might have produced different results. He notes there has been only one conviction for such an offense since 1975.

"The police life is all about knowing who did it and never being able to prove it," he said. "Maybe if more resources had been applied, different results would have followed."

Allegations of a meat-substitution racket have been made over the past three or four years in both the Victoria and federal parliaments. One senator alleged that a meat inspector who had tried to interfere in the racket had been transferred from his job.

The current meat substitution racket so far has been shown to involve only one small plant in a Melbourne suburb, although hundreds of samples have been taken around Australia and in the U.S. of other shipments.

Only 10 containers of meat are known to be affected so far—worth some 300,000 dollars (Australian)—a minute proportion of Australia's 700 million-dollar beef trade with the U.S. However, the government wants to be viewed as acting to prevent future abuses.

Soon the Cabinet is expected to consider proposals for higher penalties for meat violations and a more intensive inspection process, including placement of official seals on export cartons.

In Victoria, where most of the allegations of meat-substitution have occurred, the state government has announced tighter regulations dealing with horse and kangaroo meat killed for the pet-food market. These laws will require pet food to be stained with an edible dye.

Primary Industry Minister Peter Nixon this week said that small traces of dye indicating the presence of horsemeat had been found in export meat cartons in Victoria.

Delays in shipping beef have resulted in the closing of meatworks 2,000 miles from Melbourne.

Mr. BAUCUS. Mr. President, our import/export policies certainly need to be reviewed in light of the extreme restrictions placed on our agricultural exports, while Australia is slapped on the hand and told not to continue shipments of mislabeled beef.

Look at the policy Japan took in reaction to the recent medfly infestation in California. They certainly did not limit their attention to the small segment of California's fruit industry that was troubled by the medfly. We must toughen our negotiating of import and export policies to avoid these double standards.

Mr. President, I expect USDA to use the number of reports that have already been conducted on the quality of foreign inspections to upgrade their inspection program. For example, the report of the Comptroller General entitled "Better Inspection and Improved Methods of Administration Need for Foreign Meat Imports" and the November 1979, "USDA–FSQS Task Force Report on the Inspection of Imported Meat and Poultry." I also feel that USDA should provide an update on the progress they have made on improving inspection efforts since the release of the task force report.

The history of reports done on this subject goes back several years. Coupled with the recent incidents that I mentioned earlier, I believe there is adequate proof that the need exists for action to protect American consumers.

A significant part—6 percent or more—of the beef Americans eat is imported. But there are serious questions about the safety and wholesomeness of imported meat. Consumers have no way of knowing whether the meat they buy is a safe, wholesome American product or a foreign product produced and slaughtered under questionable conditions.

U.S. livestock producers suffer as well when unsafe or adulterated meat products are imported. Foreign producers can compete unfairly when they do not have to comply with the same stringent wholesomeness and safety requirements as domestic producers.

Inspection procedures for imported meat are so shoddy that even the agency doing the inspecting has said:

> We have no basis for determining the level of effectiveness achieved by the present program. We know that it provides some protection against the entry of adulterated products into the United States food channels, but we do not know precisely how much. (USDA–FSQS in Task Force Report on the Inspection of Imported Meat and Poultry; November, 1979.)

USDA inspectors constantly monitor domestic plants which produce meat to move in interstate commerce.

Federal inspectors examine animals both before and after slaughter to insure that they are free from disease and contamination. Samples taken from carcasses and internal organs are tested for the presence of chemical residue and disease.

Federal inspectors insure that clean operating practices are used and that sanitary conditions are maintained in domestic slaughter facilities. Inspectors also assure that only permitted amounts of acceptable ingredients are used in product formulation.

This is in sharp contrast to the relatively haphazard inspection of foreign meat markets. The USDA does not conduct continuous inspection in foreign plants.

Rather, countries wishing to be eligible to export meat request USDA and State Department approval. Before granting approval, the USDA evaluates a country's laws, regulations, and inspection staff and conducts onsite reviews.

Once a country is authorized to export, its inspection procedures are not routinely reexamined. For example, the task force report points out that although foreign countries are supposed to maintain laws and regulations to limit biological residues to levels permitted in the United States, the USDA has only recently begun to monitor compliance in this area. Officials of the U.S. Food Safety and Quality Service do make periodic inspections of foreign plants. However, only 20 inspectors are available to monitor 1,159 certified foreign meat plants. At best, USDA inspectors visit foreign plants quarterly. Some overseas establishments are visited only once every 2 years.

These infrequent inspections cannot insure compliance with U.S. standards. The problem is aggravated because inspections must be announced in advance; plant operators thus have ample warning to prepare for inspection.

During 1978, only 38 times did an inspection result in plants being rejected for failure to meet U.S. standards. During 1979 and 1980, this number was 41 and 34, respectively.

Imported meat must undergo an additional inspection when it arrives at a U.S. port. But this inspection—supposedly a second line of defense—also is minimal.

Eighty-five inspectors examined the 2 billion pounds of meat imported in 1978. With imports totaling 2.2 billion pounds of meat in 1979, and 2.1 billion pounds in 1980, the thoroughness of U.S. port inspection of imports is questionable.

Mr. President, my amendment would also focus on trade barriers facing domestic livestock producers wanting to export their products and expand their markets. This is a natural step to take to give us an idea if our action relating to meat imports could be viewed as a trade barrier compared to policies encountered in other importing countries.

I also expect USDA to determine if additional inspection and labeling requirements imposed on exporting countries would violate the General Agreement on Tariff and Trade [GATT] and the Trade Agreement Act of 1979. Also, consideration should be given to the amount of leeway that exists to renegotiate these agreements.

In summary, the safety and quality of imported meat products are issues of great concern to myself, to many of my colleagues, to consumers, and to domestic producers.

Mr. President, while I do not intend to offer an amendment to restore the support price for wool to 85 percent of formula, I do want to emphasize my support for renewal of the Wool Act—at the 85 percent level. I hope that the conference committee will consider my support and that of 14 of my colleagues for renewal.

In a letter of April 24, 15 Senators, including myself, expressed support for the renewal of the Wool Act without change or modification. Although the administration quarreled with our premise that the Wool Act is not financed out of the pocket of the American taxpayer, the fact remains that funds appropriated from the Treasury to reimburse OCC for expenditures paid in connection with wool price-support payments are limited to 70 percent of gross receipts from duties collected during the preceding year's wool imports.

There is good reason to support renewal of the Wool Act of 1977. I quote a paragraph from our April letter to Secretary Block:

> Like many agricultural programs, the Wool Act makes a substantial contribution to our agricultural industry, and is succeeding in facilitating the growth and expansion of the sheep industry. Since the Wool Act was renewed and revised in 1977, the domestic sheep industry has made a substantial turnaround. Sheep numbers have grown 5.6 percent in the past two years—the only increase recorded in the past 21 years. The total inventory value of the industry has grown by 80 percent, from $541 million in 1977 to $974 million in 1980. It is estimated by the American Sheep Producers Council that our nation will produce in excess of 104 million pounds of wool this year, an increase of 3 million pounds over the 1978 output. So the Wool Act is doing its job. The sheep industry is growing impressively, especially in light of $100 million in predation losses annually.

I would like to make one additional point about the apparent 10 percent cut in the price support of wool in the Senate bill. By cutting the percentage of the formula by 10 percent, we are actually lowering the price paid to producers by 41 percent. I do not think this type of cut will give our sheep industry the support they need to continue their growth and expansion.

Mr. President, I fully support the renewal of the Wool Act of 1977 with an incentive set at 85 percent of formula. I hope the conferees will recognize the importance of this provision while putting the final touches on the 1981 farm bill.

AGRICULTURAL EXPORT CREDIT REVOLVING FUND

Mr. HAYAKAWA. Mr. Presdent, I rise at this point to bring to the attention of this body what appears to be a serious shortcoming in the guarantees provided through the GSM–102 export credit guarantee program. The export of perishable agricultural commodities, such citrus, is hampered in the program by the fact that the costs of the transportation are not included in the guarantees. Because the export of these products is freight intensive, with transportation costs sometimes amounting to more than 50 percent of the total cost of the shipment, the lack of guarantees for an increment of the freight costs has effectively precluded such sales. For example, a sale of approximately $9 million worth of fresh lemons to Poland failed last year because of the CCC's unwillingness to cover increment of the freight costs.

Mr. President, I bring this to the attention of the Senate because it is my understanding that the Department of Agriculture could amend its own regulations to provide guarantees to cover some or all of the freight costs for perishable agricultural commodities. I would strongly support and encourage such an action by the Department.

Mr. GOLDWATER. Mr. President, I support the suggestion made by my colleague from California. It is imperative to our overall trade position that our Government encourage the export of U.S. agricultural commodities. Because the regulations in the export credit guarantee program do not provide for the costs of transportation for freight-intensive perishable agricultural commodities, such as citrus, many sales to U.S. exporters of these products are lost.

The situation is typical of the discrimination against farm exports that all too often shows up in our Government's programs. The Export-Import Bank covers transportation costs for exports of manufactured products under its direct credit, export loan program, and the Overseas Private Investment Corporation (OPIC) includes freight charges in loan guarantees made under its finance program whenever the total projected costs include such charges.

The Ex-Im asks that freight be carried on U.S.-owned vessels, but OPIC does not. The Cargo Preference Act does not now apply to CCC guarantees and the question of whether it would apply is a different subject that could be examined after new regulations are published. The matter which I am now addressing is the fact that the Department of Agriculture should amend its regulations to insure that CCC guarantees do

include transportation costs of freight-intensive agricultural commodities.

Mr. DECONCINI. Mr. President, I, too, support the suggestion made by the Senator from California. The export of U.S. agricultural commodities, fresh or otherwise, must be encouraged. Removing such an impediment to the export of perishable agricultural commodities under the CCC export credit guarantee program is to be supported, and I, too, urge the Department of Agriculture to amend its regulations accordingly.

Mr. HELMS. Mr. President, although these comments do not apply specifically to the agricultural export credit revolving fund in our bill, they do apply to one of the CCC programs that relate to those to be funded by this revolving fund. I thank my able colleagues for their comments. I support doing whatever is necessary to insure that the export of U.S. agricultural commodities, perishable or otherwise, is promoted through our governmental programs. Thus, I encourage the Department of Agriculture to look at its GSM-102 regulations and consider whether some, or all, of the transportation costs for certain perishable commodities should be covered by the guarantees.

Mr. HELMS. Mr. President, the interest in finding a remedy to problems that are supposed to exist in the tobacco program must be tempered with reality.

Earlier, reference has been made to the hearings before the International Trade Commission in which the export potential of U.S. leaf tobacco was explored, and in which possible damage to the tobacco price support program was evaluated.

The report of the ITC was negative. That is, it found that imports are not causing harm to the price support program—that it is sound in its financial condition and in its prospects for the future. Allow me to quote from the report filed in the Federal Register on September 2, 1981:

> Loan stocks of Flue-cured tobacco have been steadily declining since 1972 and are now at their lowest level since 1977. The amount of tobacco placed under loan each year has been significantly lower since 1978 than during 1974–77.
>
> We have found that the cost to the Government of operating the program quite plainly has not been increasing relative to past years. In light of recently developed information, USDA estimates of financial losses on the 1975 crop and on subsequent crops appear to be exaggerated.
>
> The Flue-cured stabilization cooperative projects that substantial profits will be made on sales from crop years 1976–80.

As regards burley tobacco, the ITC report continues:

> Loan stocks are practically nonexistent. No burley was placed under loan in 1980, and the CCC reports no losses from sales or other disposal operations.

Mr. President, this evidence is compelling proof that the kind of tampering with the program suggested by the amendment I oppose will not solve problems relating to the tobacco trade, regardless how it is advertised.

Obviously, those who have carefully studied tobacco issues come to conclusions different from those who would legislate major changes without the benefit of hearings or the rest of the normal legislative process.

I ask unanimous consent to have the report of the International Trade Commission printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

[International Trade Commission]

CERTAIN TOBACCO; REPORT TO THE PRESIDENT ON INVESTIGATION NO. 22–43—AUGUST 21, 1981

FINDINGS AND RECOMMENDATIONS

On the basis of the information developed in the course of the investigation, the Commission [1] finds and recommends that tobacco, provided for in items 170.3210, 170.3500, 170.6040, and 170.8045 of the Tariff Schedules of the United States Annotated (TSUSA), is not being and is not practically certain to be imported into the United States under such conditions and in such quantities as to render or tend to render ineffective, or materially interfere with, the flue-cured tobacco program or the burley tobacco program of the Department of Agriculture, or to reduce substantially the amount of any product being processed in the United States from such tobacco.

BACKGROUND

The Commission instituted its investigation on March 5, 1981, following the receipt on January 18, 1981, of a request from the President. The investigation was instituted pursuant to section 22(a) of the Agricultural Adjustment Act (7 U.S.C. 624(a)) to determine whether tobacco, provided for in items 170.3210, 170.3500, 170.6040, and 170.8045 of the TSUSA, is being or is practically certain to be imported into the United States under such conditions and in such quantities as to render or tend to render ineffective or materially interfere with, the tobacco program of the Department of Agriculture, or to reduce substantially the amount of any product being processed in the United States from such tobacco.

Notice of the Commission's investigation was published in the Federal Register of March 11, 1981 (46 F.R. 16162). A public hearing was held in Washington, D.C., on June 24 and 25, 1981. All interested parties were afforded an opportunity to appear and to present information for consideration by the Commission.

This report is being furnished to the President in accordance with section 22(a) of the Agricultural Adjustment Act. The information in the report was obtained at the public hearing, from interviews by members of the Commission's staff, from information provided by other Federal and State agencies, and from the Commission's files, submissions from the interested parties, and other sources.

---

STATEMENT OF CHAIRMAN BILL ALBERGER, VICE CHAIRMAN MICHAEL J. CALHOUN, AND COMMISSIONER PAULA STERN

I. INTRODUCTION

Section 22 provides that relief from import competition shall be granted if the President finds that articles "are being or are practically certain to be imported . . . in such quantities as to render or tend to render ineffective, or materially interfere with . . ." certain agricultural programs.[2] The statute thus requires that two different events occur before relief is granted. First, with regard to the imports, the article must be imported or be practically certain to be imported. The "practically certain" standard means that the probability of imports must be highly likely. Mere speculation as to future imports that will cause harm to a program is not sufficient.

Second, after the import test has been met, it also must be shown that harm to the program is occurring or is threatened by those imports. The most severe harm would "render ineffective" the program. Relief from imports may also be provided if imports are shown to "materially interfere with" a program. Material interference is more than slight interference but less than major interference. A program which has been rendered ineffective has also suffered material interference, although the reverse may not be true. Therefore, material interference is the less stringent of these two standards. We believe that the Commission should consider both of these standards in order to provide the fullest advice possible to the President.

Finally, relief from prospective harm by imports may be provided if their importation is practically certain to materially interfere with or tend to render ineffective a program.[3] Tendency to render ineffective must, of course, be more than speculative. A real and imminent harm to the program in question must be shown. In this case we find that none of the requisite harms to the program is present and, therefore, find that relief is not warranted.

II. SUMMARY OF REASONS

Our determination in this case is based upon several factors which indicate to us that the conditions for imposing import restrictions under Section 22 do not exist. In reaching our conclusions we have considered the impact of imports on the purposes established for the programs and the impact on the operation of the programs.

While there has been a large increase in the volume of imports of burley and flue-cured tobacco since 1975, imports in prior years characteristically have been very low and, in our view, the market share enjoyed by imports is not sufficient to materially affect the USDA tobacco programs.

Furthermore, the information presented to us during this investigation clearly indicates that the programs are healthy and are not suffering the type of harm or interference contemplated by the statute. USDA concedes this fact with respect to the burley program. With respect to the flue-cured program, the evidence weighs against USDA's representations. For example, loan stocks of flue-cured tobacco have been steadily declining since 1978 and are now at their lowest level since 1977. The amount of tobacco placed under loan each year has been significantly lower since 1978 than during 1974–77.

In addition, we have found that the cost to the Government of operating the program quite plainly has not been increasing relative to past years. In light of recently developed information, USDA estimates of financial losses on the 1975 crop and on subsequent crops appear to be exaggerated. While there was a slight loss of $5.6 million on the 1974 crop and there may be a loss of about $11 million on the 1975 crop, these losses are not comparable to the average losses experienced in the period 1950–70. They simply are not of a magnitude to suggest material interference or ineffectiveness of the program. Moreover, in stark contrast to USDA estimates, the Flue-cured Stabilization Cooperative (FCS) projects that substantial profits will be made on sales from crop years 1976–80.

With respect to the prospective impact of imports on the programs, there is no evidence to demonstrate that imports are tending to render the program ineffective or that they are practically certain to be imported so as to cause future harm. While the best estimates do indicate a long term growth in imports, such an event is too protracted to be a basis for concluding imminent harm. Moreover, information on the current crop is that because of its high quality auction prices are high, loan placements are down sharply over prior years, and processors are dipping into loan stocks to obtain lower grade tobacco.

---

Footnotes at end of article.

While USDA is alarmed by the apparent long-term decline in U.S. competitiveness vis-a-vis other tobacco producing countries, the facts before us do not suggest that harm is imminent.

Finally, the purposes of the tobacco programs, including assuring adequate income to farmers and fair prices to consumers, maintaining a balanced supply, and providing a balanced flow of tobacco in interstate and foreign commerce, are currently being achieved.

III. THE TOBACCO PROGRAMS OF THE USDA

The purposes of USDA programs dealing with tobacco, as well as with certain other agricultural commodities, are set forth in section 2 of the Agricultural Adjustment Act of 1938:

"It is hereby declared to be the policy of Congress to continue the Soil Conservation and Domestic Allotment Act, as amended, for the purpose of conserving national resources, preventing the wasteful use of soil fertility, and of preserving, maintaining, and rebuilding the farm and ranch land resources in the national public interest; to accomplish these purposes through the encouragement of soil-building and soil-conserving crops and practices; *to assist in the marketing of agricultural commodities for domestic consumption and for export; and to regulate interstate and foreign commerce in cotton, wheat corn, tobacco, and rice to the extent necessary to provide an orderly, adequate and balanced flow of such commodities in interstate and foreign commerce through storage of reserve-supplies, loans; marketing prices for such commodities and parity of income, and assisting consumers to obtain an adequate and steady supply of such commodities at fair prices.* (Emphasis added.)

There are no other specific legislative purposes articulated for the tobacco programs.

With respect to types of tobacco covered by this investigation, the purposes set forth in the 1938 Act are accomplished through two different programs administered by USDA; the flue-cured tobacco program, and the burley tobacco program.[4] Section 22 provides for relief when the President finds that "any article or articles are being or are practically certain to be imported . . . as to render or tend to render ineffective, or materially interfere with, *any program or operation undertaken under this chapter or the Soil Conservation and Domestic Allotment Act . . . or any loan purchase or other program or operation undertaken by the Department of Agriculture. . . .*" We therefore have made findings and recommendations with regard to each program.

The specific programs of the Department of Agriculture that are of concern to the Commission in this investigation are those which support the flue-cured and burley types of tobacco. Under these programs, the price farmers receive for their tobacco is supported by a loan program that establishes minimum prices for every grade of these tobaccos. The average support price of tobacco is set by a formula based on the parity index (index of prices paid by farmers). A support price for each individual grade is established by USDA to reflect market conditions to the extent possible, provided that the average of prices of all grades weighted by the historical share of each grade in the overall crop must equal the statutory support price. This average price is $1.58 per pound for 1981.

The support programs further require that the Secretary of Agriculture establish annually a national poundage quota for both types of tobacco and, in the case of flue-cured tobacco, also an acreage allotment, thereby limiting the amount of tobacco which can be brought to market by growers. With the exception of allowing up to 10 percent overmarketing by a farmer (which is then subtracted from his quota in the next year), any tobacco grown in excess of a farmer's prorated marketing quota cannot be marketed except with severe penalties. The purpose of these marketing limitations is essentially to assure that the market will not be oversupplied with tobacco, causing market prices to decline below the support price and causing increased quantities of tobacco to be placed in the Government stocks.

Producers may place any or all of their tobacco under loan if auction of that tobacco does not bring a bid from prospective buyers at least equal to the appropriate support price for the grades offered. The grower, whether he places his tobacco under loan or sells it to a dealer, receives payment immediately through the auction management. The tobacco placed under loan is generally processed by agents of the USDA into the strip form and then stored until after the auction season is complete. At that time the tobacco is made available for sale at a price no lower than 105 percent of the support price. Certain fees, carrying charges, and interest charges are added to this price during the time tobacco remains under loan. When all tobacco under loan from a particular crop is sold or otherwise disposed of, a financial accounting is made. After expenses are paid the remainder of any proceeds are applied by the Commodity Credit Corporation (CCC) against the loan principal and then against the outstanding interest. The surplus of income over expenses, if any, is not accumulated by the CCC. These so-called profits are distributed to the growers through their associations while losses, if any, are absorbed by the CCC.

IV. THE QUESTION OF HARM TO THE BURLEY PROGRAM

USDA testified before the Commission that only the flue-cured tobacco program is being adversely affected by imports. Imports of burley and other types of tobacco which are entered into the United States under the four TSUSA numbers covered by this investigation are not believed by USDA to be harming the USDA burley program. We concur with the USDA in this assessment.

The burley tobacco program is unquestionably healthy. Although imports of this type of tobacco are believed to have increased in recent years, this increase is clearly in response to increased demand for burley tobacco. The basic marketing quota for burley was stable at about 614 million pounds[5] from the 1979 crop year through the 1980 crop year and was increased to 660 million pounds in 1981. The effective quota, that is, the basic quota adjusted for under- or over-marketing of the previous year, has been increased to 851 million pounds. Stocks both under loan and held by dealers and cigarette manufacturers have declined. Loan stocks are practically non-existent, no burley was placed under loan in 1980, and the CCC reports no losses from sales or other disposal operations.

No testimony at the Commission's hearing and no other information available to the Commission supports an argument that imports are adversely affecting the burley program. We, therefore, determine that burley tobacco is not being imported and is not practically certain to be imported under such conditions and in such quantities as to render or tend to render ineffective, or materially interfere with, the burley program of the Department of Agriculture.

V. THE QUESTION OF HARM TO THE FLUE-CURED PROGRAM

USDA and other participants testified that imports of flue-cured tobacco were materially interfering with this program and that projected increases in such imports will materially interfere in the future. Major elements of testimony in favor of relief included the following:

(1) Imports have increased from an annual level of 30 million pounds or less before 1976 to as much as 85 million pounds in 1979. USDA projects imports to increase by about 8 percent each year until at least 1986.

(2) Imports have displaced at least 225 million pounds of tobacco from the 1975–80 crops which would otherwise have been purchased by dealers or cigarette manufacturers, causing the displaced domestically produced tobacco to be placed under loan. During the next five years additional displacement is expected to exceed 400 million pounds.

(3) Because of the addition of imports to domestic inventory, marketing quotas have been reduced substantially since 1975.

(4) Because of the availability of foreign tobacco at prices well below that of domestic tobacco from either the auction floor or from loan stocks, the Flue-cured Stabilization Cooperative which handles the stocks has been unable to sell and will continue to be unable to sell substantial quantities of tobacco otherwise competitive with imports, suffering financial losses projected at as much as $123 million from the 1975–80 crops currently under loan, and over $200 million from future crops.

In order to halt the interference with the program and to prevent future interference, USDA suggested that a quota on imports be established at the average level of such imports from 1978–80, or approximately 72 million pounds.

Of the standards for finding harm to the flue-cured tobacco program under section 22, only material interference was claimed. No participant in this investigation alleged, nor does any information before us suggest, that the quantity of imports is such as to render the program ineffective. Regarding the assertion that imports are materially interfering with the program, we can find no such interference, nor do we find indications of imminent harm. While there are troublesome factors affecting the operation of the flue-cured program, imports are not entering at such a level or under such conditions as to cause the requisite interference; nor is the program suffering or facing the adverse circumstances contemplated by section 22.

Imports. Imports of flue-cured tobacco have indeed increased to record high levels in recent years. In 1976 imports began to increase dramatically, reaching 54 million pounds in 1977, 74 million pounds in 1978, and 85 million pounds in 1979. While imports of flue-cured tobacco appear to have declined to 76 million pounds in 1980, import penetration has remained near the record high level of 15 percent of domestic utilization. From the time the program was created by the Congress, until 1975, imports were at a very low level, never exceeding 30 million pounds in any year. Import penetration during that period did not exceed 3 percent of domestic utilization of U.S. produced flue-cured tobacco. Therefore while recent increases appear dramatic, it must be remembered that they are from a very low level.

Domestic utilization of tobacco is not the only yardstick by which the impact of imports can be measured. Nearly one-half of all domestic tobacco production is destined for export markets. Even a large portion of tobacco used for domestic production of cigarettes is ultimately exported in that processed form. Although imports are at record high levels, they remain at less than one-sixth of the level of flue-cured tobacco exports and import penetration relative to all utilization of U.S. produced flue-cured tobacco is only 8 percent.

It is apparent that the major reason for the increase in imports in recent years is the price differential which has resulted from the rapid escalation of the U.S. support price. Prices paid by cigarette manufacturers for U.S. produced tobacco are substantially

Footnotes at end of article.

above those for tobacco from other producing nations. Much U.S. produced tobacco is of higher quality than that available abroad. This is a fact clearly demonstrated by the large volume of U.S. exports despite their high prices. However, there is also significant foreign production comparable to lower quality, neutral flavored domestic tobacco at prices below the support price. The average price of imported flue-cured tobacco in the United States was $.60 per pound below that of domestic tobacco, even after adjusting for quality differences.

It is quite possible that imports will increase further under these conditons of competition, as predicted by USDA. However, though these imports undoubtedly will have some effect upon the program, we do not believe that they have reached or are likely to reach in the immediate future a level which would constitute material interference.

The question of present harm. We believe that the program is healthy and is not suffering the type of harm contemplated by the statute. USDA testified that dealers and cigarette manufacturers have been purchasing and placing in inventory increased quantities of imported tobacco. It suggested that, as a result, those buyers were reducing their purchases from FCS-held loan stocks causing those stocks to increase. In addition, buyers were purchasing imports rather than domestic tobacco from the tobacco auctions causing FCS to purchase the displaced tobacco at the support price, thereby raising the level of loan stocks and causing unusual expenditures. In order to balance supply (which includes the larger quantities under loan) with demand, USDA testified it had reduced marketing quotas. We have examined all these factors in detail.

The level of uncommitted stocks (those still available for sale)[6] as of the beginning of each crop year has been declining steadily since 1978 and, by July 1, 1981 had declined to 468 million pounds. Recent sales in the first few weeks of the 1981 crop year have caused uncommitted stocks to decline even further to what may be the lowest level since at least mid-1977. We cannot speculate as to what level these stocks might be were imports not available during recent years, but the trend is in a positive direction despite the lower quality of recent harvests and the higher volume of imports in recent years.

Another indicator of material interference specifically identified by USDA and other supporters of import restrictions is the amount of tobacco being placed under loan each year. This amount reached 277 million pounds in 1976, declined to about 64 million pounds in 1978 and increased to 138 million pounds in 1980. However, an examination of changes in the amount of flue-cured tobacco placed under loan shows that there is no discernible positive correlation between that quantity and the level of imports. In fact, to the extent a relationship exists between import levels and the amount of flue-cured tobacco placed under loan, it appears to be a negative correlation.[7] Furthermore, the amount of tobacco placed under loan each year has been significantly lower since 1978 than during 1974–77.

The level of tobacco placed under loan is a function of demand in the market for the tobacco offered at a price which can be no lower than the support price. Since support prices are set in advance of the harvest, there is no method by which USDA can adjust the support prices on the approximately 150 grades of flue-cured tobacco to perfectly reflect market conditions. If a crop is of generally low quality, it is probable that the support prices on some, and possibly many, of the various grades will be higher than prospective buyers believe appropriate. Such tobacco will inevitably be placed under loan. Similarly, it is probable that in the event of a low quality crop, and particularly if that crop is large, there will be more of some lower quality grades than the market can comfortably absorb at support prices. Under such conditions it would be expected that farmers will place larger than desirable quantities under the loan program. Such tobacco would remain as part of loan stocks until demand for those grades at the offered prices increased relative to the supply at the tobacco auctions. This is precisely one of the means by which a commodity buffer stock is intended to accomplish its purpose of maintaining stable prices and supplies. The smooth operation of the flue-cured stabilization mechanism points to a system that is functioning as intended.

USDA has in recent years made adjustments in the program which will serve to encourage lower loan stock levels in future years. Among these are incentives to farmers not to harvest the lowest quality tobacco which is in least demand, and the removal of price support for a number of grades covering this lower quality tobacco. As a separate matter, the interest rate policy of the CCC may have operated as a cause, different from imports, of large FCS-held uncommitted stocks. The interest rate charged by the CCC was set for the life of the loan and, owing to escalating costs of money, rapidly fell below commercial interest rates. For example, the interest charged on tobacco now under loan is as low as 6 percent. By 1981, the commercial rates exceeded the loan rate by as much as 14 percentage points. So long as it is reasonable to expect commercial interest rates to remain high or to increase, there is clear incentive for flue-cured purchasers to maintain a measure of their inventory under FCS control, thereby availing themselves of what is essentially a subsidized inventory. Although there will continue to be an interest rate differential between the CCC rate and commercial rates, recent changes in policy now provide for a higher variable interest rate on CCC loans. The reduced differential between loan rates and commercial rates, although still about 5 percentage points at this time, will be less likely to encourage a build-up in FCS-held tobacco stocks.

In addition, it is our view that the current condition of the loan program is not an indication of harm. Rather it is the result of the proper operation of the system. When harvests were of good quality relative to other years, as in 1978 and 1979, the average price paid to farmers exceeded the support price by a considerable margin. In those years tobacco placed under loan was in relatively small quantities, suggesting that demand was strong relative to supply and suggesting that imports increased in those years partially because of this strong demand. In other years, such as 1977 and 1980, when the crop was rather poor quality, market prices were close to the support price and large quantities were placed under support. In 1975 the quantity offered was simply too large for the market to clear at prevailing prices.

If the system is working properly, tobacco which is placed under loan is ultimately sold at little or no cost to the program. USDA testified that the losses already incurred and likely to be incurred in the immediate future were the most telling indicators of harm from imports. A loss of about $6 million had already occurred in sales from the 1974 crop and, on the basis of some sales at a loss over the period December 1979 to March 1981, USDA projected that losses would continue into the future. However, in our view such losses are not likely to occur.

The only loss which has actually occurred during the last decade is that on sales from the 1974 crop. Production in that year was among the highest in the decade and all but 25 million pounds were sold at auction at prices which exceeded the $0.83 support price by an average of $0.22 per pound. This was nearly the smallest quantity placed under loan in well over a decade, and this tobacco was described in testimony as the "leavings of the leavings." The loss incurred on these sales cannot be convincingly laid at the door of imports.

USDA states that, on the basis of sales prices obtained in recent bid sales of the 1975 crop, losses likely to be incurred on that crop can be estimated at $34 million. However, FCS, which is directly responsible for determining list prices and conducting the sale of stocks, estimates losses at $11.6 million if those stocks are sold at list price. The extreme estimate made by USDA is belied by the most recent events in sales by FCS.

Since the 1981 markets opened in late July, over 40 million pounds of tobacco have been sold from stocks of the 1975 crop, and these sales included large quantities of that tobacco which previously had been made available for sale at bid. This tobacco was not sold owing to lack of interest among potential buyers at a price acceptable to FCS. All 40 million pounds, accounting for over one-third of the remaining stocks of the 1975 crop, were sold at list price. Only a small amount of tobacco from the 1975 crop similar to that previously offered in bid sales remains in loan stocks (approximately 5 million pounds). There is no reason to believe that this tobacco, or any other from the 1975 crop, will be sold at a loss approaching that projected by USDA.

Moreover, if the remaining stocks are sold at list prices, the loss would more nearly approximate the lower FCS estimate than that of the USDA. High auction prices for the 1981 crop and the removal of interest rate incentives are likely to increase the appeal of tobacco now held by FCS. The increased demand for the grades currently held under loan may allow FCS to revalue the tobacco upward, reducing losses further. An additional encouraging indication is that this crop has been held by FCS for only about 6 years. The average length of time before complete disposal of crops from 1955–70 was over eight years, and the average for the 1971–74 crops was over six years. Of those crops after 1966, only the 1974 crop was sold at a loss; others were sold at profits of up to $16 million.

USDA further suggested that if losses on the 1975 crop were $34 million, other crops held by FCS would also be sold at substantial losses. However, since there is no convincing evidence that the 1975 crop will be sold at a loss greater than that estimated by FCS, there is no reason to doubt the FCS estimates on other crop years as well. FCS estimates that stocks from each of those crops will be sold at substantial profit and that the net profit for all crops under loan through 1980 will be about $17 million. It should be noted that FCS is not permitted by the legislation to carry over any profit it may make from sales of one year's crop to balance losses incurred from sales of another year's crop and, technically, it cannot make a profit. All gains must be distributed to the farmers participating in the program after expenses have been paid. It may be desirable that each and every crop be sold at no loss to the program, but losses must be expected on occasion. Only the size and frequency of such losses are in question. The operation of the program has certainly improved since 1950–70 during which the program incurred frequent and, sometimes, large losses. We do not believe that the relatively small loss from sales of the 1974 crop and the uncertain loss from other crops constitutes material interference from imports.

USDA also argues that material interference to the program has manifested itself in the need to reduce the marketing quotas since 1976. Marketing quotas for flue-cured tobacco have decreased from the level of the

Footnotes at end of article.

mid-1970's. In 1975 the basic quota was 1,491 million pounds and, in 1981, it is only 1,013 million pounds. However, the 1975 quota was a record high quota which exceeded the levels of preceding years by nearly 40 percent. The decline since that time is in fact only a return from several years of abnormally high marketing quotas to the levels in effect before 1974.

As support for its decision to reduce marketing quotas, USDA noted that the domestic utilization of flue-cured tobacco has declined by 17 percent since 1972 while exports have declined only slightly (although exports have declined by 18 percent from 1973 levels). Utilization of U.S. produced flue-cured tobacco in 1980 was 113 million pounds below utilization in 1971 while imports had increased by 65 million pounds. Thus, USDA argues that processors are turning more and more to imports to replace domestic tobacco. However, in the same period, cigarette manufacture in the United States increased 24 percent to about 714 billion cigarettes in 1980. It is apparent that factors other than imports are at play here. In particular, cigarette manufacturers have apparently become considerably more efficient in the use of tobacco in their product or have shifted the tobacco content of cigarettes from flue-cured to some other type of tobacco. In 1971 manufacturers produced about 860 cigarettes from a single pound of flue-cured tobacco (blending it with other tobaccos, both domestic and imported). In 1980 manufacturers produced 1.140 cigarettes from each pound of flue-cured tobacco purchased either domestically or from foreign sources, an increase of one-third. We find, therefore, that it is not primarily the presence of imports which have caused the decrease in the marketing quotas, but rather a variety of other factors which are beyond the control of the program and are also beyond the scope of section 22.

USDA testified that material interference had already occurred, but their recommendation of 72 million pound quota on imports of flue-cured tobacco is not consistent with that conclusion. This level is the average of imports during the most recent three years for which data are available. However, imports during those years were the highest in the history of the program, and only in 1979 did imports substantially exceed the recommended quota. If a level of imports substantially lower than 72 million pounds was interfering with the program as early as 1976 and imports are now materially interfering with the program, there can be no justification to allow that quantity to be entered in the future.

The question of future harm to the program. From the language of the statute, there are two alternative standards by which the prospective impact of imports may be sufficient to warrant relief. The first standard is that articles are practically certain to be imported under such conditions and in such quantities as to materially interfere with the flue-cured program. The second standard is that articles are being imported or are practically certain to be imported under such conditions and in such quantities as to tend to render ineffective the flue-cured program.

As is the case with allegations of current injury, no representation has been made nor data collected by us which suggests that the program is likely to be rendered ineffective. The remaining statutory basis for considering future harm to the program is that there are articles being imported which are practically certain to materially interfere with the program. Again, we can find no data which allow for a conclusion that there is a quantum of flue-cured tobacco which is "practically certain to be imported" under conditions or in quantities which would materially interfere with the support program.

In the first instance, the USDA forecast of 8 percent yearly import growth through 1986 does not support a conclusion that imports are practically certain to cause material interference. Second, current information on the 1981 harvest indicates that the quality of the tobacco being sold at recent auctions is better than that in most recent years, and there appears to be a short supply of lower grade tobacco similar to that which has been prevalent in FCS loan stocks. Prices offered at auction are reported by the USDA to be significantly higher than the support price—which is itself 12 percent higher than in 1980—and the quantity of tobacco being placed under loan in the first few weeks of this auction season is well below the rate of 1980. As noted above, the higher market prices provide incentive for purchases of older tobacco from FCS. In fact, there have been significant purchases from FCS stocks, at list prices, of grades of tobacco which USDA suggested might be sold only at a loss.

We recognize that these events do not necessarily guarantee a long term positive trend in all the factors which we have considered. It is possible that, as with any agricultural commodity, conditions in the tobacco markets may change very rapidly. We are, however, of the view that unless some entirely unforeseen event causes a rapid turn-around in the market, that these imports cannot be said to be practically certain to harm the program in the foreseeable future.

The purposes of the Program. Finally, we have concluded that the purposes of the programs are currently being achieved. The primary purpose of the program, according to USDA, is the maintenance of farmers' incomes from growing and marketing flue-cured tobacco. The first factor which determines income is the price at which a farmer's tobacco is sold. The price of tobacco is guaranteed by the price support legislation to be some percentage of parity—that is, the price of a pound of tobacco is guaranteed to be able to buy some percentage of what it could buy during the period 1910–14. This percentage has been changed during the history of the program, most recently in 1960. The legislation has essentially defined by this process what Congress considers to be a minimum fair price for tobacco both for growers and for consumers. This price is still guaranteed through the price support system. Provided the program operates effectively there is no manner in which imports can interfere with a grower obtaining that price for any tobacco he markets within his quota.

The second factor which determines growers' incomes is the quantity of tobacco which they are allowed to place on the market for sale at or above the support price. As discussed above, this quantity has varied considerably over time. However, we note that the gross returns from sale of tobacco has increased. In 1972, 1,022 million pounds were marketed at an average price of $0.853 per pound (13 cents above the support price) for a total crop value of $872 million. In 1975, marketings reached an all-time record of 1,415 million pounds at an average price of $0.998 per pound (6.6 cents above support) for a total value of $1,412 million. In 1980, the support price had risen to $1.42 per pound and farmers received an average of $1.45 per pound on a total crop of 1,086 million pounds for a total value of $1,571 million. In each year, the value of the crop has increased and the average price has been above the support price determined by the statutory formula. The gross return on an acre of harvested tobacco in 1977 was over $2,300, far exceeding most other crops including those which have support programs (e.g. sugar, peanuts). While tobacco accounted in 1977 for only 0.3 percent of total acreage planted in the United States, it accounted for 4.4 percent of the total value of the crops. Additionally, from 1972 to 1979 the average return to land, management, and allotment for flue-cured tobacco in North Carolina increased from $8,200 to $15,400, or 89 percent.[3] The increase in the support price during the same period was only 79 percent, suggesting that growers have improved their position relative to the support price established by Congress.

Without addressing the issues implicit in the income distribution effects of the practice of leasing tobacco allotments, we note that testimony at the hearing indicated that the average lease value of an allotment was about $0.40 per pound in 1980 and had increased in recent years. Therefore, either the actual growers (who often are not the same as allotment holders) are willing to make less money on their tobacco operations, or the guaranteed price of tobacco has increased more than have the costs of growing and curing the tobacco. We cannot under these conditions find otherwise than that the purpose of the tobacco program in providing tobacco farmers with a fair income is being accomplished.

The program is also designed to provide for balanced supply-demand relationships in the marketplace for flue-cured tobacco. This is primarily accomplished through the process of setting marketing quotas. Such quotas are largely determined by a formula in which the man variables are the historical levels of domestic utilization, exports, existing inventory both in private and FCS stocks, and the expected crop size. The North Carolina Farm Bureau observed in its post-hearing brief that no mention is made in the 1938 Act of the role of imports in the determination of marketing quotas and that all variables are defined in terms of U.S. produced tobacco only. Regardless, the legislation does allow the Secretary of Agriculture the discretion to adjust the marketing quota according to other factors, such as imports, which he might deem relevant. We do not believe that the term "adequate and balanced flow" in the 1938 Act is necessarily to be interpreted as an increasing or even stable market for domestic tobacco, but only that there should not be unexpected but otherwise avoidable imbalances in the markets for tobacco. There has been a gradual decline in marketing quotas which roughly parallels the decline in utilization of flue-cured tobacco. The similarity in these changes indicates that the system is operating as it should despite the presence of import competition. We find no evidence that there is an import-induced imbalance in the marketplace for flue-cured tobacco.

Another purpose of the program is the regulation of foreign commerce. Although the tobacco legislation does not define the importance of exports to the programs, they are clearly a significant factor in their operation. The formula by which the Secretary of Agriculture determines marketing quotas includes as one of its variables the average level of exports. In the determination of support prices for individual grades, USDA has considered the possible effects of overpricing tobacco grades favored by foreign buyers. In recent years exports consistently have accounted for nearly one-half of total utilization of U.S. produced flue-cured tobacco and, despite the recent increases in the level of imports, currently exceed imports by a six to one ratio.

Any complete discussion of the tobacco program must include the positive contribution of exports to the purposes of the program and the potential impact upon those exports of import restrictions. It is our view that although the appeal of U.S. produced flue-cured tobacco in foreign markets continues to be strong, it is experiencing increasing competition on the basis of both quality and price. The declining trend in U.S. exports, both absolutely and relative to other countries' exports, is particularly disturbing as it may indicate potential for tougher competition in the domestic market from foreign

Footnotes at end of article.

producers. Close attention should be given to the causes and solutions for the ailing export market in any examination of the industry and the program.

VI. THE PROCESSING CLAUSE

Section 22 includes a clause which states that if imports "reduce substantially the amount of any product processed in the United States from" a commodity which is the subject of a USDA program, restrictions may also be imposed by the President. This clause no longer appears to have relevance to investigations under section 22.[9]

The processing clause was added to section 22(a) to provide an avenue of relief of processors of agricultural articles subject to a processing tax that was part of the Agricultural Adjustment Act of 1933. That processing tax was struck down as unconstitutional in 1936 in *United States* v. *Butler*, 297 U.S. 1 (1936), and the clause has not formed the basis for a Commission determination since that time.

Nevertheless, we note that the products which we consider to be the "product processed" from tobacco are cigarettes. Production of cigarettes has increased steadily during any recent period which might be chosen. Since 1972, production has risen by about 24 percent to 714 billion cigarettes in 1980. There is likewise no indication that imports will reduce production of cigarettes in the foreseeable future. We therefore find that tobacco, either flue-cured or burley, is not being imported under such conditions and in such quantities as to reduce substantially the amount of any product processed in the United States from domestic flue-cured or burley tobacco.

Statement of Commissioner Catherine Bedell

On the basis of the information before me in this investigation I have found that—

"(1) Flue-cured tobacco, provided for in items 170.3210, 170.3500, 170.6040, and 170.8045 of the Tariff Schedules of the United States Annotated (TSUSA) is being or is practically certain to be imported into the United States under such conditions and in such quantities as to materially interfere with the flue-cured tobacco program of the Department of Agriculture, but that

"(2) Burley tobacco, provided for in items 170.3500, 170.6040, and 170.8045 of the TSUSA, is not being and is not practically certain to be imported into the United States under such conditions and in such quantities as to render or tend to render ineffective, or materially interfere with, the burley tobacco program of the Department of Agriculture, or to reduce substantially the amount of any product being processed in the United States from such tobacco."

Therefore, I recommend that the President proclaim a quota on imports of flue-cured tobacco in order that the entry of such tobacco will not materially interfere with the flue-cured tobacco program.

Before discussing the data supporting my respective findings and recommendation, I wish to discuss four points central to my decision in this case. The first three points are also central to my decision in section 22 cases in general.

First, the Commission's task in a section 22 investigation is to determine the impact, if any, that imports are having on a Department of Agriculture (USDA) program or on a product processed from a product covered by such a program. While the Commission, in assessing such impact, must examine the program and its method of operation in order to understand how it works, it is not the Commission's responsibility or function to question its merits or the manner in which the Department of Agriculture administers it. The programs are authorized by Congress and administered by the Department of Agriculture. Thus, any criticisms of the programs directed to the Commission during the investigation are not relevant to a Commission finding under section 22 and accordingly are not taken into account.

Second, keeping in mind the purpose of the particular program and its method of operation, I have considered in this and in prior cases[10] certain economic factors and data which I believe are key in determining the impact, if any, of imports on the operations of a program. For example, I have considered such factors as import levels, domestic production and inventory levels, inventories held by USDA under the particular program, changes in the cost to the Government in running the program, price differences between the domestic and imported products, world stocks of the imported product, and whether various objectives of the program are being met. The key test is whether imports are rendering or tending to render a program ineffective or materially interfering with it. Basic objectives of a program may be satisfied, but a program may nevertheless be materially interfered with if imports are causing increases in domestic stocks under loan and losses to the program.

Third, officials of the USDA are the most expert witnesses to testify and present information during a section 22 investigation. USDA has administered the programs for almost 50 years, is the closest party to them, and should be in the best position to know when a program is in difficulty and what is causing the difficulty. Other parties may of course rebut the assertions made by USDA and from time to time have successfully done so. However, when other parties have been unable to persuasively rebut the contentions and supporting information of the Department, I have given great weight to the sworn testimony of the Department.

Fourth, in the present case the scope of investigation covered imports of flue-cured and burley tobacco. Both types are grown in the United States, and each type is the subject of a different USDA program. Imports of both, whether viewed by type or in the aggregate, do not necessarily have the same impact on both programs. Further, the programs, while sharing many features and objectives, are different. For example, the flue-cured tobacco program includes an acreage allotment system, and the burley tobacco program does not. Thus, I have examined the impact of imports on each program and have, in so doing, made separate findings with respect to the impact of imports on each program.

My findings with respect to the impact of imports on each of the two programs, together with my recommendation of a quota on imports of flue-cured tobacco, are discussed in detail immediately below.

*Flue-cured tobacco*

The program.—The authority for USDA's flue-cured tobacco program (as well as that for its burley tobacco and other programs) is set forth in the Agricultural Adjustment Act of 1938, the Agricultural Adjustment Act of 1949, and the Commodity Credit Corporation Charter Act. The objectives of the programs are set forth in the 1938 act and include the stabilizing, supporting, and protecting of farm income and prices, assistance in the maintenance of balanced and adequate supplies of the subject commodities, including tobacco, and the facilitation of an orderly distribution of such commodities.[11]

The flue-cured tobacco program consists of three parts—marketing quotas, an acreage allotment program, and price supports. The marketing quota specifies the quantity of tobacco that may be sold without penalty in a given marketing year from a qualifying farm. The acreage allotment specifies the maximum acreage that may be planted in tobacco in a given year on a qualifying farm. The 1949 act provides that when marketing quotas are in force, price supports are available to any producer who is unable to sell his tobacco for at least the price-support rate (also known as the loan level). Price supports are made available by means of nonrecourse loans made through producer cooperative associations, with financing by the Commodity Credit Corporation (CCC).[12]

Material interference.—Flue-cured tobacco is being or is practically certain to be imported under such conditions and in such quantities as to materially interfere with the flue-cured tobacco programs.

Imports increased steadily during the past 10 years from 10 million pounds, farm-sales-weight equivalent, in marketing year 1970 to 84 million pounds in 1980.[13] Imports are projected to have been 76 million pounds for the marketing year ended June 1981.[14] U.S. utilization of domestically grown flue-cured tobacco declined during this period, and as a result imported flue-cured tobacco, which in 1970 accounted for less than 2 percent of U.S. utilization, accounted for 13 percent in 1980.[15] Furthermore, USDA projects that these trends will continue, with imports reaching 118 million pounds and accounting for nearly 19 percent of U.S. utilization by marketing year 1985.[16]

In large part because of imports, national marketing quotas for flue-cured tobacco were reduced in 4 of the last 6 crops years (1975–80) and had to be reduced a fifth time in 1981.[17] The marketing quota for the 1981 crop year, the most recent, had to be reduced 7.5 percent from the 1980 level because domestic supplies were considered excessive.[18] The 1981 quota level is 32 percent less than the 1975 level. This downward adjustment of annual marketing quotas caused in part by increased imports has had a negative effect on farm income. While the farm income objective of the program technically has been met through adjustment of the price-support levels, farm income undoubtedly is lower than it would otherwise have been because of the marketing quota reductions.[19]

Most of the imported flue-cured tobacco competes directly with lower quality, lower stalk domestic flue-cured tobacco, which accounts for the major portion of the domestic tobacco currently under loan from the 1975–80 crops.[20] USDA estimates the quantity of domestic flue-cured tobacco from the 1975–79 crops diverted into loan stocks because of imports at 169 million pounds (farm-sales weight), with a loan value of $198 million.[21] It projects additional displacement from the 1980 crop at 56 million pounds, with a loan value of $80 million, and future displacement for the next 5 marketing years (1981–85) at 414 million pounds, with a loan value of $833 million.[22] As of May 1, 1981, uncommitted flue-cured loan stocks from the 1975–80 crops amounted to 476 million pounds (farm-sales weight), representing principal and interest of about $682 million.[23] Although there have been several major sales in recent weeks by the CCC of lower quality, lower stalk tobacco from 1975–76 crop years under loan, it is too early to conclude that these sales represent a trend or basic change in the market situation.[24]

Import penetration is largely the result of lower import prices, which can eventually be translated into losses to the CCC under the program. After adjusting for quality differences, imported flue-cured tobacco is underselling similar domestic tobacco by 60 cents per pound, or by 30 percent.[25] Because tobacco is perishable over a period of time, it will be necessary for the tobacco under loan from the 1975–80 crops to be sold, probably at a substantial price discount, in order to prevent deterioration. USDA projects that the CCC will lose $34 million from the eventual sale of the 1975 crop and $123 million on the 1975–80 crops (including interest).[26] USDA estimates that the projected displacement of an additional 414 million pounds in crop

Footnotes at end of article.

years 1981–85 could cost the CCC an additional $100 million to $150 million.[27]

The price advantage of imports in combination with growing inventories of foreign flue-cured tobacco stores both in the United States and abroad make it practically certain that USDA's flue-cured tobacco program will continue to be interfered with for several years to come if no ceiling on import levels is set. During the last decade domestic stocks of foreign-grown flue-cured tobacco increased steadily from 14 million pounds in 1971 to 166 million pounds in 1980.[28] These stocks accounted for 8.3 percent of total stocks of domestic flue-cured tobacco on July 1, 1980, compared with 3.8 percent on July 1, 1978.[29] Furthermore, a recent study on tobacco by the World Bank shows that there is presently an abundance of low-quality filler grade flue-cured tobacco in world markets and that this abundance will continue for at least the next 4 to 5 years due to expanded production in Brazil, Korea, and Malawi.[30]

In summary, I have found, on the basis of increased and projected increases in imports, import penetration, stocks under loan in the program, and loan losses, that imports are materially interfering with USDA's flue-cured tobacco program. Further, I have found on the basis of the lower prices of imported flue-cured tobacco and the abundance of such tobacco in world markets, that imports of flue-cured tobacco are practically certain to continue to materially interfere with USDA's flue-cured tobacco program. I have found nothing in the information before me that convincingly refutes or rebuts the facts, figures, and projections provided by the Department of Agriculture.

Recommended relief.—I have considered the various relief proposals made by interested parties in this investigation and have concluded that the proposal made by the Department of Agriculture is the most appropriate in the present situation. Therefore, in order that the entry of flue-cured tobacco will no longer materially interfere with USDA's flue-cured tobacco program, I recommend that the President proclaim a quota restricting imports of flue-cured tobacco to an annual level of 72 million pounds, farm-sales weight (52 million pounds, declared weight). This level is equal to the average of estimated flue-cured tobacco imports for the period 1978–80, which I consider to be representative. I suggest that such a quota be applied on a global rather than a country-by-country basis.

I favor the USDA's proposed limitation for several reasons. First, it will halt the rapid increase in flue-cured tobacco imports and reduce them slightly (1980 marketing year imports were 84 million pounds, farm-sales weight, and 1981 imports are projected to be 76 million pounds). At the same time I feel that such a quota is unlikely to disrupt manufacturers' operations, cause domestic shortages, or adversely affect U.S. tobacco product exports. Second, I believe that a quota in this amount will reduce the likelihood that the CCC will be forced to sell the tobacco now under loan at a substantial loss. Third, such a quota should have little, if any, disrupting effect on world markets and therefore cannot serve as a basis for retaliatory action by any of our trading partners (the 1955 waiver under the General Agreement on Tariffs and Trade notwithstanding).

Because marketing conditions affecting an agricultural product like tobacco can change radically from year to year due to the weather and other factors, I suggest that any limitation be reviewed by the Department annually and that the Commission be asked to reevaluate the situation in 3 to 5 years in order to advise whether the quota should be modified or terminated.

*Burley tobacco*

As stated above, USDA's burley tobacco program is similar to its flue-cured tobacco program. A major difference, of course, is that growers of burley tobacco are not subject to an acreage allotment system.

Market conditions relevant to the flue-cured and burley tobacco programs are quite different. Burley tobacco has been in tight supply in world markets for the past 2 years, and the World Bank predicts that this situation is not likely to change much in the next 3 to 4 years.[31] Demand for U.S. burley tobacco is increasing both here and abroad.[32] Virtually no burley tobacco is presently under loan (an estimated 1.3 million pounds, farm-sales weight, was under loan in 1981, compared with 600 million pounds of flue-cured tobacco in 1981), and therefore there is no likelihood of significant losses to the CCC under that program in the foreseeable future.[33] Finally, the USDA, which administers the burley tobacco program and which therefore is the party most knowledgeable about its operations, is of the view that imports are not adversely affecting that program.[34]

Issued: August 21, 1981.

By order of the Commission:

KENNETH R. MASON,
*Secretary.*

FOOTNOTES

[1] Commissioner Bedell dissents in part. Commissioner Bedell finds that flue-cured tobacco, provided for in items 170.3210, 170.3500, 170.6040, and 170.8045 of the TSUSA, is being or is practically certain to be imported into the United States under such conditions and in such quantities as to render or tend to render ineffective, or materially interfere with, the flue-cured tobacco program of the Department of Agriculture, or to reduce substantially the amount of any product being processed in the United States from such tobacco.

[2] The statute also includes a clause referring to products processed from agricultural commodities. This clause is more fully discussed below and in a memorandum to the Commission from the General Counsel (GC–E–197). Appendix H of the report.

[3] It is the view of Vice Chairman Calhoun that relief from prospective harm from imports may be provided if imports are practically certain to be imported under such conditions and in such quantities as to materially interfere with a program or if their importation is such as to tend to render ineffective a program.

[4] A thorough discussion of the distinctions between the programs may be found in Appendix H of the report (memorandum to the commission from the General Counsel, GC–E–196). Also, it is possible that small amounts of other types of tobacco which may be grown in the United States are included in some of the TSUSA categories mentioned in our notice of investigation. However, the best information available indicates that imports of those tobaccos are insignificant. Therefore, this investigation is only concerned with burley and flue-cured tobacco.

[5] This and other references to poundage in this opinion are in terms of farm-sales weight, the weight of tobacco when sold by the grower at auction. After processing and packing, the weight of tobacco is somewhat reduced. One pound packed weight is approximately equal to 1.4 pounds farm-sales weight.

[6] USDA has suggested that because total FCS-held stocks have been higher since 1977 than during the period 1973–76, material interference is occurring. However, these total FCS-held stocks comprise two categories of tobacco. These categories are 1) uncommitted stocks still available for sale and 2) committed stocks which are already sold on paper but have not yet been removed from FCS control. These latter stocks are, in effect, the same as privately held stocks, and they should not be considered still under loan.

[7] For example, in crop years 1977 and 1978 imports increased significantly while loan placements decreased from the preceding years. In 1980 imports declined while placements nearly doubled. See the tabulation on p. A–32 and table 4.

[8] The USDA study which presents this farm income data also found that, while the number of growers had decreased, the size of each farm increased. The income of growers is a stated purpose of the program, but stability in the number of farmers is not. Therefore, it is actually the income per farm which is most relevant to an examination of grower income, rather than the growth in total crop value.

[9] See memorandum to the Commission from the General Counsel, GC–E–197, Appendix H of the report.

[10] *See*, for example, my statement or statements in which I joined in investigation No. 22–42. Peanuts, USITC Publication 1124, January 1981, pp. 5–9; investigation No. 22–41, Sugar, USITC Publication 881, April 1978, pp. 14–16; investigation No. 22–40, Dried Milk Mixtures, USITC Publication 783, July 1976, pp. 8–9; investigation No. 22–39, Cheddar Cheese, TC Publication 653, March 1974, pp. 6–8; and investigation No. 22–38. Wheat and Wheat Milled Products, TC Publication 675, May 1974, pp. 8–10.

[11] See sec. 2 of the 1938 act and USDA testimony during the Commission hearing, transcript, p. 29.

[20] Lower quality, lower stalk stocks are nevertheless quite salable. Cigarettes are made from blends of tobacco, and most blends include a considerable amount of lower quality, lower stalk tobacco.

Unlike most other agricultural products, tobacco is not quickly perishable. In fact, it is at its best after it has been aged for several years. It is not uncommon for tobacco to be held by cigarette manufacturers and other firms and by producer cooperative associations for several years before being used. However, after 5 or more years the tobacco begins to deteriorate, and it is not generally salable after 10 years. Thus, stocks under loan from the 1975–76 crop years are the ones of most immediate concern to USDA in managing the program because they are reaching the point where they will have to be sold. See report, pp. A–26–A–28.

[21] Report, p. A–28. USDA considers diversion or displacement to occur when imports exceed a penetration level of 3 percent. Thus, figures showing displacement used in this paragraph represent imports in exceess of 3 percent penetration. USDA's rationale for this figure is set forth on pp. 66–70 of the hearing transcript.

[34] Hearing transcript, p. 81.

Mr. BENTSEN. Mr. President, I cannot vote for this farm bill. I will not support this bill because the vote for this farm bill as now written is the vote for an end to the American system of family farming.

American agriculture is in the worst financial condition since the Great Depression.

This bill turns over to the Secretary of Agriculture the discretionary authority to manage our farm programs for the next 4 years. However, it has been evident since the first Cabinet meeting of this new administration that the Secretary of Agriculture did not determine agricultural policy.

Agricultural policy for this administration is being set by the Secretary of State and is being set by the Director of the Office of Management and Budget. The decisions made today have in large part been detrimental to the best interest of the American farmer. The promise to end the grain embargo was finally honored only after a delay of over 3 months. Since then, decisions on export sales of U.S. farm products have consistently been manipulated in an attempt to achieve foreign policy objectives.

It is evident from the recent sale of butter to New Zealand that these negotiations, these attempts to use agriculture as a tool of our foreign policy, have been badly mishandled. The recent sale of butter to New Zealand was made at great expense to this country. The greatest expense was not any differences in the immediate sale price, but was the beating which our credibility took when the complete terms of this sale were revealed.

This sale was made on the condition that this butter not be resold to Russia. However, there is nothing in the sale contract to prevent this butter from being converted into butter oil and then being sold to Russia through that device. In addition, we have given New Zealand, a foreign country, complete control over any export sales of a vital American agricultural commodity for the next 6 months. On top of that, we have given New Zealand a lesser, but still very important, amount of control over these sales for an additional 6 months. A total of 1 year in which New Zealand will be in a position to determine our export sales policy for dairy products.

Mr. President, I do not believe, and the farmers of this country do not believe, that the Department of Agriculture will be willing and able to administer the farm program, a program over which they have almost complete discretion, in a fair and equitable manner unless the Office of Management and Budget is faced with the threat of large budget outlays as the price of failure to do so. This bill does not present such a threat and thus it will not work.

In addition, this bill is a slap at the American farmer. The American farmer has taken his share of budget cuts. The American farmer has taken tremendous cuts for the last 4 years. Last year the American farmer took a cut in his take home pay that amounted to almost 25 percent. This year, he is under a pay freeze. That cut will not be reversed because real net farm income will probably be no higher this year than it was last year. Last year was the lowest since 1934—the depth of the Great Depression.

Even though the farmer has taken his cut for 4 years he has taken additional cuts this year. The farm bill reported by the Senate Agriculture Committee represented a major cut for American agriculture. This cut was necessary in order to comply with the budget ceiling, so it was made.

Since then some very fast pencils have been hard at work. The cost estimates on this bill have been revised upward and the administration has used this new estimate to justify demanding further major cuts in the bill. Last week a majority of the Senate Committee on Agriculture agreed to make major cuts in this bill. They brought to the floor a compromise package which represented not one but two major cuts in our farm programs.

The administration is now telling us that even that is not enough. That the farmers of this country must take a third cut. Mr. President, I voted against that cut. Unfortunately, a majority of the Senate has capitulated to this pressure and has, so to speak, given up the farm.

Thousands of farmers will also have to "give up the farm" this year and next year as a result.

However, the Senator from Texas will not give up the farmers of Texas. For this Senator realizes that if we lose the American family farmer then we also lose the agricultural production system, a food supply which is the most dependable, economical, and highest quality in the world.

Mr. President, I am strongly opposed to passage of this bill. I will vote against it and I urge my colleagues to do likewise.

Mr. BURDICK. Mr. President, while there are parts of the bill, such as the sugar section, that merit support, the overall bill falls far short of what is needed to provide subsistence to the American farmer. This industry is vital to the health of the economy, and not only provides food and fiber for our citizens, but offsets much of our dollar drain in foreign markets. Farmers cannot survive, in this day of high interest and inflation under the terms of this bill.

Mr. President, American farmers are in trouble. The Senator from Oklahoma, Mr. BOREN, earlier pointed out that in 30 years time farmers have gone from the point where their annual net income approximately equaled their debt to the point where farmers' debt exceeds their annual net income by a factor of 10. That, Mr. President, is a telling statistic. Farmers, and all of rural America, have had to eat up their equity acquired through inflated land values. According to the USDA's own statistics, farmers in my State will lose money on nearly everything they have produced this year. Under this bill, farmers will be losing money again next year. We are facing a serious crisis in rural America.

The administration says farmers will do well in the free market and that the export market will save them. I am not that confident. The big boom in farm exports that began in the early 1970's really began with the decision to cut the dollar loose from the $35 per ounce gold standard. The resulting decline in the value of the dollar made our grain the world's best buy. Recently, the dollar has gained sharply. The USDA has already revised downward its estimates of exports because of the strengthening dollar.

Further, exports are not in our hands. There has to be a buyer first. I have been hearing for 20 years that the rapidly growing world population and growth in world food demand will soon outstrip our ability to meet it. It has not happened yet. I do not think it is likely to happen during the life of this bill unless there is a major disaster in some other major grain growing area of the world. If that happens, I have the gnawing fear that farmers who are asked to bear their losses now on the free market will not be permitted the free market to recover their losses during a short supply. They could instead face all manner of limitations and export control policies designed to ration available supplies at some low price. What they are asked to give up to the budget now, they will be asked to give up to inflation then.

If no crop disaster occurs during the next 4 years, farmers will simply not be able to wave a magic wand and increase exports enough to make an adequate adjustment in their incomes. There simply are not enough buyers yet.

Mr. President, the costs are too great to pass a bill that fails to meet the needs of our basic industry.

Mr. BAKER. Mr. President, I would like to take this opportunity to commend all of my colleagues who have worked so long and with great diligence to insure passage of the 1981 farm bill.

Reauthorizing farm programs for 4 years is never an easy task. Farming is an important industry in this country; the farm programs included in this legislation will have a significant impact on the American farmer as well as other segments of our society. Each commodity program has a unique complexion and yet, each program must be considered in light of the overall impact on farming in this country.

In addition to these factors, this year Congress has been faced with the realization that budget constraints had to be applied to farm programs along with all other Federal programs.

I would like to thank the Senate Agriculture Committee and its distinguished chairman (Mr. HELMS) and its distinguished ranking member (Mr. HUDDLESTON) for the long hours which they have devoted to this legislation.

It is my understanding that the committee held approximately 24 days of hearings on this bill and worked for over 3 weeks marking up its original recommendations. Countless other hours were spent fine tuning the committee compromise proposal.

It has taken the Senate 5 days to complete consideration of this bill. I would have ideally liked to have had completed passage earlier, but I believe that it is

vitally important that the Senate spend as much time as proved necessary. Without Senate action, the Department of Agriculture and the farm community would have been placed in the unfortunate position of returning to the Agriculture Act of 1949. Such action would have been costly to the Government and to the farmer.

I trust that Senate passage will allow the House of Representatives to take up this important legislation.

The farm bill entails consideration of a number of provisions which are uniquely fashioned with local and national repercussions. This legislation, perhaps more than many other bills which the Senate considers, requires each Senator's consideration or particular needs in his or her State as well as consideration of the entire agricultural community.

I believe that the action we have taken to meet these challenges exemplifies the very essence of the Senate's role as a deliberative body. This year we have had to anticipate the needs of our farmers with the additional constraints of budget considerations. We have considered amendments during the past week. There have been those Senators who have attempted to enhance various provisions. There have been others, like my colleague from Indiana (Mr. LUGAR), who have diligently attempted to hold fast to the administration's original request for major changes.

There were obviously some amendments which I did not support and which would have adversely impacted farmers from the State of Tennessee. In particular, amendments to the tobacco program would have had a devastating impact on tobacco farmers in my State. Every other Senator was faced with the same situation. I commend my colleagues for the manner in which the amendments have been considered and the particular needs have been addressed.

To paraphrase the distinguished Senator from Kansas (Mr. DOLE), whose leadership during the past days has been invaluable, the Senate has been able to move ahead with a bill and forge a compromise which I believe is in the best interest for farmers and the country.

I would also like to thank at this time, Mr. President, the distinguished minority leader (Mr. ROBERT C. BYRD) for his role in expediting Senate passage of this bill, and staff director George Dunlop, minority staff director Carl Rose and the entire committee staff.

The PRESIDING OFFICER. Are there any further amendments? If not, the question is on agreeing to the committee amendment, as modified and amended.

The committee amendment, as modified and amended, was agreed to.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The question is, Shall the bill pass?

Mr. HELMS. Mr. President, I ask for the yeas and nays on final passage.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from New York (Mr. D'AMATO), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Nevada (Mr. LAXALT), the Senator from Alaska (Mr. MURKOWSKI), the Senator from Vermont (Mr. STAFFORD), the Senator from Idaho (Mr. SYMMS), the Senator from Texas (Mr. TOWER), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

I further announce that, if present and voting, the Senator from New York (Mr. D'AMATO), and the Senator from Texas (Mr. TOWER), would each vote "yea."

On this vote, the Senator from Idaho (Mr. SYMMS) is paired with the Senator from Pennsylvania (Mr. HEINZ).

If present and voting, the Senator from Idaho would vote "nay" and the Senator from Pennsylvania would vote "yea."

Mr. CRANSTON. I announce that the Senator from New Jersey (Mr. BRADLEY), the Senator from Arkansas (Mr. BUMPERS), the Senator from Florida (Mr. CHILES), the Senator from California (Mr. CRANSTON), the Senator from Connecticut (Mr. DODD), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Hawaii (Mr. INOUYE), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Maine (Mr. MITCHELL), the Senator from Mississippi (Mr. STENNIS), and the Senator from Massachusetts (Mr. TSONGAS) are necessarily absent.

I further announce that, if present and voting, the Senator from Mississippi (Mr. STENNIS) would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 49, nays 32, as follows:

[Rollcall Vote No. 273 Leg.]

YEAS—49

| | | |
|---|---|---|
| Abdnor | East | McClure |
| Andrews | Ford | Nickles |
| Armstrong | Glenn | Packwood |
| Baker | Gorton | Percy |
| Boschwitz | Grassley | Pressler |
| Byrd, Harry F., Jr. | Hatch | Quayle |
| Byrd, Robert C. | Hatfield | Randolph |
| Cannon | Hawkins | Rudman |
| Cochran | Hayakawa | Sasser |
| Cohen | Helms | Schmitt |
| Danforth | Huddleston | Simpson |
| Denton | Jepsen | Specter |
| Dixon | Kassebaum | Stevens |
| Dole | Long | Thurmond |
| Domenici | Lugar | Wallop |
| Durenberger | Matsunaga | Warner |
| | Mattingly | |

NAYS—32

NOT VOTING—19

| | | |
|---|---|---|
| Bradley | Hollings | Stennis |
| Bumpers | Inouye | Symms |
| Chiles | Johnston | Tower |
| Cranston | Laxalt | Tsongas |
| D'Amato | Mitchell | Weicker |
| Dodd | Murkowski | |
| Heinz | Stafford | |

So the bill (S. 884, as modified and amended) was passed.

[The text of the bill as modified amended, and passed is printed at the conclusion of today's proceedings.]

See pages 21290a thru 21290ll.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, needless to say, I am glad that this hour has arrived. This has been a hard week for all Senators, but I have been so impressed with the good humor of Senators as they debated difficult issues. I do not think there is a Senator in this Chamber who participated in the debate or cast a vote who did not find some problem with the legislation.

The bill certainly is not entirely satisfactory to everybody, but with so many commodities involved and such complicated aspects in each of the commodities, plus the budgetary restraints which were upon us for the first time that a farm bill has ever been reported out of a committee or passed by the Senate, I think the Senate can be proud of the work that it has done.

Mr. President, I am deeply grateful to the distinguished Senator from Kentucky, the able ranking minority member of the Agriculture Committee. No chairman ever had a finer ranking member with whom to work than DEE HUDDLESTON. I want him to know that he has my admiration and respect.

The consideration has been a lengthy and arduous task for all Senators. I am grateful to my colleagues for their patience and their helpful attention to the detail of trying to handle this legislation covering the Nation's farm commodity programs.

Mr. President, I wish to commend the staff of the Committee on Agriculture, Nutrition, and Forestry for the professional manner in which they handled the myriad of details. If you just pick up the report on this bill and look through it, you will see the enormous amount of work that was done.

The staff of the committee began its work on this bill more than a year ago. The staff from offices of all members of the committee began to coordinate closely that process the beginning of this year. I could not be more pleased, Mr. President, with the successful way that they offered their cooperation and their dedication working to the advantage of the Senate, the farmers, and the consumers.

I wish to emphasize in a very special way the bipartisan nature of this cooperation, both among the Senators and the staff. This has always been a tradi-

tion of the Senate Agriculture Committee and one in which Senator HUDDLESTON and I are pledged to continue.

Specifically, Mr. President, I wish to express my appreciation to George Dunlop, the chief of staff of the committee; Bob Franks, general counsel, who is, in my judgment, the most able agriculture lawyer anywhere; Carl Rose, my fellow North Carolinian, counsel to the minority; Bill Bailey, committee economist; and all the rest of the fine young people on the committee staff who have, each and every one, devoted the longest conceivable hours in the production of this legislation. Tom Clark is committee deputy counsel, and his contribution to this bill and its many amendments is deeply appreciated. Also, I thank Ron Wilson whose coordination with other Senators staffs and commodity organization was most helpful.

In all, there are some 34 committee staff—the smallest staff of any in the Senate—who deserve thanks and these I have named are but a few.

Again, I offer my special thanks to Senator HUDDLESTON and to Tom Little of his staff.

Senator DOLE—what a magnificent job he did. He took some tough stands. Without Senator DOLE and his efforts on this floor, I am not sure that we would be anywhere close to the passage of this bill. He has been outstanding.

Mr. President, I also commend Mr. John Gordley with Senator DOLE. I also commend Senator THAD COCHRAN and Mr. Wayne Boutwell, of his staff, for his outstanding professional contribution to the entire process.

Finally, Mr. President, I want to thank the Secretary of Agriculture, John Block, for the countless hours he has spent near the Chamber to help work out a myriad of details.

Two of his most able aides, Assistant Secretary for Economics Bill Lesher and his legislative coordinator, Randy Russell, are alumni of the Agriculture Committee. I thank all concerned.

Now, Mr. President, after a week, I say "Whoopee," and yield the floor.

Mr. DOLE. I want to express my thanks to the chairman for his leadership in the past several months, the distinguished Senator from Kentucky, Senator HUDDLESTON, and everyone else on our committee. We have an outstanding staff, and we have outstanding people on our personal staffs who have worked with the chairman's staff. I think we have put together a pretty good product. I thank the distinguished Senator from North Carolina for letting me participate because it was an opportunity.

It is my view now that we have a bill that will be signed by the President. That is due to the patience, I think, of the Senator from North Carolina more than anything else the rest of us may have done. I thank the Senator.

Mr. HELMS. I thank the Senator.

Mr. THURMOND. Will the Senator yield?

Mr. HELMS. Certainly.

Mr. THURMOND. Mr. President, I would like to take this opportunity to commend the able Senator from North Carolina, Senator JESSE HELMS, for the outstanding leadership that he provided in preparing a sound farm bill to bring to the Senate and on the manner in which he has handled that bill on the floor of the Senate.

I have seen in past years when agriculture bills have been brought before the Senate great divisions, a tremendous amount of time consumed, and ill feeling incurred. I think this bill probably has brought forth less division, more unity, and more satisfaction than any since I have been in the Senate.

I just want to commend the able Senator from North Carolina for the great job he has done and the splendid manner in which he has handled this bill.

I would also commend the able Senator from Kentucky, Senator DEE HUDDLESTON, for the fine job he did in working with the chairman.

Senator HUDDLESTON is well versed on agricultural matters, and he has proved to be a very competent person in this field.

I also commend Senator DOLE who was the ranking minority member last year, for the contributions he made to the passage of this bill.

This bill is not everything we want. I think today the farmers are the forgotten segment of the population of America.

This bill is as good a bill as I feel we could have gotten from the Senate this year.

Again, I commend the chairman and others who played such a vital part in the passage of this legislation.

Mr. HELMS. Mr. President, I thank the distinguished Senator from South Carolina. I yield the floor.

Mr. SIMPSON. Mr. President, I, too, join in commending the floor managers for their leadership on this bill, even though I slipped on a few votes with regard to tobacco. I greatly appreciate what these fine Senators have done.

## ROUTINE MORNING BUSINESS

(The following routine morning business was transacted during the day:)

## MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

## EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate a message from the President of the United States submitting a sundry nomination which was referred to the Committee on Environment and Public Works.

(The nominations received today are printed at the end of the Senate proceedings.)

## SECOND ANNUAL REPORT OF THE FEDERAL LABOR RELATIONS AUTHORITY—MESSAGE FROM THE PRESIDENT—PM 78

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Governmental Affairs:

*To the Congress of the United States:*

In accordance with the Civil Service Reform Act of 1978 (P.L. 95–454, Sec. 701) (5 U.S.C. 7104(e)), I hereby transmit the Second Annual Report of the Federal Labor Relations Authority for the Fiscal Year ended September 30, 1980.

RONALD REAGAN.

THE WHITE HOUSE, *September 18, 1981.*

## EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC–1952. A communication from the Director of the Defense Security Agency, transmitting, pursuant to law, a report on a proposed foreign military sale to the United Arab Emirates; to the Committee on Armed Services.

EC–1953. A communication from the Director of the Defense Security Assistance Agency transmitting, pursuant to law, a report on a proposed foreign military sale to Tunisia; to the Committee on Armed Services.

EC–1954. A communication from the Under Secretary of the Interior transmitting, pursuant to law, notice of an oil and gas lease sale to be held on October 20, 1981; to the Committee on Energy and Natural Resources.

EC–1955. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report and summary entitled "Billions of Dollars Are Involved in Taxation of the Life Insurance Industry—Some Corrections in the Law Are Needed"; to the Committee on Finance.

EC–1956. A communication from the Associate Commissioner of the Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, a report on the case of a certain alien found admissible to the United States under section 212 (a)(28)(I)(ii) of the Immigration and Nationality Act; to the Committee on the Judiciary.

## PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM–424. A resolution adopted by the New York State Department of the Polish Legion American Veterans, relating to programs and benefits for veterans; to the Committee on Veterans' Affairs.

## REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation, with an amendment in the nature of a substitute, and an amendment to the title:

S. 929. A bill to amend the Communications Act of 1934 to provide for improved administration of the amateur radio service and private land mobile and fixed services by the Federal Communications Commission, to address the problem of radio-frequency interference to certain electronic equipment, to permit volunteer assistance to the Federal Communications Commission in the area of

examinations, licensing, and enforcement in the amateur radio service, and for other purposes (Rept. No. 97–191).

By Mr. ROTH, from the Committee on Governmental Affairs, with an amendment in the nature of a substitute:

S. 1080. A bill to amend the Administrative Procedure Act to require Federal agencies to analyze the effects of rules to improve their effectiveness and to decrease their compliance costs; to provide for a periodic review of regulations, and for other purposes.

## EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. THURMOND, from the Committee on the Judiciary:

Report to accompany the nomination of Sandra Day O'Connor, to be an Associate Justice of the Supreme Court of the United States (together with additional, supplemental, and separate views) (Ex. Rept. 97–22).

## INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. THURMOND (for himself, Mr. HATCH, Mr. KENNEDY, Mr. DENTON, Mr. LAXALT, and Mr. SPECTER):

S. 1639. A bill to amend chapter 209 of title 18, United State Code, relating to extradition, and for other purposes; to the Committee on the Judiciary.

By Mr. THURMOND:

S. 1640. A bill to amend certain provisions of title 18, United States Code, relating to the procedures for interception of wire or oral communications; to the Committee on the Judiciary.

By Mr. GRASSLEY:

S. 1641. A bill to extend the Reed Act and to authorize the designation of funds in State accounts as Reed Act funds in certain circumstances; to the Committee on Finance.

By Mr. HEINZ (for himself and Mr. D'AMATO):

S. 1642. A bill to amend the Internal Revenue Code of 1954 to provide a partial interest exclusion for taxable years beginning in 1983 or 1984; to the Committee on Finance.

By Mr. HART:

S. 1643. A bill to provide minimum standards under which State workers' compensation laws will provide prompt, adequate, exclusive, and equitable compensation for occupational diseases or death resulting from exposure to asbestos, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. MOYNIHAN:

S. 1644. A bill to amend the Internal Revenue Code to allow an investment tax credit for theatrical productions; to the Committee on Finance.

S. 1645. A bill to let funds in individual retirement accounts be used to purchase collectibles; to the Committee on Finance.

S. 1646. A bill to establish a Reconstruction Finance Corporation; to the Committee on Banking, Housing, and Urban Affairs.

## STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. THURMOND (for himself, Mr. HATCH, Mr. KENNEDY, Mr. DENTON, Mr. LAXALT, and Mr. SPECTER):

S. 1639. A bill to amend chapter 209 of title 18, United States Code, relating to extradition, and for other purposes; to the Committee on the Judiciary.

(The remarks of Mr. THURMOND on this legislation appear earlier in today's RECORD.)

By Mr. THURMOND:

S. 1640. A bill to amend certain provisions of title 18, United States Code, relating to the procedures for interception of wire or oral communications; to the Committee on the Judiciary.

(The remarks of Mr. THURMOND on this legislation appear earlier in today's RECORD.)

By Mr. GRASSLEY:

S. 1641. A bill to extend the Reed Act and to authorize the designation of funds in State accounts as Reed Act funds in certain circumstances; to the Committee on Finance.

### REED ACT EXTENSION

● Mr. GRASSLEY. Mr. President, at the request of the Job Service of Iowa I am introducing legislation to extend section 903 of the Social Security Act for an additional 10 years.

Section 903, commonly referred to as the Reed Act, was added to the Social Security Act in 1954. It provides for the transfer of Federal unemployment tax moneys to individual State accounts when all other Federal Unemployment Tax Act—FUTA—accounts have reached their statutory limits, all advances have been repaid, and an excess is available. There have only been excess funds three times since passage of the Reed Act—in 1956, 1957, and 1958. Deposits totaling $138 million were distributed among the States on June 30 of each of those years.

Reed Act funds may be used by the States either to pay unemployment benefits or, with the approval of the State legislature, for administrative purposes. Many States have used Reed Act funds for major capital purchases, primarily of premises. These investments have resulted in substantial cost savings to the employment security system in terms of reduced expenditures for leasing facilities.

Originally, the use of Reed Act funds for administrative expenses was limited to 5 years from the date of distribution. Congress has extended the limit three times. Until legislation is passed to extend the time limit again, funds credited to State Reed Act accounts on June 30, 1956, will no longer be available for administrative purposes. Extension of the time period is also necessary so that amounts credited to State accounts in 1957 and 1958 will remain available for administrative purposes.

This legislation would also allow States to restore Reed Act funds expended as a condition of borrowing from the Federal Government. States that have depleted their own unemployment funds may borrow from the Federal Government. Before qualifying for Federal loans, however, they must use available Reed Act funds to pay unemployment benefits. Under current practice, the only way for States to restore expended Reed Act funds is through amortization of real estate purchases. Thus, those States that have been forced to use Reed Act funds to pay benefits as a condition of receiving Federal loans may no longer use those funds for administrative purposes.

Approximately $25 million is available among the Reed Act accounts of 33 States. Without objection, I request that a table showing Reed Act balances by State appear at this point in my remarks.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

STATE REED ACCOUNT BALANCES

| State | Balance Mar. 31, 1981 |
|---|---|
| Alabama | 187,000 |
| Alaska | 187,000 |
| Arizona | 470,000 |
| Arkansas | |
| California | 3,703,000 |
| Colorado | 1,024,000 |
| Connecticut | |
| Delaware | |
| District of Columbia | |
| Florida | |
| Georgia | 147,000 |
| Hawaii | 87,000 |
| Idaho | |
| Illinios | |
| Indiana | 481,000 |
| Iowa | 765,000 |
| Kansas | 1,114,000 |
| Kentucky | |
| Louisiana | 1,403,000 |
| Maine | |
| Maryland | 527,000 |
| Massachusetts | |
| Michigan | |
| Minnesota | 109,000 |
| Mississippi | 329,000 |
| Missouri | 756,000 |
| Montana | 92,000 |
| Nebraska | 546,000 |
| Nevada | |
| New Hampshire | 472,000 |
| New Jersey | |
| New Mexico | 572,000 |
| New York | 392,000 |
| North Carolina | 2,545,000 |
| North Dakota | 223,000 |
| Ohio | |
| Oklahoma | 1,231,000 |
| Oregon | 362,000 |
| Pennsylvania | |
| Puerto Rico | |
| Rhode Island | |
| South Carolina | 613,000 |
| South Dakota | 209,000 |
| Tennessee | 882,000 |
| Texas | 1,518,000 |
| Utah | 547,000 |
| Vermont | |
| Virginia | 811,000 |
| Virgin Islands | |
| Washington | 813,000 |
| West Virginia | |
| Wisconsin | 1,561,000 |
| Wyoming | 207,000 |
| Total | 24,885,000 |

Source: U.S. Department of Labor records available Mar. 31, 1981.

Mr. GRASSLEY. Mr. President, over the years, Reed Act funds have been an important source of discretionary funds for the States. The legislation I am introducing will make it possible for the States to continue to exercise that discretion, but will not affect Federal budget totals, since the funds remain a part of trust fund accounts whether they are used for administrative purposes or to pay benefits.

Mr. President, I ask unanimous consent that the text of the bill appear at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1641

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That (a)

section 903(c)(2) of the Social Security Act is amended by—

(1) striking out "twenty-four" wherever it appears and inserting in lieu thereof "thirty-four"; and

(2) striking out "twenty-fourth" and inserting in lieu thereof "thirty-fourth".

(b) Section 1202 of the Social Security Act is amended by—

(1) designating the paragraph currently contained in this section as subsection (a);

(2) adding the following new subsection:

"(b) Upon repayment of all advances made to a State pursuant to section 1201 of this Act, and upon a request from the Governor of that State, the Secretary of Labor shall designate as funds transferred pursuant to section 903 of this Act an amount in the account of the State not to exceed the aggregate amount of funds transferred to the State pursuant to section 903 and expended to pay unemployment benefits in order for the State to qualify for advances pursuant to section 1201."●

---

By Mr. HEINZ (for himself and Mr. D'AMATO):

S. 1642. A bill to amend the Internal Revenue Code of 1954 to provide a partial interest exclusion for taxable years beginning in 1983 or 1984; to the Committee on Finance.

SMALL SAVERS INCENTIVE ACT

● Mr. HEINZ. Mr. President, I am introducing a bill today, along with my distinguished colleague from New York Senator ALFONSE D'AMATO, called the Small Savers Incentive Act. This legislation is important to both small savers and this country's savings institutions.

As a result of the tax legislation recently passed there will be a 2-year period from January 1, 1983, through January 1, 1985, during which there will be no incentive for new investments at savings institutions. The all savers certificates program will have ended and no new incentive will exist until the onset of a $450 ($900 for joint returns) exemption for interest income beginning in 1985.

The willingness of Americans to save for their own future and to invest in the future of this Nation has always been an engine of economic progress. Since World War II, family savings have provided for the construction of 57 million units of housing, the creation of millions of jobs and billions of dollars of production.

The importance of family savings to the economic health of this country was a fundamental reason for the tax cuts we enacted. Major disincentives to savings were removed, but there is still more work to be done.

I am therefore introducing the Small Savers Incentive Act which provides for an exclusion from taxes of $200 ($400 for joint returns) of annual interest income for that period between January 1, 1983 and December 31, 1984. It is vital that the gap left by the recent tax legislation be filled and the flow of new savings be uninterrupted.

I would also like to take this opportunity to commend my dear colleague, Senator ALFONSE D'AMATO, for his early and devoted support of incentives for small savers. Since his first days in office he has been a champion of this cause and a staunch defender of "the little guy." We both look forward to the support of our respected colleagues.●

By Mr. HART:

S. 1643. A bill to provide minimum standards under which State workers' compensation laws will provide prompt, adequate, exclusive, and equitable compensation for occupational diseases or death resulting from exposure to asbestos, and for other purposes; to the Committee on Labor and Human Resources.

ASBESTOS HEALTH HAZARDS COMPENSATION ACT OF 1981

● Mr. HART. Mr. President, today I am reintroducing legislation which I hope will serve as a starting point in Congress effort to develop a fair and adequate compensation system for victims of occupational disease. Reform of our Nation's workers compensation system has been studied and thoroughly debated for the last decade.

Nearly everyone who has examined the system has agreed that it is inadequate, ineffective, inequitable, and in serious need of reform. In no case is this more true than with State and Federal workers' compensation statutes for asbestos-related disease.

This legislation attempts to take only the first step toward developing a system that quickly distributes compensation benefits to asbestos disease victims and fairly apportions the costs of such benefits among all responsible parties.

It provides a mechanism by which asbestos manufacturers, distributors, other segments of the asbestos industry, and the Federal Government can contribute substantially to the compensation of workers disabled by an asbestos-related disease.

The specific details of the bill are of less importance than the effort to solve a real and growing problem. I welcome any constructive contributions which may be offered and I intend to continue to work closely with Representative GEORGE MILLER, chairman of the House Labor Standards Subcommittee, on the even more important effort to develop alternatives to the present inadequate compensation system for occupation disease in general.

I am firmly committed, however, to developing some type of legislative remedy that will establish a more uniform, comprehensive and equitable means of compensating workers disabled by asbestos-related disease. I am confident that working together, with the benefit of Representative MILLER's leadership, we can make substantial progress toward this goal.

Mr. President, last year the Senate Committee on Labor and Human Resources held 2 days of hearings on legislation to provide compensation benefits to asbestos disease victims. During those hearings and since that time, a broad consensus has emerged in favor of developing a legislative remedy to insure asbestos workers disabled by an asbestos-related disease are equitably compensated.

It is clear from the record we established in those hearings that State workers' compensation laws are inadequate. It is also clear that litigation is not the answer. Let me outline the clear and compelling arguments for the legislative remedy we have devised and then describe it.

There are almost 2 million workers who are either severely or partially disabled from an occupationally related disease. One-third of these occupational disease victims suffer long-term total disability.

Only 5 percent of those severely disabled from an occupational disease receive workers' compensation benefits, partly because of the difficulties involved in establishing the work relatedness of disabling illnesses.

On average, a disabled worker with an occupational disease waits a year before receiving the first payment of compensation benefits. By comparison, work-injury cases are settled in an average of 2 months.

Sixty percent of all occupational disease awards are initially denied, while only ten percent of the injury awards receive similar treatment.

A worker who becomes totally disabled for life from an occupational disease and who is able to prove that the disability is linked to the workplace receives, on average, about $9,700 in total compensation benefits compared to expected future earnings of $77,000. This implies that workers' compensation benefits replace about one-eighth of lost wages.

Mr. President, the most prevalent and often the most debilitating occupational diseases afflicting American workers today, and a principal cause of the skyrocketing occupational disease rate, are those produced by occupational exposure to asbestos. Asbestos-related diseases are the most prevalent form of occupational disease because asbestos permeates our environment.

Over 3,000 products commonly found in the home and working environment contain asbestos, including electrical insulation, brakedrums, wall and ceiling board, potholders and pipes, just to name a few. One of its most extensive uses, and the source of much of the occupational disease today, is as insulation in ships.

The full consequences of occupational exposure to asbestos in the United States have just begun to be recognized in the last few years. According to estimates made by the Department of Health, Education, and Welfare, between 8 and 11 million workers have been exposed to asbestos in the Uinted States since the beginning of World War II.

The National Institute of Occupational Safety and Health believes more than 4 million of these workers were exposed to asbestos in shipyards during the Second World War.

Because of the long-latency period for asbestos-related disease, between 15 and 40 years, it is only now that many of these workers are becoming disabled and the incidence of occupational disability is climbing at such an alarming rate. In many ways, asbestos disease is a hidden cost of World War II for which many American workers are still paying.

Of the 4 million heavily exposed workers in the United States, approximately 1.6 million are expected to die of an asbestos-related disease. Since most of these cancers will be manifest in the next 30 to 35 years, the expected average number of cancers attributed to asbestos per year will average about 67,000. Such

numbers would represent about 17 percent of all cancers detected annually in the United States.

Mr. President, clearly these frightening statistics make this one of the most serious health issues to come before this Congress. Because of the inadequacies and inequities of existing mechanisms for compensation of occupational disease, it is essential that Congress develop a legislative remedy.

Under current law, workers who are disabled by an asbestos-related disease have no adequate way of obtaining necessary compensation for lost wages. Workers' compensation levels vary from State to State due to different statutes, and the benefits for occupational disease continue to be inadequate.

Most State workers' compensation statutes contain artificial barriers to compensation, such as medically impractical time periods, or other time-related restrictions such as unrealistic statutes of limitation on occupational disease or asbestos cases which prevent asbestos victims and their families from obtaining the compensation they need and deserve.

Because workers' compensation is so poor, many workers go to court in an effort to win product liability lawsuits against asbestos manufacturers so they may obtain compensation that way.

This route, however, has also proved to be unfair and inadequate. Court battles are long and expensive and are sometimes decided on the basis of legal technicalities. Also, as former U.S. Representative Robert Sweeney, now a plaintiff's attorney, testified before the House Subcommittee on Labor Standards:

> The level of litigation . . . is so high that the judicial system literally has no means to accommodate all the suits that are anticipated to be filed.

The experience of the last 5 years demonstrates that with respect to occupational disease claims, the product liability lawsuit is as inadequate, unfair, and unsatisfactory a means of attempting to compensate workers with asbestos-related disease as are the various State workers' compensation programs.

Even when workers are willing to bear the expense of litigating, they have often been disappointed. Over the last few years, plaintiffs and defendants have prevailed in about an equal number of cases.

Thus, in about one-half of the asbestos cases that have been tried, the worker or the worker's family received nothing. And even in those cases in which the workers win, a substantial amount of the award may go to attorneys fees and court costs.

Mr. President, my legislation represents an important beginning in the effort to develop the legislative remedy which all parties who have been involved with asbestos disease and compensation have agreed we need.

Let me describe in brief the major provisions of my bill.

First, the bill establishes Federal minimum standards to be applied in determining workers compensation for asbestos-related disease. These standards are designed to eliminate the artificial barriers in most States' statutes which prevent compensation for asbestos disease, and to insure such compensation is meaningful. The most significant of these standards include provisions to:

Provide that compensation for total disability or death due to an asbestos-related disease shall not be less than 66⅔ percent of the claimant's average;

Provide that similar compensation shall exist for partial disability;

Provide that compensation shall be increased based on the size of the claimant's family;

Provide that benefits shall be indexed on the basis of changes in the wage scale of the job which the claimant held;

Provide that responsible parties shall pay for medical and rehabilitation benefits;

Provide that benefits shall be paid for the duration of the disability or for the life of the claimant without limitation to the dollar amount or the period of payment; and

Provide that benefits shall not be offset by any other benefits paid to claimants, nor be considered as income for tax purposes.

Mr. President, it is voluntary for the States to follow these minimum standards. However, if a State or Federal workers' compensation agency fails to award compensation at least equivalent to the compensation prescribed by this bill, a claimant will be able to file a petition for review of the State or Federal workers' compensation agency award with the Benefits Review Board established by the Longshoremen's and Harbor Workers Compensation Act.

That board will have the power to order an employer to pay the appropriate level of compensation according to the standards established in the bill.

In addition to the minimum standards established by this legislation, the bill includes provisions which will allow for the employer who pays a workers' compensation award to bring other responsible parties, including the asbestos industry and the Federal Government, into the State workers' compensation proceeding to determine the amount they should contribute to the compensation.

Naturally, two vital concerns of everyone involved in asbestos disease compensation are responsibility and amount. In this regard, the bill establishes a commission of Government, health, labor, and industry experts to develop the criteria, which Congress will have an opportunity to approve, by which the State workers' compensation board will make determinations regarding the contributions of the various responsible parties.

The single strongest feature of this legislation is based on the principle that responsible parties will pay their responsible share, no more and no less. This bill insures that both the asbestos industry and the Federal Government will play a meaningful role in any compensation scheme.

Finally, this bill provides that the workers' compensation scheme established will be the sole and exclusive remedy for those seeking compensation for asbestos-related disease. This will put an end to the massive litigation that has served neither plaintiff nor defendant well over the last 5 years, and which would be guaranteed to continue on an even larger scale in the absence of this legislation.

Mr. President, I will work with the members of the Senate Labor and Human Resources Committee and any other Members of this body who are anxious and willing to develop a solution to the complex problem of providing compensation for asbestos-related disease.

Working together, I am confident we can develop a solution which will insure prompt, equitable, and comprehensive compensation for workers who have nowhere else to turn. I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1643

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That, this Act may be cited as the "Asbestos Health Hazards Compensation Act of 1981."

FINDINGS AND PURPOSE

SECTION 1. (a) The Congress finds that—

(1) a significant number of people suffer disability or death or both from occupational diseases caused by the inhalation or ingestion of asbestos;

(2) members of households of persons who are occupationally exposed to asbestos may suffer from asbestos-related disease;

(3) asbestos-related diseases occur among individuals employed in both the private sector and public sector;

(4) diseases arising from exposure to asbestos constitute a substantial burden upon interstate commerce and have an adverse effect on the public welfare;

(5) diseased and disabled workers and their survivors deserve, and the public interest will be best served by prompt, adequate, exclusive, and equitable compensation;

(6) the primary method for providing such compensation, State laws governing occupational disease and disability, do not in many cases provide prompt, adequate, exclusive, and equitable compensation;

(7) all parties responsible directly or indirectly for the occurrence of occupational asbestos disease, including, but not limited to, the Federal Government and the asbestos industry, should participate in the compensation of individuals who suffer as a result of exposure from such disease;

(8) such participation should be in an equitable manner and should be the exclusive remedy for those suffering from an occupational asbestos disease; and

(9) an incremental approach, beginning with the model program authorized by this Act for the compensation of asbestos-related occupational disease and disabiilty, may advance an objective of uniform minimum standards for State workers' compensation laws governing occupational disease.

(b) It is the purpose of this Act—

(1) to establish minimum standards by which State and Federal workers' compensation laws shall provide prompt, adequate, exclusive, and equitable compensation to any—

(A) person disabled by disease resulting from occupational exposure to asbestos;

(B) person disabled by an asbestos-related disease resulting from the occupational exposure to asbestos of a member of such person's household;

(C) dependent of a deceased person whose death from an asbestos-related disease results from the occupational exposure to asbestos of the deceased person himself or of some member of the deceased person's household.

(2) to provide a mechanism under which all responsible parties, including, but not limited to, the Federal Government and the asbestos industry, equitably share the cost of such compensation.

DEFINITIONS

SEC. 2. As used in this Act—

(1) The term "asbestos" means chrysotile, amosite, and crocidolite and when they occur in ribrous form, tremolite, anthrophyllite, and actinolite.

(2) The term "asbestos-related diseases" means asbestosis, mesothelioma of the pleura or peritoneum causally related to asbestos exposure, bronchogenic cancer, causally related to asbestos exposure, cor pulmonale related to asbestosis, or any other disease which the Secretary determines by a preponderance of medical and scientific evidence results from exposure to asbestos, and adds to the above list by regulation: *Provided*, That in promulgating any regulation adding to, altering, or amending the list of asbestos-related diseases as defined herein the Secretary shall comply with the rulemaking requirements of section 553 of title 5, United States Code, and the hearing requirements of sections 556 and 557 of title 5, United States Code. These sections shall apply as if the Secretary were the agency referred to therein.

(3) The term "claimant" means an individual who is eligible to seek compensation under this Act, as set forth in section 1(b)(1).

(4) The term "affected person" means—

(A) a person disabled by an asbestos-related disease resulting from occupational exposure to asbestos;

(B) a person disabled by an asbestos-related disease resulting from the occupational exposure to asbestos of a member of such person's household; and

(C) a deceased person whose death from an asbestos-related disease results from occupational exposure of the deceased person himself or of some member of the deceased person's household.

(5) The term "child" means a natural or adopted child or a stepchild who—

(A) is unmarried; and

(B)(i) has not attained eighteen years of age; or

(ii) is under a disability as defined in section 223(d) of the Social Security Act which began before the age specified in section 202(d)(1)(B)(ii) of the Social Security Act or, in the case of a student, before he ceased to be a student; or

(iii) is a student.

(6) The term "compensation" means money or services made available under any applicable State or Federal workers' compensation law or pursuant to this Act to a claimant, including medical and rehabilitation services designed by the State or Federal agency carrying out the applicable State or Federal workers' compensation law.

(7) The term "dependent" means—

(A) a child of an affected person; and

(B) a wife who is a member of the same household as the affected person or is receiving regular contributions from the affected person for her support or whose husband is an affected person who has been ordered by a court to contribute to her support or who meets the requirements of section 216(b)(1) or (2) of the Social Security Act, or in the case of an individual who is a wife of a minor, the determination shall be made in accordance with section 216(h)(1) of the Social Security Act as if the affected person were an insured individual referred to in that Act, and such term also includes a divorced wife as defined in section 216(b)(1) of the Social Security Act who is receiving at least one-half of her support as determined in accordance with regulations prescribed by the Secretary from the affected person or is receiving substantial contributions from the affected person (pursuant to a written agreement), or there is in effect a court order for substantial contribution to her support from such affected persons.

(8) The term "total disability" has the meaning given it by the regulation of the Secretary. Such regulation shall provide that an affected person shall be considered totally disabled when by reason of an asbestos-related disease his prior level of earnings had decreased 60 per centum.

For purposes of this definition, an affected person's prior level of earnings shall be his average annual earnings over the highest three of the last five years preceding his application for benefits under this Act. The level of earnings of an affected person who has not been employed within that period shall be measured by his earning capacity as if he were not disabled.

(9) The term "partial disability" means a condition that results in less than total disability as defined in this Act.

(10) The term "responsible party" in each case shall include any corporation, partnership, individual, joint venture or any other entity which with regard to the specific affected person involved—

(A)(i) employs or employed the claimant or claimant's decedent filing a claim under this Act who has been occupationally exposed to asbestos during such employment, or employs or employed a member of the affected person's household who has been occupationally exposed to asbestos during such employment; or

(ii) engages or has engaged in the mining, or manufacture or sale, excluding sales wherein the seller supplies an asbestos-containing product to a buyer who then brands or re-brands the product and subsequently sell or otherwise introduces the product into the stream of commerce, or import for sale or distribution of asbestos fiber or any product or substance containing asbestos which, by weight of reasonable scientific evidence, is determined to contribute to the incidence of asbestos-related disease, disability, or death; and

(B) is determined by a State or Federal workers' compensation agency to have contributed to the occupationally related asbestos-related disease or death or whose products so contributed to asbestos-related disease or death for which compensation may be paid under this Act.

The term "responsible party" may include the Federal Government, any State, or any public agency or a political subdivision of such Federal or State government regardless of whether such Government or agency qualifies under subparagraph (A) of this section.

(11) The term "State" means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, and American Samoa.

(12) The term "State workers' compensation agency" means an agency, court, or official designated in each State as responsible for the administration or enforcement of the workers' compensation laws of that State.

(13) The term "Federal workers' compensation agency" means an agency, court, or official designated by the Federal Government as responsible for the administration or enforcement of the Federal workers' compensation laws.

(14) The term "employee" means any individual employed by his or her employer or any individual who is treated as an employee for purposes of the workers' compensation law of any State or any Federal workers' compensation law, and for purposes of this Act shall include members of the household of employees occupationally exposed to asbestos.

(15) The term "State workers' compensation laws" means the laws of each State which provide compensation for death and disability resulting from occupational diseases.

(16) The term "Federal workers' compensation laws" means the laws of the Federal Government which provide compensation for death and disability resulting from occupational diseases.

(17) The term "student" means a full-time student as defined in section 202(d)(7) of the Social Security Act, or a student as defined in section 8101(17) of title 5, United States Code.

(18) The term "Secretary" means the Secretary of Labor.

(19) The term "widow" includes the wife living with or dependent for support on the affected person at the time of his death, or living apart for reasonable cause or because of his desertion, or who meets the requirements of section 216(c)(1), (2), (3), (4), or (5) and section 216(k) of the Social Security Act, who is not married. The determination of an individual's status as the widow of an affected person shall be made in accordance with section 216(h)(1) of the Social Security Act as if such affected person were the insured individual referred to therein. Such term also includes a surviving divorced wife as defined in section 216(d)(2) of the Social Security Act, who, for the month preceding the month in which the affected person died, was entitled to or receiving from the affected person at least one-half of her support as determined in accordance with regulations prescribed by the Secretary, or was receiving substantial contributions from the affected person (pursuant to written agreement), or there was in effect a court order for substantial contributions to her support from the affected person at the time of his death.

(20) The term "employer" means any person employing individuals and engaged in commerce or an industry affecting commerce, and shall include the United States of America, or any State or political subdivision thereof.

(21) In the case of a claimant who is a woman, references in this Act to the wife or widow of such affected person shall be deemed to refer to the husband or widower.

APPLICABILITY

SEC. 3. The provisions of this Act shall apply only to disability or death of an affected person resulting from such person's occupational exposure to asbestos, or resulting from the occupational exposure to asbestos of a member of such person's household.

STANDARDS FOR BENEFITS FOR DISABILITY OR DEATH RESULTING FROM EXPOSURE TO ASBESTOS

SEC. 4. (a) The minimum standards for State and Federal workers' compensation for the purpose of this Act shall be as follows:

(1) Compensation for total disability shall be paid in any case in which, as a result of an asbestos-related disease, the affected person is totally disabled as defined in section 2(8).

(2) Compensation for partial disability shall be paid in any case in which the affected person is partially disabled as a result of an asbestos-related disease and the post disability wage earning capacity of the affected person does not equal that person's gross weekly wage prior to the disability, taking into consideration age, training, and local conditions.

(3) Compensation for total disability, or death, due to an asbestos-related disease shall not be less than 66⅔ per centum of the average gross weekly wage of the affected person for the highest three of the five years

immediately preceding the beginning of total disability or prior to death: *Provided, however,* That no compensation payable under this Act shall be less than 10 per centum in excess of the weekly compensation benefit which would have been payable to the employee, as defined in this Act, pursuant to the workers' compensation laws of the State in which the claim is filed and allowed or pursuant to an applicable Federal workers' compensation law, but for the provisions of this Act.

(4) Compensation for partial disability shall be not less than 66⅔ per centum of the difference between the average gross weekly wage of the affected person for the highest three of the five years immediately preceding determination of partial disability and the wage-earning capacity of the affected person after the disability taking into consideration age, training, and local employment conditions: *Provided, however,* That no compensation payable under this Act shall be less than 10 per centum in excess of the weekly compensation benefit which would have been payable to the employee, as defined in this Act, pursuant to the workers' compensation laws of the State in which the claim is filed and allowed or pursuant to an applicable Federal workers' compensation law, but for the provisions of this Act.

(5) Compensation provided for in subsection (3) and (4) of this section shall be increased by 50 per centum of the difference between the compensation provided under section 4(a)(3) and 4(a)(4) and 80 per centum of the average gross weekly wage of the affected person for the highest three of the five years immediately preceding the beginning of total disability or prior to death if the claimant has one dependent, and by 100 per centum of the difference if the claimant has two or more dependents, but compensation shall in no case be more than 80 per centum of the affected person's average weekly wage for the highest three of the five years immediately preceding the beginning of total disability or prior to death. The compensation provided by this Act shall not be reduced because of any provision in State or Federal workers' compensation laws relating to maximum benefits.

(6) Benefits shall be indexed on the basis of any change in the wage scale of the job which the affected person held and which the affected person would still hold if the affected person had not been disabled or had not died, except that benefits may be recomputed once the affected person attains the normal age of retirement or otherwise would have experienced a change in income if the claimant had remained on that job.

(7) There shall be no exemption from or a waiver of liability for a responsible party and the standards and provisions of this Act shall apply uniformly to all responsible parties.

(8) Benefits shall be paid for the duration of the disability, or for the life of the claimant whichever is less without limitation as to the dollar amount or the period of payment.

(9) In addition to compansation for wage replacement, responsible parties shall pay for medical and rehabilitation benefits which are necessary and reasonable and such compensation shall be paid without limitation as to dollar amount or the period for providing such benefits.

(10) Barriers to compensation for occupational disease, disability, or death to which this Act applies shall be void, including but not limited to, provisions relating to the time since the last exposure to asbestos or the time period from the last date of employment by any responsible party.

(11) Benefits shall be paid to the widow or widower of a claimant for life or until remarriage. If a widow or widower remarries, two years' benefits shall be paid by responsible parties in a lump sum to such widow or widower. If additional dependents exist after the death or remariage of the widow or widower, 50 per centum of the benefits shall be paid to such dependents in equal shares until the dependents cease to be dependents.

(12) No responsible party may discriminate on the basis of race, creed, color, national origin, age, sex, handicapped condition, prior employment in the asbestos industry, or past exposure to asbestos, against a claimant or any other person directly involved in making a claim pursuant to this Act. No responsiole party may discriminate against a claimant for exercising any rights under this Act or exercising any right under applicable State or Federal workers' compensation laws.

(13) Any claimant who believes that he has been discharged or otherwise discriminated against by any responsible party covered by this Act in violation of section 4, subsection 12 of this Act may, within ninety days after such violation occurs, apply to the Secretary for a review of such alleged discharge or discrimination. A copy of the application shall be sent to such person who shall be the respondent. Upon receipt of such application, the Secretary shall cause such investigation to be made as he deems appropriate. Such investigation shall provide an opportunity for a public hearing at the request of any party to enable the parties to present information relating to such violation. The parties shall be given written notice of the time and place of the hearing at least five days prior to the hearing. Any such hearing shall be of record and shall be subject to section 554 of title 5 of the United States Code. Each hearing examiner presiding under this section shall receive compensation at a rate not less than that prescribed for GS–16 under section 5332 of title 5, United States Code. Upon receiving the report of such investigation, the Secretary shall make findings of fact. If he finds that such violation did occur, he shall issue a decision, incorporating an order therein, requiring the person committing such violation to take such affirmative action as the Secretary deems appropriate, but not limited to, the rehiring or reinstatement of the claimant to his former position with back pay. If he finds that there was no such violation, he shall issue an order denying the application. Such order shall incorporate the Secretary's findings therein.

(14) Each employer shall make a reasonable effort to reemploy a rehabilitated affected person in a position commensurate with his age, training, and medical condition.

(15) Notwithstanding paragraph (10) of this section any claim for benefits under this Act must be filed within three years after death or an initial medical determination of total disability due to the asbestos-related disease, whichever occurs first.

Provided, however, that every claimant shall have three years after the date of enactment of this Act, within which to file a claim for benefits hereunder.

(16) Any claimant or responsible party may reapply for an increase or decrease in the level of benefits previously awarded under this Act based upon an increase or decrease in disability of the affected person.

(17) The Secretary shall by regulation prescribe minimum standards for determining whether an affected person is disabled due to asbestos-related disease; or whether the death of an affected person was due to asbestos-related disease. Regulations required by this subsection shall be promulgated and published in the Federal Register at the earliest practicable date after the date of enactment of this Act, but in no event later than one hundred and twenty days after this Act is enacted. In promulgating such regulations the Secretary shall comply with the rulemaking requirements of section 553 of title 5, United States Code, and the hearing requirements of sections 556 and 557 of title 5, United States Code. These sections shall apply as if the Secretary were the agency referred to therein. Such regulations shall provide that claimants seeking benefits under this Act must demonstrate that such affected person has, in fact, contracted a disabling asbestos-related disease. In making the determination that an affected person has contracted a disabling asbestos-related disease, all relevant evidence shall be considered, including the history of such person's exposure to asbestos including, but not limited to, physical examination, X-ray examinations, medical tests such as pulmonary function studies, including blood gas studies and studies of ventilatory capacity at rest and during exercise (physical performance tests) and pathology studies. Medical histories, hospital records, physician's reports, and his spouse's affidavit, and in the case of a deceased affected person, other appropriate material shall be considered. The Secretary shall accept the interpretation by a physician who is board certified or board eligible in the fields of preventive medicine/occupational health, pulmonary medicine, or radiology of a chest roentgenogram which is of acceptable quality submitted in support of a claim for benefits under this title, if such roentgenogram has been taken by a radiologist or qualified radiologic technologist or technician, except when the claim has been fraudulently represented.

The Secretary shall not make any determination that an affected person has not contracted an asbestos-related disease solely on the basis of a negative chest roentgenogram. In no event shall there be any presumption of asbestos-related disease based solely on the length or degree of exposure to asbestos.

(18) No compromise or release of any compensation or medical or rehabilitation benefits shall be effective unless approved by the State workers' compensation agency, based on a determination by such agency that such compromise or release is in the best interest of the claimant, and will not adversely affect any program of rehabilitation.

(19) Compensation paid pursuant to this Act will not offset or be offset by any other benefits paid to claimants nor be considered as income for tax purposes.

CERTIFICATION AND SUPPLEMENTAL COMPENSATION

SEC. 5. (a) The Secretary of labor shall review the workers' compensation law of each State and of the Federal Government to determine whether such law meets the applicable standards for worker's compensation programs for asbestos-related disease or disability contained in section 4 of this Act. If the Secretary determines that State law meets all of the requirements of section 4, the Secretary shall so certify and the State law shall be deemed fully certified during the period covered by such certification. The Secretary shall do likewise with the Federal workers' compensation law.

(b) If the Secretary finds that the law of any State or of the Federal Government fails to meet one or more of the standards of section 4 of this Act, the Secretary shall certify the law only to the extent that it meets such standards, and the Secretary shall specify those standards which the law fails to meet. During any period in which the State or Federal law has not been fully certified, any employee shall be entitled to receive from his or her employer, with regard to any asbestos-related dsease or disability arising out of and in the course of employment with such employer, compensation in accordance with the provisions of this Act with which the State or Federal law is not in compliance (hereinafter referred to as "supplemental compensation").

(C) After initial review provided by subsection (a), the Secretary shall annually review all state and federal workers' compensation statutes and regulations relating to as-

bestos-related disease or disability, including the judicial and administrative interpretations of such statutes and regulations, and determine whether it meets the requirements of section 4 of this Act. Pursuant to such reviews, the Secretary shall modify the certifications previously issued under subsection (a) and (b) of this section, as appropriate.

ENFORCEMENT OF SUPPLEMENTAL COMPENSATION

SEC. 6. (a)(1) Any claimant who is aggrieved by an order or award of a State or Federal workers' compensation agency, insofar as it fails to award compensation at least equivalent to the compensation prescribed by this Act may within ninety days after such order or award becomes final file a petition for review of the State or Federal workers' compensation agency's order or award, insofar as it fails to award such compensation, with the Benefits Review Board (hereinafter referred to in this section as the "Board") established in section 21 of the Longshoremen's and Harbor Workers' Compensation Act, as amended (hereinafter referred to as the "Longshore Act").

(2) For the purpose of this section, the order or award of a State or Federal workers' compensation agency shall become final for the purpose of section 6(a)(1) above on the date on which no administrative appeal or review of such order or award shall be available to any party subject to such order.

(b) State law shall govern the determination of the status of any individual as an employee or an independent contractor.

(c)(1) In review proceedings under this section, the decision of the Board shall be based upon the evidence in the record before the State or Federal workers' compensation agency except that the Board, in its discretion, may (i) in any case in which the workers' compensation agency has refused to assert jurisdiction over the claim, refer the case to the Office of Workers Compensation Programs of the Department of Labor for processing in accordance with the provisions of the Longshore Act, or (ii) in any case where the State agency has refused to assert jurisdiction over the claim or has otherwise precluded the introduction of evidence permit the parties to submit additional relevant evidence in a hearing before an administrative law judge in accordance with sections 19 and 21 of the Longshore Act.

(2) Where new evidence is not submitted, the findings of fact by the State workers' compensation agency, insofar as they involve eligibility for supplemental compensation shall be conclusive if supported by substantial evidence on the record as a whole. Findings of fact and conclusions of law in the determination of the State workers' compensation agency on issues covered solely by State law shall be conclusive, and not subject to review in any proceeding under this section.

(3) Where the Board finds that the employer has failed to provide supplemental compensation to which the petitioner is entitled, the Board shall direct the employer to award the petitioner such compensation together with the reasonable costs and expenses of litigation, including reasonable attorney's fees.

(4) Any order issued by the Board shall be enforceable and reviewable in accordance with section 21 of the Longshore Act.

(5) Any award of the Board shall be modified to take into account subsequent orders or awards of the State or Federal workers' compensation agencies with respect to issues solely covered by State or Federal law. With respect to issues not solely covered by State law, procedures for the modification of Board awards or orders shall be in accordance with section 22 of the Longshore Act, except that references in that section to "the deputy commissioner" shall mean "the Board" and the word "his" in the first sentence of that section shall be read "its" and shall refer to the Board.

(6) Sections 14, 17, 18, 19, 21, 21a, 23, 24, 25, 26, 27, 31, 34, 35, 38, and 39 (a) and (c) of the Longshore Act shall be applicable with respect to claims for supplemental compensation payable under this Act during any period in which the workers' compensation law of that State is not fully certified. The Secretary shall by regulation modify the provisions of section 14 of the Longshore Act to conform the payment of supplemental compensation to the payment schedule of the applicable State's law, and may by regulation modify the applicability of any other of the foregoing provisions as appropriate to carry out the purposes of this Act.

APPORTIONMENT

SEC. 7(1) The employer or any other responsible party, or on its own behalf the State or Federal Worker's compensation agency may petition within 180 days of the initiation of a claim hereunder to have one or more responsible parties named as additional defendants in the proceeding to adjudicate a claim under this Act and to have the supplemental compensation adjudicated against and apportioned between responsible parties.

The State or Federal Workmen's Compensation agency shall adopt the percentage ranges of contribution established by the Commission under Section 8(c), and in the event that the Federal or State Workmen's Compensation agency determines that more than one party is responsible for any factor considered or specified under Section 8(c), then it shall be the responsibility of the State or Federal Workmen's Compensation agency to apportion the percentage of liability among such parties, unless such parties have previously agreed to an apportionment formula, in which event such agreement shall be binding on the State or Federal Workmen's Compensation Agency.

In apportioning liability among responsible parties included under 8(c)(1) the State or Federal Worker's Compensation Agency shall consider all the relevant factors.

Except to the extent provided for in 7(2)(c) no payment shall be required of a responsible party as defined in Section 2(10)(A)(ii) of this Act in any proceeding unless the affected person who is subject of that proceeding has been exposed to said party's fiber or products; *Provided however*, that such failure to identify any particular responsible party shall not effect the applicability of any other section of this Act.

In no event shall payment be required of a responsible party as defined in Section 2(2)(1)(A)(ii) of this Act in any proceeding unless the affected person who is subject of that proceeding has been exposed to said party's fiber or products; *Provided however*, that such failure of an affected person to identify any particular responsible party shall not effect the applicability of any other section of this Act.

(2)(a) In any proceeding to which this section applies, the worker's compensation agency shall designate the last private or public employer who exposed the affected person to asbestos to pay compensation to the claimant and shall require other responsible parties, subject to the order or award, to reimburse such employer. When the agency is unable to locate or designate the employer, the agency shall designate a single responsible party, to pay compensation to the claimant and shall require other responsible parties, subject to the order or award, to reimburse the designated party. The claimant shall be paid promptly and such payment shall not be affected by or be dependent on other responsible parties reimbursing such last employer or designated party.

(b) The contribution of the employer to the compensation paid shall be not less than an amount equal to that which would have been paid to the employee as defined in this Act, pursuant to the worker's compensation laws of the State in which the claim is filed and allowed or pursuant to an applicable Federal worker's compensation law, but for the provisions of the Act, with no rights to subrogation. Where there is no employer designated, this contribution shall be apportioned according to the provisions of 7(2)(a).

(c) Responsible parties shall make a contribution to the compensation paid in an amount equal to the difference between the employer's contribution as computed pursuant to this section and the full compensation paid pursuant to this Act. Where the employer is unable to locate and designate anyone as a responsible party, the agency shall designate one or more parties to serve as the responsible party or responsible parties.

COMMISSION TO ESTABLISH CRITERIA FOR APPORTIONMENT

SEC. 8. (a) There is hereby established an Apportionment Criteria Commission (hereafter referred to as the "Commission") composed of the following members to be appointed within thirty days of the date of enactment of this Act:

(1) The Secretary of Labor or his designee;

(2) The Attorney General or his designee;

(3) The Secretary of Health, Education, and Welfare or his designee;

(4) Two appointees of the Secretary of Commerce, one to be the chief executive officer or his designee of the largest company in the asbestos industry as determined by market share, and the other to be the chief executive officer or his designee of a second company in the asbestos industry, irrespective of market share;

(5) The directors of two State workers' compensation agencies, one to be chosen by the two chief executive officers above, and one to be chosen by the Secretary of Labor;

(6) Three members appointed by the President of the United States with special expertise, one to represent the labor community, one to represent the business community, and one to represent the insurance industry;

(7) A chairman of the Commission to be appointed by the President with the advice and consent of at least seven members listed above.

(b) The Commission shall develop the criteria and factors which shall be used by State and Federal workers' compensation agencies in apportionment proceedings under this Act, and shall have the power to conduct hearings and obtain all relevant information.

(c) The criteria developed by the Commission shall include the establishment of percentage ranges of liability for a variety of factors including, but not limited to—

(1) the party or parties responsible for the manufacture, design, formula, preparation, assembly, testing, warning, instruction, marketing, packaging, distribution, or labeling of any asbestos product;

(2) the party or parties responsible for control of the workplace environment and for publishing safe exposure limits for the workplace environment; and

(3) the party or parties responsible for establishing the criteria to which product specifications were designed and products manufactured.

(d) The criteria developed by the Commission must be approved by at least eight of the eleven members. The Commission shall report to Congress within six months of the date the Commission's last member

is appointed, and the Commission's report will be final and will go into effect sixty days thereafter, unless Congress shall disapprove it. If Congress disapproves the Commission will have three months to submit a revised report which will go into effect sixty days thereafter unless Congress shall disapprove it.

(e) The administrative expenses of the Commission including those of an executive secretary and legal counsel and such other personnel and services deemed necessary to the conduct of its business shall be paid from the authorized appropriations of section 11.

APPEALS

SEC. 9. (a) Any order issued by the Board shall be enforceable and reviewable by a United States court of appeals in accordance with section 21 of the Longshore Act.

(b)(1) Any responsible party aggrieved by an apportionment order or award of a State or Federal workers' compensation agency may appeal the decision of the State or Federal workers' compensation agency in accordance with procedures established by the applicable State or Federal law.

(2) In addition to any procedures prescribed by State law for appeal by responsible parties under section 9 of this Act with the consent of all responsible parties subject to an order or an award of a State workers' compensation agency, the agency may submit the issues contained in the appeal to binding arbitration. Any order for binding arbitration or any agreement for binding arbitration under the provisions of this subparagraph shall be carried out in accordance with State law.

(c)(1) In any proceeding subject to subsection (a) of this section in which the Federal Government is one of the responsible parties, the provisions of this Act shall apply.

(2) In any such proceeding whenever there is contribution by more than one responsible party in an order or an award of a State or Federal workers' compensation agency and one of the responsible parties is the Federal Government, the State or Federal workers' compensation agency may order the Federal Government to make contributions in proportion to its share of responsibility.

EXCLUSIVITY AND THIRD PARTY LIABILITY

SEC. 10. (a) The compensation to which a claimant is entitled under the applicable State or Federal workers' compensation laws or otherwise under this Act shall constitute the claimant's exclusive remedy against any employer or the parent or subsidiary or subsidiaries or predecessors or affiliates or successors thereto of such entities or past or present officers or directors or employees or shareholders thereof, the employer's insurer or collective bargaining agent of the employer's employees, or any employee, officer, director, or agent of such employer, insurer, or collective bargaining agent (while acting within the scope of his or her employment) for any illness, injury, or death compensable under this Act.

(b) No person or persons entitled to file a claim for benefits pursuant to applicable State or Federal workers' compensation laws and/or pursuant to this Act or who would have been entitled to file such a claim but for the expiration of limitation of action periods as set forth in this Act or such other persons whose claim would be derivative therefrom shall be allowed to recover against a present or former (i) miner, manufacturer, distributor, seller, contractor, or applicator of asbestos fibers, or materials, or the parent or subsidiary or subsidiaries or predecessors or affiliates or successors thereto of such entities or past or present officers or directors or employees or shareholders thereof, (ii) any other responsible party as defined in this Act, (iii) the United States of America, (iv) the insurers of these entities in (i), (ii), and (iii), or (v) a union which has represented such persons for collective bargaining or the parent organization of such union, for damages, including but not limited to actual, consequential, or survivorship, for bodily injury or death caused by an asbestos-related disease, loss of consortium, or for exemplary or punitive damages relating to such exposure.

(c) No responsible party may maintain any action for indemnity, contribution or other monetary damages based upon such responsible party's payment or payments pursuant to the provisions of this Act against any party immune from suit under subsections (a) and (b) of this section.

(d) No employer may maintain any action for indemnity, contribution or other monetary damages based upon such employer's payment or payments of worker's compensation benefits for an occupational disease covered by this Act nor for any payment or payments made pursuant to provisions of this Act against any party immune from suit under subsections 10(a) and 10(b) for any sums paid to the employee as workers' compensation benefits pursuant to applicable State or Federal workers' compensation laws or the provisions of this Act.

(e) Notwithstanding any other provision of law, whether substantive, jurisdictional or procedural, in any civil action arising out of or having its basis in any acts to which subsection (a) of this section applies, the provisions of this section shall exclusively govern the rights of the claimant and of each responsible party.

RESPONSIBILITY AND INSURANCE FOR RESPONSIBLE PARTIES

SEC. 11. (a) Every responsible party shall comply with orders or awards of the appropriate State workers' compensation agency made in accordance with the provisions of this Act.

(b) Every employer who has reason to believe that it is a responsible party under the provisions of this Act shall be financially responsible for the payment of benefits prescribed by this Act, and shall assure such financial responsibility by contracts of insurance, approved self-insurance programs or participation in a State fund insurance program pursuant to applicable State or Federal law.

(c) Each contractor of insurance under which compensation benefits are provided to or for employees of any responsible party made to cover occupational diseases, disabilities, or deaths as a result of exposure to asbestos shall be deemed to provide benefits in accordance with the minimum standards contained in section 4 of this Act.

(d) Any policies or contracts of insurance issued by a carrier to indemnify and/or defend a responsible party which policies or contracts of insurance would be applicable to claims against any responsible party for damage due to an asbestos-related disease shall be applicable to any contribution required or otherwise determined to be due from a responsible party under this Act.

MISCELLANEOUS

SEC. 12. (a) The Secretary may prescribe such rules, regulations, and guidelines under this Act as he deems necessary. All such rules, regulations, and guidelines shall be published in the Federal Register at least thirty days prior to their effective date.

(b) The Secretary may make such grants, contracts, or agreements, establish such procedures, and make such payments, installments, and advance by way of reimbursement, or otherwise allocate or expend funds made available under this Act as he deems necessary to carry out the provisions of this Act. The Secretary may make necessary adjustments in payments on account of overpayments or underpayments.

(c) The Secretary is authorized, by cooperative agreement, to carry out the duties of a responsible party under this Act for each department and agency of the Federal Government.

ANNUAL REPORT

SEC. 13. Within one hundred and twenty days following the convening of each regular session of each Congress, the Secretary shall prepare and submit to the President for transmittal to the Congress a report upon the subject matter of this Act, the progress toward achievement of the purpose of this Act, and the needs and requirements in the field of workers' compensation.

AUTHORIZATION OF APPROPRIATIONS

SEC. 14. There are authorized to be appropriated such sums as are necessary to carry out the provisions of this Act.

SEPARABILITY

SEC. 15. If the provisions of sections 1(a)(7); 2 (2), (8) and (10); 4(a) (3), (4), (5), (6), (15), and (16) 5; 6; 7; 10; or 11 (c) or (d) of this Act or the application of any such section to any person or circumstance, shall be held invalid in any substantive or material fashion, the remainder of the Act, with the exception of section 16 (c), shall be null and void. If any other provision of this Act or the application of such provision to persons or circumstance other than these as to which is held invalid, shall not be affected thereby.

EFFECTIVE DATE

SEC. 16. (a) The provisions of this Act shall take effect upon the date of enactment. No compensation shall be awarded to any claimant, however, prior to the time the criteria developed by the Commission established in section 8 becomes effective.

(b) Any claimant who, as of the effective date of this Act, has pending in any Federal court or any court in any of the several States an action at common law to recover damages on account of any asbestos-related disease, as defined in section 2 of this Act, may, upon first moving to dismiss with prejudice such action at common law within one hundred and twenty days of the effective date of this Act, elect to proceed under the provisions of this Act after such suit is dismissed. Any claimant not so electing shall not be entitled to benefits under this Act.

(c) A lawsuit which a claimant pursued to settlement or final determination before the effective date of this Act shall not bar a claimant from filing a claim or receiving a benefit under this Act. The benefit awarded to any claimant who, prior to the effective date of this Act, pursued an action at common law to settlement or final determination shall be reduced by the amount actually received as a result of that law. If a weekly or monthly benefit is awarded under this Act, any amount received as a result of that prior lawsuit shall be divided by the number of weeks or months which a person of the claimant's age or sex is expected to live and subtracted from the monthly or weekly benefit.

(d) Should the remainder of this Act be declared null and void, the claimant electing to proceed under the provisions of this Act shall, within one hundred and twenty days from the date of the final order declaring the remainder of the Act null and void, be permitted to reinstitute his or her action to recover damages with respect to asbestos-related disease.●

By Mr. MOYNIHAN:

S. 1644. A bill to amend the Internal Revenue Code to allow an investment tax credit for theatrical productions; to the Committee on Finance.

THEATRICAL PRODUCTION INVESTMENT TAX CREDIT ACT OF 1981

● Mr. MOYNIHAN. Mr. President, I am introducing a bill today that would provide private citizens an incentive to put up money for commercial productions of plays, ballets, and operas.

Fewer and fewer new plays are being produced each season in commercial theaters in New York and other big cities. During the 1920's and 1930's, 161 new plays opened on average each season on Broadway. According to Variety, that number fell to 65 a year in the 1940's, to 50 in the 1950's and 1960's, and to only 38 a year during the last decade.

Economics are to blame. The theater cannot compete with television and film for talented writers. Theater does not pay as well. A good playwright can earn more writing 30-second television commercials than he can turning out full-length plays.

In addition, it is not as easy as it was before to find individuals willing to put money into shows. Production costs have skyrocketed, requiring that a play run for months—if not a year—before just the cost of staging it can be repaid.

Investing in the theater "is an area fraught with hazard," Warren Hoge wrote 3 years ago in the New York Times. "Four out of five shows lose money * * *. Of the profitable ones, half produce only meager returns."

Hoge said:

A small number of shows make colossal profits and that it is the possibility of such profits that keeps moneymen rolling against the odds. (But) now even those odds are getting longer. "The opportunity for substantial profits to justify the risks is becoming less" (said one long-time inventor). "Due to the higher cost of operating, you can have a show that will run for a year and keep paying everyone except the investor. The profit is so small that recouping is impossible, let alone making any money."

The bill I am introducing today should help to eliminate the investment shortfall. It would do this by making investors in theatrical productions eligible for a 6⅔-percent investment tax credit. A theatrical production is "a presentation of a dramatic work, including a play, musical, opera, or ballet performed in a theater before a live audience."

All I ask is that individuals be given the same incentive to invest in theatrical productions that they have to invest in movies. Movie investors have been able to claim the investment tax credit since 1976. Theater investors may not claim it.

My bill is patterned after section 48(k) of the Tax Code, the section authorizing the investment credit for investors in films.

Mr. President, I ask unanimous consent that the text of the bill and a recent article on theaters from the Sunday Times of London be printed in the RECORD.

There being no objection, the bill and article were ordered to be printed in the RECORD, as follows:

S. 1644

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. SHORT TITLE.

This Act may be cited as the "Theatrical Production Investment Tax Credit Act of 1981".

SEC. 2. INVESTMENT TAX CREDIT FOR THEATRICAL PRODUCTIONS.

(a) THEATRICAL PRODUCTIONS TREATED AS SECTION 38 PROPERTY.—Subsection (a) of section 48 of the Internal Revenue Code of 1954 (defining section 38 property) is amended by adding at the end thereof the following new paragraph:

"(11) THEATRICAL PRODUCTIONS.—

"(A) IN GENERAL.—The term 'section 38 property' includes theatrical productions.

"(B) THEATRICAL PRODUCTION DEFINED.—For purposes of this subpart, a 'theatrical production' is a presentation of a dramatic work, like a play, musical, opera or ballet, in a theater before a live audience. It is not, however, a presentation primarily for use on television or radio, or in a night club or film."

(b) SPECIAL RULES FOR THEATRICAL PRODUCTIONS.—Section 48 of such Code is amended by redesignating subsection (q) as subsection (r) and by inserting after subsection (p) the following new subsection:

"(q) THEATRICAL PRODUCTIONS.—

"(1) ENTITLEMENT TO CREDIT.—

"(A) IN GENERAL.—A credit shall be allowed under section 38 to a taxpayer for the costs of a theatrical production, but only to the extent that the taxpayer has an ownership interest in it.

"(B) OWNERSHIP INTEREST DEFINED.—A taxpayer's 'ownership interest' shall be determined on the basis of his proportionate share of any loss that may be incurred with respect to the theatrical production.

"(2) PROPORTION OF INVESTMENT QUALIFYING FOR THE CREDIT.—

"(A) IN GENERAL.—In the case of theatrical productions, the term 'qualified investment' in section 46(a)(2) means, for each theatrical production placed in service by the taxpayer during the taxable year, an amount equal to 66⅔ percent of the qualified United States production costs.

"(B) PLACED IN SERVICE DEFINED.—A theatrical production shall be treated as placed in service by the taxpayer during the taxable year when it is first publicly presented, including a public presentation preceding an opening before the ultimate audience for which it was intended, but not including a presentation before a select audience, such as prospective contributors.

"(3) QUALIFIED UNITED STATES PRODUCTION COSTS.—

"(A) IN GENERAL.—For purposes of this subsection, the term 'qualified United States production costs' means production costs incurred—

"(i) in producing a theatrical production for presentation in the United States, and

"(ii) prior to the time a theatrical production opens before the ultimate audience for which it was intended.

"(B) PRODUCTION COSTS DEFINED.—For purposes of this paragraph, the term 'production costs' includes—

"(i) costs directly associated with the theatrical production, like the cost of equipment and supplies, and compensation (other than participations described in clause (v)) for services performed by actors, production personnel, directors, and producers,

"(ii) a reasonable allocation of general overhead costs,

"(iii) the cost of the rights to present a theatrical production (but not including ancillary rights such as rights for television, films, radio, or night club presentations),

"(iv) 'residuals' payable under contracts with labor organizations, and

"(v) participations payable as compensation to actors, production personnel, directors, and producers.

But participations in all theatrical productions produced by a taxpayer during a taxable year shall be taken into account only to the extent of the lesser of 25 percent of each such participation or 12½ percent of the aggregate qualified United States production costs (excluding costs described in clauses (iv) and (v) of this subparagraph) for such theatrical productions, taking into account, however, for both the 25 percent limit and the 12½ percent limit no more than $1,000,000 in participations for any one individual for any one theatrical production. For purposes of this paragraph (other than clauses (iv) and (v) of this subparagraph and the preceding sentence), costs shall be taken into account only if they are capitalized. Production costs do not include advertising and promotional expenses.

"(4) UNITED STATES.—For purposes of this subsection, the term 'United States' includes possessions of the United States."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1981.

---

THE SOUND OF MUSIC—OR OF DOOM?

The tills are alive with "The Sound of Music." Rodgers and Hammerstein's legendary musical is 21 years old, and it has settled in at the Apollo Victoria with all the confidence of a much-loved governess who knows she has been missed. But behind its sedate charm there lurks a baleful warning for the future of British theatre.

The show cost £750,000 to put on, and it has already more than repaid the investment: £1 million-worth of tickets had been sold even before the curtain rose on the first performance. The Apollo seats 2,400 people and it is nearly sold out until Christmas.

There is nothing in London to match this. In fact the commercial theatre is having an extremely difficult time. If you are a producer and want to put on a play in the West End with one set, a small cast and one star actor, you need a capital of £60,000 to £80,000. The play will then have to run for about six months to break even. A couple of decades ago a producer could still take risks: if he had one successful play running he could subsidise another or two that just broke even and one or two that had flopped. Today one success will just about pay for one disaster. Two failures in a row are unthinkable.

Things are made worse by the mulish refusal of successsive governments to take VAT off theatre tickets, or at least to reduce it. If this were done (most unlikely) some managements might possibly cut the price of their tickets. Others could operate with a slightly larger financial margin: they could afford to keep a play going when it was doing only moderately well and hope for improvement. As it is, confidence is brittle. Lame ducks, in the West End, are killed.

All this has, in the past five to six years, changed the face of the London theatre. This week five theatres (the Globe, the Duke of York's, the Fortune, the Phoenix and Drury Lane) will be dark. The Apollo in Shaftesbury Avenue goes dark the following week. That sort of thing makes people extremely cautious. It is not surprising that London

managements have turned a beady eye on the activities of the subsidised theatre. Nine London houses are currently showing plays that had first been successful on subsidised stages ranging from the National Theatre to a disused East End music hall and an Islington pub.

Like most things, this is both good and bad. Transfer a play to the West End and you prolong its life; and you often give little-known actors or directors a chance to shine before a wider public. You also bring a new audience into the theatre. Anyone who goes to see "Accidental Death of an Anarchist" (Wyndham's, originally the Half Moon in the East End) or "Educating Rita" (Piccadilly, originally the Warehouse) will step into a different world. These plays attract not only the theatre lover but also the committed, radical young: people who did not think that the live drama had anything much to say to them.

On the other hand this sort of thing could greatly harm the fringe theatre. It has already lost much of the abrasive, radical drive it used to have 10 to 15 years ago. If it were to start putting on plays with an eye on the West End it could prove fatal: the fringe could end up doped by the sweet smell of success.

At the same time commercial managements could become even less enterprising. Without new writers the theatre is nothing; but when the risks are so enormous who can blame a West End producer for not investing in new talent? That task has now been left almost entirely to the subsidised theatre both in and out of London, and the West End feeds on it like an accommodating parasite.

Look at this week's theatre programmes. Apart from the subsidised houses, only nine theatres in London will be showing a serious play, that is to say, not musicals, thrillers or boulevard comedies; and only three of these were originated by an independent management. One of these is a Thirties revival, Priestley's "Dangerous Corner" (Ambassadors); another is by an established dramatist, Simon Gray's "Quartermaine's Terms" (Queen's). The third is "Can't Pay? Won't Pay!" (Criterion) by Dario Fo—and he is author of "Accidental Death", which is still running at Wyndham's a few hundred yards away and has already been seen by 330,000 people.

Other things, too, contribute to the timidity of the West End. The world recession and the strong pound have hit tourism and therefore the box office. Shaftesbury Avenue and its neighbourhood have become an unsavoury, sometimes dangerous area, which means that what the profession calls the "passing trade" has greatly declined. Take all these things together, and it is not surprising that managements turn to those grand grand old battleships of the theatre: the big musicals that have stood the test of time. Apart from "Pal Joey" (1940), which is not strictly speaking family entertainment, London also has "My Fair Lady" (1956), and "Oklahoma!" (1943). "The King and I" (1951) has only just gone, along with "Show Boat" (1927).

Of course there is no reason why new generations should not see these musicals: the best of them are part of the cultural history of their time and have a stubborn durability which is quite beyond all but a few of their successors. The fact is that we produce no musicals which would be to us what "Oklahoma!" or "West Side Story," in their different ways, were to their contemporaries. They spoke of and to their age; whereas the best British musicals of recent years have escaped into the past ("Evita"), the imagination ("Cats") or both ("Jesus Christ Superstar"). We are still waiting for the "West Side Story" of our own time.

Meanwhile the trouble is that the British theatre seems to rely on old musicals more and more, not merely as entertainment but as an insurance policy. These shows have always pulled 'em in. There is safety in statistics. We may yet see the rise of a new, timid, unenterprising audience whose applause could sound the death-knell of the living theatre. It is in this sense that "The Sound of Music" may be the sound of doom.●

By Mr. MOYNIHAN:

S. 1645. A bill to let funds in individual retirement accounts be used to purchase collectables; to the Committee on Finance.

USE OF INDIVIDUAL RETIREMENT ACCOUNTS

● Mr. MOYNIHAN. Mr. President, the bill I am introducing today would let Americans use their individual retirement accounts to invest in collectables, Collectables are gold, diamonds, antiques, stamps, paintings, and other tangible assets. A provision in the Economic Recovery Tax Act prohibits such investments after December 31.

I do not think many Members of Congress knew of the provision. Congressman JAMES SHANNON proposed it in the House Ways and Means Committee, and it appeared later in both the committee's tax bill and in the Conable-Hance alternative. But the version of the Economic Recovery Tax Act that the Senate passed would not have barred investments in collectables. I first learned the provision the day the Senate and House went to conference. By then, it was too late to do anything about it.

There were three policy reasons for the provision. The first was economic. There was a desire to channel savings into productive investments: That is productive in the Keynesian sense that the investments bear interest.

Another aim was to prevent individuals from using savings that are supposed to be set aside until retirement for current consumption. An example often cited is the man who uses his retirement account to buy paintings for his living room walls. The 1974 pension act, ERISA, forbids one from using assets purchased through an individual retirement account before one retires. But the provision is unenforceable.

Finally, there was a fear that some dealers in collectables are taking advantage of investors by not telling them that collectables purchased with retirement funds will be taxed at ordinary income rates, upon distribution, and not at the rates for long-term capital gain.

None of these reasons persuades me that the provision is needed. Congress created individual retirement accounts to encourage Americans who are not covered by pension plans at work to save for retirement. The concept was changed slightly by the Economic Recovery Tax Act. Starting next year, everyone will be able to open an IRA, whether or not he is covered by a pension plan at work.

But the ban on collectibles will reduce saving by people who feel holding collectibles is the only way to protect a retirement fund from inflation. And there are many such people.

So one should ask: Does Congress want to encourage everyone to save for retirement, or just people who are satisfied with stocks, bonds, savings accounts and other traditional investments. That is the issue.

I believe people should be free to buy whatever assets they think will appreciate most rapidly before retirement.

If the IRS cannot prevent people from using their assets before age 65, then we ought to consider imposing strict penalties on individuals who disobey the law. This would help.

And if the fear is that collectibles dealers are misleading the public, then the Federal Trade Commission should be called in. There are already laws against misleading and deceptive advertising. But there is no law that merchants should help their customers with their income tax planning. That is too much to expect.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1645

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That (a) section 408 of the Internal Revenue Code (relating to individual retirement accounts) is amended by striking out subsection (n) and by redesignating subsection (o) as the new subsection (n).

(b) The amendment made by subsection (a) shall apply to property acquired after December 31, 1981, in taxable years ending after such date.●

By Mr. MOYNIHAN:

S. 1646. A bill to establish a Reconstruction Finance Corporation; to the Committee on Banking, Housing, and Urban Affairs.

RECONSTRUCTION FINANCE CORPORATION ACT OF 1981

● Mr. MOYNIHAN. Mr. President, I am introducing a bill today that would create a new Reconstruction Finance Corporation.

The new RFC would serve as a lender of last resort to financially troubled businesses and municipalities, providing a safety net for them in times of fiscal crisis. The need for this was eloquently argued by Felix Rohatyn in the Washington Post of June 20, 1980, where he wrote that—

Both of these national problems—large business failures and major municipal difficulties—require national initiatives.

The new entity embodied in my bill would retain the essential features of its namesakes, the Depression-era Reconstruction Finance Corporation and of the antecedent War Finance Corporation. But it would have a somewhat narrower and more clearly defined purpose.

That purpose is simply stated: It is to help businesses that are about to become insolvent—and whose loss would have

"an adverse and severe effect" on the general economy—either to become profitable again or to shut down in as short a time as possible without destabilizing the economy. For municipalities, the RFC would extend credit on condition that they straighten out their finances. The agency would start with $3 billion in capital, and have the authority to borrow another $30 billion by selling bonds. It would be limited to lending money and issuing loan guarantees to borrowers who meet its stringent conditions.

The old RFC had a broader charter. It was a product of the Hoover administration, and lasted from 1932 to 1954. It is probably best remembered for saving thousands of banks, railroads and businesses through massive loans and investments. During its heyday, from 1932 to 1945, the agency loaned or gave away more than $35 billion and, in the words of its administrator, Jesse Jones, it "grew to be America's largest corporation and the world's largest and most varied banking organization."

During the Second World War, Congress gave the RFC still broader powers, directing it to do whatever it could to advance the Nation's preparations for battle. The RFC set up a defense plant corporation to buy factories and mills and lease them to private companies to operate. It had a defense supplies corporation that purchased various strategic materials and stockpiled them. Its rubber reserve company was responsible for creating the domestic synthetic rubber industry. And there were literally hundreds of other such corporations, as well.

There are two reasons why we now need a contemporary counterpart. First, the 1980's will be a period of difficult economic adjustment, as we wean ourselves from dependence on OPEC and strive to restore our international competitiveness as a producer and exporter of manufactured goods. The transition will almost certainly be painful. But if it is too painful to too many people and communities it may be slowed down considerably or not occur at all.

The RFC served us well in similar circumstances. Of the more than $35 billion that it loaned or spent, only $9.3 billion was unrecoverable, and the loss was foreseen and specifically authorized by Congress as a contribution to the war effort. President Hoover remembered the agency as one of his most important accomplishments, writing in his memoirs "I summarize here the highlights of our successes . . . First. We created the Reconstruction Finance Corporation." I see the need for such an adjustment mechanism today.

Second, we must do a better job of spelling out precisely how, and under what conditions, we will help failing businesses and fiscally distressed municipalities in the future. Setting up an RFC forces us to do so. Indeed, that is a major function of the bill.

Four times during the past 10 years, we have voted loan guarantees or other aid from private companies. In 1970, Congress approved up to $125 million in guarantees for the Penn Central Railroad. The following year, it passed a bill offering a Federal loan guarantee of $250 million for the Lockheed Aircraft Corp. The vote on that bill was 49 to 48 in the Senate and 192 to 189 in the House, and the debate lasted almost 6 months.

In 1974, Congress rejected a request by Pan American for an emergency subsidy of $10.2 million a month, but voted instead to raise the air mail rates paid by the U.S. Postal Service to airlines that carry U.S. mail overseas.

Then late in 1979, we voted a complex and arduously negotiated program to shore up the Chrysler Corp., involving up to $1.5 billion in Federal loan guarantees.

I do not dispute the fact that there are times when one needs to assist such corporations. We cannot permit the financial distress of individual enterprises to spread and cause severe dislocation to the general economy. But we need a far better process for defining how and under what conditions the Federal Government will help businesses. I believe we need a set of general principles, and an independent body to implement them, rather than to continue the present practice of handling requests by individual companies on an ad hoc basis as crises arise.

But some caution is required. One must be careful to avoid repeating the mistakes of the British with their National Enterprise Board. The NEB, which was set up in 1975, to "promote industrial efficiency" and "safeguard productive employment," not only lends money to ailing businesses, but also buys them when all else has failed. This approach has resulted in British Shipbuilding, British Steel, and British Leyland. None of these companies shows any sign of ever becoming profitable. In the meantime, the need to subsidize them has forced Britain to divert a growing share of her liquid capital to inefficient and unproductive uses.

The bill I am introducing today has twelve sections, described in the accompanying fact sheet. I want to highlight the key provisions.

The RFC would be managed by a seven-member Board of Directors. The Treasury Secretary, the Federal Reserve Board Chairman and the Chairman of the Council of Economic Advisers would be Board members, by virtue of their positions, and then the President would name four additional Directors whose appointments would require Senate confirmation. No more than two could be members of the same political party. The general powers of the corporation are spelled out in section 4.

Sections 5 and 6 are the heart of the bill. Under section 5, the RFC would be empowered to lend money or issue loan guarantees to businesses that, in the opinion of the RFC Board, are about to become insolvent and that, were they to fail, would cause a severe disruption of the national economy, or of the economy of a multi-State region. In addition, the businesses must be unable to find credit elsewhere. The intention, as I said earlier, is not to interfere with the dynamics of capitalism, a process that Joseph Schumpeter called one of "creative destruction," but rather to provide an adjustment mechanism that would ease the path from that process.

Businesses that the RFC has reason to believe can be made profitable again would be treated differently from those that should simply to be shut down. For the potentially profitable, the company—or, possibly, the RFC—would draw up a plan of reorganization and recovery. Once it has come up with a plan that the RFC Board considers realistic and feasible, it would be eligible for loans and guarantees. The RFC could not provide more than half the aid required under the plan. And there is a general limit on aid to any one business or municipality of $1.65 billion.

For a company about to fail and unable to draw up a plan that the Board is "reasonably certain" will restore it to profitability, the RFC would only be able to lend money or guarantee loans on condition that the company has a plan of gradual liquidation that would shut it down in as short a time as possible, while minimizing the disruption to the economy.

In addition, the RFC would have limited authority to buy the assets of a failing company, or to lend money to another, healthy concern in situations where, by doing so, the RFC would reduce its losses and make the failing company sufficiently attractive that another concern would take it on. This provision resembles one in the charter of the Federal Deposit Insurance Corporation which can take such extraordinary steps to get a healthy bank to merge with a failing or failed one.

Aid to municipalities may be required for somewhat different reasons. The New York Times said it well in a July 27 180 editorial. "Turmoil in the national economy is forcing a (new) phase in the enduring urban crisis," the Times noted:

> Even older cities that were getting by five years ago are in crisis today as their service economies, drained of much industrial employment, hit the rocky bottom of inflation and recession. This developing (new) phase of the urban crisis may be the toughest of all, requiring unprecedented national help.

Indeed, the new phase is not really an "urban" crisis at all—it is a problem of national dimensions. The cities have not the means to solve it by themselves.

The nature and origin of the crisis are well known. Many cities have lost industries and workers to the suburbs. Left behind is a population and economic infrastructure that generates too little wealth to pay for the welfare, medical, educational, and other social services that a humane society must provide. Consequently, many cities are strained to the breaking point. Add a major recession and, for many cities, the strain becomes unmanageable. The urban poor are the first to be laid off and the last to get back their jobs.

There is little, in the short run at least, that a city can do. It may increase its taxes, or lay off sanitation workers and teachers, but the higher taxes, or

dirty streets and crowded classrooms make it a less desirable place to live. This causes remaining businesses and people to flee, and leaves the city in an even worse position than it was before.

It is up to the national government to improve the economy so that the urban poor will be employed. But until this has been done, the Government should stand ready to serve as a lender of last resort to cities in need.

A municipality would be eligible for aid, under our bill, if as a practical matter, it can neither balance its budget nor borrow what it requires at fair rates in the credit markets or from banks. Again, the RFC would be limited to lending money and guaranteeing loans or bonds. But before it could help a city, the State would have to set up an independent watchdog agency, with control over the city's finances, and it would have to form an entity similar to New York's Municipal Assistance Corporation to borrow for the city until it is able to meet its credit needs on its own. In addition, the city and its watchdog State agency together would have to present the RFC with a recovery plan that would give the city a balanced budget and renewed access to the credit markets in no more than 5 years, or in less time if the RFC feels it appropriate.

The RFC could have no more than $1.65 billion in credit to any one city outstanding at one time, and in no event could it pay more than half of the deficit during the period of time covered by the city's recovery plan.

Section 7 outlines the terms and conditions for RFC aid. In general, any loans would have to be fully and adequately secured. The Government would have a first lien on any property in case of default. And the agency would charge its clients whatever it cost the Government to borrow.

The corporation would start with $3 billion in capital stock and would be owned entirely by the Federal Government. During hearings and subsequent deliberations, we will consider where this money would come from. Some have suggested that a 50-cent-per-gallon tax on gasoline, the proceeds of which would pay for the RFC. I have also heard it suggested that the necessary capital might be raised through a special surtax on large corporations. That is an issue that must be considered and debated. For the present, the bill simply authorizes the entire $3 billion.

Finally, the RFC would have authority to borrow up to 10 times its subscribed capital stock, that is, up to $30 billion.

Mr. President, enactment of this bill is a necessary step down the road to economic recovery. It is a large step. I do not suggest that it is the only step that must be taken.

I ask unanimous consent that the bill be printed in the RECORD, together with a fact sheet summarizing its provisions and Mr. Rohatyn's article.

There being no objection, the bill, fact-sheet, and article were ordered to be printed in the RECORD, as follows:

S. 1646

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. SHORT TITLE.

This Act may be cited as the "Reconstruction Finance Corporation Act of 1981".

SEC. 2. CREATION OF CORPORATION.

There is created a Reconstruction Finance Corporation (hereinafter referred to as the "RFC").

SEC. 3. BOARD OF DIRECTORS.

(a) COMPOSITION OF THE BOARD.—The management of the RFC shall be vested in a Board of Directors (hereinafter referred to as the "Board") consisting of seven members, three of whom shall be the Secretary of the Treasury (or, in his absence, the Undersecretary of the Treasury), the Chairman of the Board of Governors of the Federal Reserve System and the Chairman of the Council of Economic Advisers, who shall be members ex officio. Four other individuals shall be appointed by the President, by and with the advice and consent of the Senate.

(b) DIRECTORS APPOINTED BY THE PRESIDENT.—The term of each Director appointed by the President shall be three years, but a Director may continue in office after the expiration of his term until a successor has been appointed and confirmed. Whenever a vacancy occurs among the Directors so appointed, the individual appointed to fill such vacancy shall hold office for the unexpired portion of the term of the Director whose place he is selected to fill. No more than two of the Directors appointed by the President shall be members of the same political party. Each shall receive a salary at the rate provided for under section 5315 of title 5, United States Code, for level IV of the Executive Schedule.

(c) CONFLICTS OF INTEREST.—No Director, officer, attorney, agent, or employee of the RFC shall in any manner, directly or indirectly, participate in the deliberation upon or in the determination of any question affecting his personal interests, or the interests of any corporation, partnership, or association in which he is directly or indirectly interested.

SEC. 4. GENERAL POWERS.

Upon enactment of this Act, the RFC shall become a body corporate and as such shall have the power—

(1) to adopt and use a corporate seal;

(2) to have succession until dissolved by an Act of Congress;

(3) to make contracts;

(4) to sue and be sued, to complain and defend, in any court of competent jurisdiction, State or Federal;

(5) to appoint by its Board of Directors (subject to the civil service laws and chapter 51 and subchapter III of chapter 53 of title 5) such officers and employees as shall be necessary for the transaction of the business of the RFC, to define their duties, to fix their compensation, and to require bonds of them and fix the penalty thereof;

(6) to prescribe, amend and repeal, by its Board of Directors, bylaws, rules and regulations governing the manner in which its general business may be conducted and the powers granted to it by law may be exercised and enjoyed, including the selection of its Chairman and Vice Chairman, together with provision for such committees and the functions thereof as the Board of Directors may deem necessary for facilitating its business under this Act;

(7) to make use of the United States mails in the same manner and upon the same conditions as the executive departments of the Federal Government; and

(8) to do all other acts and things as may be necessary or incidental to the conduct of its business and the exercise of all the rights and powers granted to it.

SEC. 5. SPECIAL POWERS; FINANCIAL AID TO ELIGIBLE BUSINESS ENTITIES.

(a) GENERAL AUTHORITY.—The RFC is authorized to provide assistance, in the forms and under the terms and conditions described herein and in section 7, to any eligible business entity. For the purpose of this Act, the term "business entity" means any individual, corporation, company, association, firm, partnership, society or other concern that is engaged in the manufacture or production of goods and services in the United States.

(b) ELIGIBILITY.—A business entity is eligible for assistance if the Board has certified that the entity is certain to become insolvent, that its closure would adversely and severely affect the economy of the United States or any sizable region thereof, and that credit is not otherwise available to the entity on terms and conditions that are conducive to its survival.

(c) FORMS OF AID.—

(1) The RFC may, in the discretion of its Board of Directors, make loans to any eligible business entity, or guarantee the payment, in whole or in part, of interest, principal, or both, on loans made by non-Federal lenders to any such entity only if—

(A) the Board has obtained or developed a Plan of Reorganization and Recovery which, in the judgment of the Board, is reasonably certain to restore such entity to profitability within the period for which credit or other assistance is extended. The Plan must specify all actions to be taken, including reductions and other economies, sources of revenue and other credit, and the contributions to be made by all interested parties. The Board shall review such Plan periodically, and from time to time make such revisions as shall be necessary to keep the Plan realistic and feasible; or

(B) where no such Plan of Reorganization and Recovery can be obtained or developed, the Board has obtained or developed a Plan of Gradual Liquidation which, in the judgment of the Board, will lead to the closing of the entity in as brief a period as possible without having an adverse and severe effect on the economy, but in no case longer than three years.

(2) Whenever, in the judgment of the Board, such action would reduce the risk or avert a threatened loss to the RFC and would facilitate a merger or consolidation of an eligible business entity with another business entity, or facilitate the sale of assets and the assumption of liabilities of an eligible business entity by another business entity, the RFC may purchase any such assets, or lend money or guarantee the payment, in whole or in part, of interest, principal, or both, on a loan by a non-Federal lender to another business entity. Any assets acquired by the RFC under this paragraph shall be sold by the RFC as soon as practical, but in no case less than two years after acquisition.

SEC. 6. SPECIAL POWERS; FINANCIAL AID TO ELIGIBLE MUNICIPALITIES.

(a) GENERAL AUTHORITY.—The RFC is authorized to extend aid, under the terms and conditions described herein and in section 7, to any eligible municipality. For the purpose of this Act, the term "municipality" means a city, township, or any other political subdivision of a State which is a unit of general government, including the District of Columbia.

(b) ELIGIBILITY.—A municipality is eligible for aid if the Board has certified that the municipality is effectively unable to bring all of its expenditures, other than capital items, into balance with its revenues and to obtain

credit in the public credit markets or elsewhere in amounts and terms sufficient to meet the municipality's financing needs.

(c) FORMS OF AID.—The RFC may, in the discretion of its Board, lend money to any eligible municipality, or guarantee the payment, in whole or in part, of interest, principal, or both, on loans made by non-Federal lenders to such municipality only if—

(1) the State (except in the case of the District of Columbia) has created an agency, board, or other entity authorized by the law of the State to control the fiscal affairs of such municipality during the entire period for which assistance under this section will be outstanding (hereinafter referred to as the "independent fiscal monitor");

(2) the State (except in the case of the District of Columbia) has created an agency, board or other entity authorized by the law of the State to act on behalf of or in the interest of the municipality as its financing agent; and

(3) the municipality has submitted, with the approval of the independent fiscal monitor, a recovery plan which, in the judgment of the Board, will enable the municipality to bring all of its expenditures other than capital items into balance with its revenues, in a budget reported in accordance with accounting principles established under State law, and to resume borrowing for itself to the full extent required, within a reasonable period of time, but in no case more than five years.

(d) INTEREST ON CERTAIN GUARANTEED OBLIGATIONS TO BE TAXED.—Section 103(f) of title 26, United States Code, is amended by inserting ", or under section 6 of the Reconstruction Finance Corporation Act of 1981," immediately after "New York City Loan Guarantee Act of 1978".

SEC. 7. SPECIAL POWERS; LIMITATIONS AND CONDITIONS.

(a) LIMITS ON THE AMOUNT OF AID.—

(1) In no case shall the aggregate amount of assistance given under section 5 or 6 of this Act to, or in connection with, any one business entity and its subsidiary or affiliated business entities, or any one municipality—

(A) exceed at any one time 5 per centum of the sum of (i) the authorized capital stock of the RFC, plus (ii) the aggregate amount of bonds of the RFC authorized to be outstanding when the capital stock is fully subscribed;

(B) exceed, in the case of an eligible business entity with a Plan of Reorganization and Recovery, 50 per centum of the amount of aid required by such Plan, (without regard to any subsequent revisions to it); and

(C) exceed, in the case of an eligible municipality, 50 per centum of the deficit in the operating budget of such municipality during the period covered by its recovery plan.

(2) The aggregate of the principal amount of the loans outstanding at any one time with respect to which guarantees have been made and of the loans that the RFC has made directly shall not exceed 10 times the sum of the subscribed capital stock of the RFC.

(b) TERMS AND CONDITIONS FOR LOANS AND LOAN GUARANTEES.—

(1) Each loan or loan guarantee made under section 5 or 6 or this Act may be made for a period not exceeding 20 years, though in no case shall the period exceed the useful lives of any physical assets purchased with such loan.

(2)(A) Each direct loan shall bear interest at a rate not less than the current average market yield (as certified by the Secretary of the Treasury to the RFC) on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the maturity of such loan, adjusted to the nearest one-eighth of 1 per centum.

(B) Each loan to be guaranteed shall bear interest at a rate determined by the Board to be reasonable taking into account the current average yield on outstanding obligations of the United States with remaining periods to maturity comparable to the maturity of such loan.

(3) Each such loan shall be fully and adequately secured, except that the requirement of this paragraph may be waived by the Board for a loan made pursuant to a Plan of Gradual Liquidation. The RFC, under such conditions as it shall prescribe, may take over or provide for the administration and liquidation of any collateral accepted by it as security for such loan. Each such loan may be made directly upon promissory notes or by way of discount or rediscount of obligations tendered for the purpose, or otherwise in such form and in such amount and at such interest or discount rates as the RFC may approve, except that no loan or advance shall be made upon foreign securities or foreign acceptances as collateral or for the purpose of assisting in the carrying or the liquidation of such foreign securities and foreign acceptances.

(4) The RFC may not guarantee a loan unless it determines that the terms, conditions, and security (if any), and the schedule and amount of repayments with respect to the loan are sufficient to protect the financial interest of the RFC and are otherwise reasonable, including a determination that the rate of interest on such loan does not exceed such rate as the RFC determines to be reasonable, taking into account the range of interest rates prevailing in the private market for similar loans.

(5) The RFC shall be entitled to recover from an applicant for a loan guarantee under section 5 the amount of any payment made the RFC pursuant to such guarantee upon the failure of the applicant to pay when due the principal of and interest on the loan with respect to which the guarantee was made, unless the RFC for good cause waives the right of recovery; and the RFC shall be subrogated to all of the rights under such loan of the recipient of such payment.

(6) Any loan guaranteed by the RFC under this Act shall be incontestable (A) in the hands of an applicant on whose behalf such guarantee is made unless the applicant engaged in fraud or misrepresentation in securing such guarantee, and (B) as to any person (or his successor in interest) engaged in fraud or misrepresentation in making or contracting to make such loan.

(7) The RFC may guarantee short-term obligations incurred for the purpose of obtaining temporary funds with a view to refinancing from time to time so long as the entire term does not exceed that specified under paragraph (1) and the borrower continues to be eligible for assistance.

(8) Loans and guarantees of loans and of municipal debt shall be subject to such further terms and conditions as the RFC may prescribe to carry out the provisions of this Act.

(c) PROHIBITION AGAINST FEES.—No fee or commission shall be paid by any applicant for a loan or a guarantee under this Act in connection with any such application or any loan or a guarantee made under this Act, and the agreement to pay or the payment of any such fee or commission shall be unlawful.

(d) FEDERAL FINANCING BANK.—Notwithstanding the provisions of section 6 of the Federal Financing Bank Act of 1973 or any other provision of law, none of the loans guaranteed under this Act shall be eligible for purchase by sale or issuance to, the Federal Financing Bank or any other Federal agency or department or entity owned in whole or in part by the United States.

SEC. 8. CAPITALIZATION OF THE RFC; OTHER FINANCIAL PROVISIONS.

(a) AUTHORIZED CAPITAL STOCK.—

(1) The RFC shall have capital stock of $3,000,000,000, subscribed by the United States of America, payment for which shall be subject to call in whole or in part by the Board of Directors of the RFC.

(2) There is authorized to be appropriated the sum of $3,000,000,000 for the purpose of making payments upon such subscription when called.

(b) FUNDS ON DEPOSIT WITH TREASURY OR FEDERAL RESERVE BANK.—All moneys of the RFC not otherwise employed may be deposited with the Treasurer of the United States subject to check by authority of the RFC or in any Federal Reserve bank, or may, by authorization of the Board of Directors of the RFC, be used in the purchase for redemption and retirement of any notes, debentures, bonds, or other obligations issued by the RFC, and the RFC may reimburse such Federal Reserve banks for their services in the manner as may be agreed upon. The Federal Reserve banks shall act as depositories, custodians, and fiscal agents for the Reconstruction Finance Corporation in the general performance of its powers conferred by this Act.

(c) ISSUANCE OF NOTES, DEBENTURES, and BONDS.—

(1) The RFC is authorized, with the approval of the Secretary of the Treasury (hereinafter referred to as the "Secretary") to issue, and to have outstanding at any one time in an amount aggregating not more than the sum of ten times its subscribed capital stock its own notes, debentures, bonds, or other such obligations (hereinafter referred to as "obligations"). Obligations of the RFC shall mature not more than twelve years from their respective dates of issue, shall be redeemable at the option of the RFC before maturity in such manner as may be stipulated in such obligations, and shall bear such rate or rates of interest as may be determined by the RFC.

(2) The RFC, with the approval of the Secretary, may sell on a discount basis short-term obligations payable at maturity without interest.

(3) The obligations of the RFC may be secured by assets of the RFC in such manner as shall be prescribed by its Board of Directors. Obligations of the RFC may be issued in payment of any loan authorized by this Act or may be offered for sale at such price or prices as the RFC may determine with the approval of the Secretary.

(4) Obligations of the RFC shall be fully and unconditionally guaranteed both as to interest and principal by the United States and such guaranty shall be expressed on the face thereof. In the event that the RFC shall be unable to pay upon demand, when due, the principal of or interest on obligations issued by it, the Secretary shall pay the amount of such principal or interest, which amount is authorized to be appropriated, out of any moneys in the Treasury not otherwise appropriated. To the extent of the amounts so paid, the Secretary of the Treasury shall succeed to all the rights of the holders of such obligations.

(d) SALES OF RFC OBLIGATIONS TO THE TREASURY; PUBLIC-DEBT TRANSACTIONS.—

(1) The Secretary, in his discretion, is authorized to purchase any obligations of the RFC to be issued under this section, and for such purpose the Secretary is authorized to use as a public-debt transaction the proceeds from the sale of any securities hereafter issued under the Second Liberty Bond Act or under any other general bond-issuing authority granted.

(2) The purposes for which securities may be issued under the Second Liberty Bond

Act or under any other general bond-issuing authority granted are extended to include any purchases of the RFC's obligations.

(3) The Secretary may, at any time, sell any of the obligations of the RFC acquired by him under this section.

(4) All redemptions, purchases, and sales by the Secretary of the obligations of the RFC shall be treated as public-debt transactions of the United States.

(5) Obligations of the RFC shall not be eligible for discount or purchase by any Federal Reserve bank.

(e) EXEMPTION FROM TAXATION.—

(1) Any and all obligations issued by the RFC shall be exempt both as to principal and interest from all taxation (except surtaxes, estate, inheritance, and gift taxes) now or hereafter imposed by the United States, by any territory, dependency, or possession thereof, or by any State, county, municipality, or local taxing authority.

(2) The RFC, including its franchise, its capital, reserves, and surplus, and its income shall be exempt from all taxation now or hereafter imposed by the United States, by any territory, dependency, or possession thereof, or by any State, county, municipality, or local taxing authority; except that any real property of the RFC shall be subject to State, territorial, county, municipal, or local taxation to the same extent according to its value that other real property is taxed.

(f) FORMS OF OBLIGATIONS; PREPARATION BY THE SECRETARY OF THE TREASURY.—In order that the RFC may be supplied with such forms of obligations as it may need for issuance under this Act, the Secretary is authorized to prepare such forms as shall be suitable and approved by the RFC to be held in the Treasury subject to delivery, upon order of the RFC. The engraved plates, dies, bed pieces, and so forth, executed in connection therewith, shall remain in the custody of the Secretary. The RFC shall reimburse the Secretary for any expenses incurred in the preparation, custody, and delivery of such obligations.

(g) RFC AS A DEPOSITARY OF PUBLIC MONEY; OBLIGATIONS CONSIDERED LAWFUL INVESTMENTS.—

(1) When designated for that purpose by the Secretary, the RFC—

(A) shall be a depositary of public money, except receipts from customs, under such regulations as may be prescribed by the Secretary;

(B) may be employed as a financial agent of the Government; and

(C) shall perform all such reasonable duties, as depositary of public money and financial agent of the Government, as may be required of it.

(2) Obligations of the RFC shall be lawful investments, and may be accepted as security for all fiduciary, trust, and public funds the investment or deposit of which shall be under the authority or control of the United States or any officer or officers thereof.

SEC. 9. ADMINISTRATIVE PROVISIONS.

(a) COOPERATION WITH OTHER FEDERAL AGENCIES.—

(1) In order to enable the RFC to carry out the provisions of this Act, the Treasury Department, the Comptroller of the Currency, the Federal Reserve Board, the Federal Reserve banks, the Interstate Commerce Commission, the Internal Revenue Service, and all other executive departments, agencies, boards, commissions, and independent establishments of the Federal Government, are hereby authorized, under such conditions as they may prescribe, to make available to the RFC, in confidence, such reports, records, or other information as they may have available relating to the condition of business entities or municipalities with respect to which the RFC has had or contemplates having transactions under this Act, or relating to individuals, associations, partnerships, or corporations whose obligations are offered to or held by the RFC as security for loans to business entities or municipalities under this Act, and to make through their examiners or other employees for the confidential use of the RFC, examinations of such business entities and municipalities.

(2) Every applicant for a loan or a guarantee under this Act shall, as a condition precedent thereto, consent to such examinations as the RFC may require for the purposes of this Act and that, upon request, reports of examinations by constituted authorities may be furnished by such authorities to the RFC.

(b) REPORTS BY THE RFC.—The RFC shall make and publish a quarterly report, the first of which shall be made not later than January 1, 1982, of its operations to Congress. Each such report shall include a statement of—

(1) the aggregate loans and guarantees made to each borrower;

(2) the number of borrowers and amount borrowed segregated by States;

(3) the assets and liabilities of the RFC; and

(4) the names and compensation of all individuals employed by the RFC whose compensation exceeds $1,500 a month.

(c) AUDIT OF FINANCIAL TRANSACTIONS; REPORT ON AUDIT.—

(1) The accounts of the RFC shall be audited annually in accordance with generally accepted auditing standards by independent certified public accountants or independent licensed public accountants certified or licensed by a regulatory authority of a State or other political subdivision of the United States. The audits shall be conducted at the place or places where the accounts of the RFC are normally kept. All books, accounts, financial records, reports, files, and all other papers, things, or property belonging to or in use by the RFC and necessary to facilitate the audits shall be made available to the person or persons conducting the audits, and full facilities for verifying transactions with the balances or securities held by depositories, fiscal agents, and custodians shall be afforded to such person or persons.

(2) A report of each such independent audit shall be included in the appropriate quarterly report submitted to Congress under subsection (b) of this section. The report of each such independent audit shall set forth the scope of the audit and shall include—

(A) such statements as are necessary to present fairly the RFC's assets and liabilities and surplus or deficit;

(B) an analysis of the changes therein during the year;

(C) a statement in reasonable detail of the RFC's income and expenses during the previous year;

(D) a statement of the sources and applications of funds; and

(E) the independent auditor's opinion of such statements.

SEC. 10. CRIMINAL PROVISIONS.

(a) WILLFUL MISREPRESENTATIONS TO THE RFC.—Whoever makes any statement knowing it to be false, or whoever willfully overvalues any security, for the purpose of obtaining for himself or for any applicant any loan, or extension thereof by renewal, deferment of action, or otherwise, or the acceptance, release, or substitution of security therefor, or for the purpose of influencing in any way the action of the RFC, or for the purpose of obtaining money, property, or anything of value, under this Act, shall be punished by a fine of not more than $5,000 or by imprisonment of not more than two years, or both.

(b) COUNTERFEITING AND OTHER MISHANDLING OF RFC OBLIGATIONS.—Whoever—

(1) falsely makes, forges, or counterfeits any obligation or coupon in imitation of or purporting to be an obligation or coupon issued by the RFC;

(2) passes, utters, or publishes, or attempts to pass, utter, or publish, any false, forged, or counterfeited obligation or coupon purporting to have been issued by the RFC, knowing the same to be false, forged, or counterfeited;

(3) falsely alters any obligation or coupon issued or purporting to have been issued by the RFC;

(4) passes, utters, or publishes, or attempts to pass, utter, or publish, as true any falsely altered or spurious obligation or coupon issued or purporting to have been issued by the RFC, knowing the same to be falsely altered or spurious; or

(5) willfully violates any other provision of this Act;

shall be punished by a fine of not more than $10,000 or by imprisonment for not more than five years, or both.

(c) DEFRAUDING THE RFC, ITS AUDITORS, OR THE PUBLIC.—Whoever, being connected in any capacity with the RFC—

(1) embezzles, abstracts, purloins, or willfully misapplies any moneys, funds, securities, or other things of value, whether belonging to the RFC or pledged or otherwise entrusted to it;

(2) with intent to defraud the RFC or any other body politic or corporate, or any individual, or to deceive any officer, auditor, or examiner of the RFC, makes any false entry in any book, report, or statement of or to the RFC, or, without being duly authorized, draws any order or issues, puts forth, or assigns any obligation, or draft, bill of exchange, mortgage, judgment, or decree thereof;

(3) with intent to defraud, participates, shares, receives directly or indirectly any money, profit, property or benefit through any transaction, loan, commission, contract, or any other act of the RFC; or

(4) gives any unauthorized information concerning any future action or plan of the RFC which might affect the value of securities, or, having such knowledge, invests or speculates, directly or indirectly, in the securities or property of any company, bank, or corporation receiving loans or other assistance from the RFC;

shall be punished by a fine of not more than $10,000 or by imprisonment of not more than five years, or both.

(d) USE OF WORDS "RECONSTRUCTION FINANCE CORPORATION" BY OTHERS.—No individual, association, partnership, or corporation shall use the words "Reconstruction Finance Corporation" or a combination of these three words, as the name or a part thereof under which he or it does business. Every individual, partnership, association, or corporation violating this prohibition shall be guilty of a misdemeanor and shall be punished by a fine not exceeding $1,000 or imprisonment not exceeding one year, or both.

(e) Section 433 of title 18, United States Code, is amended by inserting "of 1981" immediately after "the Reconstruction Finance Corporation Act."

SEC. 11. AUTHORIZATION OF APPROPRIATION.

There are hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act. No authority to make payments, loans, or guarantees under this Act shall be effective except to such extent or in such amounts as are provided in advance in appropriation Acts.

SEC. 12. SEPARABILITY OF PROVISIONS.

The right to alter, amend, or repeal this Act is hereby expressly reserved. If any part of this Act shall for any reason be adjudged by any court of competent jurisdiction to be invalid, such judgment shall not affect, impair, or invalidate the remainder of the Act.

RECONSTRUCTION FINANCE CORPORATION FACT SHEET

Section 1. States the name of the proposed legislation: "The Reconstruction Finance Corporation Act of 1981".

Section 2. Creates the Corporation.

Section 3. Describes the composition of the seven member Board of Directors (the Secretary of the Treasury, the Chairman of the Board of Governors of the Federal Reserve System, and the Chairman of the Council of Economic Advisers, *ex officio*, plus four additional members to be appointed by the President with the advice and consent of the Senate, not more than two of whom may be members of the same political party) and prohibits conflicts of interest.

Section 4. Sets forth the general powers of the Corporation.

Section 5. Sets forth special powers with respect to aiding eligible business entities. A business would be eligible if it is "certain to become insolvent", if "its closure would adversely and severely affect the economy of the United States or any sizable region thereof" and if private credit is not available to it. The RFC is empowered to make or guarantee loans, but only if it has a "Plan of Reorganization and Recovery" describing steps to be taken to restore the financial health of the business or a gradual liquidation plan for the business. The RFC is also empowered, under certain circumstances, to purchase assets and hold them for short periods.

Section 6. Sets forth special powers with respect to aiding eligible municipalities. Loans may be made or guaranteed to municipalities that are unable to balance their expense budgets and unable to obtain credit elsewhere, provided that certain requirements are satisfied. These include the creation by the state of a fiscal "watchdog" agency for the municipality, and the preparation of a "recovery plan" for the municipality.

Section 7. Sets forth the limits and conditions on RFC aid, which may not exceed half of the aid required by a business' Plan of Reorganization and Recovery or of the deficit described in a municipality's Recovery Plan, nor may the aid to any business or municipality exceed $1.65 billion.

Section 8. Capitalizes the RFC at $3 billion, to be subscribed by the federal government. The RFC is also authorized to issue notes, bands and other obligations, guaranteed by the federal Treasury, up to $30 billion.

Section 9. Sets forth a number of administrative procedures and arrangements.

Section 10. Provides criminal penalities for willful misrepresentations to the RFC, mishandling of RFC obligations and defrauding the RFC.

Section 11. Authorizes "such sums as may be necessary" to carry out the provisions of this act.

Section 12. Provides for the separability of the Act's various provisions should any of them be invalidated by a court.

---

RECONSTRUCTING THE RFC

(By Felix Rohatyn)

Recent economic developments suggests the need for a new version of the Reconstruction Finance Corporation of the 1930s. In the private sector, there now exists the prospect of major business failures. We need only examine the present conditions in the auto, airline and steel industries to foresee the possibility of future petitions, similar to Chrysler's, for federal assistance to avert massive bankruptcy. Certain of our large financial institutions are also considerably more fragile than they seem.

A comparable condition besets major American cities. New York City is unlikely to regain full access to public markets by the end of fiscal 1982, as anticipated when Congress authorized loan guarantees in 1978. The combination of economic decline and reduction in anticipated federal aid has caused repeated modification in the city's financial plan, showing potentially large budget gaps for 1982.

With some variation, the same picture may be drawn for Cleveland, Chicago, Philadelphia, Newark and other cities. Local action to raise revenues or cut expenses beyond a reasonable point only deepens the economic crisis.

Both of these national problems—large business failures and major municipal difficulties—require national initiatives. Over the long term, fiscal and monetary policy, formula revisions, federal aid and other changes in the fiscal relationships among levels of government will no doubt be debated. These are surely needed. But in the present circumstances, some action is needed now to provide a safety net for both businesses and municipalities in crisis.

A new Reconstruction Finance Corporation could supply the capital assistance and serve as the catalyst needed to avert even larger problems. The RFC would be created by the federal government and authorized to assist businesses and municipal governments whose failure would have a material impact on the country or a significant region. This assistance would take the form of loans or, in the case of businesses, loans as well as equity investments.

There are several reasons that support the creation, through federal legislation, of a new RFC:

First, the threshold determination of whether the public interest supports federal intervention has essentially been made. In the case of Lockheed, Chrysler and New York City, Congress did commit large sums to take the company or city out of bankruptcy. The philosophical line has been crossed with the argument that the social consequences of both business and municipal failures, of the scope indicated, are vast, and largely uncharted.

Second, applying the appropriate remedy requires a professional nonpolitical approach as well as a broader set of options. Providing guaranteed loans at high interest rates to a failing company, overburdened with debt and with inadequate permanent capital, may buy time but will clearly not cure. The ability to make equity investments, as part of an overall, multilateral rescue package, can come only from an RFC.

Third, it should be evident that the legislature is a poor forum to determine specific cases. Under the pressures of the emergency, delicate negotiations with unions, banks, stockholders and suppliers are impossible. Congress is besieged with simple but urgent demands for action. Negotiations would benefit from the insulation provided by setting up a professional mechanism that could make the decision to commit or not to commit aid using the leverage that often does not exist in the legislative process.

Fourth, the problem of massive business and municipal collapse is a national responsibility simply because neither private lenders nor states are able to cope with needs of this magnitude. Each of the participating interests must play a part in any rescue plan, but it requires a coordinating agency with sufficient authority and capacity to bring about a solution.

Fifth, the RFC would have the advantage of providing continuity as well as professionalism in the design of a fiscal strategy for each particular case. The RFC should be managed by paid professionals with its own board of directors, the majority of whom would be private citizens and would include the secretary of the Treasury, the chairman of the Federal Reserve, the chairman of the Securities and Exchange Commission and the chairman of the Council of Economic Advisers.

Finally, the RFC should only be a temporary investor. It should remain an investor only until it can divest itself of its commitments through the marketplace and should never provide more than 50 percent of the capital required by any type of rescue. It should be a revolving fund—profitable, one hopes—stepping in where no alternatives are available and stepping out when the public interest has been served and market forces operate.

Certain risks and objections to the RFC have to be acknowledged: the risks to federalism and to private entrepreneurial decisions; the contention that it might reduce incentives for efficiency and for good management; that it amounts to discrimination against small companies and cities that may not be eligible for aid; that its intervention in credit allocation will politicize competitive markets; that the government will be left in a conflict of roles, as lender-investor and as regulator.

Each of these objections and others should be explored in detail. Some may be mitigated by the procedures for accountability and the standards for intervention that are built into the RFC legislation. Others are more fundamental and require a basic judgment about the need for some institutions and a comparative analysis of the alternatives. Since part of the RFC's activities would be for the benefit of private business, part of the capital should come from the business sector. The management, as in the original RFC, should be professional and non-political.

On balance, I believe that the RFC is needed and is preferred to the kind of ad hoc legislative response that has characterized the Lockheed, Chrysler and New York City petitions. This does not lead to state capitalism. If Chrysler ultimately fails, it will not prove that government should not have tried the cure, it will prove that the wrong medicine was applied too late. The right medicine should be available in the future. It will quite probably be needed.●

---

## ADDITIONAL COSPONSORS

S. 473

At the request of Mr. DURENBERGER, the Senator from Minnesota (Mr. BOSCHWITZ) was added as a cosponsor of S. 473, a bill to amend the Internal Revenue Code of 1954 to provide that the amount of the charitable deduction allowable for expenses incurred in the operation of a motor vehicle will be determined in the same manner Government employees determine reimbursement for the use of their vehicles on Government business.

S. 613

At the request of Mr. THURMOND, the Senator from Nevada (Mr. LAXALT) was added as a cosponsor of S. 613, a bill to amend section 1951 of the United States Code, and for other purposes.

S. 1086

At the request of Mr. DENTON, the Senator from Pennsylvania (Mr. HEINZ) was added as a cosponsor of S. 1086, a bill to extend and revise the Older Americans Act of 1965, and for other purposes.

S. 1163

At the request of Mr. NUNN, the Senator from Louisiana (Mr. JOHNSTON) was added as a cosponsor of S. 1163, a bill to increase the penalties for violations of the Taft-Hartley Act. To prohibit persons, upon their convictions of certain crimes, from holding offices in or certain positions related to labor organizations

and employee benefit plans, and to clarify certain responsibilities of the Department of Labor.

S. 1348

At the request of Mr. SASSER, the Senator from Missouri (Mr. DANFORTH), the Senator from Connecticut (Mr. WEICKER), and the Senator from Maine (Mr. MITCHELL) were added as cosponsors of S. 1348, a bill to amend the Internal Revenue Code of 1954 to clarify certain requirements which apply to mortgage subsidy bonds.

S. 1402

At the request of Mr. CANNON, the Senator from Idaho (Mr. MCCLURE) was added as a cosponsor of S. 1402, a bill to establish uniform national standards for the continued regulation, by the several States, of commercial motor vehicle width and length on interstate highways.

S. 1427

At the request of Mr. GARN, the Senator from Tennessee (Mr. SASSER), and the Senator from Iowa (Mr. JEPSEN) were added as cosponsors of S. 1427, a bill to reduce financing costs to cities, counties, and States by amending section 5136 of the Revised Statutes to permit national banks to underwrite and deal in revenue bonds issued by State and local governments, and for other purposes.

S. 1450

At the request of Mr. CANNON, the Senator from Missouri (Mr. DANFORTH), and the Senator from Arizona (Mr. GOLDWATER) were added as cosponsors of S. 1450, a bill to provide for the continued deregulation of the Nation's airlines, and for other purposes.

S. 1528

At the request of Mr. PROXMIRE, the Senator from Washington (Mr. JACKSON) was added as a cosponsor of S. 1528, a bill to amend the Social Security Act to provide for improved management of the social security trust funds and increase the return on investments to these funds.

S. 1598

At the request of Mr. STENNIS, the Senator from Mississippi (Mr. COCHRAN) was added as a cosponsor of S. 1589, a bill to establish a National Commission on Interest Rates.

S. 1607

At the request of Mr. D'AMATO, the Senator from New York (Mr. MOYNIHAN) was added as a cosponsor of S. 1607, a bill to amend the Internal Revenue Code of 1954 to provide a minimum interest and dividend exclusion of $200 for each individual.

SENATE JOINT RESOLUTION 29

At the request of Mr. HEINZ, the Senator from Wisconsin (Mr. KASTEN) was added as a cosponsor of Senate Joint Resolution 29, a joint resolution to authorize and request the President to issue a proclamation designating the calendar week beginning with the first Sunday in June of each year as "National Garden Week."

SENATE JOINT RESOLUTION 59

At the request of Mr. ROBERT C. BYRD, the Senator from Indiana (Mr. LUGAR), the Senator from South Carolina (Mr. THURMOND), and the Senator from Washington (Mr. JACKSON) were added as cosponsors of Senate Joint Resolution 59, a joint resolution designating the square dance as the national folk dance of the United States.

SENATE JOINT RESOLUTION 67

At the request of Mr. INOUYE, the Senator from New Jersey (Mr. WILLIAMS) and the Senator from Minnesota (Mr. BOSCHWITZ) were added as cosponsors of Senate Joint Resolution 67, a joint resolution to establish "National Nurse-Midwifery Week."

SENATE JOINT RESOLUTION 107

At the request of Mr. ROBERT C. BYRD, the Senator from New Hampshire (Mr. HUMPHREY), the Senator from South Carolina (Mr. THURMOND), and the Senator from Tennessee (Mr. BAKER) were added as cosponsors of Senate Joint Resolution 107, a joint resolution to designate the 7th day of October 1981 as "National Guard Day."

SENATE CONCURRENT RESOLUTION 33

At the request of Mr. PRESSLER, the Senator from Idaho (Mr. SYMMS), the Senator from Nebraska (Mr. ZORINSKY), the Senator from Nebraska (Mr. EXON), the Senator from Nevada (Mr. LAXALT), the Senator from Missouri (Mr. EAGLETON), the Senator from Oklahoma (Mr. BOREN), the Senator from North Dakota (Mr. ANDREWS), the Senator from Iowa (Mr. JEPSEN), the Senator from North Carolina (Mr. HELMS), the Senator from Idaho (Mr. MCCLURE), the Senator from Arizona (Mr. DECONCINI), the Senator from Montana (Mr. MELCHER), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from North Carolina (Mr. EAST), and the Senator from South Dakota (Mr. ABDNOR) were added as cosponsors of Senate Concurrent Resolution 33, a concurrent resolution disapproving the Federal Trade Commission Trade Regulation Rule relating to the sale of used motor vehicles.

SENATE RESOLUTION 199

At the request of Mr. NUNN, the Senator from New York (Mr. MOYNIHAN) was added as a cosponsor of Senate Resolution 199, a resolution to authorize "National Productivity Improvement Week."

SENATE RESOLUTION 211

At the request of Mr. BENTSEN, the Senator from Mississippi (Mr. COCHRAN), the Senator from Nevada (Mr. CANNON), and the Senator from South Dakota (Mr. PRESSLER) were added as cosponsors of Senate Resolution 211, a resolution calling on the Governors of the Federal Reserve System to encourage banks to make loans available for productive uses while eliminating loans for speculative and unproductive uses.

UP AMENDMENT NO. 378

At the request of Mr. HAYAKAWA, the Senator from California (Mr. CRANSTON) was added as a cosponsor of UP amendment No. 378 proposed to S. 884, a bill to revise and extend programs to provide price support and production incentives for farmers to assure an abundance of food and fiber, and for other purposes.

## AMENDMENTS SUBMITTED FOR PRINTING

### INTERNATIONAL SECURITY AND DEVELOPMENT COOPERATION ACT

AMENDMENT NO. 552

(Ordered to be printed and to lie on the table.)

Mr. PROXMIRE submitted an amendment intended to be proposed by him to the bill (S. 1196) to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act to authorize appropriations for development and security assistance programs for the fiscal year 1982, to authorize appropriations for the Peace Corps for the fiscal year 1982, to provide authorities for the Overseas Private Investment Corporation, and for other purposes.

AID TO SYRIA

Mr. PROXMIRE. Mr. President, I send to the desk an amendment and ask for its appropriate referral. This is an amendment to the foreign aid bill, which would prohibit aid to Syria.

AMENDMENT NO. 553

(Ordered to be printed and to lie on the table.)

Mr. LUGAR submitted an amendment intended to be proposed by him to the bill, S. 1196, supra.

## NOTICES OF HEARINGS

SELECT COMMITTEE ON INDIAN AFFAIRS

Mr. COHEN. Mr. President, I would like to announce for the information of the Senate and the public, the scheduling of a public hearing before the Senate Select Committee on Indian Affairs.

A hearing is scheduled for September 22, 1981, beginning at 10 a.m., in room 5302 of the Dirksen Senate Office Building, on S. 503, a bill to authorize the purchase, sale, and exchange of lands by the Devils Lake Sioux Tribe of North Dakota.

For further information regarding the hearing, you may wish to contact Mary Jane Wrenn of the committee staff on 224–2251.

Mr. President, I would like to announce for the information of the Senate and the public, the scheduling of a public hearing before the Senate Select Committee on Indian Affairs.

A hearing is scheduled for September 28, 1981, beginning at 9:30 a.m., in room 6226 of the Dirksen Senate Office Building, on S. 874, a bill to provide for additional protection of steelhead trout as a game fish.

For further information regarding the hearing, you may wish to contact John Chaves of the committee staff on 224–2251.

SUBCOMMITTEE ON GOVERNMENTAL EFFICIENCY AND THE DISTRICT OF COLUMBIA

Mr. MATHIAS. Mr. President, I would like to announce that the Subcommittee on Governmental Efficiency and the District of Columbia of the Governmental Affairs Committee will be holding a hearing on Senate Resolution 207, a resolution to disapprove the District of Columbia Act 4–69, relating to the reform of

the sexual assault laws of the District of Columbia. The hearing will be held on Wednesday, September 23 at 9:30 a.m. in room 357 of the Russell Senate Office Building.

For further information, contact Eileen Mayer of the subcommittee staff at 224-4161.

SUBCOMMITTEE ON INTERGOVERNMENTAL RELATIONS

Mr. DURENBERGER. Mr. President, I would like to announce that the Subcommittee on Intergovernmental Relations of the Governmental Affairs Committee has scheduled a hearing to consider and review standard, "boilerplate" language to be included in all future block grant legislation. The language was prepared in consultation with public interest groups representing entities and persons impacted by Federal assistance provided through the block grant mechanism. Included in the language are provisions dealing with the areas of application and planning, nondiscrimination, transition, reporting, and auditing.

The hearing will be in room 3302, Dirksen Senate Office Building, Wednesday, September 23, 1981, starting at 9:30 a.m. Those wishing to submit written statements to be included in the printed record of the hearing should send five copies to Ruth M. Doerflein, clerk, Subcommittee on Intergovernmental Relations, room 507, Carroll Arms Building, Washington, D.C. 20510.

For further information on the hearing, you may contact Pam Hess of the subcommittee staff at 224-6702.

## AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON THE JUDICIARY

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on September 22, to hold a hearing on the annual refugee consultation for fiscal year 1982.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on September 26, at 10 a.m., to hold a hearing on the Criminal Code.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON JUVENILE JUSTICE

Mr. STEVENS. Mr. President, I ask unanimous consent that the Subcommittee on Juvenile Justice of the Committee on the Judiciary be authorized to meet during the session of the Senate on September 26, at 1 p.m., to hold a hearing on media response.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON CRIMINAL LAW

Mr. STEVENS. Mr. President, I ask unanimous consent that the Subcommittee on Criminal Law of the Committee on the Judiciary be authorized to meet during the session of the Senate on September 22, at 2 p.m., to hold hearings on S. 904 and S. 907, bills dealing with assassination attempts.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ADDITIONAL STATEMENTS

### ACID RAIN

● Mr. MITCHELL. Mr. President, acid rain has been the subject of debate in many diverse forums during the past months. Perhaps the longest running dialog on this issue has occurred in the scientific community. Scientists throughout the United States and the world have devoted years to their search for more complete knowledge about the causes of acid precipitation, the extent of the problem, its effects on aquatic resources, fish life, and vegetation such as forests and other crops.

While our knowledge is far from complete, it represents a solid basis for a policy to deal with the situation. An important addition to our analysis of the acid rain issue has recently been published by the National Academy of Sciences, a body noted for its objectivity, and highly respected within the scientific community.

The conclusion of the National Academy is clear and unequivocal. They state:

Although claims have been made that direct evidence linking power-plant emissions to the production of acid rain is inconclusive, we find the circumstantial evidence for their role overwhelming.

The Committee believes that continued emissions of sulfur and nitrogen oxides at current or accelerated rates, in the face of clear evidence of serious hazard to human health and to the biosphere, will be extremely risky from a long-term economic standpoint as well as from the standpoint of biosphere protection.

Of the options presently available only the control of emissions of sulfur and nitrogen oxides can significantly reduce the rate of deterioration of sensitive freshwater ecosystems . . . In the most seriously affected area . . . this would mean a reduction of 50 percent in deposited hydrogen ions. Control of $SO_2$ from new electrical generating plants alone would be insufficient to accomplish this, and thus restrictions on older plants must be considered.

I ask to include additional excerpts at the end of my statement.

Mr. President, I am in agreement with these conclusions. I will introduce legislation to implement these recommendations in the near future.

This report is particularly timely, as the Environment and Public Works Committee on which I serve, begins its deliberations on amendments to the Clean Air Act. I commend the report to my colleagues.

The excerpts follow:

EXCERPTS FROM "ATMOSPHERE-BIOSPHERE INTERACTIONS: TOWARD A BETTER UNDERSTANDING OF THE ECOLOGICAL CONSEQUENCES OF FOSSIL FUEL COMBUSTION"

Ecologists, geochemists, and climatologists are beginning to discover that in many respects man is now operating on nature's own scale, particularly through the heavy use of fossil fuels to supply the energy that runs our industrial civilization. Because the uncertainties associated with such large-scale operations are very great—for good or ill—it behooves us to exercise restraint in our present intensive use of energy, and to mitigate where possible the ill effects that air pollution imposes not only on us but also on the ecosystems that make up our life support system. In this connection numerous studies have reported on the substantial opportunities for energy conservation and shifts to alternative energy sources.

• • • • •

Perhaps the first well-demonstrated widespread effect of burning fossil fuel is the destruction of soft-water ecosystems by "acid rain," which has been caused by anthropogenic emissions of sulfur and nitrogen oxides that are further oxidized in the atmosphere. Major effects include destruction of many species of fish and their prey and acidification of surface and ground waters to the point where toxic trace metals reach concentrations undesirable for human consumption and for aquatic animal habitats (see Chapter 8). Severe degradation of many aquatic ecosystems has been recorded in Norway, Sweden, the United States, Scotland, and Canada (Drablös and Trollan 1980). Surprisingly, significant effects have also been recorded for aquatic systems in countries once thought to be geologically resistant to acidification, including the Netherlands, Denmark, and Belgium (Vangenechten and Vanderborght 1980, Van Dam et al. 1980, Rebsdorf 1980).

• • • • •

Although claims have been made that direct evidence linking power-plant emissions to the production of acid rain is inconclusive (Poundstone 1980, Curtis undated), we find the circumstantial evidence for their role overwhelming. Many thousands of lakes have already been affected, according to estimates by European and North American scientists (Drablös and Tollan 1980). Acidified lakes have been found in areas where geological factors, such as volcanism and the weathering of pyrites, or biological factors, such as acid bog drainage, cannot be implicated. At current rates of emission of sulfur and nitrogen oxides, the number of affected lakes can be expected to more than double by 1990, and to include larger and deeper lakes (Henriksen 1980). There is little probability that some factor other than emissions of sulfur and nitrogen oxides is responsible for acid rain. Although the deposited nitrogen and sulfur may be slightly beneficial in terrestrial soils deficient in these elements, the stimulus is expected to be short-lived (Abrahamson 1980), and over the long term acid precipitation is likely to accelerate natural processes of soil leaching that lead to impoverishment in plant nutrients (Overrein et al., 1980). When freshwater effects are considered, the positive effects are greatly outweighed by the negative.

• • • • •

The same gaseous oxides are known to affect human health directly in urban areas (Lave and Seskin 1977, NRC 1977b, NRC 1977c, NRC 1978a, Mendelsohn and Orcutt 1979) and to cause decreases in crop yields in some areas. Acid deposition is also known to cause large economic losses by corroding metals and eroding buildings and statuary made of calcareous rock (Bolin 1971, Nriagu 1978). The Committee believes that continued emissions of sulfur and nitrogen oxides at current or accelerated rates, in the face of clear evidence of serious hazard to human health and to the biosphere, will be extremely risky from a long-term economic standpoint as well as from the standpoint of biosphere protection.

• • • • •

In Chapter 8, we give an up-to-date case history of acid deposition, one example of the severe biospheric effects resulting from anthropogenic pollution of the atmosphere that appears already to have eliminated or substantially reduced the populations of some organisms, including fishes, in parts of their natural ranges. Owing to the concen-

trated efforts of scientists in the Northern Hemisphere, most notably in Scandinavia during the past decade, we have a much more complete knowledge of the causes and consequences of acid deposition than we have for other pollutants discussed here. Yet even for acid deposition, many mechanisms and effects are poorly known. Throughout the above-mentioned chapters we have attempted to indicate how widespread and complicated the atmospheric pollution problem is, and how intertwined the biogeochemical cycles of pollutants are with the cycles of naturally important elements. As a consequence, second- and third-order effects may be of great importance, but they are far more difficult to predict than the first-order effects upon which most attention is focused.

Though necessarily incomplete in many respects, the information synthesized by the Committee renders a rather unfavorable picture of the consequences of current fossil fuel burning practices. Along with the probable large-scale effects described above, slow, nearly undetectable increases in a multitude of extremely toxic substances are taking place. It is the Committee's opinion, based on the evidence we have examined, that the picture is disturbing enough to merit prompt tightening of restrictions on atmospheric emissions from fossil fuels and other large sources such as metal smelters and cement manufacture. Strong measures are necessary if we are to prevent further degradation of natural ecosystems, which together support life on this planet.

Some pollutants, such as sulfur and nitrogen oxides, particulate pollutants, and lead, are readily amenable to control by appropriate engineering technologies. Others, such as mercury and $CO_2$, are more difficult and expensive to control by available technologies. In the long run, only decreased reliance on fossil fuel or improved control of a wide spectrum of pollutants can reduce the risk that our descendants will suffer food shortages, impaired health, and a damaged environment.

• • • • •

Acid deposition, due to the further oxidation of sulfur and nitrogen oxides released to the atmosphere by anthropogenic sources, is causing widespread damage to aquatic ecosystems, including loss of bicarbonate, increased acidity, and higher concentrations of toxic metals. As a result, several important species of fish and invertebrates have been eliminated over substantial parts of their natural ranges.

Effects on terrestrial ecosystems are less pronounced. Increased leaching of both nutrients and toxic elements is evident in poorly buffered soils sensitive to acidification. There is some evidence for damage to crop plants, and many soil microbial processes are negatively affected at low pH. Trees appear to be slightly stimulated by acid precipitation, although this effect is expected to be short-lived, because of increased leaching of cationic nutrients and the buildup of toxic concentrations of metals in soil water.

Better long-term studies of deposition processes and of effects on ecosystems are required to illuminate the complex ecological effects of acid precipitation and associated nutrients and toxicants. The control of emissions of sulfur and nitrogen oxides from fossil fuels is necessary to halt the acidification of sensitive aquatic ecosystems.

• • • • •

Of the options presently available only the control of emissions of sulfur and nitrogen oxides can significantly reduce the rate of deterioration of sensitive freshwater ecosystems. It is desirable to have precipitation with pH values no lower than 4.6 to 4.7 throughout such areas, the value at which rates of degradation are detectable by current survey methods, as mentioned above. In the most seriously affected areas (average precipitation pH of 4.1 to 4.2), this would mean a reduction of 50 percent in deposited hydrogen ions. Control of $SO_2$ from new electrical generating plants alone would be insufficient to accomplish this, and thus restrictions on older plants must be considered. Furthermore, there are no proposed restrictions on the emission of nitrogen oxides, and the amounts of these substances emitted are expected to continue to increase.

The alkalinity of waters endangered by acidification can be enhanced by a number of means, most notably by "liming"—adding calcium carbonate or oxide—and by adding phosphorus to stimulate biological fixation of nitrate and $CO_2$. All of these techniques are expensive ($50 and more per hectare of water surface), and treatments must be repeated every few years. Due to high costs and logistic difficulties, lime cannot be applied to the vast areas that are currently endangered by acidification. In the areas most susceptible to acid deposition, it will therefore be impossible to maintain the alkalinity and pH of more than a few selected bodies of water. Furthermore, pH and alkalinity cannot be artificially maintained without increasing the ionic concentration of the receiving water, the consequences of which have not been investigated. The fate of dissolved toxic metals after liming is also poorly known.

The deposition of acid from the atmosphere was recognized in President Carter's second environmental message to the U.S. Congress on August 2, 1979, as "one of the most serious global pollution problems associated with fossil fuel combustion," rivaled only by the buildup of carbon dioxide in the atmosphere. The topic, generally known as "acid rain," has been of much international concern because acids are deposited far from the sources of their precursors.

Acid precipitation was the subject of a major international symposium in 1975, when research on many aspects of the topic was in its infancy. Since that time, many studies have been completed, including an enormous amount of work in Scandinavia. Recent symposia (Drablös and Tollan 1980, Hutchinson and Havas 1980, Shriner et al. 1980) treat many aspects of the problem in much more detail than previously, and some long-term studies of effects allow a much more conclusive summary of the problem. We can thus learn much from a case study of acid precipitation about the problems likely to be encountered with other atmospheric pollutants.

• • • • •

Direct cause-and-effect linkages between sources of acid and effects on ecosystems will not be possible in the foreseeable future, owing to the remoteness of sources and the complexity of the interaction among emissions from different sources, atmospheric transport, chemical transformations, and specific orographic and geological settings. But the increased emission of sulfur and nitrogen compounds from anthropogenic sources is the only plausible explanation for acid deposition.

• • • • •

A number of changes in the emissions of acid precursors have taken place over the past few decades, which may influence the acidity of precipitation. While $SO_2$ emissions have not changed greatly for several decades, owing to a switch from coal to other fuels and to increased control of gaseous sulfur emissions, there was unquestionably a great increase in anthropogenic sulfur emissions in the 20th century, causing increased sulfate deposition in remote regions.

Despite the relative constancy of annual $SO_2$ emissions during the past century, three technological changes may cause the emissions to produce acid precipitation more efficiently.

First, the height at which gases are injected into the atmosphere has increased nearly threefold, causing $SO_2$ to be transported farther and to remain in the atmosphere longer, increasing the probability of oxidation to sulfuric acid. Second, recent controls of particulate emissions have reduced the amount of alkaline fly ash discharged from smokestacks, and it is conceivable that in the past such material partially neutralized acid emissions. Third, there has been a gradual change from seasonal to year-round emission. Less coal is used for space heating and more coal is used for generating electricity. Also the demand for electricity during the summer months has grown with the increased use of air conditioning. The high temperatures and humidities in summer may result in more efficient oxidation of $SO_2$ emissions to sulfuric acid.

In addition to the technological changes in $SO_2$ emission, there has been an increase in emission of nitrogen oxides for the past few decades. Nitrogen oxides are emitted from a wide variety of sources, with some injected high into the atmosphere while others are ejected and dispersed at ground level through motor vehicle use. In the absence of control technology for nitrogen oxides, their emissions will exceed emission of sulfur oxides by the turn of the century.

We stress that emission of nitrogen and sulfur oxides and the consequent acid precipitation are broad regional rather than global problems. When natural and anthropogenic emissions are compared on a regional basis, it is clear that man's activities completely overwhelm natural sources of $SO_2$ and $NO_x$, even though the magnitude of anthropogenic emissions of these oxides may seem unimportant when compared with natural emissions on a global scale.

• • • • •

The theory that the acidification observed in poorly buffered fresh waters was due to changing land-use patterns (Rosenqvist 1978a,b) has now been discounted as an explanation for the widespread effects observed, particularly in remote areas. Detailed study over several years of watersheds in Norway, some with changing land-use patterns and some without, has shown that, on the average, both are acidified at equal rates (Drablös and Sevaldrud 1980, Drablös, et al. 1980). Moreover, studies of lakes in North America in areas where land-use patterns have never changed have also shown substantial increases in hydrogen ion or losses in buffering capacity (Dillon et al. 1978, Watt et al. 1979).

• • • • •

Large areas of the earth's surfaces consist of poorly buffered geologic materials. Where such areas occur within several hundred kilometers of sources of atmospheric emissions that are acid precursors, detectable acidification of at least freshwater ecosystems may be expected to occur. In the United States such areas occur largely in the eastern part of the country (Cogbill and Likens 1974). In Canada, there are roughly 2 million square kilometers of acid-sensitive terrain—most of the eastern half of the country. Similar large geologic areas occur in Scandanivia, Scotland, and the northern part of the Soviet Union. A high proportion of the world's freshwaters occur in such terrain (between 50 and 80 percent depending on estimates); thus, large-scale degradation becomes an important concern.

• • • • •

Routine surveys in the past generally have used measurement techniques too insensitive to detect changes in lakes susceptible to acidification. It follows from the previous discussion on bicarbonate buffering that the measurement of alkalinity using modern methods is a far more sensitive method than is pH determination for measuring the degree of lake acidification. Where sufficiently sensitive

techniques have been used in lakes subjected to acid precipiation, spectacular losses of alkalinity have been recorded. For example, Dillon et al. (1978) found that two lakes in south central Ontario, a region where the average pH of precipitation is 3.95 to 4.38, had lost over 50 percent of their alkalinity in a period of 5 to 10 years. Seasonal data are necessary in such studies to separate long-term trends from annual variation, because alkalinity in soft water systems is also greatly affected by seasonal cycles of plant production.

More typically, long-term measures of alkalinity are not available and the effects of acid precipitation must be interpreted through changes in pH. Watt et al. (1979), Thompson et al. (1980), the Ontario Ministry of Environment (1978), and Harvey (1980) have shown moderate to substantial decreases in pH over periods of a few years to two decades. In the latter two studies, rates of pH change (once again in south central Ontario) were often 0.1 pH units per year or more, indicating the total exhaustion of bicarbonate buffering in the lakes. Major damage to lakes may occur well before such dramatic reduction in pH takes place. For example, in an experimental acidification of a small lake, Schindler et al. (1980) found that 70 percent of the lake's alkalinity had been depleted before pH values decreased detectably below normal.

• • • • •

Scandinavian and North American studies appear to agree on one point: acidification of sensitive waters is detectable within one to two decades where pH values of precipitation are less than 4.6—a 10-fold increase in acidity over the theoretical "pure" rain pH value of 5.6 (Henriksen 1979, 1980; Watt et al. 1979; Thompson et al. 1980). In areas where precipitation has pH values of 4.0 to 4.3, degradation is much more rapid (Dillon et al. 1978, Keller et al. 1980). Changes in the pH or alkalinity of water bodies of small areas of Belgium, the Netherlands, and Denmark also have been recorded (Vangenechten and Vanderborght 1980, Van Dam et al. 1980, Rebsdorf 1980).

• • • • •

As a result of acidification a number of organisms have been reduced or eliminated over significant parts of their ranges. A considerable change in algal species results from acidification and the changes associated with it.

• • • • •

Effects are severe on animals as well as plants. Studies of distribution show that numerous lacustrine molluscs and crustaceans are not found even at weakly acid pH values of 5.8 to 6.0 (Figure 8.15; J. Okland 1980, K. Okland 1980, Okland and Okland 1980). Experimental, whole-lake acidification studies have revealed similar tolerances for benthic Crustacea (Schindler 1980a). The crayfish *Orconectes virilis* rapidly loses its ability to recalcify after moulting as the pH drops from 6.0 to 5.5 (Malley 1980) and is probably thus rendered more vulnerable to predation and protozoan infection. In Scandinavia, the once-common crayfish *Astacus astacus* has become rare in lakes where the pH is below 6. The phyllopod *Lepidurus arcticus* is not found in water below pH 6.1 (Almer et al. 1978). Other planktonic crustaceans such as *Daphnia* species and the fairy shrimp, *Branchinecta paludosa* are also very sensitive to small declines in pH below 5.5. *Daphnia magna* and *D. middendorfiana* are susceptible to fungal infections at low pH (Havas 1980). The effects of heavy metals are negligible at such high pH values, and thus the direct toxicity of hydrogen ion is implicated.

• • • • •

Fish have been more extensively studied than other aquatic organisms in acidified lakes. Fromm (1980) believes that impairment of reproduction occurs at any pH below 6.5. Kennedy (1981) found high incidences of embryonic abnormality and high embryonic mortality rates of lake trout at pH 5.8. The reproductive failure appears to be due to disruption of calcium metabolism and deposition of protein in the oocyte (Fromm 1980).

Other stages of the life cycle usually appear to be less sensitive. Adult fishes of most species survive at pH values of 5.0 to 5.5. Changes in ionic balance appear to result from exposure to acid. Effects seem to be mitigated by increased calcium concentrations (McDonald et al. 1980). Blood pH also decreases, resulting in less capacity to carry oxygen. The fathead minnow, *Pimephales promelas*, disappeared from an experimentally acidified lake at pH 5.8 (Schindler 1980a). Spawning and egg production are known to be affected at such pH values (Spry et al. 1981).

At slightly lower pH values, other fish populations begin to decline. At pH values less than 5.0, most of the species of value to sport or commercial fisheries have disappeared.

• • • • •

The combination of aluminum and hydrogen ion is highly toxic to fish at concentrations where neither is toxic alone. The fish kills observed at spring melt in Scandinavia and the Adirondacks appear to be due to a combination of high acidity from melting snow plus high levels of aluminum leached from terrestrial soils (Cronan and Schofield 1979, Driscoll 1980, Baker and Schofield 1980, Grahn 1980, Muniz and Leivestad 1980). The effect appears to be due to a clogging of the gill by irritation-induced mucus discharges, causing severe respiratory stress. The loss of plasma sodium and chloride also occurs (Muniz and Leivestad 1980, Rosseland 1980).

• • • • •

Adverse effects of acid precipitation on forests have not been proven. It is difficult to assess the effect of acid precipitation on forest yield against a background of yield differences caused by annual climatic variation. In addition, over much of the area subjected to acid precipitation, the soils are naturally acidic podzols with a vegetation adapted to these acidic conditions. Indeed, some experimental studies of Scandinavian forested areas show the additional sulfur and nitrogen supplied by acid precipitation to have a slight fertilizing effect in the short term, particularly in mature podzolic soils, which are capable of adsorbing large amounts of sulfate (Abrahamsen 1980, Tamm and Wiklander 1980, Tveite 1980). Long-term effects are uncertain, but the initial stimulation caused by adding nitrogen to a nitrogen-deficient forest may give way to deficiencies of other elements, such as Ca, K, Mg, P that are more rapidly leached away. As magnesium and other elements are mobilized at low pH and leached from the soil, long-term permanent damage to the ecosystem may result, causing chronic deficiencies of the elements in plants. Also increased mobilization of ions could result in toxic concentrations of aluminum and manganese. Seedling establishment may be affected. There is a paucity of studies of understory vegetation, although Horntvedt et al. (1980) mention reduced moss cover under forests artificially subjected to precipitation of pH 3, and Evans and Curry (1979) found that gametophyte fertilization in bracken fern was highly sensitive to precipitation of pH 3.4.

• • • • •

Effects on crops as a result of direct foliar damage have been reported, though effects are species specific and depend on environmental and physiological conditions. Some positive effects of acid precipitation on soybean yield have been observed (Irving and Miller 1980). However, Evans et al. (1980) found that simulated rain at pH 4 and below caused the number of seed pods per plant to be reduced and thus the seed mass of soybeans produced was significantly decreased. In a comprehensive review of the subject, Jacobson (1980) concluded that there was experimental evidence for damage to agricultural crops by strongly acid precipitation. Rains with a pH below 3.0 have been noted in many experiments to cause foliar lesions. Differences among studies may reflect differences in soil type or treatment technique.●

---

## IMPOUNDMENT LEGISLATION: A DOMESTIC GULF OF TONKIN RESOLUTION

● Mr. BAUCUS. Mr. President, I rise today to comment briefly on the administration's talk about impoundment legislation.

The administration has been talking lately about introducing a bill to give the President special authority to impound funds appropriated by Congress. What does the administration mean by impoundment? The administration means letting the President, alone, decide which appropriations to spend and which not to spend. It means a massive transfer to the executive branch of Congress constitutional authority and responsibility to establish spending priorities.

Nearly 10 years ago President Nixon asserted a constitutional right not to spend funds appropriated by Congress. Mr. Nixon severely abused a right he did not possess. He used this right to punish recalcitrant legislators and to alter policies enacted by Congress. For example, without warning and without consultation with Congress, President Nixon terminated the emergency disaster loan program, the rural electrification program, and the water and sewer grant program—all in 1 day. These programs—vital to the quality of life in rural America—had been authorized and funded by Congress after extensive hearings and debate.

Mr. President, talk about impoundment legislation has a tendency to generate more heat than light, and more fiction than fact. Before this talk escalates further, I want to make a few points about the administration's proposal.

First, the administration's impoundment talk implies that the President has no impoundment authority. That simply is not true. Mr. Nixon did not have statutory authority to impound funds. But Mr. Reagan does: It is authority that he must share with Congress; it is authority that must be used with the full knowledge and participation of the Congress and the American people.

In 1974, Congress passed the Congressional Budget and Impoundment Act to correct the abuses of the Nixon administration and to assert more effective control over spending activities. The act provides procedures—deferrals and rescissions—whereby the President can propose not to spend funds already appropriated. Congress must then approve or disapprove the President's request. Just this past spring, acting upon President Reagan's request, the Congress approved over $12 billion in rescissions in fiscal year 1981 appropriations.

My first point is simple enough. The President and the Congress make the budget together. Under our form of government, they must continue to do so.

Second, the administration's talk about impoundment legislation assumes that Congress is going to appropriate and spend more than is needed. History belies this assumption. Exactly the opposite is true. In 36 of the last 37 years, during Republican as well as Democratic administrations, the appropriations enacted into law by Congress have been under the President's budget. Thus far, this year is no different. The Senate-passed HUD appropriations bill, for example, is nearly $2.7 billion less than the administration requested.

Third, the President can veto any appropriation bill with which he disagrees. He does not need to have new impoundment powers. He already has the authority, and the responsibility, to veto bills he regards as excessive.

Mr. President, the impoundment proposal launched by the Reagan administration would place unprecedented power in the hands of the Chief Executive. As the impoundment debate continues, if indeed it does, we would do well to recall what the late Senator Hubert Humphrey said about President Nixon's impoundment grab. He said:

> In effect, it tells Congress: There is no need to scrutinize the budget, there is no need to appropriate funds, indeed, there is little or no need for Congress. . . . The President asks us for a domestic Gulf of Tonkin Resolution.

The administration's talk about impoundment legislation should be seen for what it really is. It is nothing more and nothing less than an audacious ploy by an administration whose economic program is not working and may not work.

For the past month, the administration's budget figures have resembled butterflies in a wind—fluttering here, there, and everywhere without landing. The administration's economic projections—upon which the credibility of its program rests—daily looks more and more like a budgetary shell game. No wonder Wall Street is skeptical.

Now, with interest rates at record levels and with budget deficits looming larger and larger, the administration is asking Congress to let it slash another $15 billion without telling anyone where the cuts are to be made.

Mr. President, I support the administration's objective of bringing Federal spending and revenues into balance. With the administration—openly, not blindly—I am prepared to look hard at additional spending cuts, to reexamine its tax policies, and, above all, to work to end the devastating interest rates that are wrecking havoc on our economy.

But I cannot and I will not support impoundment legislation.

Earlier this year, Senator MATHIAS and I suggested another approach to the budget dilemma. We introduced S. 526 which would insure that Congress receives better balanced budget information early in the budget process. This bill would require the President to submit a balanced budget for our consideration—whether or not he favors such a budget. This mechanism is simple, responsible, and direct. It would put the onus where it belongs—on Congress and on the President.

Mr. President, I hope the administration will lay aside its talk about impoundment legislation and get on with the job of getting our economy moving again. Impoundment legislation will not make the President's program work. It will not balance the budget. Blanket authority to cut spending is no substitute for the hard, sweaty, difficult process of forming public policy and getting majority support for it. Whatever the issue—be it taxes or spending—we are better off with tough, open debate about who gets how much and who pays.●

## ELERSON P. HARDY—MAINE WORLD WAR I VETERAN

● Mr. MITCHELL. Mr. President, I rise to pay tribute to a Maine World War I veteran who passed away recently, Elerson P. Hardy of Portland. Mr. Hardy's life exemplified the kind of devotion and service to his country that is so common among the veterans of the First World War. It is often too easy to ignore the service of these great men and women who fought to preserve our Nation.

Mr. Hardy was remembered at a memorial service attended by his fellow World War I veterans. I ask that the description of that service as reported in the Portland Evening Express be printed in full at the conclusion of my remarks. The story contained in this article should serve as a reminder of the sacrifices these men and women made for the greatness of our Nation.

The article follows:

VETERANS TO THE END

(By Kim Murphy)

Elerson P. Hardy of Portland attended many memorial services for fellow veterans during his life.

Last month, he died at 82 and the service was for him.

His friends, several dressed in uniform and parading the American flag, saluted him. And wept.

Hardy was a popular and active member of their organization—Cumberland Barracks 469, Veterans of World War I. A past commander and chaplain of Cumberland Barracks, he had participated in the same memorial service for his friends. He wanted it for himself when he died.

The service was held at Hay and Peabody. The participants were 20 men in their 80s and 90s who gave a fitting goodbye to a man proud all his life he had been a soldier.

Each year, the ranks of Cumberland Barracks dwindle.

"Seven years ago," said its chaplain, Clinton Wallace, "there were 700 members. We have 175 now."

Of 175, there are only 20 or so who go to the service. Many of the others are handicapped or confined by age.

Death is a natural topic among them.

"Every time I hear the back door rattle," said Wallace, "I think it's the angels and I don't want to miss them." He'll be 85 next May.

"My wife says not to worry about it," said former Cumberland Barracks Commander Earl Bean of Portland. "We won't die until our time comes. Isn't that right?"

"So you don't worry about it?" he was asked.

"I haven't got much time to worry." He chuckled at his joke.

Elerson Hardy's memorial service was the 316th in seven years conducted by Chaplain Clinton Wallace.

A widower for eight years, Wallace is the quintessential veteran. The patriotism and service of his past are what fills his present and binds him to his associations in Cumberland Barracks. While their bodies may be aging, their pride in being soldiers for a country they love with all their hearts is strengthened every time they are together. And it is death in their ranks that brings them all together most often.

At Hardy's service, the organist played "My Buddy" as the old veterans walked slowly into the room behind the American flag. Members of Cumberland Barracks call themselves buddies.

A folded flag lay beside Elerson Hardy's body.

Some of the veterans were in suits, some in light summer jackets. Some used canes.

It was a solemn parade.

They took their places in a semicircle at the front of the room. Commander Ralph Price stepped to the podium.

"We the veterans of Cumberland Barracks 469, Veterans of World War I, are here to pay our respects to Elerson P. Hardy who has made the supreme sacrifice. . . ."

He told of Hardy's devotion to duty, how he served on the USS Delaware and the USS New York. Hardy left high school three months before graduation to sign up to fight in World War I. He left figuring he'd never finish school, compelled by the more important cause of serving his country. Later, he did go back to school.

"He was a past commander of this post and one we'll all remember," continued Price, his voice beginning to tremble.

"As time slips rapidly by and the seasons fade one into another, our life is soon ended. . . ."

As he spoke, each man there must have had at least a fleeting thought of his own memorial service to come. Behind them, I thought, how strongly they believed in what they fought for so many years ago, when they were young. And still, through all the ugly passages America has seen, they still possess their soldiers' devotion to country.

Price wiped his eye. "Generation after generation," he said, "all the shadowy peoples of the past have lived as we live, perplexed and mystified by death.

"Surely there is an afterlife and true, a life to which light and peace shall come, where the burden shall be lifted and the heartache shall cease, where the love, the hope and fulfillment that escape us here on earth shall be given to us, to be ours, forever.

"We do not glorify war," he said.

"We abhor it, those of us who have borne the battle, for all its terror and pain."

Then he spoke of the brotherhood created by war, an unspoken sentiment that has lasted years.

"There are bonds born in military service that are never broken. I think that they are not even broken by death. They are bonds of intimacy and fellowship. They give us strength."

It was Clinton Wallace's turn to speak.

"Buddies, we are here today to honor one of our best members." He, too, had trouble with his voice.

"The commander's voice was breaking," he said of Price. "You'll notice mine is, too. I feel like crying today more than I do praying. To say that we'll miss (Hardy) is the very least."

"Elerson Hardy," he said "Elerson Hardy. Elerson Hardy.

"We call our buddy's name. He does not answer. We the members of Cumberland Bar-

racks 469, Veterans of World War I, bid you a last goodbye and fond farewell."

Commander Price placed a poppy in Hardy's hands.

As Wallace gave the benediction, the veterans saluted.

The organist played taps.

Then Wallace gave the flag to Hardy's family and the veterans walked sadly and with dignity, two by two, from the room.●

## DAVIS-BACON ACT

● Mr. BAUCUS. Mr. President, I would like to submit for the RECORD a recent article on the Davis-Bacon Act that appeared in the National Journal. The article reviews the ongoing controversy over how the Davis-Bacon Act affects the workers it protects, their local economies, and the national economy.

I found the article informative, because it describes the results of recent Government studies and also examines the reliability of those results. It is apparent to me that no results based on these studies should be accepted as conclusive. The article points out the need for careful scrutiny of issues related to the Davis-Bacon Act.

The article follows:

[From the National Journal, Sept. 5, 1981]

FOES MAY USE SALAMI TACTICS TO WIPE THE DAVIS-BACON ACT OFF THE BOOKS

(By William J. Lanovette)

Sen. Strom Thurmond was grilling Deputy Defense Secretary Frank C. Carlucci at an Armed Services Committee hearing earlier this summer when he set a trap for the second-ranking Pentagon official.

"Mr. Carlucci," the South Carolina Republican asked, "suppose I offered you a proposal where you could save $400 million a year in your budget and not cut back a single program? Not only that, but my proposal would not discriminate against anyone, it would not affect the quality of the end product. Would such a proposal be of interest to you?"

"It would be of interest," the cautious Carlucci replied, "but when somebody approaches like that, Sen. Thurmond, I zip up my pockets."

Thurmond persisted. "There is the opportunity for just such a proposal in your military construction program, he said. "In fact, the Armed Services Committee has added a provision to waive the Davis-Bacon Act as it applies to military construction. This waiver provision is estimated to save about $400 million each year. . . . Does [the Defense Department] support this waiver provision?"

"Yes, sir, we do," Carclucci answered. "We think that would be very important."

With this colloquy, Thurmond neatly—if only temporarily—managed to split the Administration on its commitment to preserve the Davis-Bacon Act, a labor law that has sparked controversy since its enactment 50 years ago.

Carlucci subsequently amended his response and opposed the waiver. That puts him in line with the Administration's official opposition to Davis-Bacon repeal.

Foes of the act, which determines the minimum wages that must be paid to workers on federally aided construction projects, have been lobbying hard since this spring, hoping to win its repeal on the wave of President Reagan's cost-cutting campaign. The first showdown could come this month, when the Senate votes on the fiscal 1982 military construction authorization bill (S. 1408) that Thurmond asked Carlucci about on July 28.

The bill, as reported by the committee, includes the Davis-Bacon waiver. The act's supporters have threatened a filibuster. If the waiver succeeds, Davis-Bacon opponents can be expected to turn to some of the 70-odd other laws that include similar provisions while continuing to seek over-all repeal.

"The fight could be hairy," predicted a Senate aide. Labor strongly opposes the waiver, and the Administration apparently won't support it.

To attract union and blue-collar support during his presidential campaign, Reagan promised to retain the law, a promise Labor Secretary Raymond J. Donovan reaffirmed this spring. "The President is against repeal of Davis-Bacon, and so am I," Donovan declared at the National Press Club in April.

Reagan and Donovan are on record, however, in favor of "tightening up the administration" of the act. In January, they suspended revised regulations proposed by the Carter Administration, and on Aug. 14, Donovan announced reforms that could "significantly reduce the cost of government construction." Although intended as a compromise, Donovan's reforms have angered both labor and business and intensified the fight over repeal.

JOINING THE DEBATE

The Davis-Bacon Act requires that whenever more than $2,000 in federal funds are used to construct, alter or repair public buildings or public works, the wages paid to laborers and mechanics, including fringe benefits, must be at least those determined by the Labor Secretary to be "prevailing" on similar projects in the area.

Beyond the question of whether such minimum wages should be set at all, dissent and debate surround the way they are determined and the way they affect the local and national economies.

The debate is already acrimonious and promises to become even more so. The act has been a focal point for long-standing labor-management disputes, but much of the data being used in the debates are inconclusive.

"This is a very complicated area with no comprehensive studies available to answer many of the basic questions," said Robert J. Flanigan, an associate professor of labor economics at the Stanford University Graduate School of Business who worked at the Council of Economic Advisers (CEA) during the Carter Administration.

"Every labor economist at the CEA in the past 10 years has looked at the labor costs and inflation impact of the Davis-Bacon Act. While evidence shows that there is a positive effect on inflation, there is uncertainty about the exact size of the effect, given limitations in the underlying data. The data available are really very meager."

That hasn't stopped participants in the debate from citing the studies that seem to prove their points. Often they cite the same studies to support opposite views.

A popular source is the 1979 General Accounting Office (GAO) study that is notable for its unambiguous title: "The Davis-Bacon Act Should Be Repealed." Understandably, opponents of the act use many examples from the study to illustrate administrative folly and needless costs in the program. And they recite its main conclusions: that the act is outdated, impractical to administer and inflationary.

But supporters of the act, while rejecting the GAO's conclusions, nevertheless find points in the study to support their own views. Robert A. Georgine, president of the AFL–CIO's building and construction trades department, for example, said at a hearing of the Senate Labor and Human Resources Subcommittee on Labor that "this report is so flawed as to render it useless as the basis for any sort of informed policy judgment."

Two minutes later, however, he countered the charge that the act is inflationary by noting that in 18 of 30 cases examined, "the GAO concluded that the Labor Department wage determinations were too low rather than too high."

Contestants in the Davis-Bacon debate don't even agree why the act was passed in the first place. Critics such as the Chamber of Commerce of the United States repeatedly call it a "Depression-era law" that today's economic conditions have made obsolete.

Christopher Luis, a labor lawyer at the chamber, argued that "in 1931, federal construction accounted for over half of the construction in this country. But today, federal and federally assisted programs amount to a fifth of all the nationwide construction. Yet, because the totals are so high—about $42 billion in Davis-Bacon projects out of $228 billion nationwide—the inflationary impact is greater."

But supporters note that the 1931 act's co-sponsor, Rep. Robert L. Bacon, R-N.Y., had introduced similar legislation as early as 1927 to protect local wage standards for government construction from erosion by cheap labor imported from outside the community. His impetus was a 10-year federal construction program begun the previous year. By 1927, the bill's supporters point out, six states had passed similar wage-protection laws; the first was Kansas, in 1891. Today, 39 states have "little Davis-Bacon" laws on their books, the most recent passed by Minnesota in 1973.

Although the act was passed to discourage contractors from importing cheap labor and disrupting the local wage structure, its critics today contend that the act itself often produces a similar effect by inflating wages, often above what local, non-union contractors usually pay.

"Three quarters of our members won't even bid on federal construction projects," said Hubert L. Harris, executive vice president of Associated Builders and Contractors Inc. "It's too disruptive to their work force. They have problems with their laborers when they raise wages for a government job and then lower them for other work." About 95 per cent of the 12,500 contractors who are association members run non-union shops.

James Schlicht, the group's assistant director for government relations, says the Davis-Bacon Act has ironic consequences. The law, he said, was "established to protect local contractors from itinerant contract labor." But in fact, it "prevents non-union contractors from bidding on local federal work, so union people from outside some in and take over that work. Our people are irate over this."

The contractors' group has raised a $500,000 war chest to lobby against the act in Congress and has drawn up a "battle plan" to sell its point of view. It has also formed a coalition of groups opposing the act.

Their main argument is that it is inflationary. "Without Davis-Bacon," Harris said, "this federal money could buy food for the poor, extend social security payments, pay for welfare services and health research. . . . We're trying to tell liberals and people oriented towards labor that they should look at what Davis-Bacon does to the budget and spending and society as a whole."

Coalition members meet monthly to plan their lobbying strategy, with the builders' group and the Chamber of Commerce taking the lead in planning and coordination. The American Farm Federation is urging its members to attack the act as irate taxpayers. Others in the coalition include the National Association of Manufacturers, Associated

General Contractors of America, the National Limestone Institute, the Air Conditioning Contractors of America, the National Sand and Gravel Association and the National Association of Home Builders.

GAO STUDIES

The report cited most often in the debate is the 1979 study by the GAO concluding that the act should be repealed. This was the ninth GAO study of Davis-Bacon since 1962 and is, to date, the most comprehensive.

The report concluded that the act is no longer needed because the federal government's share of nationwide construction has diminished, the economy is not in a depression and other federal laws such as unemployment compensation and minimum wage guarantees protect workers' earnings.

"After nearly 50 years of administering the Davis-Bacon Act," the GAO concluded, "the Department of Labor has not developed an effective system to plan, control or manage the data collection, compilation and wage determination functions." In fact, said the GAO, "it may be impractical to ever do so," based on investigations in 5 of the 10 federal regions.

The GAO examined in detail 30 wage determinations selected randomly from about 10,000 made during the first half of 1976. While admitting "the absence of statistical certainty," it concluded that "if these projects are representative . . ., the act results in unnecessary construction costs of several hundred million dollars annually."

The GAO estimated that in 1977, $189 million in "unnecessary contractor costs" resulted from Davis-Bacon and Anti-Kickback Acts paperwork. Another $12 million in 1977 was spent by federal agencies "to attempt to administer and enforce the act."

The GAO found that in 12 of the 30 cases studied, "prevailing wages" were set at a level higher than private-sector wages; on that basis, it concluded that the act inflated wages by an average of 3.4 per cent.

The total cost of all construction covered by the act in 1977 was an estimated $37.8 billion. The GAO assumed that 40 per cent of construction costs are for labor. That meant labor costs of about $15.1 billion, and costs attributable to the act of about $513 million (3.4 per cent).

The report cited a 1971 GAO study that concluded that Davis-Bacon inflated construction costs by 5 to 15 per cent. These figures are frequently cited by the act's critics today and were used by the Chamber of Commerce to reach its estimate that $400 million a year would be saved by waiving Davis-Bacon in the military construction bill.

When the GAO report was published, Labor Secretary Ray Marshall said its "assertions" were "unsupported" and asked for details of the 12 cases that the GAO used to derive its 3.4 per cent inflationary average. But, according to current Labor Department officials, the data were never provided.

The GAO further angered the department last Oct. 2 when it released a preview of a "Review to Determine Whether the Davis-Bacon Act Has an Inflationary Impact and Increases Costs on Metro Construction," a reference to Washington's new regional subway system.

The GAO found "that setting prevailing wages for Metro construction . . . may increase the construction costs by about 6.8 per cent" and that total construction costs "could be increased by about $149 million" of a total $2.1 billion cost for the system. The GAO surveyed 13 crafts on private building construction projects in suburban Montgomery County, Md., and concluded that in 11 of them, the Davis-Bacon wage was, on average, 33.9 per cent above the actual prevailing wage.

The Labor Department has asked for but not received details on these calculations; in the meantime, it has dismissed the GAO findings on the ground that the private-sector wages were paid not for heavy construction but for residential construction, which traditionally draws lower-paid workers.

To the chagrin of Davis-Bacon defenders, the inflation rates from the GAO's 1971, 1979 and 1980 reports are being widely used by the act's critics to project savings in federal construction that might be realized by repeal.

"At this point, we don't have any way of determining how cheaply federal construction would have been done in the private sector," complained William M. Otter, administrator of the Labor Department's wage and hour division. "We can only obtain that information from voluntary submissions we receive from contractors, and the non-union people don't submit their pay records very often."

Contractors respond less than 10 percent of the time to department surveys, Otter said. "Those who are the loudest to complain about our wage determinations—the non-union contractors—are the worst offenders and have the most to lose by not participating."

OTHER STUDIES

Also being cited in the Davis-Bacon debate are a 1975 analysis of the act by Armond J. Thieblot Jr. of the University of Pennsylvania's Wharton School, a 1976 investigation by the Council on Wage and Price Stability and a 1978 comparison of union and non-union wages by Clinton C. Bourdon and Raymond E. Levitt of the Massachusetts Institute of Technology that was prepared for the Housing and Urban Development Department (HUD).

The Wharton study estimated the inflationary effect of the act at between $240 million and $567 million annually.

The Council on Wage and Price Stability compared Davis-Bacon wage levels with those reported by the Bureau of Labor Statistics for 19 cities. It concluded that Davis-Bacon rates were 2.7 per cent below prevailing rates for commercial construction and 3.1 per cent above rates for residential construction.

The study for HUD reported on eight metropolitan areas and concluded that the Davis-Bacon Act has never been "effectively established" as inflationary. The law, it said, is not simply "an idiosyncratic response to Depression-era problems" but "represents one particular philosophy of government."

In 1979, the CEA conducted a confidential staff review of the act's effects, sharing its findings with members of an interagency review group on wage laws. When he became director of the Office of Management and Budget (OMB) this year, Dave Stockman released the group's review of wage law policy options to four Republican opponents of the Davis-Bacon Act, Sens. Orrin G. Hatch of Utah and Don Nickles of Oklahoma and Reps. John M. Ashbrook of Ohio and John N. Erlenborn of Illinois.

Using this options paper, opponents of the act have gleaned conclusions from the CEA staff review, including a finding that in 13 cities surveyed, Davis-Bacon wages were significantly above those in the local labor market.

The CEA staff reportedly reviewed several options for administrative changes in the law and concluded that if these reduced prevailing rates by 10 percent, the total federal savings would be $1 billion. That assumes the wages account for a quarter of total construction costs of $40 billion.

SPREADING THE WORD

Armed with the calculations from the interagency paper, opponents of the act have added to the statistical free-for-all. The Chamber of Commerce often cites the CEA staff's estimate of $1 billion a year in savings through administrative changes and the 5 to 15 percent inflation estimate from the 1971 GAO study to calculate savings through outright repeal. The Associated Builders and Contractors estimates savings from repeal at 10 to 15 percent of the federal construction bill.

In addition, OMB, using the 1979 CEA study as a basis, estimated in its April 1981 budget revisions that the Davis-Bacon act inflates wages by 5.6 to 11 percent.

In the face of this opposition, the AFL-CIO's Georgine contends that the act isn't inflationary if properly administered. "This whole fight has taken on the same kind of emotional hysteria that existed for other labor issues," he said, "such as common situs picketing and labor law reform. They're arguing principles rather than practical reality."

He added that "it's really not a question of technical arguments but a debate determined by the positions parties have traditionally and historically taken on these issues."

The act's critics, not surprisingly, make the same argument. "To have the Labor Department intruding in the free marketplace is, in my view, unreasonable," said Harris of the contractors' group. "This is labor's sacred cow, which has escaped real detailed review or justification these past 50 years."

In fact, the debate over repeal or reform of the Davis-Bacon Act will probably never be resolved conclusively by studies because no one has made a comprehensive comparison of prevailing wages.

"The only way to really put some of these questions to rest," said Flanigan of the Stanford business school, "is to produce independent data for union and nonunion workers nationwide, across various skills. There's no such body of data for that now, so people will have to look at pieces of the story for certain cities and certain crafts."

Labor Department officials say they want to commission an independent study of this sort but can't convince OMB that the results would justify the sizable cost. "We started the process of conducting a comprehensive economic analysis at the end of the last Administration," said Donald E. Elisburg, former Assistant Labor Secretary for Employment Standards and now a lawyer representing Davis-Bacon supporters, "but we could never get it funded."

RULES CHANGES

Labor Secretary Donovan's proposals in August to improve the efficiency of the Davis-Bacon Act were seen as going too far by labor and not far enough by contractors.

To Georgine, the reforms would "cut the guts out" of the unions' apprenticeship training programs. In the view of Schlicht of the Associated Builders and Contractors, the reforms are "useless and worthless." But Hubert Beatty, executive vice president of the Associated General Contractors of America, takes a more moderate view: "This makes me confident the department is listening to the concerns of business and will continue to respond favorably to suggestions. . . ."

The most controversial proposal involves eliminating the so-called 30 percent rule. Currently, if the Labor Department cannot determine the prevailing wage as a rate paid to a majority of workers within a craft, it tries to find a rate that is paid to the largest number of such workers, but no less than 30 percent of them. Only if there is no group at least as large as 30 percent at the identical wage does the department adopt the workers' average pay rate as the official prevailing wage.

The Administration proposal would man-

date use of the average rate if there is no majority rate. The estimated annual savings: $68 million to $173 million.

The 30 percent rule is assumed to favor union over non-union workers because more of them are likely to earn the identical wage under collective bargaining agreements. This assumption is seriously challenged, however, by an analysis of fiscal 1980 wage classifications made by the Labor Department.

"This isn't a survey, it's more a look at the luck of the draw," said Otter. "These are soft figures, but absent something better, they are interesting."

The department looked at all 84,984 wage classifications made in the 2,310 surveys it conducted during the year. A majority wage rate was set in 36.2 percent of the cases, and of these, 19.1 percent were the union wage and 80.9 percent the non-union wage.

The 30 percent rule was applied in 21.8 percent of the cases. Here the results were unexpected. Its use resulted in adoption of the union wage only 3.7 percent of the time, where as it produced a non-union wage 96.3 percent of the time.

"We're doing the same breakfast for fiscal 1981," said Anthony J. Ponturiero, head of the Labor Department's division of government contract wage determinations. "If the accuracy of these data holds up, this is really a surprise to a lot of people."

For the other 42 percent of the determinations, when neither the majority nor the 30 percent rule were applied, an average of the wages was made to select the prevailing rate.

Another proposed reform, which angered both labor and management, would establish a "helper" classification on construction jobs. Permitting one helper for every five journeymen, the department estimated, would reduce wages paid on federal construction contracts by $450 million a year. But Schlicht guesses that it might save only $200 million because, he says, about half the contracts for Davis-Bacon construction are set by collective bargaining agreements that don't recognize a helper classification.

The contractors' groups were disappointed that a ratio of one helper to one journeyman had not been proposed, since this was mentioned in Labor Department briefings when the regulations were being drafted. Luis of the Chamber of Commerce estimated that such a ratio would save $500 million a year, whereas with the proposed ratio, "the savings will be nowhere near $450 million."

"These proposals are not at all a solution," said Elisburg. "The net effect will be reducing protections for construction workers. . . . Their cost-savings calculations are based in large measure on a lot of guesswork based on reports that have no credibility."

Georgine complained that another proposal, to eliminate weekly payroll reporting requirements by contractors, would "lead to wholesale cheating" by contractors. He said "glaring proof of the need for payroll reporting is the fact that contractors are cheating today."

The Labor Department reports that in fiscal 1980, 31 contractors were disqualified from federal construction projects because they failed to pay their workers Davis-Bacon wages. That year, 2,695 investigations found $6.2 million in wages owed 15,482 workers. For the first nine months of the current fiscal year, 2,712 investigations found $6.7 million in wages owed 18,256 workers. (The department has no information on the number of contractors that were involved or the number of investigations that led to disqualification.)

CONGRESSIONAL SHOWDOWN

The proposed regulatory changes evidently haven't relieved the pressure for legislative changes, and with Congress back in session after the summer recess, lobbying for and against repeal has become intense.

Both labor and management expect a close vote when the military construction bill comes to the Senate floor.

Foes of Davis-Bacon tried to attach similar waivers to housing construction bills in the last Congress, but the Democratic majority kept them bottled up in committee.

Thurmond's estimate that the Davis-Bacon waiver would cut the military construction budget by 10 percent seems to have been accepted as an article of faith by the Armed Services Committee; this figure is also being quoted widely by those lobbying for the waiver, which would require defense construction contractors to pay only the federal minimum wage in the future.

But Perry J. Fliakas, deputy assistant Defense secretary for installations and housing, said the estimate was "rather arbitrarily developed." He told the committee that administrative reforms would reduce construction costs by $70 million, but said the department has made no estimate of a waiver's effect.

Brig. Gen. Donald M. O'Shei, director of the Pentagon's construction operations and facility management office, is also puzzled by Thurmond's prediction. "Conceivably, with a 20 percent higher wage rate, and wages representing half the cost of construction, you could get that result," he said. "But I think they just extrapolated from the GAO reports and a couple of other places."

O'Shei said he knows of no analysis within the Defense Department, and thinks there is "nothing peculiar" about the Pentagon's projects to expect a higher degree of labor intensity. "Our work is done by private contractors, doing a cross section of types of construction."

Even without sizable savings, the waiver holds some appeal philosophically, and it is this factor that Davis-Bacon's foes hope to use during the Senate debate.

Failing enactment of the waiver—if passed by the Senate, it still must get through the House—Nickles and other Senators plan to work for passage of legislation repealing the entire law.

And, if a repeal effort fails, they hope to attack the provisions in more than 70 other laws that apply the Davis-Bacon wage determinations to federal programs.

But that would keep the Administration on a collision course with opponents of the law.

---

"PREVAILING WAGES" DON'T ALWAYS MEAN HIGHER WAGES

Despite business complaints, wage determinations under the Davis-Bacon Act don't always result in higher wages for workers on federally assisted construction projects.

In many cases, in fact, the wage set by the Labor Department is less than it would have been if the department merely averaged the wages paid all similar workers in the geographic area.

Under the act, wage determinations are made for individual projects and for geographic areas. Last year, the department made 13,311 project determinations and 1,421 geographic ones. Both kinds are based on responses by contractors to questionnaires.

In computing the prevailing wage, the department first looks for a wage paid to the majority of workers in a particular craft. If there is no majority wage, it identifies the rate paid to the greatest number of workers, but no fewer than 30 per cent of all the workers. Only if no single rate is shared by at least 30 per cent of the workers does the department compute the average of all wages in the craft. Results can vary markedly under all three methods.

A wage compilation for Dodge, Johnson, Laurens, Pulaski and Wilkinson Counties in Georgia last May, for example, produced the lowest wage with the majority method. A survey of soft-floor layers revealed one earning $11.35 an hour, one earning $5.25 and four earning $5.00. The majority earned $5.00, and that became the prevailing wage. The average wage would have been $6.10.

Among bricklayers in a March survey of 10 Georgia counties, the majority procedure raised the required wage for only a few workers. The survey included data from Atkinson, Berrien, Brooks, Clinch, Colquitt, Cook, Echols, Lanier, Lowndes and Thomas Counties.

| *Workers* | *Wage* |
|---|---|
| 11 | $8.70 |
| 3 | 8.00 |
| 1 | 7.60 |
| 5 | 7.50 |
| 2 | 7.25 |
| 36 | 7.00 |
| 4 | 6.25 |
| 1 | 6.00 |

In this case, 36 of the 63 workers made $7.00 an hour, and that became the prevailing wage, even though the average rate was $7.34.

Similarly, a survey in four North Dakota counties set a majority wage for plumbers of $5.33 an hour. The average rate would have been $7.26.

The so-called 30 per cent rule is often criticized for producing the highest wage, which is also assumed to be the local union rate, but in the two recent Georgia surveys, different results were apparent.

For example, among mason tenders in the 10-county survey, the rule produced the highest rate.

| *Workers* | *Wage* |
|---|---|
| 11 | $4.00 |
| 4 | 3.75 |
| 5 | 3.50 |
| 2 | 3.25 |
| 3 | 3.00 |

Since 11 of the 25 made the same wage, $4.00 was set as prevailing in the region, compared with an average rate of $3.68.

Likewise, among carpenters in New Haven County, Conn., where the 30 percent rule resulted in a $13.60 prevailing wage, the average would have been $8.61.

Conversely, the rule yielded the lowest wage for plasterers in the 10-county Georgia survey.

| *Workers* | *Wage* |
|---|---|
| 2 | $8.25 |
| 1 | 8.00 |
| 3 | 7.00 |
| 6 | 6.00 |

Since 50 percent of the workers earned $6.00, that became the prevailing wage. The average wage was $6.79.

When the average rate has to be used as the prevailing wage, it can be higher than the wage paid to most workers.

Among sheet metal workers in the Georgia five-county survey, the minimum was set at $6.28 as hour. Of the 34 workers surveyed, 13 made more than $6.28 and 21 made less.

| *Workers* | *Wage* |
|---|---|
| 1 | $10.17 |
| 2 | 9.00 |
| 1 | 8.60 |
| 1 | 8.25 |
| 3 | 8.00 |
| 1 | 7.75 |
| 1 | 7.70 |
| 1 | 7.25 |
| 2 | 7.00 |
| 3 | 6.25 |
| 3 | 6.00 |
| 3 | 5.75 |
| 5 | 5.00 |
| 6 | 4.20 |
| 1 | 3.50 |

Some contractors' groups have urged that the average be used instead of the majority rule on the ground that it more accurately reflects the intent of Congress. The Reagan

Administration hasn't gone that far, but it has proposed that the 30 percent rule be eliminated and that the average rate be adopted if there is no majority rate.●

## PRESIDENT REAGAN'S ECONOMIC PACKAGE

● Mr. JEPSEN. Mr. President, recently, the national news media have concentrated on what they claim is a lack of support from the American business community for President Reagan's economic program. Although this claim is patently false, a small number of "naysayers" have indeed been particularly vocal while the vast majority of the business community, who strongly support the current economic policies, have been unfortunately silent. It is easy to understand how the mistaken news stories of the past month got started.

That is why I was so pleased to see an advertisement by the Chase Manhattan Bank in the Washington Post voicing confidence in the administration and admonishing others for not doing so. The remarks of the bank's CEO were not just idle rhetoric. Chase Manhattan was one of only two major commercial banks in the country to lower its prime rate last week. Bill Butcher practices what he preaches.

His initiative is to be applauded and I hope other American leaders will follow his lead. It is a shame when the voices of a very few drown out the deep set feelings of the large majority. There is a "time to keep silence and a time to speak." It could not be plainer that now is a time to speak and to do so loudly.

I ask that Mr. Butcher's remarks be printed at this point in the RECORD.

The remarks follow:

LET'S GIVE REAGAN ECONOMIC PACKAGE A CHANCE

(By Willard C. Butcher)

Someone once said that the modern American's prayer is:

"Dear God, I pray for patience, and I want it right now!"

The latest examples of this instant-gratification syndrome are the supposed sages of Wall Street, who, according to the other day's newspapers, are "concerned that the Reagan administration's economic program is not working."

"The question," intoned one such market analyst, "is no longer whether the administration can balance the budget, but whether the whole supply-side concept will ultimately work."

Come on, fellahs. Let's give the President and his economic program time to at least become operative before we start to bury it.

Indeed, it's appalling when supposedly sophisticated observers denounce the administration's tax and budget cuts, literally before they take effect on Oct. 1. That's not unlike ordering a new air conditioner and wondering, before it's delivered, why the house isn't cool yet.

In my view, little public purpose is served by sniping at the administration's economic package while ignoring the real facts, which, I believe, are the following:

First, President Reagan has begun—and I underscore *begun*—to orchestrate a massive change in economic direction in this country which, for the first time in decades, attempts to reduce the role of government and increase the role of private citizens to forge their own economic future.

This philosophy, not unimportantly, parallels that of Thomas Jefferson and the other Founding Fathers, who believed the greater defense of capitalism was the encouragement of individual liberty.

So the President's economic direction for the country should be indisputable—even on Wall Street. Stated another way, the issue is not where we are going, but how we are going to get there. And getting from here to there requires that we leap a huge chasm and, on the way, endure a good deal of short-term, economic pain—unbalanced budgets, high interest rates, reduced social programs, tight money markets, and all the rest.

In business terms, what the President is trying to do is invest in long-term strategies which, in the short run, may prove to be somewhat costly. They are designed, however, to improve the long-term "profitability" of our nation and the overall standard of living of our people. And I personally believe they are well worth the pain.

And "pain" is exactly what we are in store for—a painful period of economic readjustment. I also would expect a few missteps along the way, as we attempt first to rein in and then to turn around an economy running amok. To think that everything will go smoothly is, to me, the height of naivete.

It is also important to remember that, as the President himself has acknowledged, this economic program is merely a first step. Clearly, much more must be done to get us back on the track to economic growth and prosperity. For example:

Further significant budget cuts are imperative to continue to reduce the government's drain on the private, productive economy.

We must continue to hack away at counterproductive, government overregulation, an area where we have barely begun to scratch the surface.

Anti-trust policies must be reexamined in light of increased competition from foreign-owned competitors both in the United States and abroad.

Social Security and other similar programs must be revamped to strike a balance between the legitimate requirements of the citizenry for health and welfare and the long-term needs of the nation for growth and prosperity.

All these things and many more must be addressed, and I believe President Reagan and his administration will address them.

But all will take time. And counting out the President's program before the bell rings strikes me as being very unfair. I'm surprised, frankly, that the critics, presumably because of the pain involved in jumping our economic chasm, seem to have forgotten that the objective is to get to the other side. In trying to eliminate the pain of adjustment, they've obviously also forgotten Lloyd George's warning that "the most dangerous thing in the world is trying to leap a chasm in two jumps."

In the view of this Wall Streeter, then, President Reagan already has taken bold and dramatic initial steps to soundly redirect the economic policy of our nation. I believe he deserves not our blind loyalty, but at least our patience and, more important, an honest effort by each of us to differentiate between short-term problems of economic readjustment and long-term prospects for economic re-emergence.●

## A TRIBUTE TO ROY WILKINS

● Mr. WILLIAMS. Mr. President, it seems that the struggle for civil rights and justice under American law is a never ending one. Last week this struggle lost one of its most effective leaders, Roy Wilkins. America lost one of its great citizens.

Roy Wilkins was president of the National Association for the Advancement of Colored People for 22 years. From his position of leadership he helped to guide our Nation and its public policy toward minority citizens, in some of America's darkest days of racial discrimination. Distasteful of violence as a means of change and impatient with merely allowing an evolution of attitudes toward blacks, Wilkins used legislation, litigation, negotiation, and persuasion to change life circumstances for blacks in this country.

His effective litigation strategies are marked by the landmark Supreme Court decision in Brown against Board of Education which overturned the separate but equal education practice as inherently not equal and therefore unlawful. That decision has profoundly changed American education today and resulted in black and white children going to school side by side, as Roy Wilkins did years before in St. Paul, Minn. Roy Wilkins was born in 1901 in St. Louis, Mo., son of a Methodist minister forced to do back breaking work to earn a living. His mother died 4 years later and Wilkins was raised by an uncle and aunt in St. Paul.

After leaving Minnesota and learning of the pervasive and deep discrimination of blacks all over the country, Wilkins devoted his entire public life to addressing discrimination. His first job was with the Kansas City Call, a prominent black newspaper. He used journalism to persuade and influence blacks to vote, using the American system to protest their grievances and hostility against discrimination. From journalism to litigation, to his work as president of the largest civil rights organization, Wilkins devoted the rest of his life to combating racism. His dedication and commitment won the respect of public officials and Presidents.

Roy Wilkins was equally concerned with equal access to employment for blacks. His first assignment with NAACP was to investigate the working conditions of blacks on a levee project in Mississippi. He found the conditions deplorable and wrote the book, "Mississippi Slave Labor," as an account of his investigations. Congress responded with legislation designed to improve the working conditions in levee labor camps.

Referring to the employment discrimination and the Jim Crow laws, Wilkins said:

> We condemn the propaganda that Negro citizens must "earn" their rights through good behavior. Good behavior wins the respect of our fellow citizens, which we value and seek, but no American is required to earn his rights as a citizen. His human rights come from God and his citizenship rights come from the Constitution.

It was my pleasure to work with NAACP under Roy Wilkins' leadership throughout his term as president. The Civil Rights Amendments of 1972 and title VII are two important legislative responses to racial discrimination that I was proud to work closely on developing with the NAACP.

Wilkins was often criticized by other

blacks during the 1960's for working within the system to produce social change. He defended his tactics as sound, resisting the black power leaders advocating separatism. He knew they were asking for nothing more than the separatism of the white racists who blacks should be working against in their fight for equality. When asked why he did not change the name of the organization to eliminate the word "colored," Wilkins responded that it was his hope that the organization would work toward equality for all people of color.

It is particularly important to reflect on Mr. Wilkins work today when our Nation is battling the problem of deteriorated working conditions, segregated schools, discrimination in housing, disenfranchisement, and other institutional barriers to equality. Severe budget cuts in programs designed to balance many of the economic and other inequities as well as the administration's proposals to eliminate important regulations and limit the role of the Federal Government in human services does not project favorably on the hopes for improvement of the status of blacks and other minorities in the next few years.

I am concerned for the American people when time after time the administration proposes additional cuts in social services and other programs designed to assist powerless and discriminated-against Americans and when the administration hopes to slow down the enforcement of educational equality and civil rights. In this time when important gains like the Voting Rights Act are being viewed with distaste, when a Federal presence in insuring civil rights is called burdensome and when programs like legal services and CETA are eliminated from the President's budget, the strong voice of Roy Wilkins will be missed.

He told his NAACP membership, which grew to over 400,000 under his strong leadership, that blacks could make gains by using the system. Many of even the most skeptical were beginning to believe him. Now the system that Wilkins influenced to become more responsive to the needs of all Americans, is retreating on its commitment. Those of us who feel the direction is a wrong one could use the wisdom of Roy Wilkins. The loss of such a leader and friend is deeply mourned.●

## SAUDI ARABIA

● Mr. MOYNIHAN. Mr. President, in the conduct of this Nation's foreign policy there should be no more important task than to ascertain as precisely as possible what another government has said. Words are important. They are the diplomat's currency. He is not careless with them.

I speak, Mr. President, on the basis of some experience in these matters. While U.S. Ambassador to India, and later to the United Nations, I spent a not inconsiderable portion of my time reading, and rereading, the texts of speeches and statements by officials of other nations' governments, because I had discovered early on that one could not always rely on summaries or analysis prepared by others.

Knowing as I do that my colleagues in the Senate feel a similar obligation to be as well informed as possible about the views of foreign governments, and mindful of the debate that will soon be conducted in this Chamber about American relations with Saudi Arabia, I would like to take this opportunity to share information that may be of interest to other Senators.

On the evening of August 24, the day the Reagan administration officially announced its intention to provide Saudi Arabia with an $8.5 billion air defense package which would include five AWACS, the sophisticated airborne surveillance and command centers, I was invited to appear on public television's "McNeil-Lehrer Report" to discuss the proposal.

Speaking for the administration was our distinguished former colleague in this body, and my good friend, James L. Buckley, the Under Secretary of State for Security Assistance, Science, and Technology. I argued against the proposal, as I shall continue to do here on the floor of the Senate when this body considers a resolution to disapprove the sale.

During the broadcast I made mention of Saudi Arabia's reaction to the August 18 incident above the Gulf of Sidra, when American aircraft shot down two Libyan fighter planes. I said that the Saudis had "joined a group called the Gulf Cooperation Council to declare our action to be medieval piracy on the high seas." And I suggested that it would not be wise to provide military equipment as sensitive and as powerful as the AWACS to a country that apparently has so little regard for American interests that it could join in an international condemnation of an American action as clearly justified as was the downing of the Libyan fighter planes.

On September 1, I received a letter from a State Department official which said:

> Saudi Arabia did not join in stating that the downing of two Libyan planes was an act of piracy on the part of the United States. The statement to which you referred was issued by a functionary of the Arab League in Tunis. It is as accurate to attribute it to the various member states of the Arab League as a statement by a United Nations functionary to its members.

Mr. President, I do not doubt that the Arab League issued such a statement. And I would be inclined to agree that Saudi Arabia should not necessarily be held to account for every utterance of an Arab League official. This is not, however, the statement to which I referred during the August 24 broadcast.

On August 22, the Gulf Cooperation Council, which is comprised of Saudi Arabia, Kuwait, Bahrain, Qatar, Oman, and the United Arab Emirates and has established its headquarters in Riyadh, issued a condemnation of the U.S. action. It described the American action as "U.S. aggression" and called it a "provocative trap and an exercise of medieval piracy at high seas."

The statement also said:

> The action is more dangerous than we imagine because with this act the United States is encouraging the policy of the cowboys.

A statement which I find particularly offensive because I take it to be a personal, and wholly inappropriate, reference to the President of the United States.

While the Saudis have not endorsed the statement explicitly, they have not tried to distance themselves from it either. I believe this failure is significant. It can be compared to the response of the Government of Oman, which has felt obliged to disassociate itself from the hostile Council statement.

Mr. President, these statements by the Gulf Cooperation Council and the Government of Oman are a matter of public record. They have been reported in the "Daily Report: Middle East and Africa," published by the U.S. Government's Foreign Broadcast Information Service. This information should have been conveyed to the relevant officials at the State Department. One can only wonder why this has not been done.

In the interest of historical accuracy, and for the information of Senators, I ask that the FBIS reports to which I have referred be printed in the RECORD.

The reports follow:

["Daily Report" on the Middle East and Africa Foreign Broadcast Information Service, August 24, 1981]

GULF COUNCIL CONDEMNS "U.S. AGGRESSION" ON LIBYA

(GF231943 Manama GULF NEWS AGENCY in Arabic 1425 GMT 22 Aug 81)

KUWAIT, Aug. 22.—The Gulf Cooperation Council, which includes six Arab Gulf countries, today condemned the downing of two Libyan aircraft by U.S. aircraft over Libya's Gulf of Sidra on 18 August. In a press statement here today, Gulf Cooperation Council secretary General 'Abdallah Bisharah said that what the United States did is considered political aggression which the council strongly condemns.

Bisharah described the "U.S. aggression" as a trap the Americans laid for Libya. It is a provocative trap and an exercise of medieval piracy on the seas. He criticized the United States for carrying out maneuvers along the Libyan coast and said: "What does the United States want from maneuvers near the Libyan coast?"

He said that the aggression was a political decision and has no other interpretation but political aggression which the Arab Gulf Cooperation Council strongly condemns. He added: "The action is more dangerous than we imagine because with this act the United States is encouraging the policy of the cowboys."

["Daily Report" on the Middle East and Africa Foreign Broadcast Information Service, August 26, 1981]

PAPER CITES BISHARAH ON U.S. "AGGRESSION" ON LIBYA

(GF251918 Kuwait Arab Times in English 23 Aug 81 p 1)

KUWAIT, Aug. 22.—The Gulf Cooperation Council today strongly denounced the downing of two Libyan aircraft by the American Navy jets over the Libyan territorial waters last week.

"What America did is a political aggression which the Gulf Corporation Council [GCC] strongly condemns," the secretary general of the council, Abdallah Ya'qub Bisharah said today. He described the downing operation of the Libyan fighters as a trap

which the Americans set for the Libyans. "It is a provocative trap and an exercise of medieval piracy at high seas," he said.

One has only to read the American weekly magazine Newsweek which appeared before the operation and said that measures to deter the regime of Col. al-Qaddhafi were approved, Bisharah said before posing a question "or else what would America want by mounting maneuvers near the Libyan shores."

The secretary general of the GCC said that whether Libya had the right to intercept the American jet fighters or not is pure academic talk subject to international law interpretations. The aggression is "but a political decision and has no other interpretation but a political aggression which the Gulf Cooperation Council strongly condemns," he affirmed.

The situation is much worse than we imagine, because by mounting such operations, America is encouraging "the policy of the cowboys," Bisharah said.

Bisharah's statement was the first official comment on the incident by the conservative oil states.

OFFICIAL REJECTS GULF COUNCIL POSITION ON DOGFIGHT

(GF291257 Ash-Shariqah AL-KHALIJ in Arabic 28 Aug 81 p. 1)

MUSCAT.—The Sultanate of Oman has rejected the Gulf Cooperation Council [GCC] stand in condemning the U.S. aggression against Libya as stated by the council's secretary, 'Abdallah Bisharah earlier this week. In a press-interview published in Muscat yesterday, Omani Foreign Ministry Under Secretary Yusus al-'Alawi said: The council's secretary general did not consult with council members before issuing his statement. The council members did not authorize the secretary general to make political statements representing their views because these countries should express their own views.●

---

## ON HUMAN WORK

● Mr. MOYNIHAN. Mr. President, His Holiness Pope John Paul II yesterday issued "Laborem Exercens," the third encyclical of his historic pontificate. The title in English is "On Human Work." As it is a treatise of fundamental and enduring significance, which will surely be cited in future as a landmark document, I bring it to the attention of Members of the Senate.

In "Laborem Exercens," John Paul addresses in wise and patient fashion the vital concerns of workers in this country and around the world. He speaks of the tragic, destructive effect that unemployment has on the family structure, and counsels fair treatment of handicapped and migrant workers.

His Holiness applauds the positive role trade unionism has played in the promulgation and protection of basic human rights, and he encourages solidarity among workers in pursuit of social justice.

John Paul II writes in favor of greater worker participation in the management of businesses and the economy, while reminding us that Marxist collectivism offers only false promises to do so. In his words:

Merely converting the means of production into state property in the collectivist system is by no means equivalent to "socializing" that property.

For working women, the Pope advocates "just remuneration," even while advocating "social measures such as family allowances or grants to mothers" who wish to devote themselves exclusively to their families.

Mr. President, this encyclical could not have come at a more propitious time. Two hundred thousand workers will assemble in Washington this week in a demonstration of solidarity with the poor and the disabled who suffer most in a time of governmental austerity, such as that in which we in the United States now find ourselves.

The working people of Poland, organized finally into the first genuinely free trade union in the Communist world, today find themselves subject to even greater threats of increased repression precisely because the rights of workers, properly stated and effectively defended, are inconsistent with the demands of a totalitarian state. John Paul, having lived most of his life in Communist Poland, knows this better than we.

Mr. President, I hope that "Laborem Exercens" shall be as widely read as such a powerful and important work deserves. In order that it might be made more generally available, I ask that the complete text of "Laborem Exercens" be printed in the RECORD.

The text follows:

ENCYCLICAL OF THE SUPREME PONTIFF

(By John Paul II)

Venerable Brothers and dear sons and daughters, greetings and the Apostolic Blessing:

Through work man must earn his daily bread [1] and contribute to the continual advance of science and technology and, above all, to elevating unceasingly the cultural and moral level of the society within which he lives in community with those who belong to the same family. And work means any activity by man, whether manual or intellectual, whatever its nature or circumstances; it means any human activity that can and must be recognized as work, in the midst of all the many activities of which man is capable and to which he is predisposed by his very nature, by virtue of humanity itself. Man is made to be in the visible universe an image and likeness of God himself,[2] and he is placed in it in order to subdue the earth.[3] From the beginning therefore he is called to work. Work is one of the characteristics that distinguish man from the rest of creatures, whose activity for sustaining their lives cannot be called work. Only man is capable of work, and only man works, at the same time by work occupying his existence on earth. Thus work bears a particular mark of man and of humanity, the mark of a person operating within a community of persons. And this mark decides its interior characteristics; in a sense it constitutes its very nature.

I. INTRODUCTION

1. Human work on the ninetieth anniversary of Rerum Novarum:

Since 15 May of the present year was the ninetieth anniversary of the publication by the great Pope of the "social question," Leo XIII, of the decisively important Encyclical which begins with the words Rerum Novarum, I wish to devote this document to human work and, even more, to man in the vast context of the reality of work. As I said in the Encyclical Redemptor Hominis, published at the beginning of my service in the See of Saint Peter in Rome, man "is the primary and fundamental way for the Church," [4] precisely because of the inscrutable mystery of Redemption in Christ; and so it is necessary to return constantly to this way and to follow it ever anew in the various aspects in which it shows us all the wealth and at the same time all the toil of human existence on earth.

Work is one of these aspects, a perennial and fundamental one, one that is always relevant and constantly demands renewed attention and decisive witness. Because fresh questions and problems are always arising, there are always fresh hopes, but also fresh fears and threats, connected with this basic dimension of human existence: man's life is built up every day from work, from work it derives its specific dignity, but at the same time work contains the unceasing measure of human toil and suffering, and also of the harm and injustice which penetrate deeply into social life within individual nations and on the international level. While it is true that man eats the bread produced by the work of his hands [5]—and this means not only the daily bread by which his body keeps alive but also the bread of science and progress, civilization and culture—it is also a perennial truth that he eats this bread by "the sweat of his face",[6] that is to say, not only by personal effort and toil but also in the midst of many tensions, conflicts and crises, which, in relationship with the reality of work, disturb the life of individual societies and also of all humanity.

We are celebrating the ninetieth anniversary of the Encyclical Rerum Novarum on the eve of new developments in technological, economic and political conditions which, according to many experts, will influence the world of work and production no less than the industrial revolution of the last century. There are many factors of a general nature: the widespread introduction of automation into many spheres of production, the increase in the cost of energy and raw materials, the growing realization that the heritage of nature is limited and that it is being intolerably polluted, and the emergence on the political scene of peoples who, after centuries of subjection, are demanding their rightful place among the nations and in international decision-making. These new conditions and demands will require a reordering and adjustment of the structures of the modern economy and of the distribution of work. Unfortunately, for millions of skilled workers these changes may perhaps mean unemployment, at least for a time, or the need for retraining. They will very probably involve a reduction or a less rapid increase in material well-being for the more developed countries. But they can also bring relief and hope to the millions who today live in conditions of shameful and unworthy poverty.

It is not for the Church to analyze scientifically the consequences that these changes may have on human society. But the Church considers it her task always to call attention to the dignity and rights of those who work, to condemn situations in which that dignity and those rights are violated, and to help to guide the above-mentioned changes so as to ensure authentic progress by man and society.

2. In the organic development of the Church's social action and teaching:

It is certainly true that work, as a human issue, is at the very centre of the "social question" to which, for almost a hundred years, since the publication of the above-mentioned Encyclical, the Church's teaching and the many undertakings connected with her apostolic mission have been especially directed. The present reflections on work are not intended to follow a different line, but rather to be in organic connection with the whole tradition of this teaching and activity. At the same time, however, I am making them, according to the indication in the Gospel, in order to bring out from the

---

Footnotes at end of article.

heritage of the Gospel "what is new and what is old".[7] Certainly, work is part of "what is old"—as old as man and his life on earth. Nevertheless, the general situation of man in the modern world, studied and analyzed in its various aspects of geography, culture and civilization, calls for the discovery of the new meanings of human work. It likewise calls for the formulation of the new tasks that in this sector face each individual, the family, each country, the whole human race, and, finally, the Church herself.

During the years that separate us from the publication of the Encyclical Rerum Novarum, the social question has not ceased to engage the Church's attention. Evidence of this are the many documents of the Magisterium issued by the Popes and by the Second Vatican Council, pronouncements by individual Episcopates, and the activity of the various centres of thought and of practical apostolic initiatives, both on the international level and at the level of the local Churches. It is difficult to list here in detail all the manifestations of the commitment of the Church and of Christians in the social question, for they are too numerous. As a result of the Council, the main coordinating centre in this field is the Pontifical Commission Justice and Peace, which has corresponding bodies within the individual Bishops' Conferences. The name of this institution is very significant. It indicates that the social question must be dealt with in its whole complex dimension. Commitment to justice must be closely linked with commitment to peace in the modern world. This twofold commitment is certainly supported by the painful experience of the two great world wars which in the course of the last ninety years have convulsed many European countries and, at least partially, countries in other continents. It is supported, especially since the Second World War, by the permanent threat of a nuclear war and the prospect of the terrible self-destruction that emerges from it.

If we follow the main line of development of the documents of the supreme Magisterium of the Church, we find in them an explicit confirmation of precisely such a statement of the question. The key position, as regards the question of world peace, is that of John XXIII's Encyclical Pacem in Terris. However, if one studies the development of the question of social justice, one cannot fail to note that, whereas during the period between Rerum Novarum and Pius XI's Quadragesimo Anno the Church's teaching concentrates mainly on the just solution of the "labour question" within individual nations, in the next period the Church's teaching widens its horizon to take in the whole world. The disproportionate distribution of wealth and poverty and the existence of some countries and continents that are developed and of others that are not, call for a leveling out and for a search for ways to ensure just development for all. This is the direction of the teaching in John XXIII's Encyclical Mater et Magistra, in the Pastoral Constitution Gaudium et Spes of the Second Vatican Council, and in Paul VI's Encyclical Populorum Progressio.

This trend of development of the Church's teaching and commitment in the social question exactly corresponds to the objective recognition of the state of affairs. While in the past the "class" question was especially highlighted as the centre of this issue, in more recent times it is the "world" question that is emphasized. Thus, not only the sphere of class is taken into consideration but also the world sphere of inequality and injustice, and as a consequence, not only the class dimension but also the world dimension of the tasks involved in the path towards the achievement of justice in the modern world. A complete analysis of the situation of the world today shows in an even deeper and fuller way the meaning of the previous analysis of social injustices; and it is the meaning that must be given today to efforts to build justice on earth, not concealing thereby unjust structures but demanding that they be examined and transformed on a more universal scale.

3. The question of work, the key to the social question:

In the midst of all these processes—those of the diagnosis of objective social reality and also those of the Church's teaching in the sphere of the complex and many-sided social question—the question of human work naturally appears many times. This issue is, in a way, a constant factor both of social life and of the Church's teaching. Furthermore, in this teaching attention to the question goes back much further than the last ninety years. In fact the Church's social teaching finds its source in Sacred Scripture, beginning with the Book of Genesis and especially in the Gospel and the writings of the Apostles. From the beginning it was part of the Church's teacher, her concept of man and life in society, and, especially, the social morality which she worked out according to the needs of the different ages. This traditional patrimony was then inherited and developed by the teaching of the Popes on the modern "social question", beginning with the Encyclical Rerum Novarum. In this context, study of the question of work, as we have seen, has continually been brought up to date while maintaining that Christian basis of truth which can be called ageless.

While in the present document we return to this question once more—without however any intention of touching on all the topics that concern it—this is not merely in order to gather together and repeat what is already contained in the Church's teaching. It is rather in order to highlight—perhaps more than has been done before—the fact that human work is a key, probably the essential key, to the whole social question, if we try to see that question really from the point of view of man's good. And if the solution—or rather the gradual solution—of the social question, which keeps coming up and becomes ever more complex, must be sought in the direction of "making life more human",[8] then the key, namely human work, acquires fundamental and decisive importance.

## II. WORK AND MAN

4. In the Book of Genesis:

The Church is convinced that work is a fundamental dimension of man's existence on earth. She is confirmed in this conviction by considering the whole heritage of the many sciences devoted to man: anthropology, palaeontology, history, sociology, psychology and so on; they all seem to bear witness to this reality in an irrefutable way. But the source of the Church's conviction is above all the revealed word of God, and therefore what is a conviction of the intellect is also a conviction of faith. The reason is that the Church—and it is worthwhile stating it at this point—believes in man: she thinks of man and addresses herself to him not only in the light of historical experience, not only with the aid of the many methods of scientific knowledge, but in the first place in the light of the revealed word of the living God. Relating herself to man, she seeks to express the eternal designs and transcendent destiny which the living God, the Creator and Redeemer, has linked with him.

The Church finds in the very first pages of the Book of Genesis the source of her conviction that work is a fundamental dimension of human existence on earth. An analysis of these texts makes us aware that they express—sometimes in an archaic way of manifesting thought—the fundamental truths about man, in the context of the mystery of creation itself. These truths are decisive for man from the very beginning, and at the same time they trace out the main lines of his earthly existence, both in the state of original justice and also after the breaking, caused by sin, of the Creator's original covenant with creation in man. When man, who had been created "in the image of God . . . male and female",[9] hears the words: "Be fruitful and multiply, and fill the earth and subdue it",[10] even though these words do not refer directly and explicitly to work, beyond any doubt they indirectly indicate it as an activity for man to carry out in the world. Indeed, they show its very deepest essence. Man is the image of God partly through the mandate received from his Creator to subdue, to dominate, the earth. In carrying out this mandate, man, every human being, reflects the very action of the Creator of the universe.

Work understood as a "transitive" activity, that is to say an activity beginning in the human subject and directed towards an external object, presupposes a specific dominion by man over "the earth", and in its turn it confirms and develops this dominion. It is clear that the term "the earth" of which the biblical text speaks is to be understood in the first place as that fragment of the visible universe that man inhabits. By extension, however, it can be understood as the whole of the visible world insofar as it comes within the range of man's influence and of his striving to satisfy his needs. The expression "subdue the earth" has an immense range. It means all the resources that the earth (and indirectly the visible world) contains and which, through the conscious activity of man, can be discovered and used for his ends. And so these words, placed at the beginning of the Bible, never cease to be relevant. They embrace equally the past ages of civilization and economy, as also the whole of modern reality and future phases of development, which are perhaps already to some extent beginning to take shape, though for the most part they are still almost unknown to man and hidden.

While people sometimes speak of periods of "acceleration" in the economic life and civilization of humanity or of individual nations, linking these periods to the progress of science and technology and especally to discoveries which are decisive for social and economic life, at the same time it can be said that none of these phenomena of "acceleration" exceeds the essential content of what was said in that most ancient of biblical texts. As man, through his work, becomes more and more the master of the earth, and as he confirms his dominion over the visible world, again through his work, he nevertheless remains in every case and at every phase of this process within the Creator's original ordering. And this ordering remains necessarily and indissolubly linked with the fact that man was created, as male and female, "in the image of God". This process is, at the same time, universal: it embraces all human beings, every generation, every phase of economic and cultural development, and at the same time it is a process that takes place within each human being, in each conscious human subject. Each and every individual is at the same time embraced by it. Each and every individual, to the proper extent and in an incalculable numbers of ways, takes part in the giant process whereby man "subdues the earth" through his work.

5. Work in the objective sense: Technology.

This universality and, at the same time, this multiplicity of the process of "subduing the earth" throw light upon human work, because man's dominion over the earth is achieved in and by means of work. There thus emerges the meaning of work in an objective sense, which finds expression in

Footnotes at end of article.

the various epochs of culture and civilization. Man dominates the earth by the very fact of domesticating animals, rearing them and obtaining from them the food and clothing he needs, and by the fact of being able to extract various natural resources from the earth and the seas. But man "subdues the earth" much more when he begins to cultivate it and then to transform its products, adapting them to his own use. Thus agriculture constitutes through human work a primary field of economic activity and an indispensable factor of production. Industry in its turn will always consist in linking the earth's riches—whether nature's living resources, or the products of agriculture, or the mineral or chemical resources—with man's work, whether physical or intellectual. This is also in a sense true in the sphere of what are called service industries, and also in the sphere of research, pure or applied.

In industry and agriculture man's work has today in many cases ceased to be mainly manual, for the toil of human hands and muscles is aided by more and more highly perfected machinery. Not only in industry but also in agriculture we are witnessing the transformations made possible by the gradual development of science and technology. Historically speaking, this, taken as a whole, has caused great changes in civilization, from the beginning of the "industrial era" to the successive phases of development through new technologies, such as the electronics and the microprocessor technology in recent years.

While it may seem that in the industrial process it is the machine that "works" and man merely supervises it, making it function and keeping it going in various ways, it is also true that for this very reason industrial development provides grounds for reproposing in new ways the question of human work. Both the original industrialization that gave rise to what is called the worker question and the subsequent industrial and post-industrial changes show in an eloquent manner that, even in the age of ever more mechanized "work", the proper subject of work continues to be man.

The development of industry and of the various sectors connected with it, even the most modern electronics technology, especially in the fields of miniaturization, communications and telecommunications and so forth, shows how vast is the role of technology, that ally of work that human thought has produced, in the interaction between the subject and object of work (in the widest sense of the word). Understood in this case not as a capacity or aptitude for work, but rather as a whole set of instruments which man uses in his work, technology is undoubtedly man's ally. It facilitates his work, perfects, accelerates and augments it. It leads to an increase in the quantity of things produced by work, and in many cases improves their quality. However, it is also a fact that, in some instances, technology can cease to be man's ally and become almost his enemy, as when the mechanization of work "supplants" him, taking away all personal satisfaction and the incentive to creativity and responsibility, when it deprives many workers of their previous employment, or when, through exalting the machine, it reduces man to the status of its slave.

If the biblical words "subdue the earth" addressed to man from the very beginning are understood in the context of the whole modern age, industrial and post-industrial, then they undoubtedly include also a relationship with technology, with the world of machinery which is the fruit of the work of human intellect and a historical confirmation of man's dominion over nature.

The recent stage of human history, especially that of certain societies, brings a correct affirmaion of technology as a basic coefficient of economic progress; but at the same time, this affirmation has been accompanied by and continues to be accompanied by the raising of essential questions concerning human work in relationship to its subject, which is man. These questions are particularly charged with content and tension of an ethical and an ethical and social character. They therefore constitute a continual challenge for institutions of many kinds, for States and governments, for systems and international organizations; they also constitute a challenge for the Church.

6. Work in the subjective sense: Man as the subject of work:

In order to continue our analysis of work, an analysis linked with the word of the Bible telling man that he is to subdue the earth, we must concentrate our attention on work in the subjective sense, much more than we did on the objective significance, barely touching upon the vast range of problems known intimately and in detail to scholars in various fields and also, according to their specializations, to those who work. If the words of the Book of Genesis to which we refer in this analysis of our speak of work in the objective sense in an indirect way, they also speak only indirectly of the subject of work; but what they say is very eloquent and is full of great significance.

Man has to subdue the earth and dominate it, because as the "image of God" he is a person, that is to say, a subjective being capable of acting in a planned and rational way, capable of deciding about himself, and with a tendency to self-realization. As a person, man is therefore the subject of work. As a person he works, he performs various actions belonging to the work process; independently of their objective content, these actions must all serve to realize his humanity, to fulfill the calling to be a person that is his by reason of his very humanity. The principal truths concerning this theme were recently recalled by the Second Vatican Council in the Constitution Gaudium et Spes, especially in Chapter One, which is devoted to man's calling.

And so this "dominion" spoken of in the biblical text being meditated upon here refers not only to the objective dimension of work but at the same time introduces us to an understanding of its subjective dimension. Understood as a process whereby man and the human race subdue the earth, work corresponds to this basic biblical concept only when throughout the process man manifests himself and confirms himself as the one who "dominates." The dominion, in a certain sense, refers to the subjective dimension even more than to the objective one: this dimension conditions the very ethical nature of work. In fact there is no doubt that human work has an ethical value of its own, which clearly and directly remain linked to the fact that the one who carries it out is a person, a conscious and free subject, that is to say a subject that decides about himself.

This truth, which in a sense constitutes the fundamental and perennial heart of Christian teaching on human work, has had and continues to have primary significance for the formulation of the important social problems characterizing whole ages.

The ancient world introduced its own typical differentiation of people into classes according to the type of work done. Work which demanded from the worker the exercise of physical strength, the work of muscles and hands, was considered unworthy of free men, and was therefore given to slaves. By broadening certain aspects that already belonged to the Old Testament, Christianity brought about a fundamental change of ideas in this field, taking the whole content of the Gospel message as its point of departure, especially the fact that the one who, while being God, became like us in all things [11] devoted most of the years of his life on earth to manual work at the carpenter's bench. This circumstance constitutes in itself the most eloquent "Gospel of work", showing that the basis for determining the value of human work is not primarily the kind of work being done but the fact that the one who is doing it is a person. The sources of the dignity of work are to be sought primarily in the subjective dimension, not in the objective one.

Such a concept practically does away with the very basis of the ancient differentiation of people into classes according to the kind of work done. This does not mean that, from the objective point of view, human work cannot and must not be rated and qualified in any way. It only means that the primary basis of the value of work is man himself, who is its subject. This leads immediately to a very important conclusion of an ethical nature: however true it may be that man is destined for work and called to it, in the first place work is "for man" and not man "for work". Through this conclusion one rightly comes to recognize the pre-eminence of the subjective meaning of work over the objective one. Given this way of understanding things, and presupposing that different sorts of work that people do can have greater or lesser objective value, let us try nevertheless to show that each sort is judged above all by the measure of the dignity of the subject of work, that is to say the person, the individual who carries it out. On the other hand: independently of the work that every man does, and presupposing that this work constitutes a purpose—at times a very demanding one—of his activity, this purpose does not possess a definitive meaning in itself. In fact, in the final analysis it is always man who is the purpose of the work, whatever work it is that is done by man—even if the common scale of values rates it as the merest "service", as the most monotonous, even the most alienating work.

7. A threat to the right order of values:

It is precisely these fundamental affirmations about work that always emerged from the wealth of Christian truth, especially from the very message of the "Gospel of work", thus creating the basis for a new way of thinking, judging and acting. In the modern period, from the beginning of the industrial age, the Christian truth about work had to oppose the various trends of materialistic and economistic thought.

For certain supporters of such ideas, work was understood and treated as a sort of "merchandise" that the worker—especially the industrial worker—sells to the employer, who at the same time is the possessor of the capital, that is to say, of all the working tools and means that make production possible. This way of looking at work was widespread especially in the first half of the nineteenth century. Since then, explicit expressions of this sort have almost disappeared, and have given way to more human ways of thinking about work and evaluating it. The interaction between the worker and the tools and means of production has given rise to the development of various forms of capitalism—parallel with various forms of collectivism—into which other socioeconomic elements have entered as a consequence of new concrete circumstances, of the activity of workers' associations and public authorities, and of the emergence of large transnational enterprises. Nevertheless, the danger of treating work as a special kind of "merchandise", or as an impersonal "force" needed for production (the expression "workforce" is in fact in common use) always exists, especially when the whole way of looking at the question of

Footnotes at end of article.

economics is marked by the premises of materialistic economism.

A systematic opportunity for thinking and evaluating in this way, and in a certain sense a stimulus for doing so, is provided by the quickening process of the development of a onesidedly materialistic civilization, which gives prime importance to the objective dimension of work, while the subjective dimension—everything in direct or indirect relationship with the subject of work—remains on a secondary level. In all cases of this sort, in every social situation of this type, there is a confusion or even a reversal of the order laid down from the beginning by the words of the Book of Genesis: man is treated as an instrument of production,[12] whereas he—he alone, independently of the work he does—ought to be treated as the effective subject of work and its true maker and creator. Precisely this reversal of order, whatever the programme or name under which it occurs, should rightly be called "capitalism"—in the sense more fully explained below. Everybody knows that capitalism has a definite historical meaning as a system, an economic and social system, opposed to "socialism" or "communism". But in the light of the analysis of the fundamental reality of the whole economic process—first and foremost of the production structure that work is—it should be recognized that the error of early capitalism can be repeated wherever man is in a way treated on the same level as the whole complex of the material means of production, as an instrument and not in accordance with the true dignity of his work—that is to say, where he is not treated as subject and maker, and for this very reason as the true purpose of the whole process of production.

This explains why the analysis of human work in the light of the words concerning man's "dominion" over the earth goes to the very heart of the ethical and social question. This concept should also find a central place in the whole sphere of social and economic policy, both within individual countries and in the wider field of international and intercontinental relationships, particularly with reference to the tensions making themselves felt in the world not only between East and West but also between North and South. Both John XXIII in the Encyclical Mater et Magistra and Paul VI in the Encyclical Populorum Progressio gave special attention to these dimensions of the modern ethical and social question.

8. Worker solidarity.

When dealing with human work in the fundamental dimension of its subject, that is to say, the human person doing the work, one must make at least a summary evaluation of developments during the ninety years since *Rerum Novarum* in relation to the subjective dimension of work. Although the subject of work is always the same, that is to say man, nevertheless wide-ranging changes take place in the objective aspect. While one can say that, by reason of its subject, work is one single thing (one and unrepeatable every time), yet when one takes into consideration its objective directions one is forced to admit that there exist many works, many different sorts of work. The development of human civilization brings continual enrichment in this field. But at the same time, one cannot fail to note that in the process of this development not only do new forms of work appear but also others disappear. Even if one accepts that on the whole this is a normal phenomenon, it must still be seen whether certain ethically and socially dangeorus irregularities creep in, and to what extent.

It was precisely one such wide-ranging anomaly that gave rise in the last century to what has been called "the worker question", sometimes described as "the proletariat question". This question and the problems connected with it gave rise to a just social reaction and caused the impetuous emergence of a great burst of solidarity between workers, first and foremost industrial workers. The call to solidarity and common action addressed to the workers—especially to those engaged in narrowly specialized, monotonous and depersonalized work in industrial plants, when the machine tends to dominate man—was important and eloquent from the point of view of social ethics. It was the reaction against the degradation of man as the subject of work, and against the unheard-of accompanying exploitation in the field of wages, working conditions and social security for the worker. This reaction united the working world in a community marked by great solidarity.

Following the lines laid down by the Encyclical *Rerum Novarum* and many later documents of the Church's Magisterium, it must be frankly recognized that the reaction against the system of injustice and harm that cried to heaven for vengeance and that weighed heavily upon workers in that period of rapid industrialization was justified from the point of view of social morality. This state of affairs was favoured by the liberal socio-political system, which, in accordance with its "economistic" premises, strengthened and safeguarded economic initiative by the possessors of capital alone, but did not pay sufficient attention to the rights of the workers, on the grounds that human work is solely an instrument of production, and that capital is the basis, efficient factor and purpose of production.

From that time, worker solidarity, together with a clearer and more committed realization by others of workers' rights, has in many cases brought about profound changes. Various forms of neo-capitalism or collectivism have developed. Various new systems have been thought out. Workers can often share in running businesses and in controlling their productivity, and in fact do so. Through appropriate associations, they exercise influence over conditions of work and pay, and also over social legislation. But at the same time various ideological or power systems, and new relationships which have arisen at various levels of society, have allowed flagrant injustices to persist or have created new ones. On the world level, the development of civilization and of communications has made possible a more complete diagnosis of the living and working conditions of man globally, but it has also revealed other forms of injustice, much more extensive than those which in the last century stimulated unity between workers for particular solidarity in the working world. This is true in countries which have completed a certain process of industrial revolution. It is also true in countries where the main working milieu continues to be agriculture or other similar occupations.

Movements of solidarity in the sphere of work—a solidarity that must never mean being closed to dialogue and collaboration with others—can be necessary also with reference to the condition of social groups that were not previously included in such movements but which, in changing social systems and conditions of living, are undergoing what is in effect "proletarianization" or which actually already find themselves in a "proletariat" situation, one which, even if not yet given that name, in fact deserves it. This can be true of certain categories or groups of the working "intelligentsia", especially when ever wider access to education and an ever increasing number of people with degrees or diplomas in the fields of their cultural preparation are accompanied by a drop in demand for their labour. This unemployment of intellectuals occurs or increases when the education available is not oriented towards the types of employment or service required by the true needs of society, or when there is less demand for work which requires education, at least professional education, than for manual labour, or when it is less well paid. Of course, education in itself is always valuable and an important enrichment of the human person; but in spite of that, "proletarianization" processes remain possible.

For this reason, there must be continued study of the subject of work and of the subject's living conditions. In order to achieve social justice in the various parts of the world, in the various countries, and in the relationships between them, there is a need for ever new movements of solidarity of the workers and with the workers. This solidarity must be present whenever it is called for by the social degrading of the subject of work, by exploitation of the workers, and by the growing areas of poverty and even hunger. The Church is firmly committed to this cause, for she considers it her mission, her service, a proof of her fidelity to Christ, so that she can truly be the "Church of the poor". And the "poor" appear under various forms; they appear in various places and at various times; in many cases they appear as a result of the violation of the dignity of human work: either because the opportunities for human work are limited as a result of the scourge of unemployment, or because a low value is put on work and the rights that flow from it, especially the right to a just wage and to the personal security of the worker and his or her family.

9. Work and personal dignity:

Remaining within the context of man as the subject of work, it is now appropriate to touch upon, at least in a summary way, certain problems that more closely define the dignity of human work, in that they make it possible to characterize more fully its specific moral value. In doing this we must always keep in mind the biblical calling to "subdue the earth",[14] in which is expressed the will of the Creator that work should enable man to achieve that "dominion" in the visible world that is proper to him.

God's fundamental and original intention with regard to man, whom he created in his image and after his likeness,[15] was not withdrawn or cancelled out even when man, having broken the original covenant with God, heard the words: "In the sweat of your face you shall eat bread".[16] These words refer to the sometimes heavy toil that from then onwards has accompanied human work; but they do not alter the fact that work is the means whereby man achieves that "dominion" which is proper to him over the visible world, by "subjecting" the earth. Toil is something that is universally known, for it is universally experienced. It is familiar to those doing physical work under sometimes exceptionally laborious conditions. It is familiar not only to agricultural workers, who spend long days working the land, which sometimes "beats thorns and thistles",[17] but also to those who work in mines and quarries, to steel-workers at their blast-furnaces, to those who work in builders' yards and in construction work, often in danger of injury or death. It is likewise familiar to those at an intellectual workbench; to scientists; to those who bear the burden of grave responsibility for decisions that will have a vast impact on society. It is familiar to doctors and nurses, who spend days and nights at their patients' bedside. It is familiar to women, who, sometimes without proper recognition on the part of society and even of their own families, bear the daily burden and responsibility for their homes and the upbringing of their children. It is familiar to all workers and, since work is a universal calling, it is familiar to everyone.

And yet, in spite of all this toil—perhaps, in a sense, because of it—work is a good thing for man. Even though it bears the mark of a bonum arduum, in the terminology

Footnotes at end of article.

of Saint Thomas,[18] this does not take away the fact that, as such, it is a good thing for man. It is not only good in the sense that it is useful or something to enjoy; it is also good as being something worthy, that is to say, something that corresponds to man's dignity, that expresses this dignity and increases it. If one wishes to define more clearly the ethical meaning of work, it is this truth that one must particularly keep in mind. Work is a good thing for man—a good thing for his humanity—because through work man not only transforms nature, adapting it to his own needs, but he also achieves fulfillment as a human being and indeed, in a sense, becomes "more a human being".

Without this consideration it is impossible to understand the meaning of the virtue of industriousness, and more particularly it is impossible to understand why industriousness should be a virtue: for virtue, as a moral habit, is something whereby man becomes good as man.[19] This fact in no way alters our justifiable anxiety that in work, whereby matter gains in nobility, man himself should not experience a lowering of his own dignity.[20] Again, it is well known that it is possible to use work in various ways against man, that it is possible to punish man with the system of forced labour in concentration camps, that work can be made into a means for oppressing man, and that in various ways it is possible to exploit human labour, that is to say the worker. All this pleads in favour of the moral obligation to link industriousness as a virtue with the social order of work, which will enable man to become, in work, "more a human being" and not be degraded by it not only because of the wearing out of his physical strength (which, at least up to a certain point, is inevitable), but especially through damage to the dignity and subjectivity that are proper to him.

10. Work and society: Family and nation: Having thus confirmed the personal dimension of human work, we must go on to the second sphere of values which is necessarily linked to work. Work constitutes a foundation for the formation of family life, which is a natural right and something that man is called to. These two spheres of values—one linked to work and the other consequent on the family nature of human life—must be properly united and must properly permeate each other. In a way, work is a condition for making it possible to found a family, since the family requires the means of subsistence which man normally gains through work. Work and industriousness also influence the whole process of education in the family, for the very reason that everyone "becomes a human being" through, among other things, work, and becoming a human being is precisely the main purpose of the whole process of education. Obviously, two aspects of work in a sense come into play here: the one making family life and its upkeep possible, and the other making possible the achievement of the purposes of the family, especially education. Nevertheless, these two aspects of work are linked to one another and are mutually complementary in various points.

It must be remembered and affirmed that the family constitutes one of the most important terms of reference for shaping the social and ethical order of human work. The teaching of the Church has always devoted special attention to this question, and in the present document we shall have to return to it. In fact, the family is simultaneously a community made possible by work and the first school of work, within the home, for every person.

The third sphere of values that emerges from this point of view—that of the subject of work—concerns the great society to which man belongs on the basis of particular cultural and historical links. This society—even when it has not yet taken on the mature form of a nation—is not only the great "educator" of every man, even though an indirect one (because each individual absorbs within the family the contents and values that go to make up the culture of a given nation); it is also a great historical and social incarnation of the work of all generations. All of this brings it about that man combines his deepest human identity with membership of a nation, and intends his work also to increase the common good developed together with his compatriots, thus realizing that in this way work serves to add to the heritage of the whole human family, of all the people living in the world.

These three spheres are always important for human work in its subjective dimension. And this dimension, that is to say, the concrete reality of the worker, takes precedence over the objective dimension. In the subjective dimension there is realized, first of all, that "dominion" over the world of nature to which man is called from the beginning according to the words of the Book of Genesis. The very process of "subduing the earth", that is to say work, is marked in the course of history, and especially in recent centuries, by an immense development of technological means. This is an advantageous and positive phenomenon, on condition that the objective dimension of work does not gain the upper hand over the subjective dimension, depriving man of his dignity and inalienable rights or reducing them.

### III. CONFLICT BETWEEN LABOUR AND CAPITAL IN THE PRESENT PHASE OF HISTORY

11. Dimensions of the conflict: The sketch of the basic problems of work outlined above draws inspiration from the texts at the beginning of the Bible and in a sense forms the very framework of the Church's teaching, which has remained unchanged throughout the centuries within the context of different historical experiences. However, the experiences preceding and following the publication of the Encyclical Rerum Novarum form a background that endows that teaching with particular expressiveness and the eloquence of living relevance. In this analysis, work is seen as a great reality with a fundamental influence on the shaping in a human way of the world that the Creator has entrusted to man; it is a reality closely linked with man as the subject of work and with man's rational activity. In the normal course of events this reality fills human life and strongly affects its value and meaning. Even when it is accompanied by toil and effort, work is still something good, and so man develops through love for work. This entirely positive and creative, educational and meritorious character of man's work must be the basis for the judgments and decisions being made today in its regard in spheres that include human rights, as is evidenced by the international declarations on work and the many labour codes prepared either by the competent legislative institutions in the various countries or by organizations devoting their social, or scientific and social, activity to the problems of work. One organization fostering such initiatives on the international level is the International Labour Organization, the oldest specialized agency of the United Nations Organizations.

In the following part of these considerations I intend to return in greater detail to these important questions, recalling at least the basic elements of the Church's teaching on the matter. I must however first touch on a very important field of questions in which her teaching has taken shape in this latest period, the one marked and in a sense symbolized by the publication of the Encyclic Rerum Novarum.

Throughout this period, which is by no means yet over, the issue of work has of course been posed on the basis of the great conflict that in the age of, and together with, industrial development emerged between "capital" and "labour", that is to say between the small but highly influential group of entrepreneurs, owners or holders of the means of production, and the broader multitude of people who lacked these means and who shared in the process of production solely by their labour. The conflict originated in the fact that the workers put their powers at the disposal of the entrepreneurs, and these, following the principle of maximum profit, tried to establish the lowest possible wages for the work done by the employees. In addition there were other elements of exploitation, connected with the lack of safety at work and of safeguards regarding the health and living conditions of the workers and their families.

This conflict, interpreted by some as a socioeconomic class conflict, found expression in the ideological conflict between liberalism, understood as the ideology of capitalism, and Marxism, understood as the ideology of scientific socialism and communism, which professes to act as the spokesman for the working class and the worldwide proletariat. Thus the real conflict between labour and capital was transformed into a systematic class struggle, conducted not only by ideological means but also and chiefly by political means. We are familar with the history of this conflict and with the demands of both sides. The Marxist programme, based on the philosophy of Marx and Engels, sees in class struggle the only way to eliminate class injustices in society and to eliminate the classes themselves. Putting this programme into practice presupposes the collectivization of the means of production so that, through the transfer of these means from private hands to the collectivity, human labour will be preserved from exploitation.

This is the goal of the struggle carried on by political as well as ideological means. In accordance with the principle of "the dictatorship of the proletariat", the groups that as political parties follow the guidance of Marxist ideology aim by the use of various kinds of influence, including revolutionary pressure, to win a monopoly of power in each society, in order to introduce the collectivist system into it by eliminating private ownership of the means of production. According to the principal ideologists and leaders of this broad international movement, the purpose of this programme of action is to achieve the social revolution and to introduce socialism and, finally, the communist system throughout the world.

As we touch on this extremely important field of issues, which constitute not only a theory but a whole fabric of socioeconomic, political, and international life in our age, we cannot go into the details, nor is this necessary, for they are known both from the vast literature on the subject and by experience. Instead, we must leave the context of these issues and go back to the fundamental issue of human work, which is the main subject of the considerations in this document. It is clear, indeed, that this issue, which is of such importance for man—it constitutes one of the fundamental dimensions of his earthly existence and of his vocation—can also be explained only by taking into account the full context of the contemporary situation.

12. The priority of labour: The structure of the present-day situation is deeply marked by many conflicts caused by man, and the technological means produced by human work play a primary role in it. We should also consider here the prospect of worldwide catastrophe in the case of a nuclear war, which would have almost unimaginable possibilities of destruction. In view of this situation we must first of all recall a principle that has always been taught by the Church: the principle of the

Footnotes at end of article.

priority of labour over capital. This principle directly concerns the process of production: in this process labour is always a primary efficient cause, while capital, the whole collection of means of production, remains a mere instrument or instrumental cause. This principle is an evident truth that emerges from the whole of man's historical experience.

When we read in the first chapter of the Bible that man is to subdue the earth, we know that these words refer to all the resources contained in the visible world and placed at man's disposal. However, these resources can serve man only through work. From the beginning there is also linked with work the question of ownership, for the only means that man has for causing the resources hidden in nature to serve himself and others is his work. And to be able through his work to make these resources bear fruit, man takes over ownership of small parts of the various riches of nature: those beneath the ground, those in the sea, on land, or in space. He takes all these things over by making them his workbench. He takes them over through work and for work.

The same principle applies in the successive phases of this process, in which the first phase always remains the relationship of man with the resources and riches of nature. The whole of the effort to acquire knowledge with the aim of discovering these riches and specifying the various ways in which they can be used by man and for man teaches us that everything that comes from man throughout the whole process of economic production, whether labour or the whole collection of means of production and the technology connected with these means (meaning the capability to use them in work), presupposes these riches and resources of the visible world, riches and resources that man finds and does not create. In a sense man finds them already prepared, ready for him to discover them and to use them correctly in the productive process. In every phase of the development of his work man comes up against the leading role of the gift made by "nature", that is to say, in the final analysis, by the Creator. At the beginning of man's work is the mystery of creation. This affirmation, already indicated as my starting point, is the guiding thread of this document, and will be further developed in the last part of these reflections.

Further consideration of this question should confirm our conviction of the priority of human labour over what in the course of time we have grown accustomed to calling capital. Since the concept of capital includes not only the natural resources placed at man's disposal but also the whole collection of means by which man appropriates natural resources and transforms them in accordance with his needs (and thus in a sense humanizes them), it must immediately be noted that all these means are the result of the historical heritage of human labour. All the means of production, from the most primitive to the ultramodern ones—it is man that has gradually developed them: man's experience and intellect. In this way there have appeared not only the simplest instruments for cultivating the earth but also, through adequate progress in science and technology, the more modern and complex ones: machines, factories, laboratories, and computers. Thus everything that is at the service of work, everything that in the present state of technology constitutes its ever more highly perfected "instrument," is the result of work.

This gigantic and powerful instrument—the whole collection of means of production that in a sense are considered synonymous with "capital"—is the result of work and bears the signs of human labour. At the present stage of technological advance, when man, who is the subject of work, wishes to make use of this collection of modern instruments, the means of production, he must first assimilate cognitively the result of the work of the people who invented those instruments, who planned them, built them and perfected them, and who continue to do so. Capacity for work—that is to say, for sharing efficiently in the modern production process—demands greater and greater preparation and, before all else, proper training. Obviously, it remains clear that every human being sharing in the production process, even if he or she is only doing the kind of work for which no special training or qualifications are required, is the real efficient subject in this production process, while the whole collection of instruments, no matter how perfect they may be in themselves, are only a mere instrument subordinate to human labour.

This truth, which is part of the abiding heritage of the Church's teaching, must always be emphasized with reference to the question of the labour system and with regard to the whole socioeconomic system. We must emphasize and give prominence to the primacy of man in the production process, the primacy of man over things. Everything contained in the concept of capital in the strict sense is only a collection of things. Man, as the subject of work, and independently of the work that he does—man alone is a person. This truth has important and decisive consequences.

13. Economism and materialism:

In the light of the above truth we see clearly, first of all, that capital cannot be separated from labour; in no way can labour be opposed to capital or capital to labour, and still less can the actual people behind these concepts be opposed to each other, as will be explained later. A labour system can be right, in the sense of being in conformity with the very essence of the issue, and in the sense of being intrinsically true and also morally legitimate, if in its very basis it overcomes the opposition between labour and capital through an effort at being shaped in accordance with the principle put forward above: the principle of the substantial and real priority of labour, of the subjectivity of human labour and its effective participation in the whole production process, independently of the nature of the services provided by the worker.

Opposition between labour and capital does not spring from the structure of the production process or from the structure of the economic process. In general the latter process demonstrates that labour and what we are accustomed to call capital are intermingled; it shows that they are inseparably linked. Working at any workbench, whether a relatively primitive or an ultra-modern one, a man can easily see that through his work he enters into two inheritances: the inheritance of what is given to the whole of humanity in the resources of nature, and the inheritance of what others have already developed on the basis of those resources, primarily by developing technology, that is to say, by producing a whole collection of increasingly perfect instruments for work. In working, man also "enters into the labour of others".[21] Guided both by our intelligence and by the faith that draws light from the word of God, we have no difficulty in accepting this image of the sphere and process of man's labour. It is a consistent image, one that is humanistic as well as theological. In it man is the master of the creatures placed at his disposal in the visible world. If some dependence is discovered in the work process, it is dependence on the Giver of all the resources of creation, and also on other human beings, those to whose work and initiative we owe the perfected and increased possibilities of our own work. All that we can say of everything in the production process which constitutes a whole collection of "things", the instruments, the capital, is that it conditions man's work; we cannot assert that it constitutes as it were an impersonal "subject" putting man and man's work into a position of dependence.

This consistent image, in which the principle of the primacy of person over things is strictly preserved, was broken up in human thought, sometimes after a long period of incubation in practical living. The break occurred in such a way that labour was separated from capital and set in opposition to it, and capital was set in opposition to labour, as though they were two impersonal forces, two production factors juxtaposed in the same "economistic" perspective. This way of stating the issue contained a fundamental error, what we can call the error of economism, that of considering human labour solely according to its economic purpose. This fundamental error of thought can and must be called an error of materialism, in that economism directly or indirectly includes a conviction of the primacy and superiority of the material, and directly or indirectly places the spiritual and the personal (man's activity, moral values and such matters) in a position of subordination to material reality. This is still not theoretical materialism in the full sense of the term, but it is certainly practical materialism, a materialism judged capable of satisfying man's needs, not so much on the grounds of premises derived from materialist theory, as on the grounds of a particular way of evaluating things, and so on the grounds of a certain hierarchy of goods based on the greater immediate attractiveness of what is material.

The error of thinking in the categories of economism went hand in hand with the formation of a materialist philosophy, as this philosophy developed from the most elementary and common phase (also called common materialism, because it professes to reduce spiritual reality to a superfluous phenomenon) to the phase of what is called dialectical materialism. However, within the framework of the present consideration, it seems that economism had a decisive importance for the fundamental issue of human work, in particular for the separation of labour and capital and for setting them up in opposition as two production factors viewed in the above-mentioned economistic perspective; and it seems that economism influenced this non-humanistic way of stating the issue before the materialist philosophical system did. Nevertheless it is obvious that materialism, including its dialectical form, is incapable of providing sufficient and definitive bases for thinking about human work, in order that the primacy of man over the capital instrument, the primacy of the person over things, may find in it adequate and irrefutable confirmation and support. In dialectical materialism too man is not first foremost the subject of work and the efficient cause of the production process, but continues to be understood and treated, in dependence on what is material, as a kind of "resultant" of the economic or production relations prevailing at a given period.

Obviously, the antinomy between labour and capital under consideration here—the antinomy in which labour was separated from capital and set up in opposition to it, in a certain sense on the ontic level, as if it were just an element like any other in the economic process—did not originate merely in the philosophy and economic theories of the eighteenth century; rather it originated in the whole of the economic and social practice of that time, the time of the birth and rapid development of industrialization, in which what was mainly seen was the possibility of vastly increasing material wealth, means, while the end, that is to say, man, who should be served by the means, was ignored. It was this practical error that struck a blow first and foremost

Footnotes at end of article.

against human labour, against the working man, and caused the ethically just social reaction already spoken of above. The same error, which is now part of history, and which was connected with the period of primitive capitalism and liberalism, can nevertheless be repeated in other circumstances of time and place, if people's thinking starts from the same theoretical or practical premises. The only chance there seems to be for radically overcoming this error is through adequate changes both in theory and in practice, changes in line with the definite conviction of the primacy of the person over things, and of human labour over capital as a whole collection of means of production.

14. Work and ownership:

The historical process briefly presented here has certainly gone beyond its initial phase, but it is still taking place and indeed is spreading in the relationships between nations and continents. It needs to be specified further from another point of view. It is obvious that, when we speak of opposition between labour and capital, we are not dealing only with abstract concepts or "impersonal forces" operating in economic production. Behind both concepts there are people, living, actual people: on the one side are those who do the work without being the owners of the means of production, and on the other side those who act as entrepreneurs and who own these means or represent the owners. Thus the issue of ownership or property enters from the beginning into the whole of this difficult historical process. The Encyclical Rerum Novarum, which has the social question as its theme, stresses this issue also, recalling and confirming the Church's teaching on ownership, on the right to private property even when it is a question of the means of production. The Encyclical Mater et Magistra did the same.

The above principle, as it was then stated and as it is still taught by the Church, diverges radically from the programme of collectivism as proclaimed by Marxism and put into pratice in various countries in the decades following the time of Leo XIII's Encyclical. At the same time it differs from the programme of capitalism practised by liberalism and by the political systems inspired by it. In the latter case, the difference consists in the way the right to ownership or property is understood. Christian tradition has never upheld this right as absolute and untouchable. On the contrary, it has always understood this right within the broader context of the right common to all to use the goods of the whole of creation: the right to private property is subordinated to the right to common use, to the fact that goods are meant for everyone.

Furthermore, in the Church's teaching, ownership has never been understood in a way that could constitute grounds for social conflict in labour. As mentioned above, property is acquired first of all through work in order that it may serve work. This concerns in a special way ownership of the means of production. Isolating these means as a separate property in order to set it up in the form of "capital" in opposition to "labour"—and even to practise exploitation of labour—is contrary to the very nature of these means and their possession. They cannot be possessed against labour, they cannot even be possessed for possession's sake, because the only legitimate title to their possession—whether in the form of private ownership or in the form of public or collective ownership—is that they should serve labour, and thus, by serving labour, that they should make possible the achievement of the first principle of this order, namely, the universal destination of goods and the right to common use of them. From this point of view, therefore, in consideration of human labour and of common access to the goods meant for man, one cannot exclude the socialization, in suitable conditions, of certain means of production. In the course of the decades since the publication of the Encyclical Rerum Novarum, the Church's teaching has always recalled all these principles, going back to the arguments formulated in a much older tradition, for example, the well-known arguments of the Summa Theologiac of Saint Thomas Aquinas.[22]

In the present document, which has human work as its main theme, it is right to confirm all the effort with which the Church's teaching has striven and continues to strive always to ensure the priority of work and, thereby, man's character as a subject in social life and, especially, in the dynamic structure of the whole economic process. From this point of view the position of "rigid" capitalism continues to remain unacceptable, namely the position that defends the exclusive right to private ownership of the means of production as an untouchable "dogma" of economic life. The principle of respect for work demands that this right should undergo a constructive revision, both in theory and in practice. If it is true that capital, as the whole of the means of production, is at the same time the product of the work of generations, it is equally true that capital is being unceasingly created through the work done with the help of all these means of production, and these means can be seen as a great workbench at which the present generation of workers is working day after day. Obviously we are dealing here with different kinds of work, not only so-called manual labour but also the many forms of intellectual work, including white-collar work and management.

In the light of the above, the many proposals put forward by experts in Catholic social teaching and by the highest Magisterium of the Church take on special significance: [23] proposals for joint ownership of the means of work, sharing by the workers in the management and/or profits of businesses, so-called shareholding by labour, etc. Whether these various proposals can or cannot be applied concretely, it is clear that recognition of the proper position of labour and the worker in the production process demands various adaptations in the sphere of the right to ownership of the means of production. This is so not only in view of older situations but also, first and foremost, in view of the whole of the situation and the problems in the second half of the present century with regard to the so-called Third World and the various new independent countries that have arisen, especially in Africa but elsewhere as well, in place of the colonial territories of the past.

Therefore, while the position of "rigid" capitalism must undergo continual revision, in order to be reformed from the point of view of human rights, both human rights in the widest sense and those linked with man's work, it must be stated that, from the same point of view, these many deeply desired reforms cannot be achieved by an priori elimination of private ownership of the means of production. For it must be noted that merely taking these means of production (capital) out of the hands of their private owners is not enough to ensure their satisfactory socialization. They cease to be the property of a certain social group, namely the private owners, and become the property of organized society, coming under the administration and direct control of another group of people, namely those who, though not owning them, from the fact of exercising power in society manage them on the level of the whole national or the local economy.

This group in authority may carry out its task satisfactorily from the point of view of the priority of labour; but it may also carry it out badly by claiming for itself a monopoly of the administration and disposal of the means of production and not refraining even from offending basic human rights. Thus, merely converting the means of production into State property in the collectivist system is by no means equivalent to "socializing" that property. We can speak of socializing only when the subject character of society is ensured, that is to say, when on the basis of his work each person is fully entitled to consider himself a part-owner of the great workbench at which he is working with every one else. A way towards that goal could be found by associating labour with the ownership of capital, as far as possible, and by producing a wide range of intermediate bodies with economic, social and cultural purposes; they would be bodies enjoying real autonomy with regard to the public powers, pursuing their specific aims in honest collaboration with each other and in subordination to the demands of the common good, and they would be living communities both in form and in substance, in the sense that the members of each body would be looked upon and treated as persons and encouraged to take an active part in the life of the body.[24]

15. The "personalist" argument;

Thus, the principle of the priority of labour over capital is a postulate of the order of social morality. It has key importance both in the system built on the principle of private ownership of the means of production and also in the system in which private ownership of these means has been limited even in a radical way. Labour is in a sense inseparable from capital; in no way does it accept the antinomy, that is to say, the separation and opposition with regard to the means of production that has weighed upon human life in recent centuries as a result of merely economic premises. When man works, using all the means of production, he also wishes the fruit of this work to be used by himself and others, and he wishes to be able to take part in the very work process as a sharer in responsibility and creativity at the workbench to which he applies himself.

From this spring certain specific rights of workers, corresponding to the obligation of work. They will be discussed later. But here it must be emphasized, in general terms, that the person who works desires not only due remuneration for his work; he also wishes that, within the production process, provision be made for him to be able to know that in his work, even on something that is owned in common, he is working "for himself". This awareness is extinguished within him in a system of excessive bureaucratic centralization, which makes the worker feel that he is just a cog in a huge machine moved from above, that he is for more reasons than one a mere production instrument rather than a true subject of work with an initiative of his own. The Church's teaching has always expressed the strong and deep conviction that man's work concerns not only the economy but also, and especially, personal values. The economic system itself and the production process benefit precisely when these personal values are fully respected. In the mind of Saint Thomas Aquinas,[25] this is the principal reason in favour of private ownership of the means of production. While we accept that for certain well founded reasons exceptions can be made to the principle of private ownership—in our own time we even see that the system of "socialized ownership" has been introduced—nevertheless the personalist argument still holds good both on the level of principles and on the practical level. If it is to be rational and fruitful, any socialization of the means of production must take this argument into consideration. **Every effort**

Footnotes at end of article.

must be made to ensure that in this kind of system also the human person can preserve his awareness of working "for himself". If this is not done, incalculable damage is inevitably done throughout the economic process, not only economic damage but first and foremost damage to man.

IV. RIGHTS OF WORKERS

16. Within the broad context of human rights:

While work, in all its many senses, is an obligation, that is to say a duty, it is also a source of rights on the part of the worker. These rights must be examined in the broad context of human rights as a whole, which are connatural with man, and many of which are proclaimed by various international organizations and increasingly guaranteed by the individual States for their citizens. Respect for this broad range of human rights constitutes the fundamental condition for peace in the modern world: peace both within individual countries and societies and in international relations, as the Church's Magisterium has several times noted, especially since the Encyclical Pacem in Terris. The human rights that flow from work are part of the broader context of those fundamental rights of the person.

However, within this context they have a specific character corresponding to the specific needs of human work as outlined above. It is in keeping with this character that we must view them. Work is, as has been said, an obligation, that is to say, a duty, on the part of man. This is true in all the many meanings of the word. Man must work, both because the Creator has commanded it and because of his own humanity, which requires work in order to be maintained and developed. Man must work out of regard for others, especially his own family, but also for the society he belongs to, the country of which he is a child, and the whole human family of which he is a member, since he is the heir to the work of generations and at the same time a sharer in building the future of those who will come after him in the succession of history. All this constitutes the moral obligation of work, understood in its wide sense. When we have to consider the moral rights, corresponding to this obligation, of every person with regard to work, we must always keep before our eyes the whole vast range of points of reference in which the labour of every working subject is manifested.

For when we speak of the obligation of work and of the rights of the worker that correspond to this obligation, we think in the first place of the relationship between the employer, direct, or indirect, and the worker.

The distinction between the direct and the indirect employer is seen to be very important when one considers both the way in which labour is actually organized and the possibility of the formation of just or unjust relationships in the field of labour.

Since the direct employer is the person or institution with whom the worker enters directly into a work contract in accordance with definite conditions, we must understand as the indirect employer many different factors, other than the direct employer, that exercise a determining influence on the shaping both of the work contract and, consequently, of just or unjust relationships in the field of human labour.

17. Direct and indirect employer:

The concept of indirect employer includes both persons and institutions of various kinds, and also collective labour contracts and the principles of conduct which are laid down by these persons and institutions and which determine the whole socioeconomic system or are its result. The concept of "indirect employer" thus refers to many different elements. The responsibility of the indirect employer differs from that of the direct employer—the term itself indicates that the responsibility is less direct—but it remains a true responsibility: the indirect employer substantially determines one or other facet of the labour relationship, thus conditioning the conduct of the direct employer when the latter determines in concrete terms the actual work contract and labour relations. This is not to absolve the direct employer from his own responsibility, but only to draw attention to the whole network of influences that condition his conduct. When it is a question of establishing an ethically correct labour policy, all these influences must be kept in mind. A policy is correct when the objective rights of the worker are fully respected.

The concept of indirect employer is applicable to every society, and in the first place to the State. For it is the State that must conduct a just labour policy. However, it is common knowledge that in the present system of economic relations in the world there are numerous links between individual States, links that find expression, for instance, in the import and export process, that is to say, in the mutual exchange of economic goods, whether raw materials, semi-manufactured goods, or finished industrial products. These links also create mutual dependence, and as a result it would be difficult to speak, in the case of any State, even the economically most powerful, of complete self-sufficiency or autarky.

Such a system of mutual dependence is in itself normal. However, it can easily become an occasion for various forms of exploitation or injustice and as a result influence the labour policy of individual States; and finally it can influence the individual worker, who is the proper subject of labour. For instance the highly industrialized countries, and even more the businesses that direct on a large scale the means of industrial production (the companies referred to as multinational or transnational), fix the highest possible prices for their products, while trying at the same time to fix the lowest possible prices for raw materials or semi-manufactured goods. This is one of the causes of an ever increasing disproportion between national incomes. The gap between most of the richest countries and the poorest ones is not diminishing or being stabilized but is increasing more and more, to the detriment, obviously, of the poor countries. Evidently this must have an effect on local labour policy and on the worker's situation in the economically disadvantaged societies. Finding himself in a system thus conditioned, the direct employer fixes working conditions below the objective requirements of the workers, especially if he himself wishes to obtain the highest possible profits from the business which he runs (or from the businesses which he runs, in the case of a situation of "socialized" ownership of the means of production).

It is easy to see that this framework of forms of dependence linked with the concept of the indirect employer is enormously extensive and complicated. It is determined, in a sense, by all the elements that are decisive for economic life within a given society and state, but also by much wider links and forms of dependence. The attainment of the worker's rights cannot however be doomed to be merely a result of economic systems which on a larger or smalled scale are guided chiefly by the criterion of maximum profit. On the contrary, it is respect for the objective rights of the worker—every kind of worker: manual or intellectual, industrial or agricultural, etc.—that must constitute the adequate and fundamental criterion for shaping the whole economy, both on the level of the individual society and State and within the whole of the world economic policy and of the systems of international relationships that derive from it.

Influence in this direction should be exercised by all the International Organizations whose concern it is, beginning with the United Nations Organization. It appears that the International Labour Organization and the Food and Agriculture Organization of the United Nations and other bodies too have fresh contributions to offer on this point in particular. Within the individual States there are ministries or public departments and also various social institutions set up for this purpose. All of this effectively indicates the importance of the indirect employer—as has been said above—in achieving full respect for the worker's rights, since the rights of the human person are the key element in the whole of the social moral order.

18. The employment issue:

When we consider the rights of workers in relation to the "indirect employer", that is to say, all the agents at the national and international level that are responsible for the whole orientation of labour policy, we must first direct our attention to a fundamental issue: the question of finding work, or, in other words, the issue of suitable employment for all who are capable of it. The opposite of a just and right situation in this field is unemployment, that is to say the lack of work for those who are capable of it. It can be a question of general unemployment or of unemployment in certain sectors of work. The role of the agents included under the title of indirect employer is to act against unemployment, which in all cases is an evil, and which, when it reaches a certain level, can become a real social disaster. It is particularly painful when it especially affects young people, who after appropriate cultural, technical and professional preparation fail to find work, and see their sincere wish to work and their readiness to take on their own responsibility for the economic and social development of the community sadly frustrated. The obligation to provide unemployment benefits, that is to say, the duty to make suitable grants indispensable for the subsistence of unemployed workers and their families, is a duty springing from the fundamental principle of the moral order in this sphere, namely the principle of the common use of goods or, to put it in another and still simpler way, the right to life and subsistence.

In order to meet the danger of unemployment and to ensure employment for all, the agents defined here as "indirect employer" must make provision for overall planning with regard to the different kinds of work by which not only the economic life but also the cultural life of a given society is shaped; they must also give attention to organizing that work in a correct and rational way. In the final analysis this overall concern weighs on the shoulders of the State, but it cannot mean onesided centralization by the public authorities. Instead, what is in question is a just and rational coordination, within the framework of which the initiative of individuals, free groups and local work centres and complexes must be safeguarded, keeping in mind what has been said above with regard to the subject character of human labour.

The fact of the mutual dependence of societies and States and the need to collaborate in various areas mean that, while preserving the sovereign rights of each society and State in the field of planning and organizing labour in its own society, action in this important area must also be taken in the dimension of international collaboration by means of the necessary treaties and agreements. Here too the criterion for these pacts and agreements must more and more be the criterion of human work considered as a fundamental right of all human beings,

work which gives similar rights to all those who work, in such a way that the living standard of the workers in the different societies will less and less show those disturbing differences which are unjust and are apt to provoke even violent reactions. The International Organizations have an enormous part to play in this area. They must let themselves be guided by an exact diagnosis of the complex situations and of the influence exercised by natural, historical, civil and other such circumstances. They must also be more highly operative with regard to plans for action jointly decided on, that is to say, they must be more effective in carrying them out.

In this direction it is possible to actuate a plan for universal and proportionate progress by all, in accordance with the guidelines of Paul VI's Encyclical Populorum Progressio. It must be stressed that the constitutive element in this progress and also the most adequate way to verify it in a spirit of justice and peace, which the Church proclaims and for which she does not cease to pray to the Father of all individuals and of all peoples, is the continual reappraisal of man's work, both in the aspect of its objective finality and in the aspect of the dignity of the subject of all work, that is to say, man. The progress in question must be made through man and for man and it must produce its fruit in man. A test of this progress will be the increasingly mature recognition of the purpose of work and increasingly universal respect for the rights inherent in work in conformity with the dignity of man, the subject of work.

Rational planning and the proper organization of human labour in keeping with individual societies and States should also facilitate the discovery of the right proportions between the different kinds of employment: work on the land, in industry, in the various services, white-collar work and scientific or artistic work, in accordance with the capacities of individuals and for the common good of each society and of the whole of mankind. The organization of human life in accordance with the many possibilities of labour should be matched by a suitable system of instruction and education, aimed first of all at developing mature human beings, but also aimed at preparing people specifically for assuming to good advantage an appropriate place in the vast and socially differentiated world of work.

As we view the whole human family throughout the world, we cannot fail to be struck by a disconcerting fact of immense proportions: the fact that, while conspicuous natural resources remain unused, there are huge numbers of people who are unemployed or under-employed and countless multitudes of people suffering from hunger. This is a fact that without any doubt demonstrates that both within the individual political communities and in their relationships on the continental and world level there is something wrong with the organization of work and employment, precisely at the most critical and socially most important points.

19. Wages and other social benefits:

After outlining the important role that concern for providing employment for all workers plays in safeguarding respect for the inalienable right of man in view of his work, it is worthwhile taking a closer look at these rights, which in the final analysis are formed within the relationship between worker and direct employer. All that has been said above on the subject of the indirect employer is aimed at defining these relationships more exactly, by showing the many forms of conditioning within which these relationships are indirectly formed. This consideration does not however have a purely descriptive purpose; it is not a brief treatise on economics or politics. It is a matter of highlighting the deontological and moral aspect. The key problem of social ethics in this case is that of just remuneration for work done. In the context of the present there is no more important way for securing a just relationship between the worker and the employer than that constituted by remuneration for work. Whether the work is done in a system of private ownership of the means of production or in a system where ownership has undergone a certain "socialization", the relationship between the employer (first and foremost the direct employer) and the worker is resolved on the basis of the wage, that is through just remuneration for work done.

It should also be noted that the justice of a socioeconomic system and, in each case, its just functioning, deserve in the final analysis to be evaluated by the way in which man's work is properly remunerated in the system. Here we return once more to the first principle of the whole ethical and social order, namely, the principle of the common use of goods. In every system, regardless of the fundamental relationships within it between capital and labour, wages, that is to say remuneration for work, are still a practical means whereby the vast majority of people can have access to those goods which are intended for common use: both the goods of nature and manufactured goods. Both kinds of goods become accessible to the worker through the wage which he receives as remuneration for his work. Hence, in every case, a just wage is the concrete means of verifying the justice of the whole socioeconomic system and, in any case, of checking that it is functioning justly. It is not the only means of checking, but it is a particularly important one and, in a sense, the key means.

This means of checking concerns above all the family. Just remuneration for the work of an adult who is responsible for a family means remuneration which will suffice for establishing and properly maintaining a family and for providing security for its future. Such remuneration can be given either through what is called a family wage—that is, a single salary given to the head of the family for his work, sufficient for the needs of the family without the other spouse having to take up gainful employment outside the home—or through other social measures such as family allowances or grants to mothers devoting themselves exclusively to their families. These grants should correspond to the actual needs, that is, to the number of dependents for as long as they are not in a position to assume proper responsibility for their own lives.

Experience confirms that there must be a social re-evaluation of the mother's role, of the toil connected with it, and of the need that children have for care, love and affection in order that they may develop into responsible, morally and religiously mature and psychologically stable persons. It will redound to the credit of society to make it possible for a mother—without inhibiting her freedom, without psychological or practical discrimination, and without penalizing her as compared with other women—to devote herself to taking care of her children and educating them in accordance with their needs, which vary with age. Having to abandon these tasks in order to take up paid work outside the home is wrong from the point of view of the good of society and of the family when it contradicts or hinders these primary goals of the mission of a mother.[26]

In this context it should be emphasized that, on a more general level, the whole labour process must be organized and adapted in such a way as to respect the requirements of the person and his or her forms of life, above all life in the home, taking into account the individual's age and sex. It is a fact that in many societies women work in nearly every sector of life. But it is fitting that they should be able to fulfill their tasks in accordance with their own nature, without being discriminated against and without being excluded from jobs for which they are capable, but also without lack of respect for their family aspirations and for their specific role in contributing, together with men, to the good of society. The true advancement of women requires that labour should be structured in such a way that women do not have to pay for their advancement by abandoning what is specific to them and at the expense of the family, in which women as mothers have an irreplaceable role.

Besides wages, various social benefits intended to ensure the life and health of workers and their families play a part here. The expenses involved in health care, especially in the case of accidents at work, demand that medical assistance should be easily available for workers, and that as far as possible it should be cheap or even free of charge. Another sector regarding benefits is the sector associated with the right to rest. In the first place this involves a regular weekly rest comprising at least Sunday, and also a longer period of rest, namely the holiday or vacation taken once a year or possibly in several shorter periods during the year. A third sector concerns the right to a pension and to insurance for old age and in case of accidents at work. Within the sphere of these principal rights, there develops a whole system of particular rights which, together with remuneration for work, determine the correct relationship between worker and employer. Among these rights there should never be overlooked the right to a working environment and to manufacturing processes which are not harmful to the workers' physical health or to their moral integrity.

20. Importance of unions:

All these rights, together with the need for the workers themselves to secure them, give rise to yet another right: the right of association, that is to form associations for the purpose of defending the vital interests of those employed in the various professions. These associations are called labour or trade unions. The vital interests of the workers are to a certain extent common for all of them; at the same time however each type of work, each profession, has its own specific character which should find a particular reflection in these organizations.

In a sense, unions go back to the mediaeval guilds of artisans, insofar as those organizations brought together people belonging to the same craft and thus on the basis of their work. However, unions differ from the guilds on this essential point: the modern unions grew up from the struggle of the workers—workers in general but especially the industrial workers—to protect their just rights vis-a-vis the entrepreneurs and the owners of the means of production. Their task is to defend the existential interests of workers in all sectors in which their rights are concerned. The experience of history teaches that organizations of this type are an indispensable element of social life, especially in modern industrialized societies. Obviously, this does not mean that only industrial workers can set up associations of this type. Representatives of every profession can use them to ensure their own rights. Thus there are unions of agricultural workers and of white-collar workers; there are also employers' associations. All, as has been said above, are further divided into groups or subgroups according to particular professional specializations.

Catholic social teaching does not hold that unions are no more than a reflection of the "class" structure of society and that they are a mouthpiece for a class struggle which inevitably governs social life. They are indeed a mouthpiece for the struggle for social justice, for the just rights of working people in accordance with their in-

dividual professions. However, this struggle should be seen as a normal endeavour "for" the just good: in the present case, for the good which corresponds to the needs and merits of working people associated by profession; but it is not a struggle "against" others. Even if in controversial questions the struggle takes on a character of opposition towards others, this is because it aims at the good of social justice, not for the sake of "struggle" or in order to eliminate the opponent. It is characteristic of work that it first and foremost unites people. In this consists its social power: the power to build a community. In the final analysis, both those who work and those who manage the means of production or who own them must in some way be united in this community. In the light of this fundamental structure of all work—in the light of the fact that, in the final analysis, labour and capital are indispensable components of the process of production in any social system—it is clear that, even if it is because of their work needs that people unite to secure their rights, their union remains a constructive factor of social order and solidarity, and it is impossible to ignore it.

Just efforts to secure the rights of workers who are united by the same profession should always take into account the limitations imposed by the general economic situation of the country. Union demands cannot be turned into a kind of group or class "egoism", although they can and should also aim at correcting—with a view to the common good of the whole society—everything defective in the system of ownership of the means of production or in the way these are managed. Social and socioeconomic life is certainly like a system of "connected vessels", and every social activity directed towards safeguarding the rights of particular groups should adapt itself to this system.

In this sense, union activity undoubtedly enters the field of politics, understood as prudent concern for the common good. However, the role of unions is not to "play politics" in the sense that the expression is commonly understood today. Unions do not have the character of political parties struggling for power; they should not be subjected to the decision of political parties or have too close links with them. In fact, in such a situation they easily lost contact with their specific role, which is to secure the just rights of workers within the framework of the common good of the whole of society; instead they become an instrument used for other purposes.

Speaking of the protection of the just rights of workers according to their individual professions, we must of course always keep in mind that which determines the subjective character of work in each profession, but at the same time, indeed before all else, we must keep in mind that which conditions the specific dignity of the subject of the work. The activity of union organizations opens up many possibilities in this respect, including their efforts to instruct and educate the workers and to foster their self-education. Praise is due to the work of the schools, what are known as workers' or people's universities and the training programmes and courses which have developed and are still developing this field of activity. It is always to be hoped that, thanks to the work of their unions, workers will not only have more, but above all be more: in other words, that they will realize their humanity more fully in every respect.

One method used by unions in pursuing the just rights of their members is the strike or work stoppage, as a kind of ultimatum to the competent bodies, especially the employers. This method is recognized by Catholic social teaching as legitimate in the proper conditions and within just limits. In this connection workers should be assured the right to strike, without being subjected to personal penal sanctions for taking part in a strike. While admitting that it is a legitimate means, we must at the same time emphasize that a strike remains, in a sense, an extreme means. It must not be abused; it must not be abused especially for "political" purposes. Furthermore it must never be forgotten that, when essential community services are in question, they must in every case be ensured, if necessary by means of appropriate legislation. Abuse of the strike weapon can lead to the paralysis of the whole of socioeconomic life, and this is contrary to the requirements of the common good of society, which also corresponds to the properly understood nature of work itself.

21. Dignity of agricultural work:

All that has been said thus far on the dignity of work, on the objective and subjective dimension of human work, can be directly applied to the question of agricultural work and to the situation of the person who cultivates the earth by toiling in the fields. This is a vast sector of work on our planet, a sector not restricted to one or other continent, nor limited to the societies which have already attained a certain level of development and progress. The world of agriculture, which provides society with the goods it needs for its daily sustenance, is of fundamental importance. The conditions of the rural population and of agricultural work vary from place to place, and the social position of agricultural workers differs from country to country. This depends not only on the level of development of agricultural technology but also, and perhaps more, on the recognition of the just rights of agricultural workers and, finally, on the level of awareness regarding the social ethics of work.

Agricultural work involves considerable difficulties, including unremitting and sometimes exhausting physical effort and a lack of appreciation on the part of society, to the point of making agricultural people feel that they are social outcasts and of speeding up the phenomenon of their mass exodus from the countryside to the cities and unfortunately to still more dehumanizing living conditions. Added to this are the lack of adequate professional training and of proper equipment, the spread of a certain individualism, and also objectively unjust situations. In certain developing countries, millions of people are forced to cultivate the land belonging to others and are exploited by the big landowners, without any hope of ever being able to gain possession of even a small piece of land of their own. There is a lack of forms of legal protection for the agricultural workers themselves and for their families in case of old age, sickness or unemployment. Long days of hard physical work are paid miserably. Land which could be cultivated is left abandoned by the owners. Legal titles to possession of a small portion of land that someone has personally cultivated for years are disregarded or left defenceless against the "land hunger" of more powerful individuals or groups. But even in the economically developed countries, where scientific research, technological achievements and State policy have brought agriculture to a very advanced level, the right to work can be infringed when the farm workers are denied the possibility of sharing in decisions concerning their services, or when they are denied the right to free association with a view to their just advancement socially, culturally and economically.

In many situations radical and urgent changes are therefore needed in order to restore to agriculture—and to rural people—their just value as the basis for a healthy economy, within the social community's development as a whole. Thus it is necessary to proclaim and promote the dignity of work, of all work but especially of agricultural work, in which man so eloquently "subdues" the earth he has received as a gift from God and affirms his "dominion" in the visible world.

22. The disabled person and work:

Recently, national communities and international organizations have turned their attention to another question connected with work, one full of implications: the question of disabled people. They too are fully human subjects with corresponding innate, sacred and inviolable rights, and, in spite of the limitations and sufferings affecting their bodies and faculties, they point up more clearly the dignity and greatness of man. Since disabled people are subjects with all their rights, they should be helped to participate in the life of society in all its aspects and at all the levels accessible to their capacities. The disabled person is one of us and participates fully in the same humanity that we possess. It would be radically unworthy of man, and a denial of our common humanity, to admit to the life of the community, and thus admit to work, only those who are fully functional. To do so would be to practice a serious form of discrimination, that of the strong and healthy against the weak and sick. Work in the objective sense should be subordinated, in this circumstance too, to the dignity of man, to the subject of work and not to economic advantage.

The various bodies involved in the world of labour, both the direct and the indirect employer, should therefore by means of effective and appropriate measures foster the right of disabled people to professional training and work, so that they can be given a productive activity suited to them. Many practical problems arise at this point, as well as legal and economic ones; but the community, that is to say, the public authorities, associations and intermediate groups, business enterprises and the disabled themselves should pool their ideas and resources so as to attain this goal that must not be shirked: that disabled people may be offered work according to their capabilities, for this is demanded by their dignity as persons and as subjects of work. Each community will be able to set up suitable structures for finding or creating jobs for such people both in the usual public or private enterprises, by offering them ordinary or suitably adapted jobs, and in what are called "protected" enterprises and surroundings.

Careful attention must be devoted to the physical and psychological working conditions of disabled people—as for all workers—to their just remuneration, to the possibility of their promotion, and to the elimination of various obstacles. Without hiding the fact that this is a complex and difficult task, it is to be hoped that a correct concept of labour in the subjective sense will produce a situation which will make it possible for disabled people to feel that they are not cut off from the working world or dependent upon society, but that they are full-scale subjects of work, useful, respected for their human dignity and called to contribute to the progress and welfare of their families and of the community according to their particular capacities.

23. Work and the emigration question:

Finally, we must say at least a few words on the subject of emigration in search of work. This is an age-old phenomenon which nevertheless continues to be repeated and is still today very widespread as a result of the complexities of modern life. Man has the right to leave his native land for various motives—and also the right to return—in order to seek better conditions of life in

another country. This fact is certainly not without difficulties of various kinds. Above all it generally constitutes a loss for the country which is left behind. It is the departure of a person who is also a member of a great community united by history, tradition and culture; and that person must begin life in the midst of another society united by a different culture and very often by a different language. In this case, it is the loss of a subject of work, whose efforts of mind and body could contribute to the common good of his own country, but these efforts, this contribution, are instead offered to another society which in a sense has less right to them than the person's country of origin.

Nevertheless, even if emigration is in some aspects an evil, in certain circumstances it is, as the phrase goes, a necessary evil. Everything should be done—and certainly much is being done to this end—to prevent this material evil from causing greater moral harm; indeed every possible effort should be made to ensure that it may bring benefit to the emigrant's personal, family and social life, both for the country to which he goes and the country which he leaves. In this area much depends on just legislation, in particular with regard to the rights of workers. It is obvious that the question of just legislation enters into the context of the present considerations, especially from the point of view of these rights.

The most important thing is that the person working away from his native land, whether as a permanent emigrant or as a seasonal worker, should not be placed at a disadvantage in comparison with the other workers in that society in the matter of working rights. Emigration in search of work must in no way become an opportunity for financial or social exploitation. As regards the work relationship, the same criteria should be applied to immigrant workers as to all other workers in the society concerned. The value of work should be measured by the same standard and not according to the difference in nationality, religion or race. For even greater reason the situation of constraint in which the emigrant may find himself should not be exploited. All these circumstances should categorically give way, after special qualifications have of course been taken into consideration, to the fundamental value of work, which is bound up with the dignity of the human person. Once more the fundamental principle must be repeated: the hierarchy of values and the profound meaning of work itself require that capital should be at the service of labour and not labour at the service of capital.

V. ELEMENTS FOR A SPIRITUALITY OF WORK

24. A particular task for the Church:

It is right to devote the last part of these reflections about human work, on the occasion of the ninetieth anniversary of the Encyclical Rerum Novarum, to the spirituality of work in the Christian sense. Since work in its subjective aspect is always a personal action, an actus personae, it follows that the whole person, body and spirit, participates in it, whether it is manual or intellectual work. It is also to the whole person that the word of the living God is directed, the evangelical message of salvation, in which we find many points which concern human work and which throw particular light on it. These points need to be properly assimilated: an inner effort on the part of the human spirit, guided by faith, hope and charity, is needed in order that through these points the work of the individual human being may be given the meaning which it has in the eyes of God and by means of which work enters into the salvation process on a par with the other ordinary yet particularly important components of its texture.

The Church considers it her duty to speak out on work from the viewpoint of its human value and of the moral order to which it belongs, and she sees this as one of her important tasks within the service that she renders to the evangelical message as a whole. At the same time she sees it as her particular duty to form a spirituality of work which will help all people to come closer, through work, to God, the Creator and Redeemer, to participate in his salvific plan for man and the world and to deepen their friendship with Christ in their lives by accepting, through faith, a living participation in his threefold mission as Priest, Prophet and King, as the Second Vatican Council so eloquently teaches.

25. Work as a sharing in the activity of the Creator:

As the Second Vatican Council says, "throughout the course of the centuries, men have laboured to better the circumstances of their lives through a monumental amount of individual and collective effort. To believers, this point is settled: considered in itself, such human activity accords with God's will. For man, created to God's image, received a mandate to subject to himself the earth and all that it contains, and to govern the world with justice and holiness; a mandate to relate himself and the totality of things to him who was to be acknowledged as the Lord and Creator of all. Thus, by the subjection of all things to man, the name of God would be wonderful in all the earth".[27]

The word of God's revelation is profoundly marked by the fundamental truth that man, created in the image of God, shares by his work in the activity of the Creator and that, within the limits of his own human capabilities, man in a sense continues to develop that activity, and perfects it as he advances further and further in the discovery of the resources and values contained in the whole of creation. We find this truth at the very beginning of Sacred Scripture, in the Book of Genesis, where the creation activity itself is presented in the form of "work" done by God during "six days",[28] "resting" on the seventh day.[29] Besides, the last book of Sacred Scripture echoes the same respect for what God has done through his creative "work" when it proclaims: "Great and wonderful are your deeds, O Lord God the Almighty";[30] this is similar to the Book of Genesis, which concludes the description of each day of creation with the statement: "And God saw that it was good".[31]

This description of creation, which we find in the very first chapter of the Book of Genesis, is also in a sense the first "gospel of work". For it shows what the dignity of work consists of: it teaches that man ought to imitate God, his Creator, in working, because man alone has the unique characteristic of likeness to God. Man ought to imitate God both in working and also in resting, since God himself wished to present his own creative activity under the form of work and rest. This activity by God in the world always continues, as the words of Christ attest: "My Father is working still . . ."; [32] he works with creative power by sustaining in existence the world that he called into being from nothing, and he works with salvific power in the hearts of those whom from the beginning he has destined for "rest" [33] in union with himself in his "Father's house".[34] Therefore man's work too not only requires a rest every "seventh day",[35] but also cannot consist in the mere exercise of human strength in external action; it must leave room for man to prepare himself, by becoming more and more what in the will of God he ought to be, for the "rest" that the Lord reserves for his servants and friends.[36]

Awareness that man's work is a participation in God's activity ought to permeate, as the Council teaches, even "the most ordinary everyday activities. For, while providing the substance of life for themselves and their families, men and women are performing their activities in a way which appropriately benefits society. They can justly consider that by their labour they are unfolding the Creator's work, consulting the advantages of their brothers and sisters, and contributing by their personal industry to the realization in history of the divine plan".[37]

This Christian spirituality of work should be a heritage shared by all. Especially in the modern age, the spirituality of work should show the maturity called for by the tensions and restlessness of mind and heart. "Far from thinking that works produced by man's own talent and energy are in opposition to God's power, and that the rational creature exists as a kind of rival to the Creator, Christians are convinced that the triumphs of the human race are a sign of God's greatness and the flowering of his own mysterious design. For the greater man's power becomes, the farther his individual and community responsibility extends. . . . People are not deterred by the Christian message from building up the world, or impelled to neglect the welfare of their fellows. They are, rather, more stringently bound to do these very things".[38]

The knowledge that by means of work man shares in the work of creation constitutes the most profound motive for undertaking it in various sectors: "The faithful, therefore," we read in the Constitution Lumen Gentium, "must learn the deepest meaning and the value of all creation, and its orientation to the praise of God. Even by their secular activity they must assist one another to live holier lives. In this way the world will be permeated by the spirit of Christ and more effectively achieve its purpose in justice, charity and peace . . . Therefore, by their competence in secular fields and by their personal activity, elevated from within by the grace of Christ, let them work vigorously so that by human labour, technical skill, and civil culture created goods may be perfected according to the design of the Creator and the light of his Word".[39]

26. Christ, the man of work:

The truth that by means of work man participates in the activity of God himself, his Creator, was given particular prominence by Jesus Christ—the Jesus at whom many of his first listeners in Nazareth "were astonished, saying, 'Where did this man get all this? What is the wisdom given to him? . . . Is not this the carpenter?' ".[40] For Jesus not only proclaimed but first and foremost fulfilled by his deeds the "gospel", the word of eternal Wisdom, that had been entrusted to him. Therefore this was also "the gospel of work", because he who proclaimed it was himself a man of work, a craftsman like Joseph of Nazareth.[41] And if we do not find in his words a special command to work—but rather on one occasion a prohibition against too much anxiety about work and life [42]—at the same time the eloquence of the life of Christ is unequivocal: he belongs to the "working world", he has appreciation and respect for human work. It can indeed be said that he looks with love upon human work and the different forms that it takes, seeing in each one of these forms a particular facet of man's likeness with God, the Creator and Father. Is it not he who says: "My Father is the vinedresser",[43] and in various ways puts into his teaching the fundamental truth about work which is already expressed in the whole tradition of the Old Testament, beginning with the Book of Genesis?

The books of the Old Testament contain many references to human work and to the individual professions exercised by man: for example, the doctor,[44] the pharmacist,[45] the

Footnotes at end of article.

craftsman or artist,[46] the blacksmith [47]—we could apply these words to today's foundry-workers—the potter,[48] the farmer,[49] the scholar,[50] the sailor,[51] the builder,[52] the musician,[53] the shepherd,[54] and the fisherman.[55] The words of praise for the work of woman are well known.[56] In his parables on the Kingdom of God Jesus Christ constantly refers to human works: that of the shepherd,[57] the farmer,[58] the doctor,[59] the sower,[60] the householder,[61] the servant,[62] the steward,[63] the fisherman,[64] the merchant,[65] the labourer,[66] He also speaks of the various form of women's work.[67] He compares the apostolate to the manual work of harvesters or fishermen.[68] He refers to the work of scholars too.[70]

This teaching of Christ on work, based on the example of his life during his years in Nazareth, finds a particularly lively echo in the teaching of the Apostle Paul: Paul boasts of working at his trade (he was probably a tent-maker),[71] and thanks to that work he was able even as an Apostle to earn his own bread.[72] "With toil and labour we worked night and day, that we might not burden any of you".[73] Hence his instructions, in the form of exhortation and command, on the subject of work: "Now such persons we command and exhort in the Lord Jesus Christ to do their work in quietness and to earn their own living", he writes to the Thessalonians.[74] In fact, noting that some "are living in idleness . . . not doing any work",[75] the Apostle does not hesitate to say in the same context: "If any one will not work, let him not eat".[76] In another passage he encourages his readers: "Whatever your task, work heartly, as serving the Lord and not men, knowing that from the Lord you will receive the inheritance as your reward".[77]

The teachings of the Apostle of the Gentiles obviously have key importance for the morality and spirituality of human work. They are an important complement to the great though discreet gospel of work that we find in the life and parables of Christ, in what Jesus "did and taught".[78]

On the basis of these illuminations emanating from the Source himself, the Church has always proclaimed what we find expressed in modern terms in the teaching of the Second Vatican Council: "Just as human activity proceeds from man, so it is ordered towards man. For when a man works he not only alters things and society, he develops himself as well. He learns much, he cultivates his resources, he goes outside of himself and beyond himself. Rightly understood, this kind of growth is of greater value than any external riches which can be garnered . . . Hence, the norm of human activity is this: that in accord with the divine plan and will, it should harmonize with the genuine good of the human race, and allow people as individuals and as members of society to pursue their total vocation and fulfill it".[79]

Such a vision of the values of human work, or in other words such a spirituality of work, fully explains what we read in the same section of the Council's Pastoral Constitution with regard to the right meaning of progress: "A person is more precious for what he is than for what he has. Similarly, all that people do to obtain greater justice, wider brotherhood, and a more humane ordering of social relationships has greater worth than technical advances. For these advances can supply the material for human progress, but of themselves alone they can never actually bring it about".[80]

This teaching on the question of progress and development—a subject that dominates present-day thought—can be understood only as the fruit of a tested spirituality of human work; and it is only on the basis of such a spirituality that it can be realized and put into practice. This is the teaching, and also the programme, that has its roots in "the gospel of work".

27. Human work in the light of the Cross and the Resurrection of Christ:

There is yet another aspect of human work, an essential dimension of it, that is profoundly imbued with the spirituality based on the Gospel. All work, whether manual or intellectual, is inevitably linked with toil. The Book of Genesis expresses it in a truly penetrating manner: the original blessing of work contained in the very mystery of creation and connected with man's elevation as the image of God is contrasted with the curse that sin brought with it: "Cursed is the ground because of you; in toil you shall eat of it all the days of your life".[81] This toil connected with work marks the way of human life on earth and constitutes an announcement of death: "In the sweat of your face you shall eat bread till you return to the ground, for out of it you were taken".[82] Almost as an echo of these words, the author of one of the Wisdom books says: "Then I considered all that my hands had done and the toil I had spent in doing it".[83] There is no one on earth who could not apply these words to himself.

In a sense, the final word of the Gospel on this matter as on others is found in the Paschal Mystery of Jesus Christ. It is here that we must seek an answer to these problems so important for the spirituality of human work. The Paschal Mystery contains the Cross of Christ and his obedience unto death, which the Apostle contrasts with the disobedience which from the beginning has burdened man's history on earth.[84] It also contains the elevation of Christ, who by means of death on a Cross returns to his disciples in the Resurrection with the power of the Holy Spirit.

Sweat and toil, which work necessarily involves in the present condition of the human race, present the Christian and everyone who is called to follow Christ with the possibility of sharing lovingly in the work that Christ came to do.[85] This work of salvation came about through suffering and death on a Cross. By enduring the toil of work in union with Christ crucified for us, man in a way collaborates with the Son of God for the redemption of humanity. He shows himself a true disciple of Christ by carrying the cross in his turn every day [86] in the activity that he is called upon to perform.

Christ, "undergoing death itself for all of us sinners, taught us by example that we too must shoulder that cross which the world and the flesh inflict upon those who pursue peace and justice"; but also, at the same time, "appointed Lord by his Resurrection and given all authority in heaven and on earth, Christ is now at work in people's hearts through the power of his Spirit. . . . He animates, purifies, and strengthens those noble longings too by which the human family strives to make its life more human and to render the whole earth submissive to this goal".[87]

The Christian finds in human work a small part of the Cross of Christ and accepts it in the same spirit of redemption in which Christ accepted his Cross for us. In work, thanks to the light that penetrates us from the Resurrection of Christ, we always find a glimmer of new life, of the new good, as if it were an announcement of "the new heavens and the new earth" [88] in which man and the world participate precisely through the toil that goes with work. Through toil—and never without it. On the one hand this confirms the indispensability of the Cross in the spirituality of human work; on the other hand the Cross which this toil constitutes reveals a new good springing from work itself, from work understood in depth and in all its aspects and never apart from work.

Is this new good—the fruit of human work—already a small part of that "new earth" where justice dwells? [89] If it is true that the many forms of toil that go with man's work are a small part of the Cross of Christ, what is the relationship of this new good to the Resurrection of Christ? The Council seeks to reply to this question also, drawing light from the very sources of the revealed word: "Therefore, while we are warned that it profits a man nothing if he gains the whole world and loses himself (cf. Lk 9:25), the expectation of a new earth must not weaken but rather stimulate our concern for cultivating this one. For here grows the body of a new human family, a body which even now is able to give some kind of foreshadowing of the new age. Earthly progress must be carefully distinguished from the growth of Christ's kingdom. Nevertheless, to the extent that the former can contribute to the better ordering of human society, it is of vital concern to the Kingdom of God".[90]

In these present reflections devoted to human work we have tried to emphasize everything that seemed essential to it, since it is through man's labour that not only "the fruits of our activity" but also "human dignity, brotherhood and freedom" must increase on earth.[91] Let the Christian who listens to the word of the living God, uniting work with prayer, know the place that his work has not only in earthly progress but also in the development of the Kingdom of God, to which we are all called through the power of the Holy Spirit and through the word of the Gospel.

In concluding these reflections, I gladly impart the Apostolic Blessing to all of you, venerable Brothers and beloved sons and daughters.

I prepared this document for publication on 15 May last, on the ninetieth anniversary of the Encyclical Rerum Novarum, but it is only after my stay in hospital that I have been able to revise it definitively.

Given at Castel Gandolfo, on the fourteenth day of September, the Feast of the Triumph of the Cross, in the year 1981, the third of the Pontificate.

JOANNES PAULUS PP. II.●

## SUPPORT FOR S. 1564, THE U.S. TUNA PROTECTION ACT

Mr. COHEN. Mr. President, I am pleased to join Senator WEICKER in support of S. 1564, the U.S. Tuna Protection Act.

Mr. President, when the Fishery Conservation and Management—the FCMA—was enacted in 1976, it excluded "highly migratory species" of fish from its protection. These species were not included in the act because it was felt at the time that they would be better managed by international cooperation. In the years that have followed the passage of the 200-mile limit bill, the international management of these stocks has failed to work. In fact, during this same period, many nations have unilaterally extended the jurisdiction of their fishery conservation zones to such species as tuna.

I would note that one of the important species of fish that falls within the present exemption for highly migratory species is the Atlantic bluefin tuna. This is an exceptionally valuable fish which is now, for the most part, harvested by foreign nations within our 200-mile limit. The most recent biological data that has been collected on this fish strongly suggests that, for most of its life, it migrates within the fishery conservation zone of the east coast of the United States. By bringing this fish within the protection of the FCMA, as this bill would do, the United States will afford its fishermen a real opportunity to harvest it which may, in turn, lead to the development of a strong domestic processing industry for bluefin tuna.

In my view, S. 1564 is a logical extension of the fishery conservation and management and I urge its prompt consideration and passage.

---

## SOVIET EMIGRATION POLICY

Mr. MATHIAS. Mr. President, the drama of the clash of nations and the conflict of ideologies often diverts attention from the human tragedies played out in obscurity in the shadows of great events. But occasionally, if we peer into the quiet places where people seek refuge, we can witness the painful experience of men and women caught in the trap of tyranny.

So it was when ALAN CRANSTON and I visited a band of "refusniks" in the Soviet Union. Nothing that I could say would add to their own stark description of their plight in a letter to the U.S. Congress and Jewish Organizations in the U.S.A. On behalf of Mr. CRANSTON and for myself, I ask unanimous consent to include a copy of the letter in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

*To the United States Congress and Jewish organizations in the U.S.A.*

It is absolutely evident now that for the last two years there has been a radical switch in the emigration policy of the Soviet Union. The following roundup is a convincing proof of an obvious trend not only to sharply diminish Jewish emigration to Israel; it looks very much as if an attempt or even a decision has been taken to close, to stop emigration altogether.

We see a sharp upturn in the number of refusals. Many hundreds of families were refused on the pretext that there is no justification for emigration. Most widespread has been the motive of so-called "insufficient kinship," a dangerous phenomenon, showing an abrupt change in the tactics of the Soviet authorities. This motive we are inclined to consider as an attempt to stop emigration, as the majority of applicants can easily be refused on this basis without ever hoping to get permission.

Emigration has been dropping drastically, in the last two years. The figures for July and August are indicative. In July it was 600, in August 400. In previous years monthly figures were as much as 1,200 to 1,500.

The waiting period of consideration of applications is unreasonably and deliberately prolonged, and in most cases has been stretched to as much as two years and more. In previous years it usually took two to three months. Things being as they are, the life of the applicants during this unjustified long waiting period is very hard and demoralizing as most applicants leave their job and have no means of a livelihood. Besides, to wait for such a long time in full vagueness of the situation, when the fate of your family is at stake, is very hard psychologically and hence has quite a negative effect on those who are potentially ready to apply.

Such a situation is in direct contravention to the corresponding clause of the Helsinki Final Act.

Other evidence of the tendency to stop emigration is the fact that in most cases, invitational affidavits are not delivered at all, though Jewish families waiting for them are informed by their relatives in Israel that invitations have been sent. They point out the registry number and the date of posting. Many of those who are waiting for invitations have postal receipts, but still cannot receive them from the Soviet International post office. Many families thus have been seeking to receive their invitations for a year and more. Previously it was done very easily without any obstacles. In addition, local OVIR offices throughout the country stopped accepting prolonged invitations. Prolongation is easily available in the Dutch Embassy in Moscow.

Furthermore, those who happen to get an invitational affidavit are very often summoned to different offices—local city hall, KGB, the security office at their place of work—for a special talk in which the authorities try to induce them to change their mind, to drop their intention to emigrate as their chances are very few and they are even promised improvement in their situation here.

Finally, the situation with veteran refuseniks, especially activists. The persecution, punishment, and total suppression of any kind of activity have become much more acute, strong, and tragic. We are now facing many new arrests among refuseniks. There are Kislik, Friedman, and Zubko in Kiev, Paritsker in Kharrov, and Chernobylsky in Moscow. All forms of Jewish life are completely forbidden by now. All seminars on Jewish humanities, mathematics, physics, and religion, and Hebrew studies are strictly forbidden. Their leaders and participants are summoned to the KGB and warned very roughly that if they try to go on leading and participating in seminars, they will immediately be arrested and exiled. Seminar gatherings are dispersed by crude force by the police and those attending are punished. Even the celebration of our Jewish holidays in the suburbs of Moscow are declared Zionist roundups and as such are severely punished.

We want to point out once more that the present situation with Jewish emigration is terribly dangerous and even tragical, and our only hope is immediate help from abroad, namely your and other countries. We ad-

dress an urgent request to you to settle all these problems with the Soviet authorities as quickly as possible in order to prevent attempts to stop emigration completely. We ask you earnestly to settle with the Soviet authorities the immediate release of all Prisoners of Conscience, letting them and their families leave this country for Israel.

The next most urgent problem is the duration of refusal, which by no means should exceed five years. Even five years is more than enough to destroy any human personality. There are now dozens of Jewish families waiting and struggling for exit visas 8, 10, and more years; in the present atmosphere of severe punishment for all forms of achieving permission the fate of such families is simply tragic, and with the current approach of the Soviet authorities they may become permanent refuseniks. If no real help will come soon from the West and your country, in particular, these people face the danger of eternal refusal.

Thanking you in advance,

——— ———.

Mr. MATHIAS. This appeal to the Congress comes to us on the eve of an anniversary year, although hardly a joyful centennial observation. It was in April 1882, that Secretary of State Frelinghuysen first protested to the Czarist government over the treatment of Russian Jewry. Almost 100 years later the conscience of the world is still plagued by this problem. It is an anniversary to remember so that we do not forget the people still deprived of their fundamental human rights.

## HIGH INTEREST RATES MUST COME DOWN FOR ECONOMIC GROWTH TO OCCUR

Mr. SASSER. Mr. President, back in March 1980 when Paul Volcker appeared before the Senate Budget Committee, he and I discussed the subject of interest rates and their effect on the economy. He maintained that high interest rates and his tight money policy would drive down inflation—in his own words—"* * * and I am perfectly confident that as that happens interest rates will come down."

Well, I am afraid that Chairman Volcker's forecasting is on a par with most other economists in this town—it simply has not happened.

We have seen moderation in the rate of inflation but largely because the lid has been kept on food and energy prices over the last few months.

We have just passed a truly historic program of cutting taxing and spending designed to encourage business growth and investment, but the stock market and the bond market are in shambles. Key sectors of our economy—automobiles, housing, farming, and small business—are facing economic disaster.

And not only that. The Federal Reserve Board's tight money policy is robbing the people of the United States. It is robbing the people of the right to own their own homes—to have a decent car—to operate a profitable business—to run a productive farm.

It is striking at the heart of the American economy with the horrendous interest rates that a tight money policy insures.

The only booming trend in the economy now is business failure.

In short, high interest rate and tight money policies have not worked. They are a major obstacle to our renewed economic growth.

And I believe that high interest rate policies are flawed in three fundamental respects.

First, they have damaged key sectors of the economy. Housing production is reaching its lowest level in about two decades. Average mortgage interest rates are approaching 18 percent, and perhaps less than 5 percent of the American homebuying public can afford to buy a home. And my friends at the National Homebuilders have told me that one-third of the Nation's homebuilders have simply left the field.

Automobile sales stood at a level of some 8 million units in the second quarter of 1981 while they were 11.5 million units in the first quarter of 1979, and some 2,600 automobile dealers have left business permanently.

Farm interest rates have skyrocketed, farm debt is at an all-time high, and interest rate costs account for about 10 percent of farm production costs in 1980 alone.

For these sectors of the economy, high interest rates have been a death blow.

Second, high interest rates and tight money have seriously undermined American business confidence. On September 13, 1981 Dun and Bradstreet reported that through the week of September 3, business failures stood at more than 11,000, up 42 percent from a year earlier. They expect that by year's end as many as 13,000 businesses will close their doors, bringing us the highest business failure rate since 1965.

The stock market has slipped drastically, and economic activity has all but ceased on the bond market, and though the demand for business credit remains strong, little of our Nation's capital is being put into long-term investment.

In short, the Federal Reserve Board's high interest rates are not promoting the economic growth this country so badly needs. The Fed's interest rate policies have received a vote of no confidence from American business.

Finally, high interest rates and tight money policies will make it impossible for us to balance the budget by 1984.

Recently, the Congressional Budget Office reported that they expect interest rate outlays to be $40 billion more than administration projections due to the administration's own unrealistic projections of interest rates through 1984.

And we know from other CBO economic projections that if GNP growth falters because of high interest rates by just 1 point below administration projections we will have about $38 billion less in Federal revenue between now and 1984.

Adding the two together we face a situation where the cumulative budget deficits will be increased by $78 billion between now and 1984.

When I see that, I find it little wonder that we are going to have a hard time in balancing the budget by 1984 unless and until interest rates come down.

In conclusion, high interest rate policies are causing serious damage to our economy. We simply can not have an economic policy which seeks to bolster American business and consumers by cutting spending and taxes while we have a monetary policy which holds down economic growth by tight money. American business stands ready to rebuild our economy and make it grow again. American consumers stand ready to buy in a stronger economy.

But that will not occur unless and until the Federal Reserve Board turns away from its present policies of high interest rates and tight money.

## SOCIAL SECURITY COST-OF-LIVING INCREASES SHOULD NOT BE DELAYED

Mr. SASSER. Mr. President, yesterday I introduced a resolution (S. Con. Res. 34) indicating the unequivocal opposition of the Congress to any delay in regularly scheduled cost-of-living increases in social security benefits.

Just a few short weeks ago, I never thought that such an action would be necessary. But the administration is persisting in its attempts to reduce social security benefits in one form or another.

For the second time this year, the administration has contravened its pledge not to reduce social security benefits.

First, there was the wholesale, 13-point assault on the system. Justified by stacked figures that echoed gloom and doom, the administration wanted to lop off billions and billions over a matter of a few years. In so doing, they would have punished millions of Americans who have a social contract with the U.S. Government named social security.

Only a solid chorus of opposition from the American people and from the Congress stopped this assault. I was among those who believed that caution and commonsense would prevail, that we would work in harmony to find a just and equitable long-term solution to the obvious problems that confront social security.

But now the administration is recommending that the regularly scheduled increase in social security cost-of-living benefits should be delayed. It is difficult to describe just how harsh and unthinking such a delay in benefits would be for those whose sole or primary income is from their social security checks.

In 1982, the administration's cost-of-living delay proposals will cost social security beneficiaries some $3.3 billion. Most beneficiaries will lose $100 in benefits while others who have worked hard and not retired until 65 may lose up to $345 in benefits just in 1982 alone.

But if we adopt this proposal and renege on giving social security beneficiaries their cost of living what will be next? What other benefits will we cut?

Public confidence in the social security system is at stake. There are other ways to keep the social security system solvent without delaying cost-of-living increases.

So I urge my colleagues to join me as cosponsors of Senate Concurrent Resolution 34 and send a message to the administration not to proceed with their proposal to delay cost-of-living increases.

## THE ECONOMIC MESS

Mr. PELL. Mr. President, this Congress, in its first 8 months of work approved with only minor changes the basic elements of the administration's dramatic economic programs. The Congress enacted the largest cut in Federal Government spending in history, the largest tax reduction in our history, and the largest peacetime increase in military spending in our history

Now, even before the full impact of these massive changes in Federal Government policy have been felt by American families and business, we face the prospect of demands by the administration for additional deep cuts in Federal Government spending. We also are told that the administration is considering changes in the size of the previous increases in military spending.

We are also informed that the administration may seek new and additional powers permitting the President of the United States to disregard the spending programs that are approved by the Congress and withhold the spending of up to 10 percent of the funds the Congress has approved for any program.

Before we are rushed headlong down this economic path, I suggest that the Congress pause and consider carefully where that path is leading.

In my view, the administration's program, if pursued to its ultimate end would lead to the abdication by our Government of its basic responsibilities to the American people for the economic and social health of our Nation.

It would mean an inevitable retreat from the commitment Americans have made to each other through their Government to give a helping hand to those who are less fortunate—to help the young get an education, to help the handicapped reach their full potential, to help the unemployed through the agony of workless months, to assure medical care for the sick, and a decent standard of living for the elderly and retired.

Those commitments of the heart are a source of pride to all Americans. And the fulfillment of those commitments to the less fortunate are the mark of a moral and compassionate civilization.

In modern societies throughout the world, the fulfillment of those commitments is an accepted responsibility of government. But the administration's program, put forward as a formula for revitalizing the American economy, requires as its price a retreat and a withdrawal from many of these basic responbilities and commitments.

In addition, further budget cuts will postpone public investments that are essential to our future economy—Government investments in highways, bridges, water supplies, and new energy sources, to name only a few.

Let us consider the scope of the actions we have already taken:

With the adoption of the Omnibus Reconciliation Act, the Congress has provided for Federal spending cuts totaling $145 billion over the next 3 years—with virtually all of those reductions imposed on nondefense spending. For the coming fiscal year, fiscal year 1982, the cut in spending for nondefense programs is $35 billion.

The Congress then approved the Economic Recovery Tax Act of 1981, providing for $750 billion in tax cuts over the next 5 years, with $37 billion of the reduction on 1982.

And, in addition, in the first concurrent budget resolution for fiscal year 1982, the Congress projected a mammoth multiyear increase in military spending with an increase of $27 billion in 1982 alone.

The administration, despite criticism and skepticism on the part of a broad range of economists, insisted that his program would revitalize the American economy, and lead to sharply reduced Federal Government deficits with a balanced budget promised for 1984. The administration promised rapid economic growth, a sharp drop on the inflation rate, and lower interest rates.

The administration now admits that economic growth will not be as fast as it thought, and that interest rates are going to stay too high too long.

The Congressional Budget Office on September 10 announced its discouraging forecast of the Federal budget deficits under the administration's program. Instead of a 1982 deficit of $27 billion as estimated by President Carter, or $42 billion as estimated by President Reagan, there would be a deficit of $60 to $70 billion.

For 1983, the deficit has grown from a projected $23 billion deficit to $45 to $64 billion, and for 1984, instead of a balanced budget a deficit of $35 to $65 billion is foreseen.

These projections, if accurate, indicate basic and troubling miscalculations in the administration's economic program.

Equally troubling to me, however, is the administration's response to the indications that its program is not working. The response of the administration is to propose more of the same medicine—more and deeper budget cuts—$10 to $15 billion more in cuts for the fiscal year starting in just a few weeks, and then $75 billion more in budget cuts during the following 2 years.

I applaud the administration's recognition that its program as presented will not balance the budget. I applaud also the administration's apparent willingness to make at least some modest cuts in the huge increase projected for military spending.

But I will oppose proposals to cut even more deeply into such Federal Government programs as education, health, housing, low-income energy assistance, and unemployment compensation. These are programs that embrace basic commitments and responsibilities of government. They are also programs that suffered deep budget cuts already. The Congress earlier this year went through each and every one of these programs with a fine-toothed comb, eliminating or reducing benefits and payments.

Congress has made decisions on each of these programs after careful and painful consideration and debate. To seek additional cuts in these same programs a few scant months after Congress has acted would constitute a breach of faith with the Congress and with the American people.

And reductions in other programs would constitute a breach in our economic safety net, in the floor of economic security upon which the citizens of any modern, compassionate nation should be able to rely.

The outlook for these nonmilitary programs in future years is grim. With additional budget cuts of $35 to $40 billion proposed for fiscal years 1983 and 1984, there appears to be little alternative but decimation of most nonmilitary programs if the administration continues on its present course. There is just no alternative unless the administration intends to seek cuts in social security or to significantly cut its proposed buildup of military forces.

In 1982 for example, of total Government spending of about $700 billion, $225 billion will go to defense, $250 billion for social security, and retirement programs, about $100 billion for interest on the Federal debt and about $25 billion for veterans benefits, leaving just $100 billion for all other Government programs.

Budget cuts totaling $75 billion in those programs obviously will require the total elimination of good, effective programs that are essential if Government is to fulfill its basic responsibility.

There are only three courses we can follow to get our economic ship of state on a seaworthy course, and each of these courses is unpleasant. We can reduce the military spending increases, we can defer the tax reduction, or we can reduce our social and human services even further. Frankly I would prefer a combination of the first and second to the third, disagreeable and unpleasant as those courses may be.

Regrettably, there are some in the administration who believe that nearly all Government activity is bad. In their view, Government, except for its military defense function, simply is a burden on our economic system and on the average American.

I disagree with that view. Government, properly conceived and administered, makes our free economic system possible. Government programs properly conceived and administered, are not a burden depressing the economy, but support the private economy and provide services without which the economy could not prosper.

Our economy cannot grow and thrive without adequate transportation facilities, water supplies, and sewage and waste treatment facilities. In addition, our economy cannot grow and prosper without an educated, well-trained and healthy population. Government has a basic, proper, and essential role to fulfill in assuring that these basic elements of growth and prosperity are available.

The slashing or eliminating of Government programs in these areas will undermine instead of strengthen our national economy.

Administration spokesmen have said that further budget cuts are necessary to prove to the financial markets in New

York that the administration is indeed serious about balancing the budget and combatting inflation. New budget cuts are necessary, we are told, to convince the banks that they can lower the extraordinarily high interest rates that are undermining efforts to restore economic growth.

I do not believe that the way to reduce interest rates is by cutting financial assistance to college students, or by slashing programs that permit the poor and elderly to heat their homes. But that is exactly what the administration is said to be considering.

It is strange, indeed that this administration should now be complaining about high interest rates. High interest rates are a basic and integral part of the administration's program. The administration has said from the outset that tight restrictions on growth of the money supply would be necessary as a part of the program to combat inflation. Tight money means high interest rates. For this administration now to complain about high interest rates is much like a proud, strutting peacock who complained that his tail was too heavy.

In February, after the administration presented its program to the Congress, I suggested several ways in which the program could and should be improved. I suggested that the budget cuts in domestic programs were too deep, the increases in defense spending were too large, and the proposed tax cut was too large, potentially inflationary and would lead to continued budget deficits.

Because of these concerns I voted against the budget resolution and the Reconciliation Act which slashed spending and projected huge military spending increases. I voted with reluctance for the tax reduction bill and said at the time, that it provided tax reductions that were too large, and too heavily weighted in favor of the well-off.

I voted for the substitute tax proposal, offered by Senator HOLLINGS, that would have given a smaller tax reduction, but assured a balanced budget, and given our Government the revenue it needs to fulfill its basic responsibilities to the American people.

With greater moderation, as I recommended in February, I believe the administration's program could succeed. Moderate budget cuts combined with moderate tax cuts and a moderate increase in defense spending would preserve the basic responsibilities and commitments of government, encourage solid economic growth, reduce inflation and move steadily toward a balanced budget.

The excesses in the administration's program are the cause of the program's current problems. The administration apparently now recognizes this as true in the case of military spending. But to offset the excessive tax cut, the administration intends to seek even deeper and more excessive budget reductions. If the administration continues down that path, the result, as I have noted will be the destruction of Government programs that are essential to the economy and the well-being of the American people. I intend to oppose such proposals for excessive reductions in essential Federal Government programs.

Enough is enough.

---

## THE NEUTRON BOMB

Mr. WARNER. Mr. President, the issues surrounding the U.S. involvement in the "neutron bomb" are extremely complex, especially for those who want to be informed, but cannot devote the extensive time and effort to keep abreast of the many varying analyses.

Today in the Washington Post, an experienced journalist, using clear and understandable facts and analogies, sets forth his perspective. This work is a valuable contribution done with objectivity and absence of emotion that is required.

This debate will—and should—embrace diplomatic, military, and arms control considerations.

However, conscientious Americans who should involve themselves in this vital decision, must answer these questions: Does this new weapons system add to our ability to deter aggression, and, without it or an equivalent substitute, how much longer can we as a nation send beyond the safety of our shores hundreds of thousands of servicemen—and an increasing number of women—to duty stations in Europe, not providing them with adequate weapons to defend themselves individually, much less win the battles to preserve the peace for ourselves? Study Philip Geyelin's analysis with care as we proceed to reach a decision.

I ask unanimous consent that the article entitled "A Bum Rap on the 'Neutron Bomb'" by Philip Geyelin, as it appeared in the Washington Post on September 18, 1981, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Sept. 18, 1981]

### A BUM RAP ON THE "NEUTRON BOMB"

(By Philip Geyelin)

Make this simple test: ask almost anybody at random to describe a "neutron bomb."

The answer you get will almost certainly be that it's the one that "kills people without damaging property."

And why not? That was the definition used on NBC's "Today Show" the other morning in a news report on how the Reagan administration decision to produce and stockpile "neutron bombs" in the United States had been confounding Secretary of State Alexander Haig's fence-mending mission to West Germany this week.

It's been the popular shorthand, in fact, since existence of the "neutron bomb" was brought to public attention in a series of articles by Washington Post reporter Walter Pincus in early June 1977. The first accounts were straightforward enough: the United States was about to begin construction of "its first nuclear battlefield weapon specifically designed to kill people through the release of neutrons rather than to destroy military installations through heat and blast."

But given the apparent secrecy and the emotions stirred by nuclear weapons of any sort, nobody should have been surprised by the awful image this conjured up of some uniquely inhumane and fiendishly clever device designed to kill "people" by making them terminally ill—while preserving property values. It was instant raw meat for pacifists and—satirists.

It also made big trouble for the Carter administration in its efforts to work out larger problems bearing on the deployment of nuclear weapons in Europe. And now it is making big trouble for the Reagan crowd as well.

So it is worth explaining how the "neutron bomb," which is quite grisly enough, still managed (as these things go) to get a bum rap.

Consider first, that "neutron bombs" are essentially upgraded shells and warheads for 8-inch howitzers and Lance missiles already in Europe. The upgrading is in the "enhancement" of an element—radiation—that is a product of any nuclear explosive (including the 20-year-old warheads the "neutron" warheads would replace).

But "neutron bombs" produce only fraction of the other elements in the American warheads already deployed in Europe: heat, blast and fallout, all of it widespread. And while the "enhanced" radiation effect is more concentrated, it is also confined to a much smaller space.

"Enhanced" radiation, in short, is much more likely to be limited largely to a battlefield and to the target for which it is specifically designed: the crews of tanks tightly bunched in overwhelming numbers for a lightning-quick punch through Allied defenses. It is the ideal equalizer in the eyes of American defense planners confronted by an alarming four-to-one Warsaw Pact advantage over NATO forces in tanks, and a comfortable numerical edge in infantry.

To the Carter administration, the logic was inescapable. Early in 1977 it was going quietly ahead, nailing down the acquiescence of allied authorities in the deployment of neutron warheads, paying no mind to public sensitivities.

"Without the Pincus articles, they would have been deployed and nobody would have noticed," says Harold Brown, defense secretary at the time. Even in the face of the resulting public uproar in Europe and at home, Jimmy Carter tried to muddle through without any real effort to make his case. Brown now freely admits "we have only ourselves to blame" for letting the misperceptions set in.

And so the misperceptions linger on and the Reagan administration continues in its own way to duck the deployment issue. It's a close question as to how much comfort the Europeans will take from the Reagan decision to stockpile the enhanced radiation shells and warheads in the United States when it is accompanied by a claim that deployment to Europe would take only "several hours." That's not much time for consultation in a crunch.

But the Reagan team, at least, is focusing on the real issue, which is whether the very qualities that make the "neutron bomb" less of a threat to population centers wouldn't make its use more acceptable. Would lowering the nuclear "threshold" open the way more easily to escalating nuclear war?

On this score—assuming the Europeans are unwilling to do more to redress the current imbalance in conventional forces—there is a lot to be said for Defense Secretary Caspar Weinberger's argument:

"If you have a weapon that matches the Soviet capability expressed in terms of an enormous preponderance of tanks and infantry . . . then I think you've added to the deterrence." By this reasoning, the Soviets will be less likely to push their luck to begin with—and the nuclear "threshold" will, in effect, have been raised.

## GERALD R. FORD PRESIDENTIAL MUSEUM

Mr. BAKER. Mr. President, I take this jet-lag-filled moment to remark on the gracious and fitting tribute which was accorded President Gerald R. Ford today at the ceremonies commemorating the Gerald Ford Presidential Museum.

I have just returned from the dedication; it was a ceremony filled with moving tributes and recollections of our 38th President and the distinguished leadership which was emblematic throughout his over 25 years of public service.

President and Mrs. Reagan joined in the tribute, along with Canadian Prime Minister Trudeau, Speaker O'NEILL, Valery Giscard d'Estaing, and Mexico President Lopez Portillo. I am sure that my colleagues in this Chamber join in congratulating President Ford and his family on this memorable occasion.

Mr. President, I ask unanimous consent that the remarks given by President Reagan at the dedication be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

REMARKS BY THE PRESIDENT AT THE DEDICATION OF THE GERALD R. FORD PRESIDENTIAL MUSEUM

Millions of Americans will follow us to this place. Like us, they will find history here; they will relive—in their own minds and through their children's eyes—dramatic and critically important moments in our Nation's life. Here they will reflect on the achievements of the 38th President of the United States—they will dwell on what Gerald Ford brought to this Nation—and what he gave to his country and his people.

Some of those who come here will bring, just as many of us do today, personal memories.

I have my own. I could not help but recall as we prepared for this trip, that the first time we encountered each other was here in Michigan. Well, it wasn't exactly an encounter and we had no awareness of each other. I was a young sports announcer for Station WHO of Des Moines, Iowa. I was broadcasting an Iowa-Michigan game. The center on that Michigan team was a fellow named Jerry Ford. And, candor and a decent regard for history force me to admit: that was about 47 years ago—and Michigan won.

I have some other unique memories, one in particular is more recent but serves to highlight our mutual interest in sports and politics. In 1976, we were engaged in another kind of game—you won that one, too. But you observed one day that we had something in common. You said, "We both played football. I played for Michigan. He played for Warner Brothers." Well let me add that playing the "Gipper" did get more attention than my 3 years in the line for Eureka College. I was a guard—right guard that is.

Mr. President, other less humorous similarities between us have occurred recently. This came home to me when I ran across this description of the American economy:

"The worst inflation in the country's peacetime history, the highest interest rates in a century, the consequent severe slump in housing, sinking and utterly demoralized securities markets, a stagnant economy with large-scale unemployment in prospect, and a worsening international trade and payments position."

That description comes from the *New York Times* and—I thought you would like to know—the date is summer 1974. Gerald Ford had just become President of the United States.

During his first few months in office, Gerald Ford made the battle against inflation, growing unemployment and a stagnant economy his first priority.

He did not hesitate to point to the causes of this economic crisis. He noted that in a 10-year period Federal spending had increased from over $100 billion to over $300 billion. In a 15-year period direct and indirect Federal payments to individuals had gone from 24 percent of the Federal budget to 46 percent while spending for defense fell from 49 percent of the budget to 26 percent.

President Ford asked his countrymen to choose:

"To put it simply," he said, "we must decide whether we shall continue in the direction of recent years—the path toward bigger government, higher taxes and higher inflation—or whether we shall now take a new direction, bringing to a halt the momentous growth of government, restoring our prosperity and allowing each of you a greater voice in your own future."

As President, Gerald Ford made his choice—and when he left office the economy was again moving in the right direction with inflation shrunk to a yearly rate of 4.8 percent. And his decision to carefully rebuild America's defense and his willingness to protect American interests and lives abroad began to reestablish our international prestige. He showed the way—and he showed that it can be done.

These are the facts, the objective criteria by which the success of the Ford Presidency can be judged. Yet the legacy left his countrymen by Gerald Ford is something deeper, something more profound.

In 1787, shortly after the Constitutional Convention concluded its work, Benjamin Franklin was asked what had been accomplished.

We have given you a Republic, he replied, if you can keep it.

For two centuries this has been the challenge before all Americans—a challenge that has always been met but not without uncertainty, moments of doubt and danger. During the first transition of Federal power from one party to the other in 1800, fierce acrimony, vows of retribution and even talk of secession filled the Nation's Capital. And in 1861, another great internal crisis shook our Nation—and this time the dissolution of the union was not only threatened; it was—for a time—a reality.

In both cases, the steadiness, the fortitude, the personal ease and quiet confidence of our Presidents saw us through.

On August 9, 1974, when the Nation was experiencing another traumatic test of its institutions, Gerald Ford took the oath of office in the East Room of the White House and spoke of the "extraordinary circumstances never before experienced by Americans."

He spoke of a time of "trouble" and "hurt" and he told us "our long national nightmare is over."

Gerald Ford woke us from that nightmare—there was no more dramatic reminder of this than President Carter's words at his own inaugural—words that instantly drew from his listeners a vigorous and warm reaction:

"For myself and for our nation," President Carter said, "I want to thank my predecessor for all he has done to heal our land."

Gerald Ford healed America because he so thoroughly understood America. His was and is an unquestioning belief in the soundness of our way of governing and in the resiliency of our people.

When he was about to step down from the Presidency, he took note of our remarkable tradition of peaceful transitions of power. He said:

"There are no soldiers marching in the streets except in the inaugural parade; no public demonstrations except for some of the dancers at the inaugural ball; the opposition party doesn't go underground but goes on functioning; and a vigilant press goes right on probing and publishing our faults and follies."

And during our Bicentennial he reminded the American people of the collective wisdom of their ways and the remarkable achievements of their past.

"In the space of two centuries, we have not been able to right every wrong, to correct every injustice, to reach every worthy goal. But for two hundred years we have tried and we will continue to strive to make the lives of individual men and women in this country and on this earth better lives—more hopeful and happy, more prosperous and peaceful, more fulfilling and more free. This is our common dedication and it will be our common glory as we enter the third century of the American adventure."

Gerald Ford healed America because he understood the adventure of America: her way of governing, her people, and the source of her strength as a Nation. On the night he learned that he was likely to be the next President of the United States, he and Betty recited a favorite prayer from the Book of Proverbs:

"Trust in the Lord with all thine heart, and lean not unto thine own understanding. In all thy ways acknowledge him, and he shall direct thy paths."

Today many of us in public life—from this country and others—have come here to speak words of tribute to Gerald Ford. The millions of Americans who will soon hear or read these words will not long remember them but can be sure that in their minds and hearts there will be a flash of recognition and a swell of gratitude—feelings that if put into words would result in a simple statement by his countrymen about Gerald Ford: "He was a good President who led us well: a good man who sought to serve others."

Mr. President, I noted recently that your confidence in our Nation's future is not at all diminished. You have said that the Nation again faces difficult moments but that "there is a good feeling in the country despite the problems."

You said our plans for economic recovery will work because the American people will make them work. You noted that the will of the people "is more important than all the technical things, all the micro- and macroeconomics. There is just no way to equate that," you said "with the will of 226 million Americans."

I am, of course, grateful for your support and counsel on this matter but I would remind you, that if today 229 million Americans can look forward to that future you speak of, it is because you brought us through difficult and trying times and helped us to believe again in ourselves.

Not too long ago, on the 200th anniversary of Paul Revere's famous ride, you offered a prayer, Mr. President, in the Old North Church in Boston—you said you hoped that those who follow us might say of our generation: "we kept the faith, freedom flourished, liberty lived."

That is a worthy prayer, Mr. President. And we offer it again today in a spirit of gratitude for your Presidency and affection for you.

Ladies and Gentlemen, it is now my honor to introduce to you the 38th President of the United States, a man of decency, a man of honor, a man of healing, Gerald R. Ford.

---

## ORDER FOR RECOGNITION OF SENATOR WALLOP ON MONDAY, SEPTEMBER 21, 1981

Mr. STEVENS. Mr. President, I ask unanimous consent that, when the Senate reconvenes on Monday next, after the

time allotted to the two leaders under the standing order, the Senator from Wyoming (Mr. WALLOP) be recognized for not to exceed 5 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

## RECESS UNTIL MONDAY, SEPTEMBER 21, 1981, AT 9:30 A.M.

Mr. STEVENS. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in recess until the hour of 9:30 a.m., Monday, September 21, 1981.

The motion was agreed to; and at 7:16 p.m., the Senate recessed until Monday, September 21, 1981, at 9:30 a.m.

## NOMINATIONS

Executive nominations received by the Senate September 18, 1981:

MISSISSIPPI RIVER COMMISSION

Rickey Dale James, of Missouri, to be a Member of the Mississippi River Commission for a term of 9 years, vice Wilmer Richard Hall, resigned.

## CONFIRMATIONS

Executive nominations confirmed by the Senate September 18, 1981:

INTER-AMERICAN DEVELOPMENT BANK

Jose Manuel Casanova, of Florida, to be Executive Director of the Inter-American Development Bank for a term of 3 years, vice Ralph Anthony Dungan, resigned.

DEPARTMENT OF ENERGY

William Addison Vaughan, of Michigan, to be an Assistant Secretary of Energy (Environmental Protection, Safety and Emergency Preparedness), vice Ruth C. Clusen, resigned.

Rayburn D. Hanzlik, of California, to be Administrator of the Economic Regulatory Administration, vice Hazel Reid Rollins.

DEPARTMENT OF THE INTERIOR

Dallas Lynn Peck, of Virginia, to be Director of the Geological Survey, vice H. William Menard.

Robert Carlton Horton, of Colorado, to be Director of the Bureau of Mines, vice Lindsey D. Norman, Jr.

DEPARTMENT OF ENERGY

Guy W. Fiske, of Missouri, to be Under Secretary of Energy, vice John Mark Deutch, resigned.

INTERNATIONAL ATOMIC ENERGY AGENCY

The following-named persons to be the Representative and Alternate Representatives of the United States of America to the 25th session of the General Conference of the International Atomic Energy Agency:

Representative:

W. Kenneth Davis, of California.

Alternate Representatives:

Richard T. Kennedy, of the District of Columbia.

Roger Kirk, of the District of Columbia.

Thomas M. Roberts, of Tennessee.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

IN THE ARMY

The following-named officer under the provisions of title 10, United States Code, section 3066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 3066, in grade as follows:

*To be lieutenant general*

Maj. Gen. Jack Vincent Mackmull, xxx-xx-xx... xxx-... U.S. Army.

The following-named officer under the provisions of title 10, United States Code, section 3066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 3066, in grade as follows:

*To be lieutenant general*

Maj. Gen. Donald Edward Rosenblum, xxx-xx-xxxx U.S. Army.

The following-named officer under the provisions of title 10, United States Code, section 3066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 3066, in grade as follows:

*To be lieutenant general*

Maj. Gen. Howard Francis Stone, xxx-xx-xxxx xxx-... Army of the United States (brigadier general, U.S. Army).

The following-named officer under the provisions of title 10, United States Code, section 3066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 3066, in grade as follows:

*To be lieutenant general*

Maj. Gen. James Benjamin Vaught, xxx-x... xxx-xx-x... U.S. Army.

IN THE AIR FORCE

Lt. Gen. John G. Albert, U.S. Air Force (age 58), for appointment to the grade of lieutenant general on the retired list pursuant to the provisions of title 10, United States Code, section 8962.

IN THE ARMY

The following-named officer under the provisions of title 10, United States Code, section 711, as follows:

*To be senior Army member of the military staff of the United Nations*

Lt. Gen. William Rowland Richardson, xxx-xx-xxxx Army of the United States (major general, U.S. Army).

The following-named officer under the provisions of title 10, United States Code, sections 3036, 3066, 3284, and 3307 to be assigned as The Surgeon General, U.S. Army, a position of importance and responsibility designated by the President under subsection (a) of section 3066, in grade as follows:

*To be lieutenant general, Army of the United States and major general, U.S. Army*

Maj. Gen. Bernhard Theodore Mittemeyer, xxx-xx-xxxx Army of the United States, (colonel, U.S. Army, Medical Corps).

IN THE NAVY

The following-named reserve captains of the line and staff corps of the Navy for temporary promotion to the grade of rear admiral, subject to qualification therefor as provided by law:

LINE

LeRoy Vincent Isaacson
Vincent Joseph Anzilotti, Jr.
Francis Neale Smith
George Clark Sayer

MEDICAL CORPS

John Peter Connelly

SUPPLY CORPS

Delbert Harry Beumer

IN THE ARMY

The following-named officer under the provisions of title 10, United States Code, section 3066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 3066, in grade as follows:

*To be lieutenant general*

Maj. Gen. John Nelson Brandenburg, xxx-x... xxx-xx-x... U.S. Army.

The following-named officer to be placed on the retired list in the grade indicated under the provisions of title 10, United States Code, section 3962:

*To be lieutenant general*

Lt. Gen. Charles Calvin Pixley, xxx-xx-xx... xxx-... (age 57), Medical Corps, Army of the United States (major general, U.S. Army).

IN THE AIR FORCE

Air Force nomination of Lee D. Badgett, permanent professor, for reappointment to the active duty list of the Regular Air Force in the grade of colonel, which nomination was received by the Senate on September 4, 1981, and appeared in the CONGRESSIONAL RECORD of September 9, 1981.

Air Force nominations beginning Jose E. Calzada, to be major, and ending Bobby C. Springer, to be first lieutenant, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of July 31, 1981.

Air Force nominations beginning George W. Beddingfield, to be colonel, and ending Melvin B. Emmons, to be colonel, which nominations were received by the Senate on August 11, 1981, and appeared in the CONGRESSIONAL RECORD of September 9, 1981.

IN THE ARMY

Army nominations beginning Ray A. Strawser, to be colonel, and ending Henry S. Maerki, Jr., to be major which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of July 31, 1981.

Army nominations beginning Marvin G. Back, to be colonel, and ending Joe T. Skidmore, to be lieutenant colonel, which nominations were received by the Senate on August 11, 1981, and appeared in the CONGRESSIONAL RECORD of September 9, 1981.

IN THE NAVY

Navy nominations beginning Iffat A. Abbasi, to be lieutenant commander, and ending Jeri M. Rigoulot, to be lieutenant commander, which nominations were received by the Senate on August 11, 1981, and appeared in the CONGRESSIONAL RECORD of September 9, 1981.

Navy nominations beginning John R. Aguilar, to be commander, and ending Craig L. Majkowski, to be lieutenant (j.g.), which nominations were received by the Senate on August 11, 1981, and appeared in the CONGRESSIONAL RECORD of September 9, 1981.

Navy nominations beginning Robert Waugh Aldinger, to be captain, and ending James Wallace Moor, to be captain, which nominations were received by the Senate on August 11, 1981, and appeared in the CONGRESSIONAL RECORD of September 9, 1981.

Navy nominations beginning Steven C. Streck, to be lieutenant commander, and ending Jon G. Motter, to be ensign, which nominations were received by the Senate on August 28, 1981, and appeared in the CONGRESSIONAL RECORD of September 9, 1981.

Navy nominations beginning Bill J. Archer, to be ensign, and ending Zein E. Obagi, to be commander, which nominations were received by the Senate on August 28, 1981, and appeared in the CONGRESSIONAL RECORD of September 9, 1981.

IN THE MARINE CORPS

Marine Corps nominations beginning George L. Alvarez, to be lieutenant colonel, and ending Robert A. Zink, to be chief warrant officer, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of July 31, 1981.

Marine Corps nominations beginning Anthony E. Agrue, to be first lieutenant, and ending John R. Zimmerman, to be first lieutenant, which nominations were received by the Senate on September 4, 1981, and appeared in the CONGRESSIONAL RECORD of September 9, 1981.

# EXTENSIONS OF REMARKS

## CONGRESSMAN McGRATH PROVIDES INSIGHT INTO MIDDLE EAST PROGRAM

### HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 18, 1981*

● Mr. LENT. Mr. Speaker, during the August work period, my good friend and colleague, Congressman RAY MCGRATH, who ably represents a Long Island district adjacent to my own, traveled to Israel to learn about that nation's needs and problems. In view of the fact that the Congress is now considering the administration's proposal to sell the AWACS plane and jet fighter enhancement equipment to Israel's foe Saudi Arabia, I think Congressman MCGRATH's views on Israeli security will be of great interest to every Member of this House. In my judgment, Congressman MCGRATH's remarks show great insight and an understanding of the problems faced by our ally, Israel. The views appeared in an article in the September 11-17 issue of Long Island Jewish World and are as follows:

[From the Long Island Jewish World, September 11-17, 1981]

MCGRATH: ISRAEL TAKES RISKS FOR PEACE

(By Stewart Ain)

A one-week trip to Israel has impressed Rep. Raymond McGrath (R-Valley Stream) both with Israel's vulnerability amidst a sea of enemies and its yearning for peace at virtually any price.

"They want peace more than I suspected before I went," McGrath said. "Not only do they want peace, but they are willing to take immense risks to achieve it."

During his trip, McGrath said he visited the Sinai and took note of the fact that by next April Israel will return to Egypt the portion of that area it still controls. More than half of the Sinai already has been returned, including seven airstrips and one air force base that the Israelis constructed. And when the rest of the land is given back to Egypt, along with it will go two large military bases and an airstrip.

"They already gave back an oil field that produced 15% of Israel's needs," he pointed out. "The only accommodation that was made is that Egypt will let Israel have the first crack at buying that oil—but it will be at the going rate. And this is what I mean when I speak of the risks Israel is taking for peace. They have returned a huge land area that would have given them time to react (if an enemy struck from the west)."

McGrath noted that the United States is going to build two air bases for Israel in the Negev to compensate for the air bases that were given up. He said that military experts in Israel told him that these two new bases will bring to eight the number of air bases in Israel, a country that has a small amount of air space in which to permit its pilots to practice their skills.

ISRAELIS SHOWED SELF-CONFIDENCE

But that didn't seem to faze the Israelis, McGrath noted. He said that when they were "confronted with a problem that seemed enormous in scope, they simply said, 'We'll find a way.' They had complete confidence in themselves. And that confidence seemed universal over there."

Although it was not an official visit paid for with taxpayer funds, McGrath said he still received the red carpet treatment from the Israeli Government. Government officials accompanied him on his tour and he had private audiences with the top members of the Israeli Government, including an hour and a half meeting with Prime Minister Menachem Begin. In addition, he was escorted around Jerusalem by the city's mayor, Teddy Kollek. Accompanying him on the trip was Rep. Guy Molinari (R-S.I.).

"The sites and the holy places brought my Bible study into reality," McGrath said. "I couldn't believe it. It was just a thrill to be there."

Throughout the country, he noted, there were men in military uniforms and each one carried an automatic rifle. He said he learned that at the age of 18 men are called for military duty and they serve three-and-a-half years, and women serve for two-and-a-half years. Israelis are in the reserves until they are 55 years old and they serve reserve duty for about one month each year, he added.

"That is all understandable," McGrath said, noting the "topography of the land and how close their enemies are. Libya is the arms depot for the entire Arab world in the Middle East. Russia arms Syria and Syria arms the PLO (Palestine Liberation Organization). All around Israel there are hostile countries being equipped with sophisticated weapons and planes.

"In spite of all of that, Israel is still willing to give back strategic land that it would be in their best interest to keep. Everyone I spoke to in Israel said he is willing to take the risk. I knew they wanted peace, but not as badly as that."

VISITED LEBANESE BORDER

His trip took him to the Lebanese border and a meeting with Major Saad Hadad of the Christian Lebanese Army, who is providing a buffer force along the border. McGrath said the Israelis are "arming him for a good reason."

While on the Golan Heights, McGrath said he visited a kibbutz inhabited by 150 families. He termed it a "precarious placement" and noted that while there he had a chance to enter one of the bomb shelters in the kibbutz.

Although he never found himself in the midst of a shelling, McGrath said that just a week before his visit to a kibbutz at Kiryat Shimona, the settlement had been shelled.

"When the shelling started, the people in the kibbutz evacuated instead of seeking the safety of the shelters," McGrath said. "I got the impression that the government did not like this because it may eventually mean that one day they might not return."

In the hills of the Golan Heights, McGrath said he saw the sensing devices implanted in the ground to detect troop movements or the flight of Syrian aircraft as they leave the ground.

"That is necessary because it is only a five minute plane ride from Damascus to the Israeli border," he pointed out.

Another impression McGrath said he is left with is the "manner in which the Israelis treat the people who live in the disputed areas, like Jerusalem," he said, noting that they have a lot more freedom under Israeli control than they had under Jordanian rule.

"I now have a tremendous understanding of the country," McGrath said. "I never realized it was so small."

IMPRESSED WITH ACCOMPLISHMENTS

Despite its size, Israel has accomplished monumental tasks, McGrath pointed out. He said they have taken 1,500 underprivileged youngsters, who come primarily from immigrant families, and they house and feed them in Jerusalem and give them a junior high and high school education. In addition, he said, they are given vocational training. All of this costs $2,000 a year per child, a figure McGrath said is "extremely low. Here, it costs $3,000 to $4,000 just to educate a student and that does not include food."

"They are a very resourceful people," he continued. "In a country that is arid, they have enough water supply to produce one of the biggest citrus and cotton crops in the world."

McGrath said he also had a chance to tour a desalination plant and learned that the Israelis are planning to connect the Dead Sea with the Mediterranean and harness that water to create hydro-electrical power. He said he also studied Israel's nuclear power plants and was stuck by the fact that virtually every home had solar panels on their roof to supplement a hot water heater.

One of the most memorable moments of the trip occurred during his meeting with Begin in the Knesset, McGrath recalled. He said that Begin pointed outside his window to a place where, he said, Jordanian guns were located in 1967. He said that Begin told him that when the Six Day War erupted, "They began shelling the room we are sitting in. And now they want us to give it back."●

## THE EXEMPLARY CAREER OF FRED M. ARNOLD

### HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 18, 1981*

● Mr. DORNAN of California. Mr. Speaker, on Thursday night, September 24, the citizens of Redondo Beach, Calif., will gather at the Blue Moon Saloon to honor a man who has given the major part of his professional life in service to their city.

After 32 years in office, City Clerk Fred M. Arnold recently retired, and

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

his friends and neighbors, including myself, feel that his exemplary career should be brought to public attention as a model for those who are inspired by dedication to duty.

Fred moved to Redondo Beach in 1930, attending local grade school and Redondo Union High School. His father served on the city council for 6 years just prior to World War II.

During the war, Fred served in the infantry. He was commissioned as an officer in 1943.

After the war, Fred returned to Redondo Beach. In 1949, he was appointed city clerk and was elected to the office in a multicandidate race 2 years later. Fred has done such a great job for the city he has been unopposed in every election since 1951.

In addition to belonging to several professional organizations for municipal officials, Fred has been actively involved in civic groups and patriotic associations. Fred has held memberships in the Optimists, YMCA, De Molay, and the Redondo Beach 20-30 Club. In 1957, he served as president of the Redondo Beach Coordinating Council. Additionally, he was a member of the establishing committee of South Bay Hospital, was chairman of the 1951 cancer drive, and for 10 years chaired the Redondo Beach March of Dimes.

Currently, Fred is a member of Elks Lodge No. 1378, the American Legion, Eagles, and the Redondo Beach Rotary Club. He served as the Rotary Club's president in 1953, and was Rotary district committee chairman in 1964.

Fred and his wife Evelyn have raised four children in Redondo Beach, of whom they are justly proud.

Mr. Speaker, Fred Arnold is the kind of man who makes America work. The qualities of a good public servant—dedication, trustworthiness, diligence, and loyalty, are all abundant in Fred's character. On his retirement, we wish him well, and say thanks for a job well done.●

## SOLIDARITY DAY

### HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 18, 1981*

● Mr. RODINO. Mr. Speaker, all roads lead to Washington this Saturday morning. Solidarity Day, sponsored by the AFL-CIO and over 150 labor, civil rights, religious, consumer, women's ethnic, environmental and other groups, will be a representation of all America. Americans young and old, male and female, black, white, and brown will arrive here from every region of the country to proclaim the principles that have guided us through 207 years of progress.

Solidarity Day, named after the Polish workers movement for freedom and justice, will be a magnificent event where the people of America will renew our common goals as a nation—and remind our leaders that Government must invest in people to insure a prosperous and productive future for our country.

The members of the media have tried to speculate on the numbers expected to turn out on Saturday, but it is not possible. I can tell you, however, that there is not one available bus in my home State of New Jersey or in our neighbor, New York. There is not one seat left on the trains between my home city of Newark and Washington, D.C. All told, over 1,000 chartered buses will roll out of our metropolitan area shortly after dawn on Saturday morning headed for the Capital.

The untold numbers who want to come but cannot find transportation will be showing their support for Solidarity Day in a number of ways. In my home city of Newark, hundreds of people gathered last night at a rally protesting the reductions in the Federal budget aimed at the helpless in our society. Mayors Kenneth Gibson of Newark, Thomas Cooke of East Orange, and Frank Rodgers of Harrison have all pronounced their support for Solidarity Day.

They will be joining millions of other Americans in sending a common message to our Government: That the American people gave no mandate last November for dismantling the programs that have brought progress and prosperity to millions of our citizens over the last 40 years. That they do not want their tax dollars spent for a military buildup over the next 3 years that dwarfs the escalation of the Vietnam war. That America has become a great Nation by believing in and depending on the potential of its citizens. That we do not begrudge basic assistance to our elderly, our poor and our disadvantaged citizens.

We hear this urgent message in response to a drastic turn in our Government policy that is setting back opportunities for Americans to work and produce. For example:

There are 7.6 million people in America who cannot find jobs. This is an unemployment rate of 7.2 percent at a time when the Reagan budget eliminated 300,000 CETA jobs and trimmed job training programs.

Joblessness among black Americans has reached 15 percent, and among black teenagers it's an unbelievable 50 percent.

The 3 million Americans who receive minimum social security benefits each month will have to get along without them, as it now stands. While some will be able to survive, at least 500,000—mostly elderly women living alone—will find it almost impossible to exist.

College will become an impossible dream for over 1 million children in middle-income families denied guaranteed student loans.

About 100,000 families living in substandard housing will have to wait indefinitely for public housing they were promised because the Federal budget reduces the amount of subsidized housing modernization program by $12 billion.

About 1 million Americans living on the edge of poverty will no longer be eligible for food stamps so that the Government can save $1.5 billion.

Roughly 3 million schoolchildren may have to drop out of school lunch programs because the Federal Government will reduce its support by $1.6 billion.

Despite these cruel attempts at balancing the Federal budget, the Reagan administration will bring in a budget this year that is larger than last year's. The Congressional Budget Office estimates that the deficit may reach $80 billion. The real reasons for the deficit lie in the defense increases and the gigantic tax bill which President Reagan signed giving benefits to the most wealthy of society, providing a $12 billion tax break for oil companies and a $15.6 billion tax break for owners of estates valued at $650,000 or less. The total cost of this tax package will be $754 billion over the next 5 years.

So, in fact, the administration is not cutting spending as it promised. It is shifting spending from human programs to nonproductive ones. The cuts in food stamps, subsidized housing, health and nutrition, jobs programs, and education will be sacrificed to pay for the tax bill and the defense increases.

Solidarity Day will show that the people of America cannot be hoodwinked into believing that the invisible hand of supply-side economics will bring back to them what the Government has taken away.

Solidarity Day will reaffirm our commitment to social programs that have provided jobs, brought millions of Americans out of poverty, expanded the middle class, provided education for the disadvantaged, and care for the elderly, and brought a greater measure of social justice to our minorities. This march for jobs, justice, human rights, and social progress will indeed show the solidarity of the American people. I hope that our leaders have the wisdom to listen to the message and act according to the will of the people.●

## TRIBUTE TO REPRESENTATIVE FRANK BECKER

### HON. CLEMENT J. ZABLOCKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. ZABLOCKI. Mr. Speaker, it is with sorrow that I join my colleagues in paying tribute to one of our former Members, Representative Frank J. Becker of New York, who passed away on September 4.

It was a privilege and honor to serve with Frank Becker back in the fifties and sixties. Frank was a dedicated public servant, one who was deeply respected on both sides of the aisle. His unrelenting hard work and drive will be remembered by all who were lucky enough to know him.

Mr. Speaker, as a member of the House Armed Services Committee, Congressman Becker made significant contributions. He courageously fought for the betterment of our servicemen and was one of the early supporters of trials by U.S. courts for servicemen accused of crimes. He consistently worked to protect the right of members of our Armed Forces, utilizing his legislative skills wisely.

While Congressman Becker and I did not always agree on all issues, he maintained the respect of his colleagues and fought hard for his positions. I remember one issue—voluntary prayer in public schools—that Representative Becker and I did agree on. He was one of the first Members of Congress to speak out on this issue after the historic Court decision.

It was with a sense of commitment and deep moral conviction that Congressman Frank Becker took the leadership on this controversial issue.

Mr. Speaker, Frank Becker served well his constituents in the Third, later Fifth District of New York, from 1953 through 1964. He will be sorely missed in the House of Representatives.

I extend my deepest heartfelt sympathies to his family and friends.●

## WHAT CETA CAN DO: ONE NEW YORK WORKER'S STORY

### HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 18, 1981*

● Mr. WEISS. Mr. Speaker, enactment of the reconciliation legislation slashed the CETA program by more than half, and eliminated public service employment. Lost in the undeserved controversy surrounding this program has been the recognition that thousands and thousands of people who participated in CETA have learned a new skill, found work, and provided valuable services for their community. A recent letter to the New York Times by a CETA beneficiary presented a good picture of what the CETA program is all about.

ONE OF CETA'S MANY SUCCESS STORIES

TO THE EDITOR:

Five years ago, I wrote a letter to The Times in which I expressed my feelings of apprehension and sadness about the then-proposed termination of the Comprehensive Employment and Training Act program. The letter was published.

A year earlier, as an unemployed Vietnam-era veteran with no real skills, I had been hired by the City of New York and assigned to the Housing Department as a neighborhood aide. I had kept my eyes and ears open, and I had learned from those who were willing to teach me. When I wrote the letter, I was not apprehensive about being out of work, I was sad because I would no longer be allowed to continue to learn the skills I had so desperately sought and needed in order to provide for myself and those who depend on me.

Collectively, we were lucky to be granted a stay until a new Administration stepped into the picture and extended the program. But even after this occurred, the controversy surrounding the CETA program continued. There were those who called CETA a no-show, no-good program; others said it just kept people off the official dole, and still others called it a neo-welfare program. In my letter, I said that CETA provided an opportunity to obtain realistic on-the-job training that would come in handy in the future.

Today, I am still employed by the Department of Housing Preservation and Development, where I hold a position of considerable responsibility. I have acquired a significant amount of knowledge in my area of professional interest and, just as important, I earn a decent living. I am now waiting to be appointed from a Civil Service list as a result of having taken a professional experience and training exam.

My greatest feeling is one of pride, of having been able to serve my people more than once: as a Vista volunteer, in the military and again with CETA, where I was paid for my work in behalf of my fellow citizens while I gained experience that has paid off for me.

I feel that the dollars that were spent on CETA were not wasted, and I sincerely hope that all those CETA workers who are scheduled to be dismissed at the end of August (just days before Labor Day) have a better answer to my question of five years ago: Where to now?

PETER ANTONIO AVILES.●

## ROBERT A. NORDSKOG

### HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 18, 1981*

● Mr. DORNAN of California. Mr. Speaker, I would like to pay tribute to Mr. Robert A. Nordskog, a man who has achieved a level of excellence in the business community that exemplifies many of the greatest of American ideals. Beginning his career from humble circumstances, he has excelled in business, sportsmanship, and service to the community.

Mr. Nordskog set the direction of his career as a 13-year-old aviator when he completed his first solo flight. His first business venture was as a racing car mechanic. This eventually led him to Lockheed Aviation where he worked on many famous aircraft, including Howard Hughes' around-the-world Lockheed model 14 aircraft.

The Nordskog Co. was founded in 1951, beginning operations out of a small Quonset hut with a few small machines and handtools. In just 4 short years, Mr. Nordskog made the company a world leader in the airborne galley field. As Nordskog Industries celebrates its 30th anniversary this year, it is the leading manufacturer of airline galleys and ahead of the competition in many other fields.

Robert Nordskog's excellence as a businessman is also exhibited in his personal life as a sportsman. At the age of 68, he holds more victories and championships in boat racing than any other competitor. He currently holds 24 national and international speed and endurance records.

Directing his sports interests into the community, Robert recently formed the Nordskog Soccer Foundation to promote soccer for American youth. He began his community involvement with the support and sponsorship of Guide Dogs for the Blind. Today, the company maintains active involvement with the Boy Scouts, the YMCA, the YWCA, the Girl Scouts, the United Way, and the March of Dimes.

Mr. Robert A. Nordskog is a living example of what can be achieved in the system of free enterprise. His achievements are truly remarkable and deserve note as an encouragement to all Americans.●

## FEDERAL SLOW PAY

### HON. CLAUDINE SCHNEIDER

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 18, 1981*

● Mrs. SCHNEIDER. Mr. Speaker, today I rise in support of H.R. 2036, the Federal slow pay bill. According to a GAO report, 39 percent of the Federal Government's bills are paid late. Small businesses and individuals cannot pay their bills to the Government late but Government can delay payments owed to them. In addition, when these businesses try to collect interest on the Government's overdue debts the Government responds by saying that it does not pay interest. Again, these same small businesses and individuals have to pay the interest on any overdue bills owed to the Government. Where is the equity?

How can we in the Congress hope to expect business to reflect the highest standards of professionalism when the Federal Government does not? How can we in the Congress work so hard to provide targeted tax incentives for business to grow when they do not have the capital to invest because they are being held up by the Government? Finally, how can we in the Congress hope for interest rates to take dramatic turns for the better when the Government creates such a demand for funds through its repayment practices toward small business?

The problem of Government delinquency in payment of debt to small businesses is a very real one. Small business in particular is hurt as it is the small firms who sell 90 percent of the off-the-shelf goods purchased by Federal agencies and other organizations spending Federal dollars. The Government cannot continue to borrow this $11 billion per year from our small businesses.

Clearly there is a need for legislation like H.R. 2036, a requirement that business transacted with Federal moneys be treated like any business in the private sector, that interest is paid for overdue bills, and early payment discounts are sought when payments are timely. As a cosponsor of this bill I endorse it fully and urge my colleagues to do likewise.●

## DEATH OF MIKE DiSALLE

### HON. DENNIS E. ECKART

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 18, 1981*

● Mr. ECKART. Mr. Speaker, this Nation and the Democratic Party lost one of their elder statesmen upon the recent death of Mike DiSalle. Through a lifetime of public service and private law practice, Mike DiSalle maintained an equilibrium and sense of humanity which this Nation will sorely miss.

Mike DiSalle was Ohio's first Governor to serve a 4-year term. After his election in 1959, he resolutely forced Ohio's leaders to recognize the State government's responsibility to assist its citizens, His detractors claimed he was a free spender, but his programs of increased educational support and more services moved Ohio in the direction which made Ohio one of the greatest industrial States of the Nation.

Mike DiSalle was elected to the Ohio Legislature in 1936. After service there, he returned home to Toledo, Ohio, and served successively as assistant law director, a city councilman, as vice mayor, and as mayor.

In addition to his term as Governor of Ohio, Mike DiSalle found the national limelight on other occasions. In 1960, he led the Ohio delegation to the Democratic National Convention to endorse John F. Kennedy for President. Ohio was the first major State to go into the Kennedy Column, and thus Mike DiSalle led the way for John Kennedy's election to the White House.

Earlier in his career, Mike DiSalle became known to all Americans as President Harry Truman's Director of the Office of Price Stabilization.

DiSalle's management of his office, with its thousands of orders and directors, proved to be effective and useful in the effort to hold down inflation during the Korean war.

The Nation's newspapers and editorial writers dubbed him "Mr. Five-by-Five," a reference to his stature and girth. He understood the Nation's need to laugh at its economic problems and once called a press conference to announce he would no longer require price controls on french fried fishing worms.

While Governor, he revealed another facet of his human side. He could not bring himself to authorize the execution of several prisoners on Ohio's death row, and as a last act of office, commuted their sentences to life imprisonment. He later wrote a book about that struggle with his convictions, entitling it, "Power of Life and Death."

Mr. Speaker, Mike DiSalle continued to be a leader after his departure from public office. Since 1963, he had worked as an attorney in Washington. Members of his party, and the Democratic Party leadership, sought his advice often on party matters. He was woven deeply into the fabric of the party here and in Ohio.

Despite his life of public service, he successfully made time to marry and raise a family.

Mr. Speaker, Mike DiSalle stood tall among America's leaders, and he will be missed.●

## GARY HYMEL

### HON. SAM GIBBONS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. GIBBONS. Mr. Speaker, Gary Hymel is a fine person and I certainly hate to see him leave the public service. I first became acquainted with Gary when he worked with our former colleague, Hale Boggs. His work for Hale was outstanding. He always handled himself in a quiet and dignified manner and with great understanding for his responsibility.

After Hale's death and after Gary joined your staff, I had an even greater opportunity to observe his work. He always impressed me as a very fine person who capably and seriously did what he thought was best for our country, you and the Congress.

Mr. Speaker, I know you are going to miss Gary; in fact, all of us will, and I for one wish him continuing success in his new endeavor.●

## THE ROLE OF THE SOCIALIST INTERNATIONAL—PART II

### HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 18, 1981*

● Mr. McDONALD. Mr. Speaker, this portion of the address by Count Hans Huyn of the West German Bundestag details the role of the Socialist International in pressing upon the Western World what amounts to unilateral disarmament. That the Socialists do this in collaboration with Moscow is openly admitted by both Socialist and Communist sources. The public is, of course, ill-served by information media which overlook or suppress these facts.

Remarks by Count Hans Huyn follow:

The final report of the Socialist International Study-Group on Disarmament was adopted unanimously at the SI-Congress in Madrid in November 1980. I here quote the directives given in "Bureau-Circular no. B13/80 of November 11th, 1980" to the "Dear comrades":

"3. The role of the SI and its member parties.

3.1 The Socialist International and interparty relations. The SI Bureau and Party Leaders' Conferences should keep disarmament on their agenda as one of the main items. The SI Bureau will on a continuous basis follow up and enhance the implementation of the recommendations of the Study Group and other decisions of the SI as well as all work for disarmament done by the member parties.

In continuation of the work of the Study Group, an advisory group on disarmament and arms control will be established by the SI Bureau to monitor the developments in the field of disarmament and to provide expert advice and other services to the Bureau. It is recommended that the member parties cooperate with each other also on a regional basis or in other limited framework.

The SI will participate to a larger extent in existing international governmental and non-governmental fora and initiate, when appropriate, new fora for the work for disarmament, detente and peace."

3.2. concerns the national level activities.

The most interesting directive concerns point: 3.3 The organizational activities of the member parties. "Member parties should establish their own bodies on disarmament policies. These bodies could for example plan and programme information, training and educational activities in the field of disarmament. They could work out an action programme for disarmament activities both at party and national levels, and make initiatives for international action.

The member parties should create the necessary organisational and financial con-

ditions for efficient and continuous work for disarmament.

Member parties should cooperate with appropriate organisations such as the trade unions and fraternal organisations especially in the fields of training and education as well as mobilisation of public opinion.

Member parties should be active in the work for disarmament also at the national level by cooperating in suitable forms with other non-governmental organisations in their own countries."

The implementations of the program by the member parties of the Socialist International all over Europe is already providing a major boost to the multiple "peace and disarmament" offensive conducted by Boris Ponomarev's International Department of the Soviet Communist Party. By implementing this program the Socialist Parties of Western Europe have virtually become tools in the hands of Soviet propaganda.

The so-called "Scandilux" meetings (Norwegian, Danish, Benelux member parties of the SI, with the SPD in the person of Egon Bahr and the British Labour Party now joint to them) which began last January are an outgrowth of this action program.

During the SI praesidium meeting in Bonn on 15/16 July 1981 it was decided to reactivate the Study Group, renamed since the Madrid Congress as the Advisory Group on Arms Control and Disarmament but still under the chairmanship of Kalevi Sorsa, Finnish Social Democrat Party Chairman. Walter Hacker of the Austrian Socialists is still secretary of the Group and has close contacts with the Soviet Embassy in Vienna.

As a result of the SI praesidium decision, the Group is now preparing to visit Washington in early November 1981, then New York for talks with the UN, then Moscow for a continuation of the dialogue with the CPSU as desired by the Soviets. The Group hopes to be received in Washington by President Reagan or Vice-President Bush and by Secretary of State Alexander Haig as well as by several members of the Senate.

The socialists are spreading informations everywhere in Europe and in Washington that if the Sorsa-Group is not received in Washington at the desired level, this will drive them into the arms of Moscow—as if they were not already in Moscow's arms.

Only a few weeks ago, the General Secretary of the Socialist International, Bernt Carlsson, outlined suggestions and arguments for supporting a socialist peace policy on the Moscow line. This policy is particularly directed towards the Federal Republic of Germany and the anxiety of its people. It is a means of escape from the hardships of economic and financial policies. Carlsson held a so-called "strategy speech" in the SI secretariat. A socialist campaign on a massive scale is to be undertaken after this year's summer recess and will oppose the "perverse confrontation course of Washington with respect to Moscow". Carlsson's final comment was: "The struggle of all the socialists in Europe for peace must be dramatically strengthened. We reject the deceptive suggestion of the Americans that Western rearmament guarantees peace, whereas in fact it is leading directly to the Third World War. We want the zero solution, the people will understand that. It is not the allegedly excessive social benefits which threaten our free society but the rearmament billions demanded by the profit requirements of the American multis and the imperialistic desires of the political leadership in Washington".

After the double track decision of the Atlantic Alliance in December 1979, 29 communist parties had a secret conference in Tihany on Lake Balaton on the subject of the further development of cooperation with the social democrats. The leader of the Department for International Relations of the Hungarian communists, Janos Berecz, stated on the 13th December 1979 that a temporary alliance between the communists and the social democrats was the pre-condition for the destruction of the Atlantic Alliance. It is agreed that achieving this "will alter the political features of Europe completely".

In 1931, Manuilski, for many years a colleague of Lenin and chief of the Comintern, declared at the Moscow School for Political Warfare: "The struggle to the death between communism and capitalism is unavoidable. At the present time, we are not yet strong enough to attack. Our hour will come in twenty or thirty years. In order to be victorious, we need an element of surprise. The bourgeoisie must be lulled to sleep. We shall therefore begin by staging the most thearetical peace movement that has ever existed. There will be electrifying proposals and extraordinary concessions. The capitalist countries, stupid and decadent, will take pleasure in working for their own destruction. They will creep into a trap baited with friendship. And as soon as they have broken cover, we will smash them by force"!

The Soviet international law lecturer M. Rapoport writes in his article "The Nature of Modern International Law" in "Soviet State and Law" 1941 (Moscow): "The struggle for peace in the socialist state is basically different from bourgeois pacifism. Our struggle for peace is subordinate to the revolutionary struggle for socialism and is therefore a revolutionary peace policy. The struggle of the USSR for peace is not a struggle for peace itself. It is organically connected with * * * the struggle to increase our power, the power of the socialist state, the fatherland, the world proletariat and for the removal of any threat to its safety".

If we consider what a gigantic pacifist movement is now going on in Europe and particularly in the Federal Republic of Germany, it becomes clear who the opponent is. Something is passing through Europe once again, like a ghost from the past and just as seductive and diabolically false as ever: "obtain peace without weapons!"

In the thirties, the British Prime Minister Chamberlain and the French Premier Daladier tried to ensure peace with Hitler by a one sided policy of appeasement. But Hitler took no notice and continued with rearmament: eventually, there was no alternative to war.

Considering the unilateral Soviet rearmament, it is a psychological masterstroke of the peace campaign in Western Europe directed from Moscow that practically everyone is talking about NATO rearmament—although this does not exist and will only come into force at the end of 1983—but no mention is made of the unilateral Soviet rearmament in all sectors—particularly with respect to the medium range missiles directed against Western Europe. We also want disarmament, the sooner the better. But not disarmament without security, disarmament with security, i.e. the achievement of an approximate balance between East and West.

The objective of the NATO double track decision is to ensure peace by a balance of forces. The common resolution to modernize the Long Range Tactical Nuclear Force.

In Europe on the one hand and to press for armament control negotiations on the other is clear evidence from the members of the Alliance that their objective is to obtain a balance of forces at the lowest possible level. We will not be prevented from this objective by any peoples' movement, no matter how impressively staged.

The German Federal Government has, of course, exphasized the maintenance of the NATO double resolution on many occasions. However, more and more organs of the SPD pass resolutions against rearmament. The SED chief Erich Honecker could therefore note with satisfaction in the spring of 1981: "In the meantime, two-thirds of the SPD regional associations have taken up a position against the so-called double track decision of NATO because its main emphasis lies on rearmament and not on negotiation."

The SPD, in particular, suffers from the dilemma that they have heard for the last decade that "peace has become more secure" due to "détente." A decade of cosmetics has produced deceptive illusions which are suddenly no longer true because of the actual threat from the Soviet Union. Helmut Schmidt produced the moratorium proposal as a way out and Brezhnev took it up gratefully. Only when the Federal Foreign Minister Genscher described a renewed declaration of Soviet hegemony as unacceptable did Helmut Schmidt find himself forced to say "no." It becomes more and more difficult for the Chancellor Schmidt to impose his will in his own party—the SPD—against his party-chairman Willy Brandt.●

## HIGH INTEREST RATES ARE KILLING US

### HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 18, 1981*

● Mr. PICKLE. Mr. Speaker, these high interest rates are killing us, and I would like to take just a few moments today to talk about a measure I am introducing aimed at bringing credit back to Earth.

As some of you may know, Senator BENTSEN this week introduced a resolution aimed at getting interest rates in this country back where they belong—down. Senator BENTSEN feels that a major reason for the dangerously high interest rates afflicting us today is the great amount of available credit which is sopped up by huge corporate mergers and market speculation.

I applaud Senator BENTSEN's noble efforts in this matter. He is a brilliant and successful businessman, and for a small-town boy from Mission, Tex., he is not a bad "shade tree economist," either.

Mr. Speaker, I happen to agree with him on this. Now, when giant companies absorb every drop of credit in sight, it only serves to worsen the hardship on people who really need loans. When DuPont bought Conoco recently, the merger did not create any new jobs, it did not invest the economy with new vigor, it did not even create a more efficient business

operation. But it did dry up a lot of capital, perhaps $4 billion worth, that could have gone to more productive purposes—to farmers, or homebuilders, to home buyers, or small business. These people, who would put the money back into the economy and meanwhile expand the job market and create usable services, cannot get loans because the money is not there, or is too expensive to borrow—driven up by the unwise lending practices of a few mammoth banks.

My resolution seeks to complement Senator BENTSEN's efforts to have the Federal Reserve pull a tighter rein on lending banks, to undertake a "jawboning exercise" aimed at convincing its members not to contribute to the inflationary spiral.

It is not our business to tell this or that company they should not own this or that other company. But now, at a time when thousands of small businesses are going under for lack of simple loans—now is not the time for us to be financing huge, unproductive corporate takeovers. You do not use your eggs for baking cakes when the family's got nothing for breakfast.

I hope many of my colleagues will lend their help in this by publicly or privately expressing their support.●

## A SALUTE TO THE AIRPORT MARINA COUNSELING SERVICE ON ITS 20TH ANNIVERSARY

### HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 18, 1981*

● Mr. DORNAN of California. Mr. Speaker, during the recent budget debates, we heard many people say that without Government funding, essential social services would be nonexistent. According to this school of thought, no one cares about people but the Federal Government.

Well, I have evidence that people who think that way are wrong. In the heart of my 27th Congressional District, within sight of the huge Los Angeles International Airport, a group of public spirited citizens have banded together in support of a nonprofit venture that illustrates the tremendous capacity for good that abides within each one of us: The Airport Marina Counseling Service.

This year marks the 20th anniversary of the Counseling Service, a community mental health clinic funded primarily by voluntary donations from corporations and private individuals.

Airport Marina Counseling offers a large array of counseling services to area residents on an ability-to-pay basis. Though the clinic receives no Federal, State, or local funds, and is not a United Way agency, it provides superior counseling to anyone who needs help.

No one is ever turned away from the Airport Marina clinic. If the problem is one which the center's capable staff is unable to solve, the individual is referred to someone who can help.

The key to the center's success is that 85 percent of its clinical and clerical staff are volunteers. They have a part time clinical staff of 60, including 4 psychiatrists, 4 psychologists, 15 licensed clinical social workers, and 7 marriage, family, and child counselors. In addition, the staff is augmented by 8 interns from local universities and 30 men and women who have completed their professional education in a mental health field and are accumulating supervised training hours for licensing.

The quality of this dedicated staff is rated outstanding by local mental health professionals. The clinic provides not only superior service to its clients, but also serves as an excellent training facility for tomorrow's vitally needed mental health specialists.

The clerical staff exhibits the degree to which the community is actively involved in the daily operation of the clinic. Over 30 people volunteer to answer the telephones, do the bookkeeping, and other related tasks in order to keep the price of the clinic's services at a minimum. An active guild association also helps to raise money for the clinic with the same goal by operating a gift shop in the neighborhood.

Airport Marina Counseling serves as an example of a private organization which provides better service with greater cost efficiency than comparable public facilities. The clinic provides quality mental health care at 50 percent of the costs of any other medical model, licensed community mental health clinic in the county.

Over the last 5 years, AMCS has increased its caseload 84 percent. Currently, the clinic has an average open caseload of 367 for any given period. In 1981, they have averaged 1,187 client therapy sessions every month. The clinic's aim is to offer preventive care by treating small problems before they grow into major forms of maladjustment. In this way, the clinic saves taxpayer money by keeping people healthy and on the job.

The clinic's competent staff, led by board of directors president, John Brierly; administrative assistant Myrna Kayton; and executive director Mary Ellen Cassman, is doing a tremendous job in managing an expanding community resource.

Mr. Speaker, it is community organizations like the Airport Marina Counseling Service, supported, staffed, and funded by enthusiastic volunteers at the local level who believe in what they are doing, which provide the backbone of our social services.

While an ever-growing Government may be able to provide larger budgets for such activities as community mental health clinics, a cold, impersonal Government will never be able to provide the kind and compassionate treatment offered by a private association of committed individuals.

On their 20th anniversary, the Airport Marina Counseling Service is pointing the way toward effective help for those in need—community based and funded organizations providing excellent services in a cost-effective way. I am proud that the Airport Marina Counseling Service has made the Westchester area a shining example of a community with a heart.●

## NATURAL GAS DEREGULATION: EDITORIAL COMMENTS

### HON. TOM CORCORAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 18, 1981*

● Mr. CORCORAN. Mr. Speaker, in view of the increasing interest in the issue of natural gas deregulation, I am submitting for the RECORD several 1981 editorial comments on this issue. These editorials from around the country generally favor accelerating natural gas deregulation. Because of space limitations, I am not including several other editorial statements in support of accelerating the deregulation of natural gas. Such statements were published last month by the New Orleans Times Picayune, the Dallas Morning News, and the Rocky Mountain News of Denver.

The editorial comments follow:

[From the New York Times, Aug. 31, 1981]

NATURAL GAS, UNNATURAL COST

Natural gas regulation: just mentioning the subject makes Congressmen uneasy. The last time Congress rewrote the laws that limit natural gas prices it took more than a year of bitter struggle. And the result, the Natural Gas Policy Act of 1978, is badly flawed. Unless Congress and the Reagan Administration can clean it up, there might well be significant losses to the economy and an even nastier political battle in 1984.

President Carter had reason to be proud of the reforms he finally squeezed out of Congress. The act greatly reduced the chance of another regional gas shortage, like that of 1977, by eliminating distinctions between "interstate" gas and gas used in the state where it was produced. The act stimulated exploration by raising price ceilings on newly discovered gas. And it provided for gradual price increases, to be followed in 1985 by total decontrol of all natural gas discovered since 1977.

What, then, needs to be cleaned up? The problems arise from the price of oil. The gradual gas price increases sounded generous enough when the act was passed—but no one anticipated how fast oil prices would run up after the revolution in Iran. In fact, controlled natural gas now costs less than half the price of oil.

That creates obvious incentives to waste this precious domestic fuel. And there is a

reverse problem. On the day of full decontrol in 1985, natural gas will jump suddenly to the market price.

The Reagan Administration solution seems to be to phase in decontrol over the next three years. It would allow newly discovered gas to rise gradually to the price of competing fuel oil. That is a fair solution—provided Congress also allows the price of "old" gas to rise and then taxes away most of the resulting windfall profits.

Phased decontrol, with a windfall tax, might have a far less painful effect on consumers than first appears. Higher natural gas costs would be at least somewhat offset by conservation, and by decreased dependence on imported oil. According to the Energy Department, phased decontrol of new gas would raise the real price to residential users by about 13 percent a year; decontrolling "old" gas as well might double that.

In return, says Michigan economist Glenn Lowry, higher prices would stimulate an increase of perhaps 15 percent in domestic production. This extra gas, combined with the incentive to conserve, could reduce the demand for imported oil by two million barrels a day, or more than a third.

If America has to buy less oil from OPEC, we'll pay less for the oil we do import. Just how much less depends upon how much OPEC lowers production in response. But a two-million-barrel reduction in imports would give us immense bargaining room. That is roughly the difference between last year's tight oil market, when prices soared, and today's oil "glut."

The case for decontrolling gas discovered before 1977 is quite different. Decontrol of such "old" gas would obviously bring no bonus in production, and by 1985, it would raise the nation's gas bill by perhaps $20 billion a year. But this decontrol would avert a crap game in which some lucky consumers get "old" gas for as little as $1 per thousand cubic feet, while others pay five or six times that for new gas. And complete decontrol would encourage all to conserve. Yes, there would be a windfall profit: most of it can and should be taxed away.

Natural gas deregulation is widely viewed as an ideological issue. Liberals side with consumers, conservatives with the producers. But in the long-run phased decontrol is in everyone's interest. By pricing natural gas at the true cost of alternative fuels we can cut waste and reduce our dependence on foreign producers, and may even pay less for foreign oil. From that perspective, the choice is easy.

---

[From the Wall Street Journal, Aug 21, 1981]

STEP ON THE GAS

When he's finished snoozing and chopping wood at the ranch, President Reagan will come back to Washington to juggle a large, very hot potato: Decontrol of natural gas prices.

This little number bounced toward the top of the agenda by growing recognition of the foolishness of the Natural Gas Pricing Act of 1978. After a long and mean battle, Congress settled on the notion of decontrol by 1985. So it whomped up a bunch of categories of different types of gas, kept about half of them under price controls indefinitely, deregulated deep gas and other pets, and escalated the price of the rest toward parity with what it thought oil would sell for in 1985, namely $15 a barrel. So we don't have deregulation and consumers don't have the protection their advocates sought, what with gas prices ready to fly up when the controls on a lot of gas expire in 1985.

In keeping with the administration's devotion to the free market, it wants real decontrol. You let the market decide the price of gas relative to the price of oil. You provide incentives for new production. And you let high prices promote conservation. This is where the administration wants to go, but it is divided on the question of how fast.

The problem is that no one really knows what would happen with deregulation. Natural gas has been under price controls for four decades, perhaps longer than any other major commodity. A vast and expensive infrastructure—from pipelines to residential furnaces—has grown up on the basis of low price and might become obsolete quickly if prices soar suddenly. There is a substantial economic likelihood that prices would soar even above the price of oil for a time while new supplies were brought on line, and a substantial political risk that this price spike would arrive just in time for the 1982 elections.

Whether this would happen depends on how fast new gas comes on line, and also on the contract structure of the gas industry, which is as complicated as a Rubik cube and as difficult to figure. Gas is sold on long-term contracts, but in addition to those which routinely expire and have to be renegotiated, others have escalator clauses pegged to a variety of prices, with some clauses setting prices above market, some below. There would be incentives for producers to share their new-found gains with, say, pipelines about to go bankrupt and leave wells unconnected. But no one knows how quickly all this could be sorted out.

So even in this administration, gradual decontrol has its advocates. It is considering a plan to immediately decontrol the price of newly discovered gas, and to allow the price of already discovered gas to rise every month by 1/36 of the difference between the controlled price and the equivalent market price of oil. This would avoid the mistakes of the NGPA, by letting the price of gas go up smoothly over three years to minimize economic shocks, and by insuring that the price of gas would have parity with oil by 1985 and be free to find its market price.

There are also, however, advocates of cold-turkey decontrol. They abhor the very idea of different "categories" of the same commodity, which provide incentives for changing categories and only secondarily incentives for production. But more importantly they offer a political argument—the delay in decontrol gives its opponents more opportunity to find ways to thwart it between now and 1985.

The political problem is that decontrol does involve an enormous transfer of income—about $40 billion a year from consumer to producer and, more to the political point, from many consuming states to a few producing states. This creates incentives for blocking decontrol, regardless of its economic efficiency. (It also creates an inducement for the federal hand to dip into those funds via a windfall profits tax.) In fact, the President probably does not have the votes for immediate decontrol, and with major battles shaping up on the budget and military spending, he has to juggle along with the rest how much political capital he should spend.

What is clear is that something must be done. Gas belongs on our energy menu; it doesn't require costly pollution equipment; it won't scare anybody by threatening a meltdown; and—best of all—it'll keep coming through the pipelines regardless of the world's ayatollahs and sheiks. Whether cold turkey now or gradually by 1985, we have to get to market pricing to restore incentives for producers to produce more and consumers to consume less, so that the country can use this premium energy resource most efficiently.

---

[From the Chicago Tribune, Feb. 24, 1981]

UNNATURAL GAS LAWS

President Reagan had hardly learned his way to the White House water cooler when he liberated oil and gasoline from the bonds of federal price controls. This was wise but largely symbolic, since the chains were due to be lifted in October anyway. So far, however, Mr. Reagan has averted his gaze from the shackles the federal government has placed on the production and use of natural gas. These, much more than the controls on oil and gasoline, threaten to make the yoke of the foreign oil cartel heavier on all of us.

Natural gas is the closest thing we have to a perfect fuel. It is clean, versatile, and abundant. And unlike oil, its price and supply are not controlled by OPEC. In fact we have plenty of it right here at home. But so far we have not exploited the numerous advantages of gas.

Why not? There are two main obstacles. The first is the Natural Gas Policy Act, which established a Byzantine maze of price controls on more than two dozen categories of gas. The uncontrolled price of a barrel of oil is now about $36. But the equivalent amount of gas sells for less than $16. Since gas has several advantages over oil, this is like pricing French wine below beer. The result is that energy firms are putting most of their money into the search for oil instead of gas, even though most experts estimate our gas resources to be considerably greater than those of oil. Last year, the drilling rate for natural gas was up only 7 per cent; for oil it was up 39 per cent.

The federal government has even taken measures to discourage the use of natural gas. The chief culprit is the Fuel Use Act, which forbids the construction of new gas boilers by utilities or industrial companies and requires existing ones to be switched to coal by 1990. This has limited the use of gas in favor of coal (and, perversely, oil), which is dirtier and less versatile than gas. That policy might make sense if we were indeed exhausting our reserves of gas, as was commonly believed when the law was passed three years ago. But the evidence now suggests potential reserves are enough to last beyond the foreseeable future. Those reserves, however, won't be of much use if the government continues to outlaw some uses of gas. Besides this law, there are government regulations which place the burden of any gas shortages directly on industrial users. Thanks to the price controls, there have been several shortages in the last decade. Industrial users understandably prefer fuels whose supplies are more reliable.

If the President and Congress want to make natural gas a weapon in the fight to reduce our dependence on imported oil, they should discard both of these policies. Decontrol of prices will increase supplies, but they will be useless as long as demand is artificially depressed. Removing the impediments to greater use of gas likewise will be pointless unless coupled with steps to increase gas supplies. Taken together, these measures would do much to subvert OPEC's tyranny without sacrificing public health or

the environment. Freeing gas would help to free us all.

---

[From the Chicago Tribune, Aug. 13, 1981]

UNSHACKLING NATURAL GAS

Natural gas is an excellent energy source—clean, versatile, safe, and, perhaps most important, abundant here at home. It has the potential to displace millions of barrels of foreign oil every day. But gas' potential hasn't been realized because of a rigid system of federal price controls that discourages production and federal laws that inhibit the use of gas by factories and utilities.

Now a group of President Reagan's Cabinet officers has urged the removal of all natural gas price controls by 1985. They recommend two changes in the 1978 Natural Gas Policy Act, which provided for a phased decontrol of new gas prices: a speeded-up schedule for this decontrol and extending it to all gas. These are wise recommendations, which the president should make a top priority.

The NGPA obviously needs fixing. It holds gas prices far too low—about half the cost of the energy equivalent in oil. This encourages waste and discourages production. Last year, thanks to the decontrol of new oil prices, oil drilling increased by 41 per cent over 1979. But gas drilling rose only 6 per cent—even though the U.S. has much greater reserves of gas than of oil.

The NGPA's formula for phasing out controls also failed to provide for the big jump in oil prices that occurred in 1979, which means that gas prices will climb sharply when the controls expire in 1985. And its continuation of controls on already-discovered gas will make it unprofitable for gas producers to use expensive methods to extract gas from old fields.

The Cabinet officers didn't examine the other side of the natural gas coin, namely the federal government's restrictions on use. Under the 1978 Fuel Use Act, industrial firms and utilities are barred from installing any new gas boilers, and are required to convert existing ones to coal. That makes sense only if you assume, as Congress and the Carter administration did in 1978, that we have nearly exhausted our gas supplies. But now everyone acknowledges that vast supplies remain. Unless restrictions on prices and demand are removed, though, that gas will stay in the ground.

Mr. Reagan no doubt understands all this. The administration's excuse for not raising the gas issue has been that it didn't want to jeopardize its tax and budget cuts. Now that those have been enacted, the President should move quickly to free the gas market. Next year is an election year, and the closer Congress gets to election day, the more reluctant it will be to do what needs to be done here. The President has accumulated an impressive store of political capital on the Hill. Now is the time to spend some.

---

[From the Cleveland Press, Aug. 12, 1981]

GAS DEREGULATION SHOULD GO SLOWLY

President Reagan has been handed a political and economic time bomb: a recommendation by his top energy advisers that he push for an end to all price controls on natural gas by 1985.

In principle, the advice from his Cabinet Council on Natural Resources is sound. Decontrol would spur natural gas exploration and production. It would force consumers to conserve that fuel. And increased supplies would replace a sizeable amount of imported oil.

Reagan faces the tough decision because the Natural Gas Policy Act of 1978 is not working well. It was supposed to bring the prices of natural gas and oil in line by 1985. But Congress thought the price of oil would be $15 a barrel then, and it already has hit $35.

If nothing is done to the act, natural gas prices abruptly will more than double in 1985, jolting consumers and the economy. This argues in favor of Reagan and Congress agreeing on a creeping decontrol over the next three years, spreading out and cushioning the price shock.

There is no good alternative to decontrol. Natural gas is the only energy source whose price is fixed by the government, and this is unfair to producers who have to pay market rates for goods and services.

Reagan should be impelled toward decontrol by the success of his move last winter to free crude oil prices. It has touched off a boom in drilling and exploration, production is up a bit. Imports have dropped and, despite doomsayers, gasoline costs only rose a few cents.

There is a final reason the president should take the risk of ending price controls. This country probably contains vast undiscovered supplies of natural gas, enough in fact to move it toward energy independence. The best way of getting from here to there is letting the free market work.

---

[From the St. Louis Globe-Democrat, Aug. 12, 1981]

PHASE OUT NATURAL GAS CONTROLS

The myth that the government can somehow spare consumers from paying the full cost of energy still is widely held by many Americans.

Thus when President Ronald Reagan's top energy advisers are reported to have recommended unanimously a plan to phase out all controls on natural gas produced in the United States, the claim is quickly made that this could double natural gas prices by 1985.

Under present law only 40 percent of natural gas price controls would be phased out by Jan. 1, 1985. Reagan's advisers are said to favor phasing out 100 percent of natural gas controls by that date.

The government never should have gotten into the energy price-fixing business in the first place. Virtually all of the shortages and distortions began when Washington began imposing price ceilings on natural gas, and then repeated all of its mistakes in applying oil price controls.

It will be recalled that when President Reagan advanced the date for total decontrol of oil, the critics claimed that the price of a gallon of gasoline would skyrocket and keep on climbing. It did rise for a brief time but then leveled off and actually has been declining in recent months as supplies have caught up with demand.

The same thing can be expected if natural gas controls are phased out. Initially there will be a fairly sharp rise, but then production should rise to meet the demand and prices will begin to level off, perhaps within a year after the decontrol program begins.

No one yet has invented a way for providing an adequate supply of energy that doesn't require those who use it to pay the going (market) price. About all that government controls do is provide jobs for energy bureaucrats to juggle prices and think up unnecessary regulations and paperwork. Sooner or later the prices have to be raised to induce the needed production, but the consumers also get struck with paying the bill for the huge energy bureaucracy as well as the energy.●

## GARY HYMEL

## HON. PETER W. RODINO TR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. RODINO. Mr. Speaker, I want to join my colleagues in recognizing the dedicated service that Gary Hymel has given to the House of Representatives since 1965. For 15 years he has been a professional to be emulated by all staffers on Capitol Hill. Whenever Members of the House needed information, Gary did his best to provide it. His handling of the legislative issues and his responsiveness to the press earned him high marks with everyone who worked here.

Throughout his 16 years working first in the majority whip's office, then in the majority leader's office and then finally in the speaker's office, Gary took on all the tough issues for Speaker O'NEILL, and he always kept his cool. I greatly appreciated Gary's professionalism, good judgment and friendliness when I served as a whip and I know that many other Members have said the same. In short, Gary was more than an aide to Speaker O'NEILL—he was a man truly dedicated to the swift and effective functioning of the House of Representatives. I will miss him, but I wish him all the best as he joins the private sector.●

---

## TRIBUTE TO OUR HISPANIC HERITAGE

## HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 18, 1981*

● Mr. BARNES. Mr. Speaker, President Reagan proclaimed the third week in September as National Hispanic Heritage Week. Washington has witnessed in the past few days the gathering of national figures to commemorate the Hispanic tradition and achievements of the Hispanic community throughout the United States. As chairman of the Subcommittee on Inter-American Affairs, and as Representative of a district with a significant and active Hispanic community, I would like to add my own personal tribute to those Hispanics that have contributed the development of our Nation. This is a unique opportuntiy for all of us who follow issues affecting the Hispanic community to pause and reconsider the accomplishments and contributions of this prominent group and to learn more about the

needs and problems affecting Hispanic Americans.

According to the Census Bureau, the Hispanic population in the United States has grown by more than 60 percent in the last decade to nearly 15 million. The Hispanic community in itself is a melting pot of cultures and traditions. Composed of Cubans, Puerto Ricans, Chicanos, and other groups from Central and South America and the Caribbean, the Hispanic identity has surfaced to represent the common interests and traditions of this mosaic of people.

The result of this unique mixture of talents is that in all spheres of government and private life we can see examples of the political, economic, and social gains of Hispanic Americans.

In the politicial arena, more Hispanic figures are surfacing each day. Having had the pleasure of being invited to become an honorary member of the Hispanic Caucus, I would like to praise the work of our Hispanic colleagues here in Congress. I am talking about my good friends EDWARD ROYBAL, BALTASAR CORRADA, ROBERT GARCIA, KIKA DE LA GARZA, HENRY GONZALEZ, and MANUEL LUJAN. Other Hispanic figures that are receiving national recognition are Maurice Ferre, mayor of Miami, and Henry Cisneros, mayor of San Antonio. The hard-working Hispanic community is also becoming more prominent in organizing labor unions, participating in sports events, contributing personalities to the media and show business, and making inroads among the leaders of the business world.

Hispanics have proven that integration into the American mainstream can be achieved in conjunction with the preservation of a group's ethnicity. The rest of the population is also profiting from this unique mixture. Many of us have learned to enjoy the Hispanics' delightful and varied cuisine, their colorful arts, and their lively music.

But aside from the festivities, I feel that this occasion should also serve to create a greater awareness of the needs and problems of Hispanic Americans. I strongly believe that all of us, especially as Members of Congress, should make it our duty to learn more about and be more responsive to the important issues facing the Hispanic community. Some of the areas that I follow very closely include: Programs to deal with poverty; bilingual education and educational opportunities; equal employment opportunities; the impact of Federal budget cuts on social programs; immigration policies; social security; and the extension of the Voting Rights Act.

During this time of celebration and reflection I would like to commend especially the Hispanic Americans of Montgomery County, Md., who have greatly contributed to the progress of my district. I look forward to continuing to work closely with Hispanic Americans in the realization of all of our goals and objectives.●

## SOLIDARITY DAY

### HON. CHARLES E. SCHUMER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 18, 1981*

● Mr. SCHUMER. Mr. Speaker, I rise to express my strong support for the AFL-CIO/NAACP "Solidarity Day" demonstration to take place on September 19, 1981. The grassroots, rank-and-file demonstration will bring together labor, civil rights organizations, senior citizens groups, and numerous public interest groups to protest in one voice the Reagan administration's attack on vital social programs. The alliance of labor and civil rights organizations was responsible in recent past for the historic civil rights legislation, and tomorrow they will join again to reaffirm their historic commitment to social and economic justice, and to make demands for jobs, food, and housing.

The administration and this Congress which has recently passed a budget denying Government responsibility to meet the needs of the poor, aged, disabled, and working people of this country should be prepared to hear the voice of tomorrow's demonstrators. It is my hope that tomorrow's effort will remind legislators and all of our Nation's citizens that America's fundamental goals are social and economic justice for all American people.●

## MICHAEL V. DISALLE

### HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 18, 1981*

● Mr. RODINO. Mr. Speaker, I learned yesterday with great sadness that Michael V. DiSalle, a valued friend of many of us in this body, died in his sleep while on a visit to his beloved Italy.

Mike DiSalle devoted much of his life to serving not only the citizens of his home State of Ohio but also of the Nation. In Ohio he was a State legislator, the mayor of Toledo and the Governor. He understood well the problems of people and he was determined throughout his career to improve the quality of life for his constituents.

And, not the least of the many difficult tasks in his career, he served for 3 years in the Truman administration in the thankless job of Director of Price Stablization and then Administrator of Economic Stabilization.

For the last decade and a half Mike DiSalle had practiced law here in Washington, and to his death he remained a compassionate, concerned and extremely astute politician to whom others constantly looked for counsel.

In his lifetime, Mike DiSalle received many honors for the qualities that earned him so many friends and admirers: For his innovative ways, for his dedication to his principles, for his courage and for his decency.

He shall always be remembered for these virtues that guided his life. He was a brilliant and principled politican, a wise counselor, a fine lawyer. Above all else, he was a good and decent man.●

# SENATE—*Monday, September 21, 1981*

*(Legislative day of Wednesday, September 9, 1981)*

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Let us pray.

*Praise the Lord, all nations! Extol Him all peoples! For great is His steadfast love toward us; and the faithfulness of the Lord endures forever. Praise the Lord.*—Psalms 117.

*O give thanks to the Lord, for He is good; His steadfast love endures forever!*—Psalms 118: 1.

We thank Thee O God for Thy gracious providence in our lives. We thank Thee for our families, for our homes, our neighbors, and friends. We thank Thee for the high privilege of working in the Senate, for the faithful service of those who enable the Senators to fulfill their awesome responsibilities to the people.

Help us dear God never to take these privileges for granted or to presume upon the dedicated support of the staffs. Protect us against the seductive influences of privilege, position, prestige and power. Keep us mindful of our frailties, our need for each other, and especially our need for the loving support of spouses and children.

Guide us through this week that our labors may be productive of justice, equity and peace. Let our actions contribute to the general welfare and our lives demonstrate qualities of leadership which inspire confidence and trust. For Thy glory and the benefit of all, we pray. Amen.

## RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. The acting majority leader is recognized.

## THE JOURNAL

Mr. STEVENS. Mr. President, I ask unanimous consent that the Journal of the proceedings to date be approved.

The PRESIDENT pro tempore. Without objection, it is so ordered.

## THE FEDERAL EXECUTIVE PAY CAP

Mr. STEVENS. Mr. President, I wish to address the dilemma the pay cap has caused in the recruitment of qualified, competent executives for the Federal Government. The Government is finding it increasingly difficult to obtain the services of qualified individuals.

When we consider the losses in the executive ranks I have mentioned the past several days, the result is that many important functions of Government are being left in the hands of competent individuals, I am sure, but, nevertheless, those of caretakers. This type of void comes at a time when some very important decisions should be made in the departments and agencies.

I was most fortunate in my hearing on this issue last week to have appear as a witness, Congressman VIC FAZIO. Congressman FAZIO included in his testimony statistics from the Hay Associates, one of the leading management consultants in the field of compensation in the world, comparing the civil service pay of the U.S. Government to other national governments.

Hay Associates reported that in each country pay in the private sector exceeds pay in the public sector. However, in the United States, this difference was by far the largest, especially at the senior executive level.

Hay found that the median pay as of May 1, 1981, for private sector jobs comparable to SES positions averaged $71,688—or over $21,000 a year more than the pay cap for SES positions, which is $50,112.50.

Mr. President, I would like to list some of the average salaries of executives in the U.S. private sector who head major functional areas which Hay Associates found:

| | |
|---|---|
| Chief administrative officer | $71,700 |
| Controller | 67,000 |
| Head of computer operations | 74,000 |
| Head of engineering | 67,000 |
| Head of legal | 75,000 |
| Head of personnel | 70,100 |
| Head of purchasing | 77,400 |
| Head of research | 71,000 |

These salaries, of course, are for positions comparable to our SES members whose salaries are capped at $50,122.50.

Let me list for you some of the executive vacancies which we are in the labor marketplace competing to fill while facing this discrepancy in salary. I shall also list the important defense and nondefense functions these officials oversee. Remember that these are but a sample of our recent executive vacancies:

EXECUTIVE FUNCTIONS

1. Dpty Ass't to Secretary of Defense (Follow-up, Reports and Management). Principally in charge of projects with GAO geared to implement cost savings. Directs DOD reports on fraud, waste and abuse.

2. Technical Director, Space and Satellite Communications Office, USAF. Responsible for Air Force satellite and space communications systems. The incumbent is held solely accountable. "The incumbent is the focal point for the highest level of executive decisions related to specific space and satellite programs . . . for the Air Force."

3. Deputy Director, Submarine Logistics Division. Responsible for maintenance and logistics support, including modernization of all submarines in the Active Fleet & Inactive Ship Force. (Includes management of all logistics for the Trident Submarine.)

4. Director, Procurement Control & Clearance Division. Directly supervises entire procurement control and clearance division which includes the Missiles and Aircraft Group and the Ships and General Contracts Group. This job is the focal point in the Navy for bringing together procurement policy and practices.

5 Director of Finance, Central European Operating Agency. Financial advisor to agency responsible for management of international petroleum pipeline covering all central portions of Western Europe. Agency is also responsible to NATO for this system, and the Director participates in sensitive international negotiations concerning the system.

6. Principal Deputy Assistant to the Secretary of Defense. (Review and Oversight). No. 2 position to Executive No. 1 listed above.

7. Administrative Director, Arms Control & Disarmament Agency. Responsible for policies, procedures, controls, and procurement for the Agency. Directs a staff of 30 employees.

8. Deputy Chief, National Security Division, OMB. No. 2 in division overseas the division's work program, reviews agency requests for appropriations, etc.

9. Assistant Director for Telecommunications and Information Systems, Defense Logistics Agency. Directs the DOD data systems that backup department wide logistics. Directs 130 employees.

DEFENSE AND NONDEFENSE FUNCTIONS

1. Director, Office of International Investment, Dept. of Treasury. Formulates Treasury Dept. policy on international investments and related issues.

2. Director, National Heart, Lung, and Blood Institute. Provides leadership for national program in the field; fosters research and investigations.

3. Director, Office of International Energy Policy, Dept. of Treasury. Formulates and implements Treasury's policy and positions on questions related to international energy policy, Treasury's participation on international energy matters in international fora and bilateral relations.

4. Chief, Analysis and Computation Division, NASA. Directs a staff of 125 in applied research, flight simulations, theoretical and experimental aerospace research.

5. Dpty Assist' U.S. Trade Representative, Exec. Office of the President. Deputy is in charge of trade policy planning, Economic Policy Support Group; also participates directly in international monetary and financial policy issues.

6. Chief, Methodology and Data Branch, Division of Risk Analysis, U.S. Nuclear Regulatory Commission. Directs branch managing reactor safety research programs. Major point of contact with NRC staff, contractors, DOE labs and field offices, foreign research programs.

7. Director, Space Science Laboratory, Geo. Marshall Flight Center, NASA. Assists in development of scientific objectives and spacecraft technology for flight missions. Initiates

and conducts supporting research in wide range of related areas.

I would sum up my statement by repeating from Congressman FAZIO's testimony a quote made by the Honorable Otto Regenspurger of the West German Parliament when discussing our Government's executive pay cap:

A Nation that cannot afford to pay its top executives what they deserve should not expect to go forward economically.

Mr. President, I call to the attention of the Senate that the list is a series of vacant executive positions that are going to have substantial impact upon our ability to carry out the President's program.

## RECOGNITION OF SENATOR WALLOP

Mr. STEVENS. Mr. President, I yield the remainder of my time to the distinguished Senator from Wyoming, who has a special order for later.

The PRESIDENT pro tempore. The Senator from Wyoming is recognized.

## REVIEW OF TAPES AND RECORDINGS IN THE MATTER OF SENATOR WILLIAMS

Mr. WALLOP. Mr. President, I thank the acting majority leader. Each day this week, it is my intention to remind Senators of the twice-a-day viewings, on Monday, Wednesday, and Friday, of the television tapes and wire recordings in the matter of Senator WILLIAMS. It can be only fair, both to Senator WILLIAMS and to the Senate itself, in its ultimate reputation as the body of all Senators, that we treat this matter with the care, concern, and respect that it deserves. We are going to meet twice today at 9:15 and 2:15. The presentation will take some 3 hours 20 minutes of Senators' time. It is critical that these tapes be viewed.

Mr. President, it is my suggestion that Senators view first the tapes and then commit themselves to the study of the proceedings and the report of the Ethics Committee. Again, I say that any Senators who have questions may refer them to the committee staff, which will be present at the viewings, or we shall make available to any Senators who want them the wisdom and advice of the special counsel as to the nature of the proceedings, or as to any other questions that Senators may have.

This is going to take more than a small amount of time of Senators and the judgment that we have to make, at the time when that comes before us as an issue, is a serious judgment. It affects the life and professional career of Senator WILLIAMS. It affects the life and professional character of each and every Senator because, as the Senate judges, so shall it be judged by the public. I urge Senators to take advantage of these viewings. They are expensive and cannot be, in all probability, scheduled at whim beyond the six showings that we have now put together.

If Members will look in the RECORD of September 15, they will see the schedule that takes place within those 3 hours. It may not be necessary to commit the full 3 hours at any one time. One can take an hour and a half, 2 hours, an hour, and stop at one point and then go back in and enter them at another point. We have tried to find as many hours as possible to make it achievable for Senators to view them all.

Mr. President, I urge my colleagues from the bottom of my heart to take the time. The room is 457 in the Russell Building every showing day. It has been setup for the convenience of Members. I urge that the Senators take advantage of it because the issue before us is serious and in every respect demands the attention of the Senate.

Mr. President, I thank the acting majority leader and yield back the remainder of my time.

## ORDER OF PROCEDURE

Mr. STEVENS. Mr. President, I yield back the remainder of my time. The distinguished Senator from Wisconsin will manage the minority leader's time at this time.

## RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER (Mr. ARMSTRONG). The Senator from Wisconsin is recognized.

Mr. PROXMIRE. Mr. President, I thank the distinguished acting majority leader.

## THE POLITICS OF THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, the Genocide Convention has long been a target of those groups which specialize in alarmism and scare tactics.

I constantly receive phone calls from people raging about the Genocide Convention. They claim it will usurp our constitutional protections, allow American citizens to be tried by international courts, subject our soldiers to trial for genocide, and even lead to the confiscation of property in this country.

Any reasoned reading of the Genocide Convention clearly demonstrates that these charges are light-years from the truth. Legal and constitutional scholars from a wide range of backgrounds and ideological orientations have lined up behind the convention. In addition, numerous professional, civic, and religious organizations support it.

Unfortunately, vocal, though unfounded, opposition expressed by those who are paranoid about the notion of international law itself has so far prevailed. Why has this been the case? I think it has to do with one of the basic characteristics of our democratic system. A highly vocal minority can sometimes prevail over a relatively complacent majority.

Why is this majority complacent? I think it may be that they consider the need for the Genocide Convention to be self-evident, and thus they have often failed to sufficiently express their views.

Therefore, the convention has not been ratified, even though most Americans, if they are aware of the treaty, are in favor of it. We must overcome our own apathy and firmly establish our commitment to human rights around the world. We must drown out the shouts of the tiny minority with the voice of the great majority. We must ratify the Genocide Convention.

## BRIBERY, RAINMAKERS, AND THE LAW

Mr. PROXMIRE. Mr. President, last Thursday, the New York Times in an editorial, made the case for prohibiting bribery both at home and abroad and for not softening the bribery law on the books.

In 1977, in the wake of scandals which rocked our foreign policy in Japan, the Netherlands, and Italy, Congress passed the Foreign Corrupt Practices Act prohibiting the bribery of foreign officials by American companies and placing reasonable accounting requirements on companies to stop slush fund bookkeeping.

Mr. President, no case has been made for amending the foreign bribery law. Exports have not been hurt and our foreign relations have not been sullied by bribery.

I hope every Senator will read and reflect upon this New York Times editorial. Amending the bribery law is serious business. In the words of the Times:

The bribery statute has proved to be strong and useful soap. There's no need for more water.

I ask unanimous consent that the New York Times editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

BRIBERY, RAINMAKERS, AND THE LAW

The 1977 law forbidding American business to bribe foreign officials has probably saved the United States untold embarrassment.

Since the law was passed, there have been none of the once-common revelations of American companies using million-dollar slush funds to pay off foreign officials and win sales. By making such bribery a criminal offense, threatening executives with jail and establishing tough new accounting requirements, the law has changed the way Americans do business abroad and for the better.

Then why is there such a rush to dilute it?

This week, Republicans on the Senate Banking Committee, cheered on by the Reagan Administration, will try to finish a bill to do just that. The changes they want would again allow businessmen to bribe officials abroad, as long as they were careful to launder the payments through agents. Accounting standards would be changed, too, to make it easy again for companies to hide questionable payments abroad.

All of this would be done, according to Bill Brock, the President's special trade representative, to clean up ambiguities in the statute that have needlessly hindered exports.

Concerns about the effect on exports were voiced speculatively when the act was first introduced. And the statute has probably depressed overseas sales to some extent—but that is by no means obvious. For all its recent strength, the dollar has been weak relative to other currencies in the last few years, and thus total exports have increased enormously since the foreign bribery act was passed in 1977. Exports might well have gone up more if the law contained fewer ambiguities. But if so, that's an argument for making it clear, not weaker. Those who favor dilution have failed to make their case.

A serious appraisal of the bribery law might have sensibly begun by examining whether any such law makes sense in the first place. But that is a question the Administration and its friends in the Senate have chosen not to face.

What is the difference, say, between the payment of illegal bribes to top foreign officials and the payment of legal fees to Washington "rainmakers"—those sophisticated lawyers and lobbyists who can produce results for their clients in Washington, or at least seem to, in the form of lucrative Federal contracts?

If one kind of influence peddling is legal at home, isn't it hypocritical to declare another kind illegal abroad? Theoretically, there may not be much difference. But the fact that it is sometimes hard to draw the line between the distasteful and the illegal is a poor reason to abandon the effort. Otherwise, not even domestic bribery laws would stand.

And there is a fairly clear test to apply. The evil to look for is whether money has been passed to Government officials so they will favor the giver, if so, that is bribery, whether at home or abroad. Americans ought to oppose the one as surely as the other. That some foreign governments do not enforce their own laws against bribery, or do so unevenly, is hardly a validation of crime.

If there are costs deriving from the foreign bribery law—if it means lost export potential—let that be demonstrated. If the law is needlessly vague, let it be adjusted. But the foreign bribery statute has proved to be strong and useful soap. There's no need for more water.

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. STEVENS. If the Chair will withhold that, I have a request, Mr. President.

## ROUTINE MORNING BUSINESS

Mr. STEVENS. Mr. President, is there an order for a period now for the transaction of routine morning business in which Senators may speak?

The PRESIDING OFFICER. There is no order.

Mr. STEVENS. I ask unanimous consent that there now be a period for the transaction of routine morning business during which Senators may speak for not to exceed 5 minutes and that the period not last beyond 10 a.m., at which time the Senate will commence the consideration of the nomination of Sandra O'Connor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## INTEREST RATES MUST BE REDUCED

Mr. HEFLIN. Mr. President, I speak in support of Senate Joint Resolution 104, offered by the senior Senator from Montana, Senator MELCHER. I am pleased to be jointly sponsoring this important measure.

Interest rates continue to soar in the 20-percent range, causing severe damage to the economy and to the economic recovery program that the Senate has adopted.

The problem of high interest rates is the most serious problem facing the American economy today. Because of current high interest rates, housing starts are at record lows, business bankruptcies are at record highs, and unemployment is on the rise.

Because of high interest rates, we may lose an entire generation of farmers. Many farmers are being forced to leave their land because they cannot afford to borrow enough money to plant their crops. Young, aspiring farmers are barred from getting a start in their chosen career because the price of borrowing money is simply too dear.

Because of high interest rates, millions of young couples cannot afford to purchase their own homes and the resulting slump in the housing industry is forcing hundreds of thousands of construction workers into unemployment.

Mr. President, high interest rates are seriously threatening any chance for economic recovery. As did most Senators, I strongly supported the economic revitalization program, and I hope and pray that it will be successful. But if interest rates are not reduced—and reduced quickly and significantly—this plan that we all worked so hard for simply cannot work.

I fully well realize that no one—not Congress, not the President, nor even the Federal Reserve Board itself—can wave a magic wand and cause a reduction of interest rates. However, there are steps that can and must be taken that will reduce interest rates.

This Senate joint resolution instructs President Reagan to begin immediate consultations with the Board of Governors of the Federal Reserve System for the purpose of modifying the Federal Reserve's tight money policy that is the primary cause of high interest rates.

It has been said many times before—in fact, I have said it on a number of occasions myself—that the Federal Reserve's tight money policy is not working. Instead of dampening inflation, it is literally breaking the back of the American economy and is effectively blocking any economic recovery.

The consultations called for in this resolution will include modifications concerning easing reserve requirements and lowering the discount rate for member banks. Further, the consultations should include controlling the Federal Open Market Committee's activities which reduce the money supply and push interest rates up.

The time has come to take immediate action to bring interest rates down.

Mr. President, I believe this resolution, which calls upon President Reagan to take immediate action to bring about a dramatic lowering of interest rates, is an important first step in the right direction.

I commend the senior Senator from Montana for his leadership on this crucial issue, and I urge that Senate Joint Resolution 104 be passed rapidly.

## SOUNDS OF SILENCE

Mr. SCHMITT. Mr. President, the many thousands of persons who came to the Nation's Capital Saturday for a "Solidarity Day" demonstration against the economic policies of the Reagan administration, came, I am sure, with a dedicated purpose. While I personally do not agree with that purpose, I certainly agree with the freedom of assembly and freedom of speech that makes peaceful disagreement the symbol of our great Nation.

We all must continue to examine any unanticipated impacts of economic change and take specific information on such impacts into account as we consider the various measures before us. Such information will always be welcomed and useful.

However, I am afraid the stated objective of Saturday's assemblage has been lost in the rhetoric of certain leaders of that assemblage and certainly distorted by others.

The supposed labor solidarity day turned into an outpouring of the same, tired rhetoric of the past. It warrants mentioning that last November 4, the American electorate repudiated, in a landslide election, the policies of the past; the tax and tax and spend and spend policies of past leadership got us into the economic mess we are currently in. Forty-four States out of 50 swept Ronald Reagan into the White House and sent former President Carter back to Georgia. The voters also changed the leadership and control of the U.S. Senate and gave the Republican Party and conservative philosophies and principles strong gains in the House of Representatives.

This new leadership has cut taxes, has reduced the growth of Federal spending and borrowing, has made important strides toward cutting the fat and fraud and abuse from various Federal programs and agencies and intends to do

more. The American people know how to economize and still keep essentials going, and so does this leadership.

Last February, President Reagan said:

I regret to say that we're in the worst economic mess since the Great Depression.

Little has changed as yet to change the truth of his remarks. Since that time, President Reagan has taken steps, with the assistance and support of Congress, to start getting us out of that mess. The speakers last Saturday were strangely silent on the fact that the inflation rate in 1980 was 13 percent and today it is 7 percent. The speakers last Saturday were strangely silent on the fact that the unemployment rate is lower today than at this same time last year. Even interest rates remain high largely because the Federal Government continues to have to borrow to finance the excesses of past administrations and Congresses. The American people have rejected runaway spending, runaway taxation, runaway regulation and the reckless economic policies of decades of Democratic leadership.

The overwhelming majority of the American people, included labor rank and file, realize that the solution to inflation, high interest rates, and our other economic problems do not lie in the rhetoric of the past heard on a sunny Saturday afternoon. The overwhelming majority of the American people know the cure. Less Government, not more, is part of the cure. More enterprise, not less, is part of the cure. Growth, not stagnation, is the whole cure.

The New York Times noted today, in commenting on the Saturday demonstration:

None of the speakers who addressed the throngs listed specific steps. They turned more to the past, the days of civil rights and anti-war protests, than to the future.

Mr. President, also on Saturday, an estimated three quarters of a million people filled New York City's Central Park to listen to a concert by Simon and Garfunkel—three times the estimated number who filled Washington's Mall to listen to the tired old rhetoric of the past.

The New York audience listened to a beautiful and haunting song entitled "Sounds of Silence." The Washington audience also heard not so beautiful "Sounds of Silence" about the future from leaders of the demonstration.

These "Sounds of Silence" do not represent the thinking of the vast majority of the American people. These "Sounds of Silence" do not represent the courage, the actions, and the programs of the new leadership in Washington. These "Sounds of Silence" do not represent New Mexicans or the American people.

## CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, under the order of the Senate the time for the conduct of morning business has been completed.

## EXECUTIVE SESSION

## NOMINATION OF SANDRA DAY O'CONNOR TO BE AN ASSOCIATE JUSTICE OF THE SUPREME COURT OF THE UNITED STATES

The PRESIDING OFFICER. Under the previous order, the hour of 10 a.m. having arrived, the Senate will now go into executive session to consider the nomination of Sandra Day O'Connor of Arizona to be an Associate Justice of the Supreme Court.

Time for debate on this nomination is limited to 4 hours equally divided and controlled by the chairman of the Judiciary Committee and the ranking member or their designees, with 30 minutes of the majority's time to be under the control of the Senator from North Carolina (Mr. HELMS).

The Senator from South Carolina is recognized.

Mr. THURMOND. Mr. President, today is truly an historic occasion—the Senate of the United States is considering for the first time in the history of our Nation the nomination of a woman to serve as an Associate Justice of the Supreme Court of the United States.

It has been the privilege of the Committee on the Judiciary, and my privilege as its chairman, to meet frequently with Judge Sandra Day O'Connor and to consider and examine in detail her qualifications for the high post to which she has been named. The Committee on the Judiciary undertook a solemn duty to the Senate and to the country when it began its inquiry. The committee has discharged that responsibility. Now, the entire Senate will participate in the ultimate decision.

I am confident that the Senate today will be guided by our highly favorable recommendation.

After careful deliberation, the committee determined and has reported to the Senate that Judge O'Connor is extraordinary well qualifed to serve on the Supreme Court. Our decision was reached after 3 days of intense examination, both of the nominee and of a broad cross section of witnesses.

In the first instance, it is notable that Judge O'Connor enjoyed the full support of the entire congressional delegation of her home State of Arizona, the support of the Governor of the State of Arizona, the support of a large delegation of Arizonans from the Arizona House and Senate, and the support of many distinguished members of the bench and the bar. That support bore witness to her outstanding career and to bipartisan and wide-based respect for her ability. Yet, much more was required.

When the committee began its deliberations, we were keenly aware that any appointment to the Supreme Court is unique because it grants life tenure and because it vests great power in an individual not held accountable by popular election. Accordingly, we reflected carefully upon the qualifications necessary for one to be an outstanding jurist and those essential to the prudent exercise of power by one relatively unchecked in its use. Each member of the committee sought to satisfy himself that this nominee possessed those qualifications. Collectively, we then determined that this nominee does, indeed, meet those high standards.

We sought, first, a person of unquestioned integrity—honest, incorruptible. and fair.

We sought a person of courage—one who has the fortitude to stand firm and render decisions based not on personal beliefs but, instead, in accordance with the Constitution and the will of the people as expressed in the laws of Congress.

We sought a person learned in the law—for law in an advanced civilization is the most expansive product of the human mind and is, of necessity, extensive and complex.

We sought a person of compassion—compassion which tempers with mercy the judgment of the criminal, yet recognizes the sorrow and suffering of the victim; compassion for the individual but, also, compassion for society in its quest for the overriding goal of equal justice under law.

We sought a person of proper judicial temperament—one who will never allow the pressures of the moment to overcome the composure and self-discipline of a well-ordered mind; one who will never permit temper or temperament to impair judgment or demeanor.

We sought a person who understands and appreciates the majesty of our system of government—a person who understands that Federal law is changed by Congress, not by the Court; who understands that the Constitution is changed by amendment, not by the Court; and who understands that powers not expressly given to the Federal Government by the Constitution are reserved to the States and to the people, not to the Court.

In Judge O'Connnor, we believe we found such a person.

During the course of extensive questioning by the committee, Judge O'Connor displayed great intellectual honesty and a degree of fairness that reflected her balanced approach to difficult issues.

She was firm in her insistence that personal belief could not outweigh the mandate of the Constitution or of the law.

She demonstrated remarkable knowledge of constitutional law and of the judicial process.

She displayed consistently an understanding of the measured and compassionate use of judicial power.

She never allowed the intense scrutiny by the committee or the pressure of news media attention to overcome her composure and her calm demeanor.

In every instance, she established clearly that she understands and appreciates the carefully balanced division of authority envisioned by our forefathers when they created our federal system of government.

Judge O'Connor is the first nominee to the Supreme Court in 42 years who has served in a legislative body. Her experience as majority leader in the Arizona State Senate will help her, and through her the other members of the Court, in recognizing and observing the separation of legislative, executive, and judicial powers mandated by the Constitution.

Judge O'Connor is also the first nominee to the Supreme Court in the past 24 years who has served previously on a State court. That experience gives great hope that she will bring to the Court a greater appreciation of the division of powers between the Federal Government and the governments of the respective States.

I must add, finally, that I found Judge O'Connor to be a lady of great personal warmth and a person who is possessed of a friendly and open character in the best tradition of our country.

She has the talents and qualities to make an important contribution to the work of our highest Court and to the vitality and history of our great Nation.

It is my opinion that Judge O'Connor will fulfill well the trust reposed in her by those who recommended her, by the President who nominated her, and by the Judiciary Committee which approved her.

I commend the President for his fine choice and urge the Senate to consent to her nomination.

Mr. President, I ask unanimous consent that the questions propounded by the questionnaire of the Judiciary Committee, which mainly constitutes a résumé, follow my remarks on the nomination of Judge Sandra J. O'Connor.

The PRESIDING OFFICER. Without objection, it is so ordered.

There being no objection, the questionnaire was ordered to be printed in the RECORD, as follows:

I. BIOGRAPHICAL INFORMATION (PUBLIC)

1. Full name (include any former names used). Sandra Day O'Connor.

2. Address: List current place of residence and office address(es). List all office and home telephone numbers where you may be reached. Office: Arizona Court of Appeals, State Capitol, Phoenix, Arizona 85007, (602) 255-4828; Home: 3561 East Denton Lane, Paradise Valley, Arizona 85253, (602) 954-6356.

3. Date and place of birth. March 26, 1930—El Paso, Texas.

4. Are you a naturalized citizen? No.

5. Marital status (include maiden name of wife or husband's name). List spouse's occupation, employer's name and business adress(es).

Married. John Jay O'Connor III. Attorney. Fennemore, Craig, von Ammon & Udall, 100 West Washington Street, Phoenix, Arizona 85003.

6. Education: List each college and law school you have attended, including dates of attendance, degrees received, and dates degrees were granted. Stanford University, 1946–1952; A.B. 1950; LL.B. 1952.

7. List (by year) all business or professional corporations, companies, firms or other enterprises, partnerships, institutions and organizations, nonprofit or otherwise, including farms, with which you were connected as an officer, director, partner, proprietor or employee since graduation from college.

Professional, Legislative and Judicial Activities: 1952–53 Deputy County Attorney, San Mateo County, California. General Civil Work for County agencies and schools.

1954–57 Civilian Attorney for Quartermaster Market Center, Frankfurt/Main, W. Germany, handling contracts and bids procedures for acquisition and disposal of goods for the armed forces in Europe.

1958–60 Private practice of law in Maryvale, Arizona, handling wide variety of matters including contracts, leases, divorces, and criminal matters.

1961–64 Primarily engaged in care of my three small children. Handled some bankruptcies as a receiver, and served as a juvenile court referee.

1965–69 Assistant Attorney General, Arizona, representing various state officers and agencies writing opinions for Attorney General; handling some litigation. Approximately three months were spent on assignment as administrative assistant at Arizona State Hospital.

1969–75 State Senator, Arizona State Senate.

1975–79 Judge, Maricopa County Superior Court.

1979 to date Judge, Arizona Court of Appeals.

Business Affiliations:

c. 1957 to date Member, Board of Directors, Lazy B Cattle Co., an Arizona Corporation. It is a closely held corporation, owned by members of my family. I served for several years during the 1950's and 1960's as secretary.

1971–74 Member, Board of Directors, First National Bank of Arizona.

1975–79 Member, Board of Directors, Blue Cross/Blue Shield of Arizona, a non-profit corporation.

Partnerships:

My husband is a partner in Fennemore, Craig, von Ammon and Udall, the predecessor of the present professional corporation which is now engaged in the practice of law.

My husband is a general partner in Westside Apartments Co. and Westside Investments, which are essentially now passive investments.

My husband and I presently have limited partnership interest in Alvernon Center One, Fourth Geostatic Energy, Orchid Leasing Associates and Virden Valley Investments, Ltd.

By virtue of the community property laws of Arizona, I have an undivided one-half interest in all of the partnerships listed.

Civic Activities:

Member, National Board of the Smithsonian Associates, 1981.

President, Member, Board of Trustees, The Heard Museum, 1968–74, 1976 to date.

Member, Salvation Army Advisory Board—1975 to date.

Member, Board of Directors, YMCA (Maricopa County), 1978.

Member, Vice President, Soroptimist Club of Phoenix, 1978.

Member, Board of Visitors, Arizona State University Law School, 1981.

Member, Liaison Committee on Medical Education, 1981.

Advisory Board and Vice President, National Conference of Christians and Jews, Maricopa County, C. 1977, to date.

Member, Board of Directors, Stanford Club of Phoenix, various times since 1960.

Member, Board of Trustees Stanford University, 1976 to 1980.

Member, Stanford Associates.

Former member, Board of Directors, Phoenix Community Council.

Former 1st and 2nd Vice President, Phoenix Community Council.

Former member, Board of Directors and Secretary, Arizona Academy, 1969–75.

Former member, Board of Junior Achievement Arizona, 1975–79.

Former member, Board of Directors of Friends of Channel 8, 1975–79.

Former member, Board of Directors, Phoenix Historical Society, 1974–78.

Former member, Citizens Advisory Board on Blood Services, 1975–77.

Past President, Junior League of Phoenix, Inc. c. 1966, and member since c. 1960, Member, Board of Directors during 1960's.

Former member, Board of Directors, Golden Gate Settlement, 1960–62.

Former member, Board of Trustees, Phoenix County Day School, 1960–70.

Former member, Maricopa County Juvenile Court Study Committee.

Former member, Board of Directors Blue Cross/Blue Shield of Arizona, 1975–79.

Memberships in Professional Organizations:

American Bar Association.

State Bar of Arizona.

State Bar of California.

Maricopa County Bar Association.

Chairman, Maricopa County Lawyer Referral Service.

Arizona Judges' Association.

National Association of Women Judges.

Arizona Women Lawyers Association.

Chairmanships of Professional Committees and Memberships on Significant Professional Committees:

Member, Anglo-American Legal Exchange 1980.

Chairman, Arizona Supreme Court Committee to Reorganize Lower Courts, 1974–75.

Chairman, Maricopa County Bar Association Lawyer Referral Service, 1960–62.

Member, State Bar of Arizona Committees on Legal Aid, Public Relations, Lower Court Reorganization, Continuing Legal Education.

Juvenile Court Referee, 1962–64.

Chairman, Maricopa County Juvenile Detention Home Visiting Board, 1963–64.

Chairman, Maricopa County Superior Court Judges' Training and Education Committee, 1977–79.

Government Activities:

State Senator, State of Arizona 1969–75. Initially appointed and then elected to two two-year terms; Republican Precinct Committeeman c. 1960–70.

Assistant Attorney General, Arizona, 1965–69. Appointed.

Deputy County Attorney, San Mateo County, California, 1952–53. Appointed.

Member, National Defense Advisory Committee on Women in the Services, 1974–76.

Member, Arizona State Personnel Commission, 1968–69.

Vice Chairman, Select Law Enforcement Review Commission, 1979–80.

Member, Maricopa County Board of Adjustments and Appeals, 1963–64.

Member and on Faculty, Arizona Committee Robert A. Taft Institute of Government.

As a State Senator I served as chairman of the State, County and Municipal Affairs Committee, on the Legislative Council, on the Probate Code Commission, and the Arizona Advisory Council on Intergovernmental Relations.

Co-Chairman, Arizona Committee to Reelect the President, 1972.

Former Republican Precinct Committeeman, District-Chairman & member County & State Committees, 1961–68.

Member, County Board of Adjustments and Appeals, 1963–64.

Member, Governor Fannin's Committee on Marriage and Family Problems c. 1962

and his Committee on Mental Health c. 1964.

Juvenile Court Referee c. 1962–65.

Member, Judicial Fellows Commission, August 1981.

Member, Arizona Law Enforcement Review Commission, 1979–80.

Member, Arizona Criminal Code Commission, 1974–76.

Member, Mayor's Committee, 1980.

8. Military Service: Have you had any military service? If so, give particulars, including the dates, branch of service, rank or rate, serial number and present status.

No military service.

9. Honors and Awards: List any scholarships, fellowships, honorary degrees, and honorary society memberships that you believe woud be of interest to the Committee.

Phoenix Advertising Club "Woman of the Year", 1972.

National Conference of Christians and Jews Annual Award, 1975.

Commencement Speaker, Arizona State University, 1974.

Participant and Speaker, American Assembly, Arden House, 1975.

Distinguished Achievement Award, Arizona State University, 1980.

10. Bar Asociations: List all bar associations, legal or judicial related committees or conference of which you are or have been a member and give the titles and dates of any offices which you have held in such groups.

See Exhibit A.

11. Other Memberships: List all organizations to which you belong that are active in lobbying before public bodies. Please list any other organizations to which you belong, (e.g. civic, education, "public interest" law, etc.) which you feel should be considered in connection with your nomination.

Organizations to which I formerly belonged or to which I now belong are listed in Exhibit A.

12. Court Admission: List all courts in which you have been admitted to practice, with dates of admission. Give the same information for administrative bodies which require special admission to practice.

Supreme Court of California, 1952.

Supreme Court of Arizona, October, 1957.

U.S. District Court, San Francisco, California, 1952.

Ninth Circuit Court of Appeals, 1952.

U.S. District Court, Phoenix, Arizona, 1957.

13. Published Writings: List the titles, publishers and dates of books, articles, reports, or other published material you have written. You may also list any significant speeches which you feel may be of interest to this Commitee.

My published writings include the opinions I have written as a member of the Arizona Court of Appeals.

"Trends in the Relationship Between the Federal and State Courts From the Perspective of a State Court Judge," Volume 22, William & Mary Law Review Number 4, Summer 1981.

In 1969, I wrote a booklet for the Arizona Attorney General outlining the powers and duties of public officers and employees in Arizona. I have written several articles for the "Arizona Weekly Gazette", such as "Lower Court Reorganization Can Provide Single Unified Trial Court" on April 29, 1975, and I also wrote a comment in the Stanford Law Review in 1952.

14. Health: What is the present state of your health? List the date of your last physical examination. Excellent. June 1981.

15. Judicial Office (if applicable): State (chronologically) any judicial offices you have held, whether such position was elected or appointed, and a description of the jurisdiction of each such court.

1975–79 Judge, Maricopa County Superior Court. Elected. The Superior Court is the trial court of general jurisdiction.

1979 to date Judge, Court of Appeals, State of Arizona. Appointed. The Court of Appeals is the intermediate court of appeals in Arizona.

16. State (chronologically) any public offices you have held, other than judicial offices, including the terms of service and whether such positions were elected or appointed. State (chronologically) any unsuccessful candidacies for elective public office.

See Exhibit A.

I have never been an unsuccessful candidate for elective public office.

Former member, Board of Directors, Golden Gate Settlement, 1960–62.

Former member, Board of Trustees, Phoenix County Day School, 1960–70.

Former member, Maricopa County Juvenile Court Study Committee.

Former Member, Board of Directors Blue Cross/Blue Shield of Arizona, 1975–79.

---

III. GENERAL (PUBLIC)

1. Please discuss your views on the following criticism involving "judicial activism."

The role of the Federal judiciary within the Federal government, and within society generally, has become the subject of increasing controversy in recent years. It has become the target of both popular and academic criticism that alleges that the judicial branch has usurped many of the prerogatives of other branches and levels of government. Some of the characteristics of this "judicial activism" have been said to include:

a. A tendecy by the judiciary toward problem-solution rather than grievance-resolution;

b. A tendency by the judiciary to employ the individual plaintiff as a vehicle for the imposition of far reaching orders extending to broad classes of individuals;

c. A tendency by the judiciary to impose broad, affirmative duties upon governments and society;

d. A tendency by the judiciary toward loosening jurisdictional requirements such as standing and ripeness; and

e. A tendency by the judiciary to impose itself upon other institutions in the manner of an administrator with continuing oversight responsibilities.

The Constitution itself establishes the guiding principle of separation of powers in its assignment of legislative power to Congress in Article I, executive power to the President in Article II, and judicial power to the Supreme Court in Article III. This principle requires the federal courts scrupulously to avoid making law or engaging in general supervision of executive functions. As Justice Frankfurther wrote in *FCC* v. *Pottsville Broadcasting Co.*, 309 U.S. 134, 146 (1940), "courts are not charged with general guardianship against all potential mischief in the complicated tasks of government."

The function of the federal courts is rather to resolve particular disputes properly presented to them for decision. In this regard, the jurisdictional requirements that a true "case or controversy" exist and that the plantiff have "standing" help guarantee that the court does not transgress the limits of its authority. The separation of powers principle also requires judges to avoid substituting their own views of what is desirable in a particular case for those of the legislature, the branch of government appropriately charged with making decisions of public policy. To quote Justice Frankfurter again, Justices must have "due regard to the fact that [the] Court is not exercising a primary judgment but is sitting in Judgment upon those who also have taken the oath to observe the Constitution and who have the responsibility for carrying on government." *Joint Anti-Fascist Refugee Committee* v. *McGrath*, 341 U.S. 123, 164 (1951) (concurring opinion).

The fact that federal judges are restricted to deciding only the particular case before them and are not given a broad license to reform society does not mean that general wrongs go unrighted. As Justice Holmes remarked, "it must be remembered that legislatures are ultimate guardians of the liberties and welfare of the people in quite as great a degree as the courts." *Missouri, Kansas & Texas Railway Co.* v. *May*, 194 U.S. 267, 270 (1904).

In the case just cited, Justice Holmes was referred to a state legislature, and our federal system requires the federal courts to avoid instrusion not only on the Congress and the Executive but the states as well.

Judges are not only not authorized to engage in executive or legislative functions, they are also ill-equipped to do so. Serious difficulties arise when a judge undertakes to act as an administrator or supervisor in an area requiring expertise, and judges who purport to decide matters of public policy are certainly not as attuned to the public will as are the members of the politically accountable branches. In sum, I am keenly aware of the problems associated with "judicial activism" as described in the preceding question, and believe that judges have an obligation to avoid these difficulties by recognizing and abiding by the limits of their judicial commissions.

2. What actions in your professional and personal life evidence your concern for equal justice under the law?

In my judgment, the record of a judge will reflect a commitment to equal justice under the law if the judge applies the law even handedly to those who come before the court. The essence of equal justice under the law, in my view, is that neutral laws be applied in a neutral fashion. I believe that my judicial record as a trial of appellate judge attests to this commitment.

As a legislator I worked to equalize the treatment of women under state law by seeking repeal of a number of outmoded Arizona statutes. I developed model legislation to let women manage property they own in common with their husbands. I also successfully sought repeal of an Arizona statute that limited women to working eight hours per day and backed legislation equalizing treatment of men and women with regard to child custody.

As an attorney, I feel a professional obligation to help provide the poor with access to legal assistance and to the courts. I have worked toward this goal through my association with the Maricopa County Bar Association Lawyer Referral Service, of which I was Chairman from 1960 through 1962, and through service on the Arizona State Bar Association Committee on Legal Aid.

I have been concerned with the rights of those who are cared for by the state. From 1963 to 1964 I was Chairman of the Maricopa County Juvenile Detention Home Visiting Board and I have served as a member of the Maricopa County Juvenile Court Study Committee. I acted as a Juvenile Court Referee in various cases between 1962 and 1964. I participated as a panel member in an Arizona Humanities Commission Seminar on law as it relates to mental health problems.

My concern for fostering understanding among disparate groups within my community led to work on the Advisory Board of the Arizona Chapter National Conference of Christians and Jews. In 1975 I received an award for services in human relations from the National Conference of Christians and Jews.

I have served on the Advisory Board of the Salvation Army in Maricopa County, and as chairman of its Senior Citizen's Council. The Senior Citizen's Council operates a very successful center for low income elderly persons, and provides meals as part of the program. It is also constructing a residential facility for the low income elderly.

Through the Heard Museum in Phoenix, as a Trustee and its President, I have worked to foster and encourage understanding and communication with the several Indian tribes and the native Americans in Arizona through various programs and projects.

As a legislator I helped develop amendments to the mental health commitment laws designed to protect the rights of the mentally ill.

I also worked successfully to obtain state facilities for the mentally retarded in Maricopa County, and to improve Arizona's laws for the mentally retarded. I succeeded in obtaining legislation to convert a relatively unused state tuberculosis hospital to a hospital for crippled children.

Mr. GOLDWATER. Will the Senator yield?

Mr. THURMOND. I am very pleased to yield to the distinguished Senator from Arizona (Mr. GOLDWATER).

Mr. GOLDWATER. I thank my friend from South Carolina.

(Mr. QUAYLE assumed the chair.)

Mr. GOLDWATER. Mr. President, during the happy, long years of my life, I have known many moments of great pride, moments that I will not relate here, but they are imbedded deep in the recesses of my mind. Today we are voting on Judge Sandra O'Connor, born in the State of Arizona, raised on a cattle ranch and now being admitted as the first woman to ever sit on the Supreme Court of our land.

Judge O'Connor is not just a good lawyer, not just a good judge, nor is the fact that she was an outstanding legislator entered into this. She was born on the land of the West, she grew up on that land, on a cattle ranch, and her feeling for the land of what we call the Southwest, and particularly Arizona, has grown with her and influenced her through her life.

When a westerner sees that land, it is not just a temporary vision of something beautiful. It is a permanent beauty that he or she has lived with all of his or her life. So it is natural that the land has its effect on all of us who were born out in that part of our country.

I have worked with her for many years on matters affecting the beauty of our land, the culture of our people, particularly the Indians, in anthropological fields because, frankly, not being a lawyer, the only other times I had to be near her were in times involving political or legislative work.

So, as I stand here today, on this historic floor of the U.S. Senate, participating in a great landmark of our history, the admittance of a woman to the Supreme Court, I think my colleagues, yes, not just my colleagues on this floor, but my colleagues who live at home in our native State, can understand my pride, because they share this, too, and every person who calls Arizona his home, looks on this day as one of the great days, not just in the history of the United States, but in the history of our own State.

My very best wishes and most sincere prayers are hers for the great success I know she will have sitting on our Supreme Bench. And, once again, for having had the foresight and the wisdom, first, to name a woman, but more importantly, to name this particular one, I congratulate President Reagan.

Judge O'Connor's brilliant appearance before the Judiciary Committee offers complete assurance that she is fully qualified for a seat on the Nation's highest court. Throughout her testimony, Judge O'Connor revealed an impressive knowledge of constitutional law and legal principles. She ticked off case citations and the dates of important court rulings as easily as most people would recite their birthdates.

Her testimony was calm, reasoned, open, and informed. She displayed great strength of personal character and stood firm to her principles of judicial restraint and strict construction.

In my opinion, she was as forthcoming as any nominee could be in responding to any questions, including her position on abortion. She declared positively that she finds abortion personally abhorrent.

Now, I realize that some dedicated opponents of abortion feel they have been burned with this kind of answer from candidates for political office, who have evaded taking a stand on public policy by hiding behind their personal beliefs.

But I would point out that the position of Supreme Court Associate Justice is not an elective office. It is not a policy-making office, or at least it should not be. Therefore, the same standards cannot be applied to a court nominee that apply to a candidate for legislative office.

I might add that right to life witnesses, who appeared at the hearings on Sandra O'Connor's nomination, commented that abortion was not the issue in 1973 or 1975 that it is today. Dr. Wilke and Dr. Gerster both explained that the National Right to Life Committee did not raise the abortion issue during the confirmation hearings on Justice Paul Stevens in 1975 because abortion "was not such a major issue previously" and was "much less discussed."

This being so, I would ask how they, or anyone else, can reasonably fault Sandra O'Connor for any positions she may have taken as a State legislator in the period from 1970 to 1974, when anti-abortion leaders admit it was not such a prominent issue. Like most of the public, Sandra O'Connor's perceptions of the problems with abortion have increased over the last 10 years, which is what she said in her testimony.

Judge O'Connor repeatedly told the committee of her strong opposition to abortion. She stated that she would draw the line of any exceptions very strictly. She said her rejection of abortion is not a sudden development to win support, but is the result and the outgrowth of what she is. Her position stems from her sense of family values and her religious training.

Moreover, Judge O'Connor reminded the committee of her vote in 1974, as an Arizona legislator, for a prohibition on the use of public medicaid funds for abortions. The sole exceptions allowed were medical procedures to save the life of the mother or to prevent pregnancy after rape or incest. Judge O'Connor said this bill still reflects her views.

Frankly, if she had gone any further in commenting on the subject, she likely would have disqualified herself from ever participating in any cases before the Court relating to the subject. What I am saying is that if the right to life supporters had succeeded in pressing Judge O'Connor to state specifically whether she believes the Supreme Court's past abortion cases are wrong, they would have denied themselves the vote of a potential friend on the Court in the future.

Mr. President, I am far more impressed with Sandra O'Connor's statement regarding her general judicial philosophy and her obvious legal competence, than I can be whatever her answers are on a single-issue subject.

Judge O'Connor plainly stated that she would approach cases with a view to deciding them on narrow grounds and with proper judicial restraint. This should assure anyone concerned that she will not be going out of her way to make rulings, such as the abortion decisions, that create sweeping changes in social policy.

Also, Judge O'Connor was persistent in expressing her concern for preserving the power and rights of States and their ability to function as important parts of our Federal system of Government. Her testimony disclosed that her philosophical attachment to local government comes not only from personal service in all three branches of State government, but from her view of the nature of our form of government and the intent of the Founding Fathers.

Next, I am pleased at the many expressions of concern about violent crime that filled Judge O'Connor's testimony. She testified that crime is one of the major problems in the Nation and that we have an unacceptably high crime rate in this Nation.

Judge O'Connor mentioned that she was personally involved in drafting and voting for legislation in the Arizona Senate reinstating the death penalty as a deterrent to vicious crime. She openly stated her concern about court-written rules of procedures, such as the exclusionary rule, that allow obviously guilty criminals to escape punishment.

She explained the problems she had as a trial judge with certain rules mandated in criminal cases by Congress. She suggested Congress consider changing these requirements. Also, she proposed that courts must resolve criminal cases quickly. She testified there must be some way the courts can more effectively say a case is at an end. She said it would be wise for legislatures to give discretion to trial judges to impose life sentences on career offenders and she recommended that legislatures find a way to compel restitution by the criminal.

She stated her view that rampant crime is also the result of a general breakdown of standards we apply in society that discourage criminal behavior.

On other issues, Judge O'Connor expressed her belief that the religious precepts on which our country was founded are interwoven in our system of government. She said Internal Revenue Service activities affecting church schools raise serious questions about the extent to which the IRS should be a tax collector and the extent it should implement social policies. She also informed the Judiciary Committee that she had prepared legislation in the Arizona Senate to prohibit obscenity in compliance with Supreme Court rulings on the subject, particularly with respect to protecting minors from the distribution of smut material.

Mr. President, from these and other clear statements by Judge O'Connor on the record, I am convinced she is a very decent, moral and religious person. She is a qualified jurist of the highest rank and a woman who possesses one of the most brilliant minds of any lawyer or legal scholar in the country, man or woman.

Sandra O'Connor will enhance the Supreme Court. I believe she will be among the constellation of judicial geniuses who have sat on that Court in the past. And I know she will uphold the Constitution and our unique American contributions to rule by law.

Mr. President, I urge my colleagues to confirm Sandra O'Connor's nomination by unanimous vote.

I thank the chairman of the Judiciary Committee for having yielded to me. I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. DECONCINI. Mr. President, it is a pleasure for me to join my distinguished colleague, Senator GOLDWATER, who has been involved in this process of nominations and who has been actually involved in nominees to the Supreme Court. I am pleased that we could join in our effort to promote this particular nominee from our State.

Judge O'Connor will not be an Arizona judge by any means. She will be a judge for all citizens. I think the statement that the distinguished senior Senator from Arizona has just put into the RECORD spells out exactly why this nominee was chosen and how she performed. When I say that, I use that in the sense of her demeanor and presentation before the Senate Judiciary Committee, being as explicit as she could be in answering very difficult questions for some of the members of the committee, including myself, and stating her beliefs, why her beliefs were what they were, how they happened to come about, and the reasoning behind each one of those decisions, both in the legislative body and in her own personal life.

I think those hearings were some of the finest hearings that I have seen instituted and carried out by the Senate Judiciary Committee.

At this time, Mr. President, I would like to say that the chairman of the Judiciary Committee, the distinguished Senator from South Carolina, conducted those hearings in the most equitable and fair manner that I have seen since I have been here. That includes modestly a few hearings that I have conducted in behalf of the Judiciary Committee. The chairman bent over backward to make clear that this was an open hearing; that there were no questions that could not be brought forward to be presented to Judge O'Connor for her response; that there was going to be ample time for everyone to ask as many questions as they wished.

One member of the committee complained during the process that there was not enough time. The chairman indicated that that person could have another turn and, indeed, a turn after that. Where most Senators only had two opportunities to question the nominee, this particular Senator was granted four opportunities. I daresay the distinguished chairman would sit there today if he thought it was necessary and there were requests for additional questioning.

As the record will show, the questioning of Judge O'Connor went the proverbial menu of soup to nuts. Indeed, there was hardly anything that was not covered in great detail. As Senator GOLDWATER and myself knew from the very beginning when the President made this nomination, she would acquit herself with the greatest of professional expertise and with human value and personality that she has within her to demonstrate to everyone on the Judiciary Committee that indeed this was one of the finest moments for this administration having this nominee approved by the committee by a unanimous vote, with one abstention.

I am hopeful that today on this floor, at 6 p.m., when the final vote is cast, we will see just that, realizing the right of any individual in this body to cast a dissenting opinion and vote the other way. But I think there has been enough time and enough effort put forward and enough opportunity to scrutinize this nominee that regardless of where a Member of this body may come down on a particular issue, whether it be gun control, capital punishment, abortion, prayer in school, busing, et cetera, they can be satisfied that Judge O'Connor possesses the qualities that will really bring about the type of individual to serve on the Supreme Court who can do it with a blindfold over her eyes, looking at the law, interpreting the law, and not with a desire to change this country in a social manner or economic manner, interpreting what is brought before the Court, which I think most of us agree is what it is all about across the street at the Supreme Court.

Many of us have been critical of various decisions that we felt have gone far astray of what was intended by the Founding Fathers by that Court.

The attitude in Arizona is one of thanksgiving. The great pride of the

people of Arizona having a native daughter nominated to the Supreme Court, of course, is one for which we are very pleased and happy. We thank so many Members of this body, so many Arizona citizens, and so many citizens around the country who have come forward in support of Judge O'Connor and who have taken the time to learn something about her. I have received a great deal of mail which is of interest to me pointing out how much they have learned about her. In fact, they were ranchers or had visited Arizona and even had gone to the small town, unbeknownst at the time that there would be a nominee from Duncan, Ariz., and having professional relationship with Judge O'Connor and her distinguished husband. This goes on and on.

The people of this country are extremely well satisfied and elated with this fine nomination.

Mr. President, there will be other Senators who have statements. I may care to make further remarks before time has elapsed on this debate.

Mr. THURMOND. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. Mr. President, I ask unanimous consent that the time on the quorum be charged equally to both sides.

The PRESIDING OFFICER. Without objection, it is so ordered.

Who yields time?

Mr. THURMOND. Mr. President, I yield to the distinguished Senator from Pennsylvania (Mr. SPECTER).

The PRESIDING OFFICER. The Senator from Pennsylvania is recognized.

Mr. SPECTER. Mr. President, I thank the distinguished chairman of the Committee on the Judiciary for this opportunity to speak.

I am pleased to add my voice to those in support of the nomination of Judge Sandra Day O'Connor to be a Justice of the Supreme Court of the United States. The hearings, which were held for 3 days before the Committee on the Judiciary, were characterized as truly historic and, as they unfolded, they lived up to that representation in every sense of the word.

Mr. President, the presence of the first woman nominee to the Supreme Court of the United States was an occasion to make the proceedings historic in and of themselves. As the nominee's judicial views unfolded and as she faced some 18 members of the committee who had a broad range of questions—some of which were very pointed, some of which were very controversial—she acquitted herself with distinction. It was obvious that the Supreme Court of the United States is about to have an addition in the personage of a young, vibrant, well-equipped woman, who has the potential to be on that Court for a generation or beyond.

Judge O'Connor brings to the Supreme Court of the United States a remarkable background. She grew up on a ranch in Arizona. She had a top-flight academic career. She graduated from Stanford Law School in 1951, at the age of 21. She ranked high in her class—reportedly, third among a very distinguished group of legal scholars.

She has been active in the practice of law in a two-man partnership. She has held the position of assistant attorney general. She has served as a State court trial judge. She has served in the legislature of Arizona, rising to the rank of majority leader of the Arizona Senate. She currently occupies a position on the Court of Appeals of the State of Arizona.

With this background, I feel that Judge O'Connor has extraordinary credentials and extraordinary qualifications for the Supreme Court of the United States.

For one thing, her extensive background on the bench and in the legislature puts her in a unique position to say, as she did, that she knows the difference between being a judge and a legislator, and she understands the judicial function to interpret the law, as opposed to the legislative function to make new law.

This has been a question of considerable controversy in the Supreme Court of the United States, going back for decades, and I believe it will continue to be an area of controversy. I believe that Judge O'Connor's position on the Court will bring insight and real balance, and that her legislative experience will stand her in very good stead.

One point of minor disagreement in the questioning by some of us was the responsibility of the Court to examine social policy in situations where the executive and legislative branches had failed to act. The case which was cited for discussion involved school segregation, with Judge O'Connor's statement that in Brown against Board of Education, the Supreme Court of the United States only reinterpreted the 14th amendment of the U.S. Constitution. After some extensive discussion on that point, I believe it accurate to say that there was more than simply a reevaluation of the interpretation of the 14th amendment between Plessy, some 50 years before, and Brown against Board of Education; that, in fact, the Supreme Court had considered social policy, as I believe it must in some extraordinary circumstances.

In her testimony, Judge O'Connor, in effect, threw the gauntlet, albeit in a very polite way, to the other branches of Government. She said in effect, let the legislature accept its responsibility, let the executive accept its responsibility, and the Supreme Court of the United States and the other Federal courts need not consider social legislation or social policy but need only interpret the laws.

I believe that is a good lesson for the U.S. Senate, the Congress generally and the State legislatures. It is their responsibility to correct glaring inequities, so that it is not necessary for the Supreme Court of the United States to consider social policy and perhaps to move toward, if not to cross, the line between legislating and the traditional judicial function.

In Judge O'Connor's background there is also a strong credential with respect to the interpretation of State law, as contrasted with Federal law. Often, the decisions of the Supreme Court raise the question as to what is appropriate for a State court to consider, in contrast with what the Federal courts ought to decide. Given her background as a State court appellate judge, she will have a fine and unique perspective, from years of experience on a State appellate court, to share with her colleagues on the Supreme Court of the United States who have not had that experience, at least not very recently.

Her experience as a State court trial judge is also a unique asset, because the Justices of the Supreme Court of the United States are far removed from the trial courts, far removed from the evidentiary rulings, far removed from the issues of search and seizure and coerced confession and a variety of matters which a trial judge has to consider and take into account. Her experience there, which, again, she can share with her brethren (I believe that is an appropriate term, notwithstanding that she is the first woman on the Court) will greatly enhance the perspective and vantage point of the Supreme Court of the United States.

Finally—and I believe most important—she brings to the High Court the perspective of a woman. It is unnecessary to elaborate upon the differences in viewpoints and experiences she will have in being the first woman to serve on the Supreme Court of the United States.

Beyond those extraordinary talents, Judge O'Connor also brings to the court an attitude of dignity, an attitude of grace, and a remarkable temperament. Of all the characteristics she displayed during the course or some 2½ days of questioning, her composure and her good humor perhaps topped the list. Judicial temperament is a matter of tremendous importance, and she has it in abundance.

The other quality which she displayed, by implication, was her good health as well as her good cheer. She showed stamina in responding to questions during 2 full days of hearings and another half day of questioning.

Beyond that, I saw her at a formal luncheon arranged by the chairman of the Judiciary Committee. On Friday afternoon, I saw her in the Senate caucus room in the Russell Building at a large party, where she was carrying forth in a social way and was being available to people who wanted to see her and wanted to meet her—again, in a great attestation of stamina and good health which mark her general appearance as a young woman at the age of 51.

I believe all of this bodes very well for the future of the Supreme Court of the United States. I consider it a rare opportunity, in my first year in this august body, to have had an opportunity

to participate in the Judiciary Committee and to participate in these deliberations and to speak and, later, to vote in support of the nomination of Judge O'Connor to be an Associate Justice of the Supreme Court of the United States.

Mr. STEVENS. Mr. President, I feel privileged to be able to vote for the confirmation of the nomination of Sandra Day O'Connor to be an Associate Justice of the United States Supreme Court.

Others will point out her distinguished record. I might say that I know of that record, because my wife's uncle had served with her in the Arizona State Senate. I know two of her very close classmates from her days in law school, but I did not know Judge O'Connor personally until she was nominated. I was pleased to meet with her, as was my wife, Catherine. We find her to be a very strong woman, with a quiet calm that comes from the confidence of knowing she can do the job for which she has been selected. To me, that means more than anything else. Mrs. O'Connor knows she is qualified, has proven she is qualified, and I am confident she will be a distinguished member of the Supreme Court.

So, I join those in the Senate today who commend the President for selecting her to be the first woman to serve on the U.S. Supreme Court and, above all, for keeping the commitment he made during the campaign of 1980 to select a woman to serve on the U.S. Supreme Court.

Mr. THURMOND. Mr. President, I ask unanimous consent that the time on all quorum calls made during the consideration of the O'Connor nomination be equally charged to both sides.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. THURMOND. Mr. President, I yield to the distinguished Senator from Kansas, a prominent member of the Judiciary Committee and the chairman of the Courts Subcommittee.

The PRESIDING OFFICER. The Senator from Kansas is recognized.

Mr. DOLE. Mr. President, in many cases when we have a nomination before the Senate for a very prominent position in the administration we have our statements inserted, but I think this is such an historic occasion that no one wishes to pass up the opportunity to speak.

Those of us who wished to be present for the vote on Sandra Day O'Connor in our committee, feel the same responsibility in a way to be here today to express our support for that nomination.

I am very pleased to join my colleagues, first, to commend the distinguished chairman of the committee for his expeditious handling of the O'Connor nomination and, second, to commend all members of that committee for their cooperation regardless of some differences in point of view.

It seems to me that after lengthy examination of this nominee and her qualification during 3 days of rather extensive questioning by learned members—that does not include this Senator—but learned members of the committee, the chairman, the distinguished Senator from Arizona, and others, that she again demonstrated her ability to cope with the questions candidly and revealed her outstanding qualifications, and I certainly understand why she was selected for this position by the President.

So, Mr. President, although this is the first opportunity I hope it is not the last that we shall have to stand in this Chamber and support the nominations of outstanding women to the Supreme Court and other positions in the judicial system and all other branches of Government.

For a long period in our Nation's history, women had great difficulty in entering the professions, in attaining executive status in business, and in becoming an effective part of the governing process. In recent years, women have joined the professional, executive, and governing ranks in ever greater numbers. They have reached the highest levels of the legislative branch of the Federal Government. They have reached the level of cabinet officer in the executive branch. However, in the 190 years of the Supreme Court's existence, no woman has served on our highest tribunal.

I wish to commend President Reagan for so quickly fulfilling his campaign promise to nominate a qualified woman to the Supreme Court. The women of our Nation represent a vast reservoir of talent which should not go untapped. In choosing a person to sit on the Supreme Court, we must diligently search for the most qualified candidates that are available—we must choose someone with a high level of integrity, leadership, character, judicial competence and temperament, and knowledge of the law.

It is the belief of this Senator, that President Reagan found such a person. Of the potential nominees, male or female, for the Supreme Court seat vacated by Justice Potter Stewart, President Reagan could not have made a better selection than Sandra Day O'Connor.

Last week, the members of the Judiciary Committee, in accordance with their responsibility to advise and consent to presidential nominations, conducted a thorough examination of Judge O'Connor's background, abilities, and qualifications.

As I have previously indicated, her credentials and her qualifications again were demonstrated during the course of the hearing. Her credentials are excellent and she conducted herself superbly during the hearings. Her knowledge of both constitutional and Federal case law, and her knowledge of issues currently being considered by the Congress, were very impressive. During the hearings my colleagues and I inquired into Judge O'Connor's judicial philosophy, her position on problems affecting our judicial system, her views regarding the Constitution, and her position on a number of social issues, including gun control and abortion. The Senator from Kansas appreciated the candor of her responses and respects the fact that she avoided answering some questions as completely as the committee members would have liked in order to avoid prejudging issues which could come before the Court. He is satisfied that Judge O'Connor's views are prolife and not proabortion, and that she views the role of the Court as interpreting the law and not making the law.

Judge O'Connor's lack of experience as a Federal court judge is perhaps a small flaw in her otherwise excellent record—but experience on the Federal bench is not essential to becoming a good Supreme Court Justice. In addition, Judge O'Connor has a great wealth of prior experience which should serve her well on the Court and provide an excellent complement to the prior experience of the eight Justices who are already there. She achieved academic honors as a law student, she has been a practicing attorney, she has been a majority leader in the Arizona State Legislature, and she has served as a State court judge at both the trial and appellate levels.

The Senator from Kansas is pleased to be able to recommend Judge O'Connor to the Members of the Senate today. This Senator hopes that he will be joined by his colleagues in setting aside an unavailing precedent of 190 years' standing in voting for this highly qualified person to be the first woman Supreme Court Justice.

This Senator hopes that we will be joined by everyone else in this Chamber at 6 p.m. this evening to pass a unanimous vote for this nomination.

So, it is time that this is occurring, time long past due. Again I commend the distinguished nominee for the way she has presented herself and responded to questions. Despite some of the accounts I have read, I believe she has tackled some of the very difficult questions, whether it is busing, the death penalty, abortion, or a number of the other controversial issues that seem to find their way to the Chamber from time to time.

In my view she responded as directly as she could without staking out in advance what her position might be in the event such a case or some question involving one of these issues or a host of other issues might come before her as a Justice of the U.S. Supreme Court.

So it is my hope that at the appropriate time later today there will be a unanimous vote for this nomination.

I thank the distinguished chairman for yielding.

Mr. THURMOND. Mr. President, I wish to thank the able Senator from Kansas. He always makes worthwhile remarks and on this occasion he kept his reputation also.

Mr. President, I suggest the absence of a quorum on the basis that we have previously requested.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. QUAYLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr.

DURENBERGER). Without objection, it is so ordered.

The Senator from Indiana.

Mr. QUAYLE. Mr. President, I am delighted today to have the opportunity to express my support for the historic nomination of Sandra Day O'Connor to the Supreme Court.

In my view, Mrs. O'Connor is superbly qualified to serve as a Supreme Court Justice. She will bring to the Court a unique blend of experience and talent. Mrs. O'Connor's outstanding record of achievement began at Stanford Law School where she was admitted to the law review and graduated in the top 10 percent of her class. One of her former classmates at Stanford, Justice Rehnquist, gave her a glowing recommendation when President Reagan sought his advice on her nomination. Similarly, lawyers who argued cases before her have testified to her thoroughness and professionalism. During her 6 years on the bench, Mrs. O'Connor consistently earned very high marks for her performance. In 1976, the Phoenix bar rated her at 90 percent. In 1978, she earned an 85 percent approval rate. In 1980, after a year on the Arizona Court of Appeals, Mrs. O'Connor once again earned a 90 percent overall approval from the bar.

Just as important, her personal integrity is unquestioned. Throughout her 6 years as initially a trial, and then an appellate, judge, Mrs. O'Connor never received lower than a 97-percent rating for integrity in carrying out the duties of her office.

In addition to her high level of judicial performance, Mrs. O'Connor has also been an effective State legislator, quickly attaining the post of majority leader of the Arizona State Senate. Those who served with her in the legislature have said that she was chosen for the leadership post as a result of admiration for her intelligence and ability to clarify the issues.

The combination of legislative and judicial experience will make Mrs. O'Connor unique among the sitting members of the Supreme Court. As a former State legislator, trial court judge, and State appeals court judge, there is little doubt that Mrs. O'Connor will bring to the Court a badly needed sensitivity to local concerns. Those of us in Congress who have warned against the dangers of an "imperial judiciary" should take great satisfaction in the nomination of a person who has a strong sense of judicial restraint and balanced Federal-State relations as does Mrs. O'Connor. Read Mrs. O'Connor's statements in this regard and there is no question where she stands. In her appearance before the Senate Judiciary Committee, she said it clearly, "the proper role of the Supreme Court is to interpret and apply the law, not make it."

Of course, the line between "legislating" and "adjudicating" is sometimes very fine, and a judge's political preferences will, at times, affect judicial considerations. Nonetheless, a person's basic scheme of values and personal traits must remain paramount in our evaluation of fitness for the Supreme Court. These traits include integrity, intelligence, fairness and commonsense. I believe that Mrs. O'Connor possesses a full measure of these qualities and is an excellent choice for the highest court in the land.

As a personal aside, Mr. President, it is a proud moment for me to vote this fine lady who has spent many summers at Iron Springs, Ariz.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, many Senators have privately expressed a measure of concern about their responsibility in connection with the nomination of Sandra Day O'Connor to become the first woman to serve on the U.S. Supreme Court.

It is no discredit to Mrs. O'Connor that a substantial national dialog has occurred in recent weeks. The concerns that have been raised are not to be confined to Senators. And it may very well be that the distinguished nominee herself may hereafter face concerns far exceeding any that Senators have felt.

Mrs. O'Connor—Madam Justice O'Connor as she shortly will become—has been chosen by the President of the United States as both the symbol and the reality of an important milestone in our Nation's history. Needless to say, President Reagan himself is likewise a part of it.

I have noted, as have others, the national dialog that has occurred since the President announced his selection of Mrs. O'Connor. Legitimate concerns have been expressed in the absence of any precise knowledge of where the nominee stands on an issue to which President Reagan has made repeated and frequent commitments for years.

The issue, of course, is the abortion issue. Ronald Reagan has been unequivocal in his position on that issue. He is unequivocal today. In his public statements on the O'Connor nomination, and in private conversation with me, the President has made clear that he is not merely satisfied but delighted with the nomination of Mrs. O'Connor. It is fair to assume, therefore, that the President is convinced that Mrs. O'Connor agrees with his position on abortion—which is to overturn the Supreme Court's decision in Roe against Wade.

If such an assumption is not correct, Mr. President, then any burden felt by Senators pales into insignificance when compared with the burden upon both the President and Mrs. O'Connor.

If the President is mistaken, then he must confront the fact that his judgment in this nomination is a contradiction of all that he has said on countless occasions in connection with the abortion issue. In that event, which I have instinctively decided is highly unlikely, Mrs. O'Connor would bear the burden of having failed to make clear to the President any ambivalence she may have regarding the issue.

The circumstances have been such that uncertainty yet exists to some degree. But such uncertainty notwithstanding, I find no suitable option for myself as a Senator. I will vote for the confirmation of Mrs. O'Connor because I have faith in the President, and because I have no valid reason to believe that Mrs. O'Connor would deliberately allow the President to be misled.

So, with her confirmation a certainty later today, I wish both Mrs. O'Connor and the President well, and assure them that I am convinced that both of them have acted in good faith, and that they will continue to do so.

Having said that, Mr. President, I believe it is essential that the record be made clear that those who have expressed concerns have done so in sincerity and on a reasonable basis. Churlish criticism of those who have raised questions has been undeserved.

Mr. President, let us examine the record, beginning with the 1980 Republican Party platform adopted at Detroit in August of last year. The platform, which Ronald Reagan pledged to support as President of the United States, included the following:

> We will work for the appointment of judges at all levels of the judiciary who respect traditional family values and the sanctity of innocent human life.

The inclusion of this statement in the platform immediately raised a debate concerning the nature of the judiciary and even the nature of law. Some critics charged that this promise was a litmus test that violated the independence of the judiciary, and suggested that legal issues be decided by the personal whims of judges, rather than by the intrinsic legal or constitutional merits of the question. Indeed, the suggestion was made that the plank seemed to set aside the law, and substitute a political judgment.

It is true that the platform did raise profound issues about the nature of the judiciary, but it raised them precisely because of a public perception that something has been happening to law and the judiciary in this country that is profoundly disturbing to the national interest. According to a Lou Harris Poll, in 1966 51 percent of the American public had a great deal of confidence in the Supreme Court. In 1980, only 27 percent of the American people said they had a great deal of confidence in the court. Thus in 14 years, public confidence evaporated to an alarming degree.

In my opinion, public confidence has evaporated because the judiciary is too often seen as tearing down the fundamental social values of our civilization, instead of reinforcing and supporting them. It is not a question of judges imposing their personal views on their interpretations of the law, or of following public opinion. Rather, the law gets its sanction from the underlying natural law, reflecting the divine order, in our social order. The values and ethics of our civilization have developed over the

course of 2,000 years. There is a common consensus on what these values are; neither an ordinary citizen, nor a judge, is free to disregard the moral absolutes of that consensus.

Too often both lawmakers and judges have deviated from those principles for the sake of presumed social utility, or in pursuit of equity and justice. Some judges have acted from a desire to institute or promote social change; others have acted as though the law were unrelated to actual life, or to fundamental values. For them, the law is a closed system that is not supposed to be influenced by external considerations.

The American people are not legal philosophers, but they are appalled by the results. They want the fundamental institutions of society supported by the law, not torn down. That grassroots feeling was reflected in the Republican Platform of 1980.

In that platform, Republicans promised to appoint judges who would respect traditional family values and the sanctity of human life. Those two aspects were not chosen at random; they go to the heart of our society. The basic unit of our society is not the individual, but the family. The God-given hierarchy of parents and children is a mystery that sums up in an ineffable way the situation of mankind.

The seventh-century English historian, Bede, once described man as a swallow flying through a shaft of sunlight in a barn; no one could know where the bird came from, or where it went, but while it flew through the beam of light it was illuminated in our sight. So too, human beings arrive on this earth through the medium of the family. It is in the family that the individual is nurtured and developed, and it is through a new family that, interlinked with the old, the stream of life flows on. Human beings, as the carriers of life and developers of civilization, depend upon the institution of the family to survive.

But the hierarchy of family life in no way destroys the individuality and humanity of the person. Each person has his own unique existence and dignity. The dignity of the person surpasses the value of material things precisely because the person possesses life. He participates in life in a way that most Americans believe reflects the life of an infinite God. This goes beyond mere religious belief; it is a deeply rooted awareness of the existence of God. Even our public opinion polls show that the vast majority of Americans believe in God; but it is not just opinion. It is an instinctive principle of action to accept the existence of transcendental reality.

Without the dignity of the person, and the protective framework of the family, our civilization and its values could not long survive. The Republican platform summed up that sentiment eloquently when it pinpointed the judiciary as a center of attention. Laws cannot make people good, but they can remove obstacles to personal and social development, and set up sanctions for those who transgress the traditional ethical system.

In promising to work for the appointment of judges who respect traditional family values and the sanctity of human life, it was not the intention of the Republican platform to reward individuals for their personal accomplishments as upholders of family values and the sanctity of life. It seems obvious that the intention was to get at the problem of the deterioration of legal interpretation by appointing interpreters who would use traditional values as a standard of interpretation. In other words, the platform plank was a promise of judicial reform.

Some critics of that plank asserted that it set up an illegitimate standard for the interpretation of law by introducing personal whim or popular opinion as a guide. Of course, whims, or public opinion, have no place in legal interpretation. No judge has the right to submit a personal view for the view of the law. But the body of our law already reflects the values of our civilization. Where the law is clear, no outside standard of interpretation is needed. But where the law or its intention is unclear, it ought to be interpreted according to the settled values of our society. It is only in recent years that alien interpretations have been introduced that contradict our social standards—with results that have devastated our society.

The Republican platform, therefore, promised a significant judicial reform to reverse the deterioration of law in our Nation.

Of all the courts in the United States, the Supreme Court is obviously the most important one for far-reaching effects of constitutional policy. It was inevitable, therefore, that the platform should become a standard for measuring the nomination of Judge Sandra D. O'Connor for the vacancy left by the resignation of Justice Potter Stewart. In the scrutiny that immediately began, it was discovered to be difficult to ascertain Judge O'Connor's views and legal philosophy. A lawyer with a somewhat limited law practice experience, Judge O'Connor had never argued a case before the Supreme Court of the United States, had no heavy trial experience, had published but a single law review article of note, and while serving 6 years as a judge on an intermediate appellate court in Arizona, had never written what careful jurists would call a noteworthy opinion.

Her judicial record was too meager to reveal any real clues as to her philosophy; and indeed in 3 days of hearings by the Judiciary Committee, there was scarcely any allusion to that record.

On the other hand, Judge O'Connor, previous to her election as judge, had served in the Arizona State Senate, and indeed, served also as the majority leader in that body. Thus her legislative record became the focus of attention.

The issue of abortion is at the center of the family issues. No other problem raises in such a unique way the integrity of the family unit. The relationship of trust and responsibility of mother, father, and child is destroyed by abortion. When the father is not the husband of the mother, the so-called solution which abortion offers simply paves the way for the dissolution of family relationships. The rights of all children, born or unborn, are called into question. And of course, the very meaning of life, the meaning of humanity and personhood, and the rights of all persons die with the aborted child.

Mrs. O'Connor's legislative record shows that whenever she had an opportunity to strengthen the hand of the proabortionists, she did so; conversely, whenever actions were under consideration which would have strengthened the cause of the traditional legal view of abortion, she found a way to avoid supporting those initiatives.

First. On April 30, 1970, Senator O'Connor voted in the Arizona State Senate Judiciary committee for H.B. 20, a bill which would have removed all restrictions from abortions done by licensed physicians without regard to indication or duration of pregnancy. This would have allowed abortion on demand throughout the whole term of pregnancy, a radical departure from the laws of other States, more radical even than the then existing statutes in New York. This anticipated Roe against Wade by 3 years. Yet Judge O'Connor had no recollection of how she voted until the opponents of her nomination began to circulate news accounts of the period which recorded her vote.

During the hearings, Judge O'Connor indicated that she supported the legislation because Arizona abortion law provided only an exception to save the life of the mother, and did not include a rape exception, but at the present time she regrets that vote. She stated:

> I would say that my own knowledge and awareness of the issues and concerns that many people have about the question of abortion has increased since those days. It was not the subject of a great deal of public attention or concern at the time it came before the committee in 1970. I would not have voted, I think, Mr. Chairman, for a simple repealer thereafter.

At another point, she suggested that she was aware of how sweeping the bill was even then, but felt there was no alternative:

> At that time I believed that some change in Arizona statutes was appropriate, and had a bill been presented to me that was less sweeping than House Bill 20, I would have supported that. It was not, and the news accounts reflect that I supported the committee action in putting the bill out of committee, where it died in the caucus.

But in fact, there was a bill less sweeping than H.B. 20, the so-called McNulty bill, S.B. 216, which had been introduced in the Senate on February 6, 1970. The McNulty bill was a less sweeping bill, limiting abortion to the first 4½ months in cases involving rape, incest, or the life of the mother. It required that the embryology of pregnancy be explained to the mother, so that she would have informed consent, and that parental consent be required for a girl 15 years or younger. When Senator DENTON pointed out the conflict in her testimony, she replied:

> Senator Denton, as I recall that bill, it provided for an elaborate mechanism of counseling services and other mechanisms for deal-

ing with the question, and I was not satisfied that the complicated mechanism and structure of that bill was a workable one.

It appears, therefore, that Judge O'Connor was less than candid in explaining her awareness of the probable impact of H.B. 20, and of the alternatives available. While it is reassuring that her understanding of the problem has increased with time—the same kind of development which many of us, including this Senator from North Carolina, would readily admit to—the fact remains that in 1970 she was supporting the more radical of two alternatives for liberalizing abortion in Arizona.

Second. On May 1, 1970, Senator O'Connor voted in the Republican Majority Caucus to send H.B. 20 to the Senate floor, siding with the 10 to 6 majority. But the caucus rules required a two-thirds affirmative vote to send the bill to the floor. Thus, indeed, it died as she testified, but not because of the lack of her support.

Third. During 1971, two bills liberalizing abortion were introduced in the Arizona Senate, but they went to Public Health and Welfare Committee, of which Senator O'Connor was not a member. The bills died in committee.

Fourth. During 1972, the proabortion lobby did not seek to have legislation introduced in the legislature, but concentrated on legal action. However, the statute which Senator O'Connor had sought to repeal with H.B. 20 was upheld in its constitutionality by the State court.

Fifth. In 1973, after Roe against Wade caused the State statutes to fall, a controversy arose in Arizona when nurses were fired for refusing to participate in abortion procedures. Senator O'Connor, in her role as majority leader, had a freedom-of-conscience bill drafted to protect the rights of medical personnel who refused to participate in abortions. But there was no element of the abortion controversy in this bill whatsoever; it went to the rights of the medical technicians, not the rights of the mother or the unborn child. It was passed unanimously 30 to 0, with those on both sides of the controversy supporting it. Therefore, it tells us nothing of Senator O'Connor's then sentiments on the matter.

Sixth. On February 8, 1973, Senator O'Connor cosponsored the Family Planning Act (S.B. 1190). This act provided that "all medically acceptable family planning methods and information shall be readily and practicably available to any person in this State who requests such service or information, regardless of sex, race, age, income, number of children, marital status, citizenship or motive." This act immediately generated a large controversy in Arizona because of the phrase "all medically acceptable family planning methods," a phrase which in radical population control organizations was a euphemism for abortion. Indeed, after Roe against Wade, there could be little doubt that abortion was a legal means of family planning. On March 5, 1973, the Arizona Republic commented in an editorial:

> Only a decade ago, family planning was commonly accepted as referring to contraception, but contraception was sharply differentiated from abortion even by family planning's faithful boosters.
>
> But now the abortion front had developed dishonest terminology in which abortion isn't even described as "interruption of pregnancy" but "post-conceptive family planning."
>
> Planned Parenthood used to be distressed by people who believed contraception was murder, just like abortion. Yet now PP often blurs the distinction even more terribly.
>
> Rather than inhibiting abortion, as some unwise supporters of the bill contend, it might make it more widespread.
>
> Why, indeed, is this bill proposed? The state certainly has no policy of discouraging contraception. The bill appears gratuitous—unless energetic state promotion of abortion is the eventual goal.

The bill was also denounced by religious leaders, and the minutes of the Public Health and Welfare committee reflect the bitter division which it caused. In addition to the abortion question, the bill also provided that the information and procedures authorized in the bill be given to minors without parental consent; in fact, the bill's sponsor, as reported in the committee minutes, indicated that the evasion of parental consent was the underpinning of the whole bill. Indeed, it was on that point that the bill died in committee.

The memorandum of Kenneth W. Starr, counselor to the Attorney General, reported on July 7, 1981, that "she recalls no controversy with respect to the bill, and is unaware of any hearings on the proposed measure."

Despite the fact that there was a controversy, Judge O'Connor testified that—

> I viewed the bill as a bill which did not deal with abortion but which would have established as a State policy in Arizona, a policy of encouraging the availability of contraceptives information to people generally. The bill at the time, I think, was rather loosely drafted, and I can understand why some might read it and say, "What does this mean?"
>
> That did not particularly concern me at the time because I knew that the bill would go through the committee process and be amended substantially before we would see it again. That was a rather typical practice, at least in the Arizona legislature.

Whatever the actual impact of the bill might have been, it is nevertheless plain that today Judge O'Connor does not support the use of abortion in family planning. She testified clearly on this point at the opening session of her hearings:

> I would like to say that my own view in the area of abortion is that I am opposed to it as a matter of birth control or otherwise. The subject of abortion is a valid one, in my view, for legislative action subject to any constitutional restraints or limitations.

As for the issue of parental consent, Judge O'Connor's view today is at considerable odds with the approach taken in the bill she cosponsored 8 years ago. In reply to a question from Senator Denton, she said:

> I would simply say that it is my personal view that I would want to have the child consult the parents and have the parents work with the child on the issue.

While both of her present positions contradict the main features of S.B. 1190, we must allow for growth and maturity of one's views. All of us today have a much clearer understanding of the implications of abortion and of the great legal ramifications which are sometimes drawn from seemingly innocuous words. Indeed, that is precisely why the issue of abortion dominated her nomination hearings.

Seventh. On May 9, 1974, Senator O'Connor was one of nine Senators who voted against S.B. 1245, a bill authorizing the University of Arizona to issue bonds to construct sports facilities, after the bill had been amended by the House to prohibit abortions at any facility operated by the Board of Regents. Senator O'Connor had supported the bill when it had originally passed the Senate. She stated:

> In the House it was amended to add a nongermane rider which would have prohibited the performance of abortions in any facility under the jurisdiction of the Arizona Board of Regents. When the measure returned to the Senate, at that time I was the Senate majority leader and I was very concerned because the whole subject had become one that was controversial within our own membership.
>
> I was concerned as majority leader that we not encourage a practice of the addition of nongermane riders to Senate bills which we had passed without that kind of a provision. Indeed, Arizona's constitution has a provision which prohibits the putting together of bills or measures or riders dealing with more than one subject. I did oppose the addition by the House of the nongermane rider when it came back.

In adopting the view that the abortion provision was nongermane, Senator O'Connor was construing the Arizona Constitution narrowly. The constitution says, in article 4, part 2, section 13:

> Every Act shall embrace but one subject and matters properly connected therewith . . .

Since the issuing of stadium bonds and the performance of abortions were both actions under the authority of the Board of Regents, it could easily be argued that the act embraced but one subject, and the prohibition on abortion was properly connected therewith. Indeed, only one senator, and it was not Senator O'Connor, registered opposition to the bill on constitutional grounds. Despite the opposition, the bill passed, and it was never declared unconstitutional. Each one must draw one's own conclusions as to whether opposition to the bill in those circumstances sprang from a desire for purifying the legislative process or an aversion to prohibiting abortion.

Eighth. On January 22, 1974, 10,000 Arizona citizens gathered at the State capitol to protest the Roe against Wade decision. They submitted petitions signed by over 35,000 registered voters asking that a memorial be sent to the U.S. Congress to pass the Human Life Amendment. Arizonans are not given to large political demonstrations; the crowd at the State capitol was the largest in Arizona's history. House Memorial 2002 passed the Arizona House of Representatives by a 41-to-18 vote. Mr. President, I had a personal interest in this matter since the language of the con-

stitutional amendment sought by the memorial was the language which I had the honor of introducing in the U.S. Senate.

On April 23, 1974, H.B. 2002 passed the Senate Judiciary by a 4-to-2 vote, with the Phoenix Gazette reporting that Senator O'Connor voted against it even after it was amended to include exceptions for rape and incest in addition to an exception for the life of the mother. On May 7, 1974, a Phoenix Gazette article quoted Sandra O'Connor as follows:

I'm working hard to see to it that no matter what the personal views of people are, the measure doesn't get held up in our caucus.

On May 15, 1974, H.B. 2002 failed to pass the majority caucus by one vote. At least one senator who was in the caucus has stated that Senator O'Connor voted against the memorial. It should also be noted that these votes were taking place at exactly the same time as Senator O'Connor's vote against the stadium bill.

Judge O'Connor testified on this point as follows:

I did not support the memorial at that time, either in committee or in the caucus. . . . I voted against it, Mr. Chairman, because I was not sure at that time we had given the proper amount of reflection or consideration to what action, if any, was appropriate by way of a constitutional amendment in connection with the *Rowe* v. *Wade* decision.

It seems to me, at least, that amendments to the Constitution are very serious matters and should be undertaken after a great deal of study and thought, not hastily. I think a tremendous amount of work needs to go into the text and the concept being expressed in any proposed amendment. I did not feel that that kind of consideration had been given to the measure.

It is of interest that the rationale she gives for not supporting the memorial is just exactly the opposite of the rationale she gave for cosponsoring the family planning bill, despite its obvious flaws. In that case, she told the committee that she was not concerned about the bill's shortcomings because she was certain that the bill would be amended in committee; but in the case of the memorial, she could not support it because the text was not yet perfect.

Ironically, a memorial has no legal impact whatsoever; the exact text of such a constitutional proposal is irrelevant since the constitutional amendment itself will be shaped in the Congress, not the State legislature. Supporting or not supporting the memorial was therefore merely a political statement, but one of keen interest in the State of Arizona. Whatever concerns Senator O'Connor may have had about the text as supported by 35,000 Arizonans, the practical effect of her withholding support was to aline herself with the proponents of abortion.

Ninth. In 1974, S.B. 1165, the State medicaid bill was introduced in the Senate. Among other provisions, it said that no benefits would be provided for abortions except when deemed medically necessary to save the life of the mother, or where the pregnancy had resulted from rape, incest, or criminal action. Attention was called to this measure by Judge O'Connor herself during the hearings, since it had been overlooked in the public debate. She said: "I supported that bill, together with that provision." Later Senator DOLE asked whether it was fair to conclude that that bill represented her views on that issue. She replied: "Yes, Senator, it reflected my views on that subject when I voted for that measure." When Senator DOLE pressed her as to whether it represented her views today, she answered: "Yes—in general substance, yes."

Yet her support of this bill tells us little about her attitude on abortion. Antiabortionists would have been displeased with any bill that provided State funding of abortion, although they would have been pleased that some restrictions were included. Proabortionists would have been pleased with any bill that established the principle of State funding of abortions, hoping to ease the restrictions at a later date. We can conclude only that she believes abortion to be a proper object of State legislation; and that, in a legislative framework, she supports restriction of abortion to cases involving rape, incest, or the life of the mother.

Nor was the abortion issue an isolated phenomenon. As is well known, abortion is only one element in a panoply of issues whose partisans describe them as women's issues. Yet, in fact, they are not women's issues as such, but only the issues of a partisan group of women who are promoting a particular view of femaleness that is at odds with the traditional view of the dignity of women. This is not the place to argue that justice of those views, or the extent to which they are actually held among women at large, but merely to point out that, by and large, those views are intolerant of the traditional family values supported by the Republican platform.

Senator O'Connor was perceived as a supporter of that group of issues. In 1970, for example, she sponsored the Equal Rights Amendment ratification in the Arizona Senate, showing none of the reticence she later displayed over memorializing Congress about the human life amendment. When the ERA was killed in the Arizona Senate Judiciary Committee in 1973, she immediately introduced a bill for an advisory referrendum on ERA, in a strategy that was interpreted as attempting to put pressure on her colleagues.

As already noted, she was a cosponsor of legislation giving information on sex education, abortion counseling, and even abortion procedures to minors without notification or consent of the parents. In 1970, she was described in Phoenix magazine as almost alone in opposing publicly State aid to private schools. In 1971, she succeeded in weakening antipornography bills which would have prohibited the public display of explicit sexual material near schools and parks. In 1972, she supported legislation giving 18-year-olds the right to drink alcoholic beverages, legislation that was defeated. In 1973, she supported H.R. 1107, a so-called no-fault divorce bill. In 1974, she was the only Senator to cosponsor H.B. 2190, a State-level version of the Child Development Act vetoed on the national level by President Nixon in 1971 as too great an intrusion into the family.

In 1974, Senator O'Connor was appointed to the Defense Advisory Committee on Women in the Services, DACOWITS, a group of 30 civilians appointed by the Secretary of Defense. DACOWITS became the center of agitation to repeal the laws prohibiting combat roles for women, specifically, the two laws upheld by the Supreme Court on June 25, 1981 as the basis for excluding women from the draft. By 1975, then Judge O'Connor spearheaded efforts in DACOWITS to allow women to enter the military academies and to be assigned to ships and aircraft other than hospital or transport vessels. For example, the minutes of the DACOWITS Subcommittee on Utilization for April 7, 1975 state:

At this point, Judge O'Connor moved the following recommendation, which was seconded by Dean Heyse: That careful analysis and definition of what is meant by "combat duty" and "combat assignment" be undertaken by the Department of Defense in order to clarify many questions which arise within the services relating to this question and in order to set forth a more uniform policy for the several branches of the services with respect to both enlisted and officer status.

Judge O'Connor then moved the following recommendation, which was adopted: That admission to the service academies be open to all qualified candidates to prepare military leaders for service in peace and war. That the Department of Defense alter its present position and take a positive position favoring admission of women to the service academies and implement it forthwith.

Judge O'Connor initiated discussion of Title 10, USC Sec. 6015 relating to the Navy's prohibition against assignment of women to vessels other than hospital or transport vessels. . . . This resulted in the following motion by Judge O'Connor, seconded by Dean Heyse: and agreed upon by all present: That the Department of Defense initiate amendment of Title 10, USC, Sec. 6051 so as to remove the total prohibition against assignment of persons (male and female) to vessels and aircraft in accordance with the qualifications of the person to be assigned and the particular mission to be performed.

It was not for nothing, then, that Judge O'Connor was endorsed for the nomination to the Supreme Court by women's liberation activists such as Eleanor Smeal, president of the National Organization for Women.

Throughout the hearings on her nomination, Judge O'Connor steadfastly refused to comment on Roe against Wade, taking the position the issues in that case would likely come before the Court, and she would have to disqualify herself under the law if she discussed the Roe holding. This was a clever position, but one that was less than candid. The statute governing disqualification of Supreme Court Justices is 28 U.S.C. 455, which provides:

Any Justice or judge of the United States shall disqualify himself in any case in which he has a substantial interest, has been of counsel, is or has been a material witness, or is so related to or connected with any party or his attorney as to render it improper, in his opinion, for him to sit on the trial, or appeal, or other proceeding therein.

Obviously, nothing in the statute excludes public statements on the issues, so long as no case is actually pending. In the case of Laird against Tatum, 409 U.S. 824 (1972), the respondents had urged Justice Rehnquist to disqualify himself because prior to his nomination as a Supreme Court Justice he had publicly spoken about the constitutional issues that were raised in the case. But Justice Rehnquist refused to disqualify himself, sharply distinguishing between public statements about the case itself—which might constitute a discretionary ground for disqualification—and public statements about what the Constitution provides, outside of the specific case involved.

After Judge O'Connor was nominated, I wrote her a letter asking for her comment on Roe against Wade. In her reply, she declined to do so, citing a distinction that Rehnquist had made between statements made before nominations to the Court, and statements made after nomination, but before confirmation. Judge O'Connor wrote: "He recognized that statements about specfiic issues made by a nominee to the bench risk the appearance of being an improper commitment to vote in a particular way."

Thus the question turns not on the issue of disqualification, but of propriety. There are no grounds whatsoever for a Justice to fear the need to disqualify himself or herself, and indeed no Justice has ever done so in the history of the Court. Yet many have commented on past decisions of the Court in their nomination hearings, including Justice Fortas, Justice Marshall, Justice Powell, and Justice Rehnquist himself.

As for the supposed impropriety, the question turns upon whether a comment on a past decision is indeed a promise to vote a certain way in the future. In point of fact, it is not. No one can predict what might be done in the future, and no prospective Justice is going to promise to bind himself or herself before the facts of a case are known, or even before it is known how a case might be presented. Comment on a past decision merely explains the judicial philosophy of the nominee at the present time. Justices often shift, or grow in their thinking, or new facts may be presented. If there were any doubt about impropriety, a nominee could simply disclaim that present comment constitutes a future promise.

The lack of substantive comment on judicial philosophy throughout three days of hearings poses a unique problem with regard to Judge O'Connor. The advise and consent duty which the Constitution imposes upon the Senate is obviously a substantive one. The Senate cannot be supposed to be a rubber stamp for an executive nomination, particularly for the Judiciary. A Justice is not the President's agent, unlike appointments in the executive branch. Yet unless the nominee's judicial philosophy is known, it is difficult for a Senator to fulfill his constitutional function of advise and consent.

Most other nominees to the Supreme Court have had a substantial public record from which their judicial philosophy could be deduced. Judge O'Connor has no such substantial record, aside from her legislative activities. By adopting the same position as a Harlan, or a Frankfurter, whose positions were well known before nomination, Judge O'Connor has all but shut out the Senate from its Constitutional responsibilities.

We are left, then, with what she described in the hearings as her personal views, repeatedly pointing out that she thought it improper to impose personal views in deciding a case. But in point of fact, every judge and justice imposes personal views in making decisions. Nearly every Justice who has appeared before the Senate for hearings has steadfastly affirmed that he believed it to be the function of the judiciary to interpret the Constitution, not to make new laws based upon his personal opinion. For example, Justice Blackmun, at his hearing, said:

> I personally feel that the Constitution is a document of specified words and construction. I would do my best not to have my decision affected by my personal ideas and philosophy, but would attempt to construe that instrument in the light of what I feel is its definite and determined meaning.

Yet it was Justice Blackmun who wrote the Court's opinion in Roe against Wade, which is generally regarded as among the most extreme examples of judicial preference for personal ideas and philosophy over textual and historical sources of constitutional law.

Throughout the hearings, Judge O'Connor repeated several times that she is personally opposed to abortion. Perhaps the clearest and most definite statements on this matter came in an exchange with Senator KENNEDY:

> Senator KENNEDY. In some earlier questions—I think by the Chairman—you were asked your position on birth control and abortion. Have your positions changed at all over the years or are they the same as indicated in your votes and statements or comments?
>
> Judge O'CONNOR. I have never personally favored abortion as a means of birth control or other remedy, although I think that my perceptions and my knowledge of the problems and the developing medical knowledge, if you will, has increased with the general explosion of knowledge over the past 10 years. I would say that I believe public perceptions generally about this particular area and problem have increased greatly over the past 10 years. I would say that I think my own perceptions and awareness have increased likewise in that interval of time.
>
> Senator KENNEDY. Does that mean your position has altered or changed or just that you have developed a greater understanding and awareness of the problem?
>
> Judge O'CONNOR. The latter, I think, Senator, is what I was trying to express.

The interpretation of this passage is difficult. Judge O'Connor says that she never favored abortion as a means of birth control or other remedy. Yet her legislative record implies just the opposite. At the same time that she was supporting abortion legislation that provided on demand until term, that would provide abortion counseling and abortions to minors without parental consent, and that would allow the University of Arizona to provide abortions to students at taxpayers' expense, she was personally opposed to abortion. And while she was personally opposed to abortion, she also opposed efforts by the pro-life movement to restore the traditional legal status for abortion.

Yet there are suggestions in the transcript that Judge O'Connor, as a State senator, tended to view the legislative process as separate from her personal views, that she was trying to make allowances for the views of those who disagreed with her. In my own view, I recognize that the legislative process involves many compromises, but I would not want ever to compromise on basic principles. In my opinion, I believe that Judge O'Connor now looks upon the legislative problem with more maturity.

In an exchange with Senator DENTON, Judge O'Connor in response to a question as to where abortion was offensive, spoke as follows:

> It remains offensive at all levels. The question is, what exceptions will be recognized in the public sector? That really is the question . . . I find that it is a problem at any level. Where you draw the line as a matter of public policy is really the task of the legislator to determine. Would I personally object to drawing the line to saving the life of the mother? No, I would not. These are things that the legislator must decide.

In my view, her comments on abortion are certainly more perceptive today than her record as a legislator would indicate. But of course, even Ronald Reagan learned from experience while Governor of California when he approved ill-drafted legislation on abortion without fully understanding the consequences. In her exchange with Senator Denton, Judge O'Connor took note of the process of interior growth:

> Senator Denton, I cannot answer what I will feel in the future. I hope that none of us are beyond the capacity to learn and to understand and to appreciate things. I do not want to be that kind of a person. I want to be a person who is open-minded and who is responsive to the reception of knowledge.
>
> I must say that I do expect that in this particular area we will know a great deal more 10 years from now about the processes in the development of the fetus than we know today. I think we know a great deal more today than we knew 10 years ago, and I hope that all of us are receptive and responsive to the acquisition of knowledge and to change based upon that knowledge.

Mr. President, there is a suggestion in that statement that Judge O'Connor is moving away from the positions which she supported as a legislator, and is focusing more clearly on her own personal convictions. In her exchange with Senator DECONCINI, she said:

> I have indicated to you the position that I have held for a long time—my own abhorrence of abortion as a remedy. It is a practice in which I would not have engaged, and I am not trying to criticize others in that process . . . But my view is the product, I suppose, merely of my own upbringing and my religious training, my background, my sense of family values, and my sense of how I should lead my own life. I have had my own personal views on the subject for many years. It is just an outgrowth of what I am, if you will.

When the President nominated Judge O'Connor to the Supreme Court, I visited him on that morning at his invitation, and he assured me personally that the

nominee shared his own views on the question of abortion. This is not hearsay. I sat with the President for the better part of a half hour in which he described Mrs. O'Connor as he perceived her.

Under extensive questioning from the Judiciary Committee, the nominee has clearly demonstrated, under oath, that she shares those views. In that sense, the President has fulfilled the commitment of the Republican platform.

Nevertheless, troubling questions remain. With all due respect to Judge O'Connor, I find it disturbing that her legislative record is in direct opposition to the personal views which she has expressed, and to which she testified as being of long standing. It suggests a dichotomy between thought and action that I, as a legislator, cannot comprehend. Yet there are also indications that she regrets the role she played in the Arizona State senate.

I think that the hearing process has focused her attention on these problems in a way which had not previously occurred. I am encouraged by the fact that, over and over again, she emphasized her awareness of the criticisms of Roe against Wade, as an extreme example of judicial activism. I am encouraged by the fact that she emphasized that, in her opinion, Roe against Wade was far from being a settled doctrine, and that she expected it to come before the Court for further review.

On that hope—that I have judged her accurately, and I am instinctively persuaded that I have—I intend to cast my vote for approval. Her testimony is that she is personally deeply opposed to abortion. We are left with the question of whether her personal views will, in fact, influence her decisions in those areas where the Constitution itself is vague or nondeterminative. My instincts, my faith in President Reagan's word, and my respect for Mrs. O'Connor as a person provide the grounds for my supporting her nomination. I wish her well.

Mr. THURMOND. Mr. President, I thank the Senator for the fine statement he has made. I am sure it will be a great contribution to this question.

Mr. HELMS. I thank the Senator.

Mr. President. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. Mr. President, I ask unanimous consent that the time of the Senator from Alabama be charged against the other side.

The PRESIDING OFFICER. Without objection, the time will be charged to the time of the Senator from Delaware.

The Senator from Alabama may proceed.

Mr. HEFLIN. Mr. President, the task which we are now considering is a most important one. It is the process by which a branch of government renews itself—a regeneration, a pumping of new blood into the life of a great and vital institution.

In my opinion, and I say this, Mr. President, only after careful reflection, there are only two institutions absolutely indispensable to the independence, health, and maintenance of our Republic—a free, fair, and vigorous press, and a strong and independent judiciary. While Presidents may come and go, their faithful execution of the laws is subject to an ultimate check. While great men and women may deliberate and legislate in these very Halls, the laws they pass do not interpret themselves.

The Federal judiciary—the high Court in particular—not only has the last word as to what our laws say, but also as to whether they may permissibly say it. The Court to which this capable jurist has been nominated is the ultimate arbiter of our most sacred freedoms, guardian of our most cherished liberties.

In fulfilling our constitutional duty to advise and consent, the men and women of this body will cast no more important vote in this session of Congress. For we are voting not so much to confirm Sandra Day O'Connor, but to reaffirm our belief in the very concept of justice, and its preeminence among values in a free and thriving republic. As our first President told his Attorney General, Edmund Randolph, some two centuries ago, "The administration of justice is the firmest pillar of government."

If justice is both the ultimate goal and indispensable for the survival of a free republic, we best insure it by the people we select as its custodians. And that is what we are about today—selecting a custodian for our most precious commodity, a trustee for our most valuable resource.

And yet, Mr. President, nowhere is there to be found a set of standards for selecting these custodians of justice. Since Chief Justice John Jay took the oath of office in 1789, 101 Justices have sat on the Supreme Court. While this record should provide some guidance for us, it is of limited assistance, for they have differed as much in their judicial philosophies as in their passion for the law.

Greatness on the Court is neither measurable nor clearly definable. It may derive from a coherent philosophy expressed with unequaled brilliance, as was the case with Justice Holmes, or from a vast currency of experience by the creative mind of a Justice Brandeis. It may stem from an unrelenting effort to restrain judicial activism by a Justice Rehnquist, an unquenchable thirst for liberty, as with Justice Douglas, or the passionate love of free expression of my fellow Alabamian, Hugo Black.

When asked to catalog the criteria for judicial selection, we normally—and somewhat automatically—list legal ability, character, and judicial temperament. To these qualities, I would respectfully add three perhaps more fundamental: First, an understanding of the proper role of the judiciary in our constitutional and Federal scheme; second, a deep belief in, and unfaltering support of, an independent judiciary; and third, an abiding love of justice.

If I might elaborate ever so briefly:

First. Regarding the proper role of the judiciary, it is the constant struggle of all Federal judges and the ultimate issue they must confront to preserve the balance between the powers of the Federal Government and those of the States while, at the same time, protecting the constitutional guarantees of all Americans. It is the supreme test of judicial acumen to preserve that balance, to which an understanding of the proper role of the Federal judiciary is indispensable.

Second. The Framers of the Constitution were painfully aware of encroachments on judicial independence. Indeed, denial to the colonies of the benefits of an independent judiciary was one of the grievances against King George III enumerated in the Declaration of Independence. If the judgment of our highest custodians of justice is at all compromised, if it is based on timidity or hesitation arising from public or political pressure, our legacy of judicial independence will be undermined. Justice compromised is justice aborted.

Third. There must be a passionate love of justice, the great cement of a civilized society, the guardian of all life and liberty. If injustice can divide us—pitting black against white, old against young, have-nots against haves—justice can bring us together as a people, and as a Nation.

Mr. President, against these highest and noblest of standards, I have examined this nominee, and find that she meets them, every one. Judge O'Connor's record of accomplishment, both in public and private life, is exemplary—a seasoned private practitioner; a vigorous prosecutor; skillful legislator; respected jurist; legal scholar; bar, civic and political leader; faithful wife; and devoted mother. The breadth of her service is surpassed only by the excellence with which it was rendered. More important, it enables Judge O'Connor to bring unique qualities to the Court: an abiding respect for the law; a deep understanding of our economic and political institutions; a clear view of the proper role of the judiciary; and a rare appreciation of the values of Americans as a people. I dare say these qualities, and her record to date, are a harbinger of judicial greatness.

When President Reagan nominated Sandra Day O'Connor for the position of Associate Justice of the U.S. Supreme Court, I was one of the few Members of the Senate who had the privilege of prior personal and professional knowledge of Judge O'Connor. I was delighted with the President's selection and was hopeful that the U.S. Senate would confirm this nomination.

Having participated with Judge O'Connor, under the leadership of Chief Justice Burger, in the recent Anglo-American Legal Exchange on Criminal Justice, I learned first-hand of her exceptional intelligence, her hard-working preparation of the issues at hand, and her unswerving adherence to integrity. Based upon my previous experience with Judge O'Connor, I was confident of her

abilities to assume the most crucial position of Associate Justice of the Supreme Court.

During the Senate Judiciary Committee hearing process, Judge O'Connor demonstrated outstanding legal abilities, judicial temperament, a quick and decisive intellect, and a firm understanding of American jurisprudence and our judicial system. After 3 days of extensive hearings by the committee, I am delighted that my initial impressions of her legal and judicial ability were confirmed to the highest extent, and that the members of the Judiciary Committee recognized her outstanding attributes in support of this nomination, with 17 affirmative votes.

I began by saying we are involved in the process of institutional renewal. As Justice Cardoza put it—

> The process of justice is never finished. (it) reproduces itself, generation after generation, in ever-changing forms. Today, as in the past, it calls for the bravest and the best.

I believe his words ring just as true today, and in Sandra Day O'Connor I believe we have "the bravest and the best." I counseled Judge O'Connor during the confirmation hearing to carry indelibly etched in her conscience, and follow as religiously as is humanly possible, the admonition of one of our greatest jurists, Learned Hand, who wrote:

> If we are to keep our democracy there must be one commandment: Thou shalt not ration justice.

I am confident that Justice Sandra Day O'Connor will follow this commandment religiously.

Mr. President, President Reagan's appointment to the Supreme Court will reflect great credit on his administration, the Court itself and, indeed, the Nation at large. I am delighted to vigorously support this nomination, and I encourage each of my colleagues in the U.S. Senate to enthusiastically support the nomination of Sandra Day O'Connor for the position of Associate Justice of the U.S. Supreme Court.

Mr. HART. Mr. President, will the Senator from Alabama yield to me?

Mr. HEFLIN. I yield.

Mr. HART. Mr. President, I congratulate the Senator from Alabama on an extremely eloquent statement.

Too often in this Chamber, we debate the merits of nominations or fundamental legislative issues and miss the more overriding point. The point here is justice, which we do not hear about too much these days. The Senator from Alabama is to be congratulated for bringing the debate back to where it belongs.

The issue on this nomination, to some degree, and in our society at large is justice.

The distinguished Senator from Alabama has made a remarkable record in his own right in pursuing the cause of justice throughout his career on the highest court of his sovereign State. I wish to add a word here of support and congratulation for him and that distinguished career and his efforts in bringing the focus of the U.S. Senate on this issue, as well as other issues of the day, back to the fundamental point—that a society without justice, without justice for all, is not a democracy and certainly is not what the United States of America started out to be.

So I want the Senator from Alabama to know that his colleague has the highest regard for him and for his pursuit of that principle.

Mr. HEFLIN. I certainly appreciate the kind comments of the distinguished Senator from Colorado.

The PRESIDING OFFICER. Who yields time?

Mr. THURMOND. Mr. President, I suggest the absence of a quorum, and I ask that the time be charged equally to both sides.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, will the floor manager yield?

Mr. BIDEN. I yield as much time as the Senator from Massachusetts will require.

The PRESIDING OFFICER (Mr. SYMMS). The Senator from Massachusetts.

Mr. KENNEDY. I am pleased and proud to support Judge Sandra O'Connor's confirmation as Associate Justice of the Supreme Court.

The Judiciary Committee hearing on her nomination established beyond any doubt her qualifications to sit on the Nation's highest court. At the hearing, she demonstrated the qualities of judicial temperament, excellence in the law, and the personal and intellectual integrity essential in a nominee to this high position. She also demonstrated her commitment to the enforcement of individual rights under the Constitution. Other witnesses at the hearing testified to the respect she has earned in Arizona as a jurist and as a concerned member of her community. I am convinced that Judge O'Connor has the potential to be an outstanding Justice on the Supreme Court.

Judge O'Connor's nomination is a significant victory for the cause of equal rights. It is a significant new step on the road toward equal justice in America. The small number of women on the Federal bench, and, until now, their exclusion from the Supreme Court, has been a particularly troubling reflection of the discrimination that women and minorities still face in our society.

Americans can be proud of this day, as we put one more "men only" sign behind us.

Americans can also take pride in this nomination for another reason. By this vote, the Senate rejects the would-be tyranny of the new right and reaffirms the vital principle of the independence of the judiciary. Single-issue politics has no place in the solemn responsibility to advise and consent to appointments to the Supreme Court or any other Federal court.

As the hearings revealed, no member of the Senate Judiciary Committee completely agrees with Judge O'Connor's views on every major issue which will come before the Court. I do not agree with her present views on the proper balance in the relationship of the Federal courts and the State judiciary in the enforcement of Federal rights. But I am satisfied that her intellectual integrity and her concern for those whose rights have been denied will lead her to a fair evaluation of that balance from the unique perspective of the Supreme Court.

I congratulate Judge O'Connor and I wish her well in the new responsibility she now begins.

Her place is already secure as the first woman in the 200-year history of American law to be nominated to the Supreme Court. But she has the ability and the character to be remembered for even more—as a wise justice who understood and advanced the historic role of the Supreme Court in preserving our country as a nation of equal justice under law.

Mr. President, I yield the remainder of my time. I thank the Senator.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. BIDEN. Mr. President, I yield as much time as the Senator from Ohio may require.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I stand to indicate my support for the confirmation of Sandra O'Connor to the Supreme Court of the United States.

In doing so, I have a special kind of good feeling, a good feeling that the overwhelming majority of this body—and it would not surprise me if the vote were unanimous—will indicate that they will not yield to the pressures of the new right and they will not be distracted to oppose her nomination on the basis of any one single issue.

My view is that, regardless of the merits of the issue, American politics have had enough of single-issue opposition or support and that it is time that those persons up for confirmation in the Supreme Court and persons up for election to public office should not be judged on the basis of any one issue—and there are many of them that are used as the sole determinant in this country.

I believe there is something basically un-American about saying that a person should or should not be confirmed for the Supreme Court or should or should not be elected to public office based upon somebody's view that they are wrong on one issue.

This judge, who has served her State well as a jurist and as a legislator, has a mind of her own. Her views are not my views. If I were doing the appointing, I doubt very much that I would appoint Judge O'Connor to the Supreme Court.

But that is not the question before the Senate of the United States. The question is: On the basis of her legal ability, on the basis of her character, on the basis of her integrity, on the basis

of her judicial temperament, and on an overall basis, is she or is she not qualified to be appointed to the Supreme Court of the United States? I know that this body today will give a resounding affirmative answer to that question.

There are many issues on which I disagree with the judge. On the whole question of access to the Federal courts for the poor, I do not agree with her attitude or some things that she has written about in a magazine article. She believes that the jurisdictional amount on Federal question cases should be a specific amount and I believe that the courts ought to be open regardless of the amount in question. This Congress has already passed on that issue and has arrived at the same conclusion as the Senator from Ohio.

She indicated her opposition to attorneys' fees being paid in section 1983 cases, the original Civil Rights Act, the anti-Ku Klux Klan Act. I take strong issue with that point of view. I do not happen to think that she is right on that score. But would that be a sufficient basis for me to vote against her confirmation? I think not.

She and I disagree with respect to the question of standing requirements in a case. Would that be a sufficient basis for me to vote against her? I think not.

I believe that the role of the court in issues having to do with social justice is, indeed, an important role. This question of judicial activism—what does that really mean? When is a court judicially active? When it is making laws or when it is not making laws? It is all a matter of perspective and all a matter of perception. It is a question of how you interpret the action of the court. I do not think she and I would agree on all matters in that connection, but I still believe she belongs on the Supreme Court, having been appointed by the President of the United States.

I doubt very much that she and I would agree on the issue of capital punishment. I would guess that we might disagree on many issues having to do with criminal procedures.

But her appointment is an appointment that the President of the United States has the right to make under the Constitution and we in the U.S. Senate have an obligation to confirm or refuse to confirm. It pleases me greatly that—after days of hearings, very full hearings, very fair hearings, conducted by the distinguished chairman of the Judiciary Committee, Senator STROM THURMOND, in which everybody was given an opportunity to be heard, in which Senators who felt that they needed an extended opportunity for questioning were given that opportunity—she came out of the Judiciary Committee with a vote of 17 to 0, 1 present.

I hope that today there will not be a single vote cast against her confirmation.

I am particularly pleased about the fact that she will become the first woman Justice of the Supreme Court. I am pleased that I had the privilege of participating in that confirmation process in connection with such an appointment.

But I do not hesitate to say that that would not be a sufficient basis alone for me to vote for her confirmation. I will vote for her confirmation because I think that she will serve the Court well, I think she will serve the American people well, and I think she will serve the cause of justice well. I am glad that we will have the privilege to vote on her confirmation today.

I yield back the remainder of my time.

Mr. DECONCINI addressed the Chair.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. DECONCINI. Mr. President, I rise once again today to discuss for a short period of time the nomination of Sandra O'Connor as an Associate Justice to the U.S. Supreme Court.

This is a monumental time for all of us—the first woman Justice—but, obviously, as many Members have pointed out, she was selected on the basis of her qualifications and her merits.

When Justice Potter Stewart announced his retirement, I submitted Judge O'Connor's name to President Reagan for consideration. Along with other people, some in this body and some other distinguished jurists and scholars, I had the honor of presenting Judge O'Connor, along with my distinguished senior colleague, Senator GOLDWATER, to the Judiciary Committee for the beginning of her confirmation hearings. I am once again here before the entire Senate to proclaim my clear, unequivocal support for this fine jurist, for this fine person, this fine woman, who will be the first woman on the Supreme Court.

I hope that our colleagues will vote a unanimous vote today in her behalf.

I think it is important to set aside a moment to say that though Judge O'Connor will be, in my judgment, the first woman to serve on the Supreme Court, after her confirmation today and her swearing in later this week, that this should not be the last, by any means, and, hopefully, it will just be the beginning. I urge the President, if he has another opportunity, that he fulfill that promise once again to bring into our judicial system the fine, qualified women that have demonstrated the absolute ability to be competent on the court and competent in the legal profession.

This should be just the beginning of a new era and not 200 years or 300 years before we have another woman on the Supreme Court. There are indeed many women qualified to serve in this position. Sandra O'Connor demonstrated that as well as demonstrating her own credibility for this position.

The Senate Judiciary Committee, as we all know, held 3 days of hearings which were conducted in an outstanding manner by the chairman, Senator THURMOND, which comprehensively covered Judge O'Connor's technical qualifications as well as her personal and judicial philosophy. These hearings reveal an individual who is capable of dealing with the intricate, complex issues that will face her and the other members of the Supreme Court in years to come.

Judge O'Connor will bring to the court a unique combination of experience as a legislator, a Government lawyer who served as assistant attorney general for the State of Arizona, a trial judge and an appellate judge. The quality and breadth of her legal background evidence her outstanding credentials for this appointment. As an honor graduate from Stanford University Law School her entire legal career has been a progression of distinguished records of achievements and accomplishments, which I think set very well and will hold her in great stead to serve on the Court.

As a legislator, Judge O'Connor served as majority leader of the Arizona State Senate and as chairman of one of the major committees of that body. She has received numerous awards and honors for her work as an active, private citizen, and has been held in high esteem by members of the Arizona State bar who have tried cases before her while she was serving as a judge.

The mix of these experiences has created in Judge O'Connor a special sensitivity, a sensitivity demonstrated in her thoughtful responses to the Judiciary Committee's question, the nature of American Government to the delicate interrelationship between its separate branches constitute the hallmark of democracy.

Judge O'Connor throughout the grueling confirmation hearings has been shown to be a woman of great depth and intelligence. She acted as a true professional. Questions presented by the Judiciary Committee were intricate and comprehensive. They involved issues of law and of her own knowledge of Supreme Court decisions and her studies of the Constitution. She answered these questions in such a manner so as to show her depth of thought and comprehension of the issues. She answered the questions fully and completely. Judge O'Connor told the Judiciary Committee her full views on judicial activism, stare decisis, and her personal views on many current issues. Questions pertaining to specific U.S. Supreme Court decisions were beyond the scope, in my opinion, of permissible questions, or at least the questions that should be answered specifically. To ask a potential Supreme Court Justice how he or she would vote on a particular issue which may come before the Court is the equivalent of asking that individual to prejudge the matter or to morally commit oneself to a particular position.

Whether or not it was pertaining to reversal of a previously decided case by the Court or a hypothetical set of circumstances or facts that would very likely present itself to a court in the future I think is unquestionably the wrong type of questions to expect a nominee, anyone—Judge O'Connor or otherwise—to answer.

Such a statement, if the nominee were to give a definite opinion, might disqualify the nominee for sitting and hearing such cases in the future. This end result is contrary to the sworn duty of a Justice to decide cases that come before the Court. In light of this basic duty, I feel that I must state my view that Judge O'Connor's statements and answers were full and complete responses to questions posed by members of the Senate Judiciary Committee.

I wish to thank the chairman for his thoughtfulness and that of the members, both Republicans and Democrats, who did indeed pose hard questions to Judge O'Connor but treated her with respect. What we are dealing with today is not a question of an individual's political ideology, but the question of an individual's competence and professionalism, integrity, judicial temperament, and commitment to have equal justice under the law, words that are said often but do we really think about equal justice under the law? That is what we as a country, that is what we as the Senate, that is what the President as the Chief Executive Officer of this land, are asking from Judge O'Connor, equal justice under the law.

I submit that we will get just that. The hearings and the statements made today by our colleagues demonstrate the confidence that Members of this body have in Judge O'Connor.

Our Constitution provides the framework of Government spanning years, decades, centuries. The retention of this framework depends to a great extent on the quality of judicial construction. As highly emotional and important as the issues of today are, and there are many that fit that particular description, there will be totally unpredictable matters that could confront the Supreme Court in future years. It takes maturity, it takes real competence to address those with that equal justice under the law always in the forefront.

It is our role to confirm a Justice who has the intelligence, training, and judgment to span through this period of time.

I am confident that Judge Sandra O'Connor will win full Senate confirmation, and I am hopeful that it will be a unanimous vote. I am equally confident that this Nation's first woman Justice, an Arizonan, will have a long and distinguished career on the Bench.

The PRESIDING OFFICER. The Senator from Utah.

Mr. HATCH. Mr. President, with great pleasure, I take the floor today as the Senate prepares to exercise its constitutional function of giving its consent to President Reagan's appointment of Judge Sandra Day O'Connor to fill the Supreme Court vacancy created by the retirement of Justice Potter Stewart. As we undertake this vital task, therefore, we should pause to recall the reasons that the "framers" split the nomination process for Supreme Court judges between the executive and legislative branches. The framers understood the importance of the Supreme Court to the new Republic. Standing before the First Congress to propose that a bill of rights be added to the Constitution, James Madison stated beautifully the purpose of the Nation's Highest Court:

> [The Court] is to be an impenetrable bulwark against every assumption of power in the legislative or executive . . . to resist every encroachment upon rights expressly stipulated for in the constitution by the declaration of rights. 1 Annals of Cong. 457.

The Supreme Court, therefore, holds the lofty responsibility of policing the bounds drawn by the framers of the Constitution. But the framers also understood that even the words of the Constitution could be slippery. They had suffered indignities at the hands of the King's magistrates who often changed the meaning of the law to fit the circumstances rather than upholding an unchanging legal standard. Recognizing that the integrity of the Constitution itself was at stake, therefore, the framers specifically provided for both the President and the Senate to participate in selecting Supreme Court judges. If the enforcement of the Constitution was to be committed to the hands of justices, the framers wanted to be sure, in the words of Alexander Hamilton, that they designed "the plan best calculated * * * to promote a judicious choice of men for filling such offices." Federalist No. 76. Their "advice and consent" plan thus provided a double check on nominations to insure that the Constitution and such words as "due process' or "necessary and proper" means what the authors intended and the people ratified not simply what five appointees might cumulatively concoct.

In light of this background, the most important qualities for a Justice of the Supreme Court is a keen comprehension of the limits drawn by the drafters of the Constitution and an unshakable resolve to those limits honored. With full awareness of the significance of this recommendation for the future of American jurisprudence, I can confidently say that these are qualities possessed by Judge Sandara O'Connor.

Mr. President, throughout the grueling inquiry into her judicial philosophy and personal background, Judge O'Connor consistently displayed a remarkable poise under pressure and a deep grasp of the intent of the authors of our Nation's foundational document. She brings to the Court an ideal set of credentials to carry out the mission described by Madison. Having served in all three branches—executive, legislative, and judicial—of State government, Judge O'Connor understands the checks and balances between them that prevents any single function of Government from overpowering the others. Moreover, her extensive experience with State government gives her an acute appreciation for the traditional principles of dual federalism which protect our individual rights against centralized governance.

In her excellent article in the William and Mary Law Review (vol. 22:801), Judge O'Connor constructed a cogent case for the principle of federalism within the judiciary:

> State courts will undoubtedly continue in the future to litigate federal constitutional questions. State judges in assuming office take an oath to support the federal as well as the state constitution. State judges do in fact rise to the occasion when given the responsibility and opportunity to do so. It is a step in the right direction to defer to state courts and give finality to their judgments on federal constitutional questions where a full and fair adjudication has been given in state court. (At page 814.)

During the hearing, Judge O'Connor was often questioned about her high regard for the ability of State courts to uphold the Constitution and enforce Federal laws. Several members of the Judiciary Committee tried tirelessly to induce her to assign to the Federal courts a preeminent role in adjudication of Federal or constitutional rights. She would not retreat from her full confidence in our Nation's bifurcated judicial system and the ability of State courts. Indeed, her defense of this principle reminded me of a similar defense by Alexander Hamilton to the objections of the anti-Federalists:

> There is not a syllable in the plan (the Constitution) under consideration which directly empowers the national courts to construe the laws according to the spirit of the Constitution, or which gives them any greater latitude in this respect than may be claimed by the courts of every state. Federalist No. 81.

Judge O'Connor's adherence to this principle is just one example of her tenacity in defense of the Constitution as it was drafted by the framers.

On another occasion during the hearing, Judge O'Connor was assailed for stating that the exclusionary rule is a judge-made rule of evidence that could be altered without doing violence to the Constitution. Several members of the Judiciary Committee questioned Judge O'Connor extensively, seeking to induce her to waver on this principle. Again she held her ground. To learn the soundness of Judge O'Connor's reading of the Constitution, we can look at what the Supreme Court itself has said. Justice Black stated in *Wolf* v. *Colorado*, 388 U.S. 25 (1969), that:

> The Federal exclusionary rule is not a command of the fourth amendment but is a judicially created rule of evidence which Congress might negate.

Again, in *Linkletter* v. *Walker*, 381 U.S. 618 (1965), Justice Black iterated:

> The rule is not a right or privilege accorded to defendants charged with crime but is a sort of punishment against officers in order to keep them from depriving people of their constitutional rights. In passing I would say that if that is the sole purpose, reason, object, and effect of the rule, the court's action in adopting it sounds more like law-making than construing the Constitution.

Indeed, more recently, the Chief Justice has said:

> Reasonable and effective substitutes can be formulated if Congress would take the lead, as it did for example in 1946 in the Federal Tort Claims Act. I see no insurmountable obstacle to the elimination of the Suppression Doctrine if Congress would provide some meaningful and effective remedy against unlawful conduct by government officials. *Bivens* 403 U.S. 388 (1971).

Mr. President, Judge O'Connor was on sound footing when she assessed the exclusionary rule. More important than her effective defense of proper constitutional principles, however, was her courage to defend those principles with her own nomination on the line. This is the brand of bravery we need on the Supreme Court.

I could cite a good many more instances of Judge O'Connor both understanding sound constitutional doctrines and resisting the contentions of those who would have driven her away from those doctrines. For example, Judge O'Connor articulated well the reasons Congress must restructure Federal civil relief under 42 U.S.C. 1983:

In view of the great caseload increase in the Federal courts and the expressed desire of the Reagan administration to hold down the Federal budget, one would think that congressional action might be taken to limit the use of 1983. It could be accomplished either directly, or indirectly by limiting or disallowing recovery of attorney's fees. 22 William and Mary 801,810.

She also enunciated well the powers conferred by article III upon the Congress to regulate Federal court jurisdiction:

The jurisdiction of state courts to decide federal constitutional questions cannot be removed by congressional action, whereas the federal court jurisdiction can be shaped or removed by Congress. Id. at 815.

Mr. President, Judge O'Connor's performance before the Judiciary Committee and her rich experience in government both assure me that she understands the Constitution and possesses sufficient courage to carry out its mandate. At the outset of my remarks, I noted that James Madison characterized the Court as a "bulwark against every assumption of power * * * resisting every encroachment upon rights." The strength of the Court as a bulwark depends on the strength of the nine individuals who comprise it. Judge O'Connor, in my opinion should prove to be not simply a "bulwark" but the "impenetrable bulwark" described by Madison. She will be the kind of Supreme Court Justice the Framers of the Constitution had in mind when they drafted article III. I am honored to exercise my constitutional duty as a Member of the Senate in giving my wholehearted consent to President Reagan's appointment of Judge Sandra Day O'Connor to the Supreme Court of the United States of America.

Finally, Mr. President, I have to add that I personally am highly pleased that President Reagan, in his first Supreme Court nomination, knowing that he may have some more in the future, has opted to choose a woman to go on the Supreme Court of the United States. This is a decision that I think is long overdue. I think that we should have had a woman on the Court much before now. There are many great women jurists, women legislators, women attorneys, and women throughout other walks of life, with legal backgrounds, who could serve on the U.S. Supreme Court and who would add balance to the Court. That balance would give at least some solace and some comfort to women all over this country, who feel as though their needs, their feelings, their rights have not been adequately spoken for, debated, or even cared for.

I believe that Judge O'Connor will represent women's rights well. I think that her writings reflect that, her experience as a legislator reflects that. I think her experiences in the executive branch of the Arizona government reflect that well.

I also suspect that she is going to irritate all of us from time to time, as all Supreme Court Justices do. There is no way that anybody nominated to the Supreme Court of the United States is going to please everybody all the time, and there is no way that Judge O'Connor, as Justice O'Connor, will please everybody all the time.

All I can say is that, from her testimony before us, I was really pleased that she is motivated in the ways she is, that she is a student of the Constitution, that she is a strict constructionist, and that she is going to stand for the principles that I believe have made the Supreme Court the great institution it really is in our lives.

I hope that 20 or 30 years from now, perhaps longer, when Justice O'Connor steps down from the bench, the good things we have said about her this day will have been fulfilled and will have been principles of history and matters of history that all of us can look back upon with a great deal of happiness and with gratitude that she was chosen by this great President, who has lived up to another of his campaign promises.

I wholeheartedly support her, as I have from the beginning. I look forward to reading her decisions, and I expect them to be articulate and well-written and well thought out, as I believe her answers were when she appeared before the Judiciary Committee on her own behalf.

The PRESIDING OFFICER. Who yields time?

Mr. HATCH. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. Mr. President, I ask unanimous consent that quorum calls from now on not be charged to either side.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. Mr. President, I suggest the absence of a quorum

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRASSLEY. Mr. President, I am a member of the Judiciary Committee and from that standpoint have been very much involved in considering the nomination of Sandra O'Connor to the Supreme Court. That started with my answers to press questions about how I considered her nomination at the time the President announced it, through the time that we eventually considered the nomination and voted on it last week.

During that period I had an opportunity to visit with Judge O'Connor in my office for about 40 or 45 minutes. At the end of that meeting with her I had a press conference in which I was asked by members of the media how I would vote on Judge Sandra O'Connor's nomination.

At that time I said I was not going to announce my vote because, in fact, I did not have my mind completely made up as to how I would vote, and that I would make that judgment based on the hearing record.

Throughout the August recess I had an opportunity to be questioned many times by my constituents as I traveled the State of Iowa on how I was going to vote on this nomination. I gave the same answers to my constituents who asked the question as I did to the media in my press conference back in July, that I would make my final decision based upon the record.

We then had 3 days of hearings and a record of those 3 days to review, and even at that point, even though I probably was more sure than ever before as to how I would vote as a result of our personal conversations back and forth on the record not only between Judge O'Connor and myself, but as I listened to every other member of the Senate Judiciary Committee ask her questions and get her answers, and as I listened to her responses to all of us, I said at the end of those 3 days of hearings, when asked by the media how I would vote on this nomination, that I was going to wait and review the record in the same way that I did as I answered the same question in July.

The weekend before last I had occasion to review that record. As you all know, I cast my affirmative vote in support of Judge O'Connor during last week's meeting.

During that review of the record, I have undergone an evolutionary process since the middle of July when I first visited with her, and it has been such a process by which the end result is that it has been very easy for me to cast this positive vote for Judge O'Connor.

I do it enthusiastically and without reservation. If there is reservation in anybody's mind it is probably only because of how the confirmation process is used in the Senate. As I understand it, it is traditional and historical that nominees for the various courts do not answer specific questions to any great extent, particularly as they relate to cases that might come before the Supreme Court.

I had some feelings, and still do, that part of the hearing process could involve how nominees might react to cases that have previously been decided by the Supreme Court. I would not expect any nominee to state how that nominee would decide a case that would come before the Court in the future.

However if nominees would comment on previous cases, it might be helpful in obtaining more thorough knowledge about how they feel. Even though she did not go to the depth that some of us, particularly the new members of the committee, would have liked her to have gone in expressing opinions on previous cases, I can say this: everything I heard in her answers regardless of the subject, and I include abortion, and I would add that I liked the answers she gave. That I basically agree with those answers and it was on this record, made by all the

members of the committee as well as other parties who testified in support of her, that I made a final decision to support Judge O'Connor.

In the process of making this decision, three of us, the Senator from North Carolina, the Senator from Alabama and I, put in the record our feelings of how we felt that the nomination procedure ought to be looked at by the committee and by the Senate to see if there is some way, to find out if there is some way, we can legitimately expect more definitive answers to our questions, again not on cases that might come before the Supreme Court but on cases that have already been adjudicated by the courts and an opinion rendered.

We say that only in the sense that we think it is legitimate for Members of the Senate to have as much knowledge as we can about nominees to the Court and, particularly, in the case of nominees like Judge O'Connor who move up from the State courts, where they have not had a record of their feelings on Federal constitutional issues. I think it is all the more important in those situations.

On the other hand, the absence of that to this point does not in any way detract from my support for Judge O'Connor as I think in many respects though we do not have an extensive record on this to judge her as compared to nominees who have moved up from lower Federal courts, she does have much to offer the Supreme Court that other nominees have not had.

One of those we dwelt upon to a considerable extent is the fact that she previously was a member of a legislative body, the State legislature of Arizona. I think it is great that the President has picked someone who can bring the perspective of a legislator to the Supreme Court and, hopefully, this will enhance respect by the Supreme Court of legislative intent, particularly the intent of State legislative bodies, both to enhance the division of powers, the States and their legitimate role in our Federal system of Government, and also to enhance the separation of powers so that the legislative activity of this Congress will be respected to a greater extent by the Supreme Court.

She brings that background to the Supreme Court. She also brings the background of a State judge to the Supreme Court, and I think again this will enhance respect by the Supreme Court for previous work done by the State courts and, hopefully, will enhance the State courts rule in interpreting the law.

I support Judge O'Connor because I believe she has basic conservative philosophies, both judicial and political.

During the extensive Judiciary Committee hearings she stated her opposition to forced busing and support of the death penalty. Those positions are very satisfying to those of us on the Judiciary Committee and in the Congress as a whole who are looking to President Reagan to give a new direction to the Supreme Court so that we will have a Court that will exercise judicial self-restraint.

It is this sort of person who is going to bring judicial restraint to the Supreme Court and an example of the people whom the President might appoint to the Federal judiciary in future years.

And if it is—and I hope it is—then, I am all the more satisfied that President Reagan is headed in the right direction.

It is because Judge O'Connor basically has conservative views, that I support her. I do not think that there was much about her basic philosophy that I found to disagree with in the 2 months since she has been nominated. I feel more satisfied now as time has passed and I believe that every favorable thought that I had about her conservative philosophy has been reinforced as a result of the hearing process.

I would say that the reinforcement of my preconceptions about her came from those who have known her during her tenure as a member of the Arizona State Legislature. I was impressed by the testimony of Republican and Democrat State legislators who have known her, who said that she was a good person. an active person, a person who worked hard. I think these are qualities that we want in a judge.

Also, in regard to the abortion issue, there was a State representative by the name of Tony West, who was present and testified, who admitted, even though he did not specifically ask her how she might vote upon that issue before the courts, he said very specifically that he would not have been here in Washington that day supporting her unless he thought that she was right on that issue. Implicitly, I read that to mean that she was pro-life on the subject of abortion.

In fact, I have been considering my years in the Iowa Legislature, a small State legislature—and I assume that Arizona can be classified as a small State legislature—and I have been considering, too, as I remember my time there, the camaraderie that grows up among legislators, and that camaraderie transcends party lines more in State legislatures than even in the Congress of the United States. I think as you get to know your colleagues in the State legislature, that is a better record of basic instincts of a person than anything we can get out of the hearing process we had before the Judiciary Committee.

So I want to be supportive of her nomination because I feel that we had at least three members of the legislature there who, on many issues, maybe would not agree with her but on some basic ones that concerned us, they expressed their approval of her.

Finally, let me say to the Senate as a body that I want to be supportive of the President in this nomination—and let me say not blindly supportive, but I am supportive. I had some doubts about that, as I said previously in my comments today. I pursued, in my questioning of Judge O'Connor, how her conversations with the President went when she visited with him. I asked if they had discussed policy questions. She refused to answer that, and I can understand that. A conversation with the President ought to be just between the two people involved.

However, I had an opportunity last week at the White House to talk to the President about this nomination. I did not go there with the purpose of talking about this; it was on another issue. I, too, do not think that I should divulge anything that the President has said to me privately.

But I am satisfied that the President did consider the very same weighty issues that we as committee members considered and he feels that she is going to respond the way he would want his nominee to respond on these issues, but, more importantly, the President finished his statement to me, not about just Judge O'Connor, but about his own feelings on the subject of abortion.

That was the first conversation I ever had with the President specifically on that subject, and I have discussed many policy questions with him both before and after the election, and I am satisfied for the first time in my own mind that the President feels as I do on the subject of abortion.

I only say these things, in closing, to whatever extent they might satisfy some doubts the leaders of the prolife forces in this country may have that the President is not honoring statements he made in the election by his performance as President. I want to satisfy those people—at least I am satisfied—that his performance on this question, specifically as it regards the nomination of Judge O'Connor, is commensurate with his rhetoric.

Mr. SYMMS. Will the Senator yield?

Mr. GRASSLEY. I yield back the remainder of my time.

The PRESIDING OFFICER (Mr. RUDMAN). Does the Senator from South Carolina yield time?

Mr. THURMOND. How much time does the Senator desire?

Mr. SYMMS. One minute.

Mr. THURMOND. Mr. President, I yield to the able Senator from Idaho.

Mr. SYMMS. Mr. President, I thank the distinguished chairman of the Judiciary Committee for yielding to me.

I would like to compliment my friend, the Senator from Iowa, for his very thoughtful consideration of this. I had the opportunity to work with the Senator from Iowa in the House and have known him to be a very careful and thorough member of committees, having served on committees with him.

I am not a member of the Judiciary Committee, but I would like to compliment Senator THURMOND and his entire committee for the very careful approach that they took in working through what I ccnsider to be a very important and responsible part of our responsibilities as Members of the Senate, to advise and consent to the President's nomination to the Supreme Court.

I am supporting President Reagan's nominee for the Supreme Court, Sandra O'Connor.

During Judge O'Connor's confirmation hearings she proved herself to be a very capable, articulate, intelligent individual with a precise legal mind. With her political background as a former legislator in Arizona and her substantial

knowledge of law she will bring to the highest court in this country a good balance of experience.

Judge O'Connor was questioned extensively by members of the Judiciary Committee on a wide variety of topics. For the most part she was forthright in her answers although she avoided some lines of questioning expressing a desire not to specifically commit herself on legal questions she might in the future be called to rule upon as a member of the Court.

I was, however, very pleased that she confirmed a belief that the Federal judicial system should have a limited role in American life. It appears that Mrs. O'Connor will help steer the Court toward its traditional role of interpreting the laws, rather than making them.

President Reagan made a commitment a long time ago to choose Supreme Court justices on the basis of the whole broad philosophy they would bring to the bench and appoint men and women to the Court who respect the values and morals of the American majority. I believe the President met that commitment by choosing Judge O'Connor for this very important post in the judicial branch of our Government.

On balance it appears she has the potential to be a very fine associate justice and I am confident that at some future time we will be able to look back on this appointment as one of the best in the proud history of the Supreme Court.

The PRESIDING OFFICER. The Senator from Delaware.

Mr. BIDEN. Mr. President, we have an abundance of time on this side of the aisle. If the Senator from Idaho would like more time, I would be delighted to yield to him.

Mr. SYMMS. I have completed my statement.

Mr. THURMOND. I yield to the Senator from Connecticut.

Mr. BIDEN. I would be happy to yield on our time. I think the Senator from South Carolina is running low on his time.

Mr. WEICKER. Will the Senator yield me 5 minutes?

Mr. BIDEN. Yes, I yield 5 minutes to the Senator from Connecticut.

Mr. WEICKER. I thank the distinguished Senator from Delaware.

Mr. President, I rise in enthusiastic support of Judge Sandra Day O'Connor's confirmation as Supreme Court Justice. The President has made an excellent choice for our highest court. As someone personally acquainted with Mrs. O'Connor, let me assure my colleagues and the American people that she will grace the Court with her intelligence and integrity.

During her years in the legislature and on the bench, she has exhibited an astute legal mind and a rigorous conscience. And if anyone had any doubts about her political savvy, those were put to rest during her recent appearances on Capitol Hill.

In one-on-one meetings with Members of Congress and long, searching sessions before a Senate committee, Mrs. O'Connor remained unflappably calm and forthcoming in her responses.

Some complained that Mrs. O'Connor should not have to be subjected to such grueling interrogation. But I disagree. Now is the time for Congress to poke and pry into Judge O'Connor's politics. Now is the time for the Congress to address the proper role of the courts as well as the improper role. Now and not next month or next year when Mrs. O'Connor takes a stand on an issue that some Members of Congress disagree with.

Once this nominee is confirmed and takes her seat on this Nation's highest court, those kinds of questions will be out of order. Once she is confirmed, she must be independent, completely and utterly free of interference from anybody, and that includes Members of Congress as well as the President of the United States. That is what our Constitution calls for. That is what is meant by the checks and balances of a tripartite system of government.

We in the Senate will not have the right to look over her shoulder as she writes an opinion and tell her, "No, Justice O'Connor, you can't reach that conclusion or prescribe that remedy. You must support school prayer but not school busing. You must ban abortion but allow capital punishment." We cannot decide that for her. From here on she is on her own.

Is there anyone here who really wants 100 politicians to decide the quality of justice he or she will receive when their day in court comes around? Do any of us want our Supreme Court counting votes on the Senate floor when it decides an issue affecting our civil rights? The answer is no. We all deserve better than that.

In Mrs. O'Connor we have a top-notch nominee. Let us confirm her and then stay out of the way and let her do her job. She will do it exceedingly well.

Today marks our swing at the pitch. And that is proper. What will always be inappropriate is to use the legislative bat as a subsequent club over the heads of the judicial and executive branches.

I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. THURMOND. Mr. President, I suggest the absence of a quorum and I ask unanimous consent that the time not be charged to either side.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. Mr. President, I yield to the Senator from Missouri.

The PRESIDING OFFICER. The Senator from Missouri.

Mr. DANFORTH. Mr. President, President Reagan has nominated Sandra Day O'Connor to be an Associate Justice of the Supreme Court. When confirmed she will be the first woman to serve on the Court in its history.

I have followed the controversy surrounding her nomination with great interest, a controversy centering on Judge O'Connor's views about abortion. Her record as a legislator in the State Senate of Arizona has been looked at in the minutest detail, and indeed much of Judge O'Connor's testimony before the Judiciary Committee last week was devoted to yet another reexamination of her record and her present opinions on that subject.

Let me say that I have been concerned with the question of abortion for a long time. Throughout the debate on Federal funding for abortion, I have continually supported the strictest language possible, language that would restrict the use of Federal funds only to cases where the mother's life is endangered. My own commitment to human life and my opposition to abortion are fundamental.

Nonetheless, I firmly believe that the preoccupation with her personal views displayed by opponents of Judge O'Connor's confirmation is misplaced. They are asking the wrong question. In my opinion, one's personal views on matters of public policy have little or no bearing on how one comprehends the duties of the judiciary under the Constitution.

We are not electing a legislator when the Senate confirms a man or woman for a seat on the Supreme Court. We are naming a justice. The true question to be addressed and answered regards Judge O'Connor's view of the Court and the role of the judiciary in the governmental system. Does she view a justice as a legislator and the Supreme Court as an institution that creates public policy? Or is the Court charged with determining what the law is and with enforcing the law enacted by the legislative branch.

Judge O'Connor left the Senate in no doubt about her answer to this question. After remarking on her experience as a State legislator and State court judge, she said:

> Those experiences have strengthened my view that the proper role of the Judiciary is one of interpreting and applying the law, not making it.

She repeated this basic belief time and again over 3 days of hearings before the Judiciary Committee.

President Reagan was outspoken in his campaign for the Presidency about his desire to stop overreaching by the Supreme Court. I wholeheartedly agree with him. And yet the position of Judge O'Connor's opponents seems to be that a nominee's personal preferences on issues such as abortion are not only relevant, but that those preferences should be pressed on the Court.

My view and the President's view, on the other hand, is that the Court is not the philosophical arbiter of Government policy. Our view is that the legislatures, both State and Federal, properly make policy decisions. The Court is to interpret the law and to apply it to different sets of facts.

Its task is to do justice, to fill in, as Justice Cardozo said, the interstices of the law. President Reagan and I are against judicial activism, whether it is activism of the right or the left. This is a conservative view of the Court and its

function that I am commending to my colleagues. The opponents of Judge O'Connor are not judicial conservatives, they are judicial activists. They seek to work their own will on the country through unelected judges.

It is easy to understand the unhappiness felt by the opponents of abortion, of whom I am one, with recent Supreme Court rulings. In many cases, most notably Roe against Wade in 1973, the Court has substituted its judgment on questions of domestic relations and public health for the judgment of State legislatures.

It is this practice of the Supreme Court and the lower Federal courts that we in the Senate ought to be working to stop. I believe we will be taking an important step in that direction by confirming Sandra O'Connor.

Judge O'Connor was asked her opinion of Roe against Wade during her confirmation hearings. She properly declined to comment directly on what she would do in any future abortion decision. But I conclude from what she did say about the role of the Court that she would have dissented in that decision.

Roe against Wade, as is well known, held that a woman's freedom to decide to have an abortion is a "fundamental right" protected by the Constitution against State interference. A State's right to proscribe or at least regulate abortions for the health of the mother or because of its interest in protecting the unborn child was judged secondary to a woman's right of privacy.

This right of privacy was expounded by the Court in Griswold against Connecticut in 1965.

While it is not clear from the various opinions in that case precisely what the constitutional basis of this right to privacy is, the effect of its creation and subsequent application in Roe against Wade was to remove from the State legislators decisions previously made by elected representatives.

In Planned Parenthood against Danforth I sought to uphold Missouri's ability to pass legislation preserving and strengthening marriage, an institution which an earlier court called "the foundation of the family and society, without which there would be neither civilization nor progress."

Missouri and I lost our battle, and the unhappiness over this and other abortion decisions explains why Judge O'Connor's nomination faces such an outcry from opponents to abortion.

And yet, to repeat, I think the outcry in this instance is misplaced. Judge O'Connor not only can, but should be part of the solution to a problem that includes the abortion decisions but goes beyond them.

That problem is a Federal judiciary that too often is willing to substitute its will for that of the legislative branch of State and Federal governments.

What we are concerned with is a judiciary that sometimes acts as though it is superior to the legislative power. This is the abuse that we need to stop, one which reaches to the heart of our entire system of government, one that challenges the very operation of a limited government such as ours.

The three branches of our Government are bounded by the Constitution, that document that at once makes possible and protects our liberty and prosperity. The three branches were designed as coequals and as coequals should not seek to control or undermine each other.

This difficulty with the judiciary is a perennial one. As long ago as the 1830's, de Tocqueville, that astute French observer of our national life, remarked that:

> Hardly any question arises in the United States that is not resolved sooner or later into a judicial question.

But, to borrow from the clear eye of Alexander Bickel, to say that the Supreme Court touches many aspects of American life does not mean that it should govern all that it touches. The work of interpeting the law, and ultimately the power to declare unconstitutional a statute passed by the Congress and signed by the President, is so important that the independence of life tenure is granted to the Court's members.

With this freedom from the ordinary demands of political life in this republic, the Court has the responsibility to exercise its power with the utmost discretion and respect for its coequal representative body. To do otherwise the Court risks losing the faith of the American people and their representatives in this Congress.

A substantial loss of faith will inevitably result in an attempt permanently to shackle the Court, either by stripping it of jurisdiction to hear a wide range of cases or by a constitutional amendment that would forever change its nature. There are already such efforts afoot in the 97th Congress.

I have faith after reviewing what Judge O'Connor has said and done in her career that she understands these things. She will not don her robes in order to legislate for partisans of any cause, left or right.

It is the expectation of this Senator that Judge O'Connor will join the Highest Court of this land dedicated to the final responsibility of insuring that our constitutional doctrines will be continuously honored.

Mr. THURMOND. Mr. President, I suggest the absence of a quorum.

Mr. BIDEN. Will the Senator withhold that. Mr. President?

Mr. THURMOND. I withhold it, Mr. President.

Mr. BIDEN. Mr. President, I have not taken the occasion this morning to speak about this nomination. Due to the fact that none of my colleagues are on the floor seeking to be heard at this time, I shall now speak about the nomination, if I may.

Mr. President, I, as did my colleague and chairman (Mr. THURMOND), sat through the hearings on the confirmation of Sandra Day O'Connor's nomination. I listened to Judge O'Connor expound on a series of issues and subjects; she described her perspective on the Constitution, the role of the Court generally, and her role, as she saw it, were she to be confirmed on that Court.

I was personally very satisfied with most, if not all, of the answers that Judge O'Connor gave. The strange thing, Mr. President, was that I noticed all of my colleagues were basically satisfied; this worried me.

I looked around on that committee and I found people with whom I have basic philosophic disagreements apparently being as satisfied as I was with Judge O'Connor's answers. And just as, as I am sure, that gave them cause to be concerned, it gave me cause to be concerned.

I am not being facetious when I say that, Mr. President, because if Senator EAST, for example, and Senator BIDEN could agree on what the qualifications of a judge could be, then either we did not understand one another's position or one of the two of us was misreading what the judge had to say. As I began to contemplate what that meant, all of a sudden a thought occurred to me. That same thought was prompted by the speeches made here this morning.

What dawned on me was that no one, Mr. President, in the approximately 200-year history of the Court, has been accurately able to predict what a Justice of the Supreme Court would be like prior to that justice's being appointed to the Supreme Court. It is somewhat of a futile exercise for us to stand on the floor of the Senate, with all due respect to my colleagues on both sides of the aisle, and assure our fellow Senators what this judge is going to be like.

It reminds me a little bit of a kid walking through a graveyard. When I walked through a graveyard to make a shortcut through to get up to my house, I used always to whistle. I used to whistle in the graveyard. It was more to assure myself that everything was all right than anything else. I was not whistling for the dead. I knew I did not believe in ghosts, I knew I was not frightened, but I wanted to let myself know aloud that I was not.

There is a great deal of whistling in the graveyard going on here on the floor of the Senate today. There is a huge amount of whistling in the graveyard about what kind of justice Judge O'Connor will be.

It would be my guess, if I had to guess, that she will be a fairly moderate justice. I do not think she will be significantly different from the man she is replacing. I think, in fact, she will probably be what my friends on the right like to think of as a strict constructionist. But every time we asked her that, she told us how important stare decisis is. She said, "Yes, I do not think judges should make the law, I think they should interpret it. Stare decisis is important." But everybody heard the first part of her comment, not the second part.

Mr. President, what my friends on the right are looking for these days is not a judge who believes strongly in stare decisis—because, a judge who does that relies on precedents, the cases the Supreme Court has already decided.

The Supreme Court has decided, in my humble opinion as a layman, incorrectly in the Roe case, but the fact of the mat-

ter is that the Court has made a decision with regard to abortion. The Court has made a decision with regard to the rights of women. The Court has made a number of decisions with regard to civil liberties and the first amendment. And here we have a judge who says, "I am a conservative; ergo, I will follow precedent."

What is happening on this floor is a strange juxtaposition of what the traditional roles have been and what you seek in a Supreme Court Justice. Really, what the liberals like HOWARD METZENBAUM are looking for is a strict constructionist. He does not even know it, I think. He wants somebody who is going to make sure that they do not overturn the decisions of the Warren Court. That is a strict constructionist today, in the way Judge O'Connor would always use the phrase.

Really, what my friend, Senator HELMS, and my other friends on the other side of the aisle—and some on this side of the aisle—are looking for is an activist on the Court. If Judge O'Connor is not an activist, she has problems, because she is not going to be overturning the decisions that they—and I, on occasion—sometimes find odious, obnoxious, or totally reprehensible.

I guess what I am trying to say, Mr. President, is that I solved the dilemma for myself of why I could sit there with Senator EAST or Senator DENTON and others with whom I have basic philosophic differences and we could both think this judge was going to be the kind of Justice we would appoint or we would be happy with if we had the right to determine who is going to be on the Court. It is because we have all confused, in my humble opinion, what we are looking for. Strict construction today, adherence to precedent today, may be the opposite of what intellectual conservatives would want.

Conversely, an activist justice may be the last thing in the world people like me would want, because I believe that the Court was right heretofore on civil liberties, has been correct on civil rights.

So, Mr. President, I caution my colleagues not to tie themselves in too tightly or weave such a closely knit web for the electorate in defining what this judge is going to be like. We are not seers; it is not our role to determine what she is going to be like. And this gets me to the basic thrust of what I think we should consider in nominees and why I am so ardently in support of Sandra Day O'Connor. That is that she possesses the qualifications to be a Supreme Court Justice. Those qualifications, in my opinion, are, in fact, not what her philosophy is and not what we think she will be, but, first of all, whether or not she possesses the legal skills and capabilities, training, and background to understand, and, in fact, have some possibility of interpreting the Constitution of the United States of America.

In short, does she have a lot of gray matter? Is she very bright? Notwithstanding the now notorious comment of a former colleague of ours, mediocrity on the bench is not something we need. We need superior intellects. This is the most superior of courts, Mr. President, and she has a superior intellect.

The next thing I think we should look for in nominees to the Supreme Court—and I do not know whether we can tell, in a predictable circumstance—that is, whether or not she is someone of moral character. There is only one way that I know of to determine whether or not someone has a good moral character. Either you know the person personally for a long time and can attest to it—and I suspect 99 or 98 of us in this body do not know about Sandra Day O'Connor—or you look at the person's background and all phases of the record. Investigators on the minority side, as on the majority side, went into great detail in investigating Sandra Day O'Connor's background.

We not only had the FBI checking, which they would have done anyway; we had our own people. We interviewed everyone, from people with whom she went to school to those with whom she practiced law and those with whom she served in the legislature, those who knew her family, those who knew her as a child. Across the board, unequivocally, even those who did not like her personally—and there were not many of those—said the woman has a lot of character; she is honest; she is straight; she is an outstanding person.

It seems to me that when you get by those first two tests, there is only one, last test we should be looking at, and that is whether or not the person has judicial temperament to be on the Court. That is almost a term of art, but it is not something that is unimportant. You can be brilliant, you can have great moral character, you can be honest as the day is long and know the Constitution and American jurisprudence better than anyone else and still be a poor judge because you do not have a good judicial temperament—you tend to lose your temper, you tend to lose your objectivity, you are not open-minded enough to see all sides of a question. That is judicial temperament.

Sandra Day O'Connor, from observation and from looking at her record, notwithstanding the fact that she has not had a long record on the bench, has had a long record of being openminded, willing to listen to all sides of an issue, and able to make, in a judicious nature, if you will, a decision based on the facts as she knows them.

So, Mr. President, I do not know what more we can ask of a Justice of the U.S. Supreme Court. We had a President, a great one, Dwight D. Eisenhower, who appointed a man named Earl Warren because he thought Mr. Warren was a mainstream Republican, and President Eisenhower wanted to have a conservative on the Court. Earl Warren turned out to be not the most liberal justice on the Supreme Court—Justice Douglas and others were more liberal—but the most liberal leader of the Court that the Court has known in its 196-year history. Earl Warren revolutionized his court—civil rights, civil liberties, and a huge range of other issues in the U.S. legal spectrum.

At that time, we had a President who appointed a man he thought was of a different philosophy.

We have had Presidents who decided they wanted to appoint very liberal Justices to the Supreme Court. I do not believe anyone is going to accuse Justice White of being the most liberal member of the Court, but we had a famous and known conservative President of the United States appoint him to the Court.

At the risk of overstating the case, I believe these examples from our history should be enough caution to those of us on the floor who are willing, for our own political needs and/or because we think we know, to stop predicting what she is going to be and to underscore the need for us to have more objective criteria to determine whether or not someone should or should not be on the Supreme Court of the United States—that is, their intellectual capacity, their background and training, their normal character, and their judicial temperament.

We cannot be asked to effectively do much beyond that; for, if it were our task to apply a philosophic litmus test beyond that—which is not the constitutional responsibility of this body, in my opinion—it would be a task at which we would consistently fail, because there is no good way in which we can know.

So I believe we should caution the electorate that even if they want us to apply a litmus test, even if they think that is our role, it is not something we can do very well; because once a Justice dons that robe and walks into that sanctum across the way, we have no control, and that is how it should be—we have no control. They are a separate, independent, and equal branch of Government, and all bets are off.

It is unlike the situation with respect to Senators and Presidents, in which the electorate can demand of us what our philosophic background is or what we think about a particular issue; and if we turn out to be different from that which they perceive, as many of us have in the past, they do to us very rapidly what they have a right to do—take back the seat that they own, not we, and say, "We made a mistake. We thought we elected a liberal, and he turned out to be conservative. Goodby." Or, "We thought we elected a conservative, and he turned out to be liberal. Goodby."

You cannot do that with a Justice. So we should not kid our electorate; we should not tell them we know. We can tell them what our hopes are. We can tell them what are desires are.

I hope Sandra Day O'Connor understands the futility of busing and understands that there is, in fact, a logical, constitutional argument for its exclusion from the remedy package. I sincerely hope that. But I have to tell my constituency the truth when they ask me, as they did during the August recess, "Joe, are you for this woman? Are you sure she is against busing, as you are?" They look you straight in the eye. I say, "I don't know. I hope so." It is the same with an entire range of other issues.

Mr. President, the only thing I am sure of today, as I prepare to vote in favor of the nomination of Sandra Day O'Connor, is that she is a woman of competence, intellect, and high moral standing, and has a record of 25 or more years of public

service that reflects a judicial bearing, a judicial temperament.

That is all I can be expected to know. I happen to believe that that is all I have a right to ask. Consequently, when that test is met, I not only feel compelled but also feel very good about exercising my role, my duty in the advice and consent process, and saying, "Yes, Mr. President, the woman you picked should be on the Court; she meets the test, and I enthusiastically support her."

The reason I bothered to take this much time is not merely that no one else wanted to speak and that I had a lot of time remaining. Another reason why I have taken this much time is that this is not the first test we are going to have. We are going to be back up here again, I am sure—perhaps not in the next 3 years, but in the near future, if Father Time has his way, as he does with all of us, and we will be making a similar decision on one, two, three, or four more Justices—soon, in the near term. It will be at least in this decade.

So I hope we do not lock ourselves into boxes which, in order to be consistent with our duties as Senators, we will have to climb out of, to our embarrassment, when the next nominee comes before us.

I find it very interesting that some of my liberal friends say that my conservative friends had no right to ask about abortion. Yet, if the President were to send up the name of somebody who was against the Voting Rights Act, who had a background of having been associated with the Klan or some other group whose ideas were anathema to civil rights, all of a sudden the litmus test would start to be applied.

I have that litmus paper out on this side, and it will be turning pink quickly.

Everyone will be saying, "Oh, no." My friends on the other side of the aisle will be saying it should not be one issue.

So if we have a sense of what obligation is, I think we will do the country a better service, we will do ourselves a serious political service, a good service, and that is not make fools of ourselves, and we will be honest with the public and hope that Sandra Day O'Connor continues to display her intellectual excellence, her moral standing, and her judicial temperament, and even with that we cannot guarantee but we can hope.

With a little bit of help and prayer, and it is likely that past is prologue and her past is exemplary, she is a fine woman, she deserves to sit on the Supreme Court of the United States if the President wants her there. He has a right to make that choice, and we do not have a right to turn it down unless she does not meet one of those standards, in my humble opinion.

Unless one of my colleagues wishes me to yield time to him, I am delighted to yield on our time to the Senator from Washington State.

Mr. GORTON. Mr. President, I had not intended to speak on this nomination, but I should wish to have the record show that I find the statement of the Senator from Delaware to have been thoughtful, to have been very well thought out, to state the duty of the Members of the U.S. Senate in dealing with nominations for the Supreme Court of the United States, in a fair, appropriate, and effective fashion.

I should wish to thank him for that statement which will grace this record and simply to say that I agree with everything which I have heard him say during the course of this talk.

Mr. BIDEN. I thank the Senator from Washington.

Had I known he was going to say that I would have yielded to him much earlier.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection. it is so ordered.

Mr. THURMOND. Mr. President, I yield to the distinguished Senator from Mississippi.

Mr. COCHRAN. Mr. President, I thank the Senator from South Carolina, the distinguished chairman of the Judiciary Committee for yielding to me.

This is indeed an important day in the life of our Republic. The Senate will confirm today the nomination of Sandra O'Connor as Associate Justice of the Supreme Court.

Not only has President Reagan chosen a woman to sit on the highest court in our Government, he has selected a person with outstanding qualifications. She has served with distinction as a State court judge, as an able and diligent legislator, and throughout her life she has been a concerned, caring, active citizen, participating in community and civic activities, helping make her area of the United States a much better place for all of its residents.

She obviously is a person with a keen intellect, whose respect for knowledge and reason will help make her a respected member of the Court. Her allegiance to the law and its importance to our society will serve as a firm basis for making the hard decisions that will be hers to make.

There are many competing and sometimes conflicting interests in our Nation. One of the most important functions of the law, and responsibilities of our courts, is to balance fairly and equitably those legitimate interests that are pressing for recognition. In many cases the law is not well settled. Precedents may not be clearly defined. That is why we have a Supreme Court. It is to this tribunal that the hardest questions are put.

In my mind, the quality and correctness of opinions and decisions and hence the compatibility of the people with their government will depend on the conscientious application of reason and the rule of law by the justices of our highest Court.

I am comfortable in the expectation that Mrs. Justice O'Connor will discharge the important duties of this office in a manner that will make us all proud of the Court and of our system of justice.

In conclusion, Mr. President, I must admit that I am delighted the President has chosen a woman to fill this vacancy. There has been a long wait.

I remember when women were first permitted to serve as members of the jury in civil and criminal cases in our courts. A dramatic impact on trials occurred, as I remember, because of their dedication to their duties and sense of fairness and the seriousness with which most women jurors attempted to comply with the courts' instructions as to the law governing the case. The quality of justice improved greatly in my State as a result of that long overdue change.

I am convinced that the future competence of the Supreme Court is assured by the excellent decision of our President to nominate Sandra O'Connor. It will be my pleasure to vote in favor of her confirmation.

I thank the Senator from South Carolina.

Mr. MATHIAS. Mr. President, this is an historic day in our Nation's history. Today we, in the U.S Senate, will exercise our authority under article II, section II of the Constitution and grant our consent to the nomination of the first woman to the U.S. Supreme Court. It is also an historic day in our Nation's continuing effort to insure women full citizenship in this country.

I think it is important that we savor this moment, because it is a milestone in the history of the Court itself, and there have been only a few of these moments. We should pause and realize that we are at the end of one era and the beginning of another. Sixteen years ago, President Johnson nominated Thurgood Marshall to the Court. We celebrated that appointment too as one of historic dimension. President Johnson said on that occasion:

> I believe that it is the right thing to do, the right time to do it, the right man and the right place.

By changing one word, I think that those words of President Johnson would be just as appropriate today.

I think President Reagan has demonstrated great vision and a fine sense of history in nominating Judge O'Connor for the seat that Justice Potter Stewart has held with such distinction for such a long time. Much reference has been made to the fact that Judge O'Connor comes from the State courts. This may indeed turn out to be an asset by bringing that State perspective into the Supreme Court.

In so doing, she will follow in the footsteps of some of her most distinguished predecessors—Justice Cardozo, Justice Holmes, Justice Brennan—and she will serve in good tradition.

Shortly before Judge O'Connor was nominated, I had an opportunity to meet with her and to discuss at length a variety of legal issues. During that conversation, I got a clear sense that when she is confirmed she will come to the Court as an interpreter of the law rather than as one who originates law. This is a view with which I wholeheartedly concur. We continued our dialog on this issue—and many other relevant con-

stitutional issues, such as freedom of the press—when my colleagues on the Senate Judiciary Committee and I had the opportunity 2 weeks ago to query her on the whole gamut of legal and constitutional issues of concern to us today, we put her through a rigorous and grueling examination. She passed that test with distinction. I have no doubt that Judge O'Connor's nomination will receive the whole-hearted support of the U.S. Senate on this historic occasion.

Mr. HUMPHREY. Mr. President, I rise today in support of the nomination of Sandra O'Connor to the Supreme Court. I met privately with Mrs. O'Connor and also observed her hour after hour in the Judiciary Committee. I have concluded that she is highly qualified to be confirmed by the Senate and intend to vote in her favor.

Let me share with you my observations of Sandra O'Connor wihch led to my decision to vote for her confirmation as a Justice of the Supreme Court. When I met in my office privately with Mrs. O'Connor we discussed judicial philosophy. There is little doubt in my mind that Mrs. O'Connor will be a conservative Justice of the Supreme Court. For instance, when I pointed out to her that the Constitution is only what the Supreme Court says it is, she quickly interjected saying, "No, I don't agree. The Constitution is what the Constitution says it is." In the committee hearings, her responses along this line were much the same. She further indicated her understanding of the difference between legislating and judging. She stated quite simply that, "As a judge, it is not my function to develop public policy."

Mr. President, I am sure most of my colleagues would agree that it is the duty of each member of the Court to put aside personal preferences and reach decisions based purely on the facts, the law and the Constitution. I believe that Mrs. O'Connor's clearly apparent conservative judicial temperament, that is, her conservative view of the role of the courts, and her clear understanding of the separation of powers, especially between the judiciary and the legislature, indicate that she will make an excellent Justice of the Supreme Court.

MRS. SANDRA O'CONNOR WILL SERVE WELL ON THE U.S. SUPREME COURT

Mr. RANDOLPH. Mr. President, it was my privilege to testify in support of Mrs. Sandra O'Connor at her hearing before members of the Senate Judiciary Committee on Wednesday, September 9.

I wish to read to the Senate my statement before the committee:

Mr. Chairman, members of the committee, I appreciate your giving me the opportunity to be heard on this historic occasion.

I am not overstating the case when I refer to this hearing as historic. For the first time in the 205 years of our Republic's existence the Senate is called on to judge the qualifications of a nominee to the U.S. Supreme Court who is a woman. I regret very much that it has taken more than two centuries to acknowledge through this nomination that just as justice should be symbolically blindfolded when determining the facts, we should be oblivious to sex when selecting those who administer justice.

Mrs. Sandra O'Connor will appear before this committee today as the choice of our President, not solely because she is a woman, but because her record appears to qualify her to serve on our Nation's highest tribunal.

I would be naive to believe that if Mrs. O'Connor is confirmed as an Associate Justice of the Supreme Court, her sex will cease to be a factor in her decisions. She will be urged to make feminist rulings; she will be criticized if she makes them or if she resists this pressure.

I look forward to the time when Justices of the Supreme Court are selected and evaluated solely on their experience, their knowledge of the law, and their dedication to the United States as a nation governed by the laws the people impose on themselves.

Mr. Chairman, when Mrs. O'Connor becomes a member of the Supreme Court, we will have succeeded at long last in having a woman occupy virtually every high office our country has to offer. The most notable exception is the White House, and I anticipate the day when the highest office in our land is not exclusively a male preserve.

A breakthrough occurred during the week in March of 1933 in which I first became a Member of the House of Representatives. It was on March 4 of that year that President Franklin D. Roosevelt—the day he took office—broke another precedent by appointing Frances Perkins as the first female cabinet member. During the 12 years that Mrs. Perkins served as Secretary of Labor she repeatedly demonstrated the wisdom of President Roosevelt's action. Her distinguished career made it easier for the other women who have subsequently served in the Cabinet.

Mrs. O'Connor, I wish you well, not only during these hearings, and the Senate confirmation vote, but during the challenging years ahead. You will be called on to make many difficult decisions, but I am confident you will approach them with a spirit of fairness, justice, and equity.

Mr. DOMENICI. Mr. President, today I wish to join the myriad of Senators who have risen to support the nomination of Sandra Day O'Connor to the U.S. Supreme Court.

Throughout the confirmation process, Judge O'Connor has impressed me as a thoroughly qualified, even brilliantly prepared, candidate for the Supreme Court. Her testimony before the Senate Judiciary Committee showed her knowledge of previous Supreme Court decisions, even those most recent ones. She declined, and quite properly so, to state her own personal views on matters that may come before the Court.

I am convinced that Judge O'Connor is a strict constructionist, both of case law and statutory interpretation. She is deeply concerned about crime in this country and has been strict in punishing criminals. She is a strong defender of private property rights and believes in the sovereignty of the States.

During her confirmation hearings, Judge O'Connor showed great strength of character, a calm and reasonable manner, and a remarkable intelligence. Judge O'Connor said that she would approach cases with a view toward deciding them on narrow grounds and with proper judicial restraint. This should assure anyone concerned that she will not be going out of her way to make rulings that create sweeping changes in social policy.

I believe Judge O'Connor will be an excellent Supreme Court Justice, and that she is an outstanding choice as the first woman to serve on that great body. I predict that we will look back on this appointment as one of the major successes of the Presidency of Ronald Reagan. I congratulate him on this superior appointment and I will join with an overwhelming majority of this Senate to confirm her as Justice of the U.S. Supreme Court.

● Mr. DENTON. Mr. President, the Senate Judiciary Committee has, without dissent, recommended the confirmation of Mrs. Sandra Day O'Connor as an Associate Justice of the U.S. Supreme Court. Although I am new to the Senate, I am quite uncomfortable with the point of view so prevalent in the O'Connor hearings regarding the proper role of the committee in the confirmation process.

Primarily, I am troubled by the contention that a nominee need not discuss, endorse, or criticize specific Supreme Court decisions. The basis for this contention is that such discussion would lead to later disqualification when cases arise that are similar to those that led to the establishment of a particular doctrine.

In my view, acceptance of this argument by the committee has created a particularly unfortunate situation in light of this nominee's past actions with regard to legislation on abortion and the limited number of judicial decisions upon which to determine her views on this and other issues. I had regarded as relatively unimportant the nominee's previous voting record on the abortion issue because Judge O'Connor had indicated that she had had a personal change of heart on the subject of abortion. Thus I had hoped to make a decision about her fitness for office on the basis of answers given to questions posed in the committee hearing.

However, the nominee repeatedly declined to answer questions about her view of the legal issues presented in the case of Roe against Wade. Relying upon the argument advanced earlier, she stated that, in her opinion, any criticism of that decision would prejudice her with regard to the abortion question.

Others have reasoned that neither this nor any other "single issue" should stand in the way of the confirmation of the nominee. I respectfully disagree with the notion that the rights of unborn human beings represent a single divisive issue that should not overshadow the otherwise excellent credentials of Judge O'Connor. Abortion—the wrongful taking of a human life—is not simply a political issue; the question of when life begins and of how it should be protected at all stages is essentially a civil rights question, and one which I believe is of immense importance.

The denigration of human life by increasingly relying on subjective meas-

ures of its "quality" or "meaningfulness" rather than on the principle that all life is God-given is frighteningly reminiscent of Hitlerian ideology. If government by judicial fiat removes the protection of the right to life from a class of individuals—in this case the unborn human being—then, the protection guaranteed others—the handicapped, the aged and the terminally ill—might also be lost in the years to come.

Moreover, biomedical research is quickly producing a whole series of new ethical questions about the nature and meaning of life. The Supreme Court's decision in Roe against Wade indicated a judicial willingness to alter fundamental historic protections by defining the concept of "person" so as to permit the elimination of the fetus, even as science was widening the concept of life.

This Nation is currently involved in a dialog that must not cease until it resolves this fundamental question of human rights. The terrible reality of the debate over abortion is that it has divided households, it has divided friends, and it has divided this body. We cannot dismiss the abortion issue when considering judicial nominees simply because the Nation has not reached a consensus. Every public official, and indeed, most citizens should exercise their right to speak out on this issue. It seems that once in every century a nation faces such a pivotal question, and I and millions of others cannot divorce the concept of the right to life from the concept of equal justice under the law.

The Supreme Court in its holding in Roe against Wade asserted final authority over the rights of the unborn fetus. Many argue that the Congress and the States have, in the course of a decade, reached a point at which further legislative remedy of abortion excesses is impossible without the approval of the Court. Prospective Justices cannot argue convincingly that the widespread controversy surrounding this issue makes their public pronouncements any more subject to criticism than the statements of the elected officials who must give advice and consent concerning judicial appointments. Prospective Justices might find that their criticism of a particular doctrine could make confirmation a more difficult process, but it does not mean that they will or should find themselves in violation of the statutes, ethical canons and other judicial renderings governing disqualification of Supreme Court Justices.

However, I recognize that others for whom I have enormous respect, including the chairman of this committee, agree with Judge O'Connor in her caution in replying to questions that attempt to elicit her views as to the correctness of prior decisions of the Court. Many of those same people are highly respected opponents of the abortion procedure. All the same, I do not believe that this committee can properly fulfill its duty to the rest of the Senate regarding any judicial nomination when it lacks an accurate estimate of the nominee's position respecting an issue of overriding importance to the general welfare of the United States.

In this context, I personally view the committee's role as a separate and distinct function from the decision which must now be made by the Senate as a whole. I respectfully contend that the committee should serve as an investigatorial body with respect to these nominations—eliciting as thorough and precise responses to specific questions as it possibly can—in order that the rest of the Senate can make a fully informed decision on the nomination. The role of the full Senate I would liken to that of judge—assessing the committee proceedings and judging the nominee on qualifications, experience, integrity, and opinions on basic legal questions.

This investigatorial responsibility of the committee is even more awesome when considered in light of the fact that this appointment is one of life tenure. This is not a 4-year, assistant secretary appointment. If confirmed, the nominee will have continuous potential for influencing a critically important issue for an indefinite period.

Given my own position on this most basic question of human life, and given the reluctance of Judge O'Connor to address the legal question of abortion in a forthright manner, I could not, in my perceived role as investigator, assent on hope nor dissent on uncertainty, with respect to my vote in the committee.

My vote on the floor of the Senate may well be different because of the way I view my role as committee member specifically and Senator generally—and for some other reasons. As a Senator on the floor, I do not feel obliged to restrict my judgment on the nominee to what was revealed within the committee hearings.

But in the final analysis, I believe the Judiciary Committee may have abrogated, in large measure, part of the responsibility of the Senate's constitutional role with respect to this most important nomination.●

● Mr. SCHMITT. Mr. President, it is with pleasure that I join with my colleagues in enthusiastically supporting the nomination of Sandra Day O'Connor for the position of Justice of the Supreme Court.

I am not a lawyer, so it was with great interest that I followed the Judiciary Committee in its deliberations of her nomination. At times, Judge O'Connor was subjected to difficult and controversial questioning by the distinguished members of the panel. However, not once during her 2½ days of testimony did Judge O'Connor lose her composure, dignity, or sense of humor. In fact, her intelligent and thoughtful responses clearly demonstrated that she is highly qualified to sit on the Supreme Court.

Additionally, Judge O'Connor brings very high academic credentials, very high intellectual credentials, and a record of clear, concise, and interpretive decisions to the Supreme Court. By interpretive decisions, I mean decisions not to make new law but to interpret the law as it is in the Constitution today.

Mr. President, I am proud to be a participant in this historic occasion; to cast my vote in favor of the first woman nominee to the Supreme Court.●

Mr. HAYAKAWA. Mr. President, I feel privileged to be a Member of the U.S. Senate on this historic day as we vote to confirm the first woman Justice of the Supreme Court, Sandra Day O'Connor. The women of our Nation have struggled to gain recognition of their abilities and competence, making great strides in recent years to overcome the barriers of prejudice against their gender. Our actions today provide long overdue recognition of the qualities of women, as well as recognition of the qualities of one particular woman.

However, we must not let the struggle of women overshadow the primary question before us: the confirmation of a highly qualified nominee for the Supreme Court. It is the role of the Senate to determine that a Presidential nominee to the Court is indeed qualified, without regard to sex.

Additionally, the Senate must not be swayed by the demands of any single interest group during the confirmation process. The opinions of any group must be carefully weighed against the requirements for a Supreme Court Justice.

I am confident that my colleagues have not allowed their responsibilities of advice and consent to be clouded by secondary considerations.

Sandra O'Connor finished among the top 10 graduates in the Stanford University Law School class of 1952. In addition to becoming a wife and mother, she practiced law, served as an assistant attorney general, and was elected to the Arizona State Senate—serving as well in the role of majority leader. She was then elected as a trial judge for Phoenix and later appointed to the Arizona Court of Appeals.

Her multifaceted career has given her experience with the law from several different perspectives—as a private citizen, and from within each of the three branches of government. Such a career provides the opportunity to clearly understand the limits and responsibilities of the various roles she accepted and, in particular, the responsibility of a judge.

After President Reagan announced his nomination of Mrs. O'Connor, loud objections were heard from several antiabortion groups. During the confirmation hearings, she carefully stated her feelings of personal repugnance toward abortion. I am more than satisfied by her statements of personal opinion on this subject. I am also confident that she will carefully address this issue, if it comes before the Court, to insure proper interpretation of current law and our Constitution.

An important point about the nominee was brought out during the consideration of her qualifications: Mrs. O'Connor favors greater reliance on our State courts to decide important issues. At a time when the Supreme Court is requested to review thousands of cases—an impossible task in terms of time and manpower—the competence of our State courts cannot be overlooked. When Federal constitutional questions have been fully heard and considered in the State court system, surely it is not necessary to provide a costly review on the Federal level.

She has also proven herself to be tough on criminals. At a time when the rate of violent crime is rising dramatically, we must give notice to the criminal element that they will not be dealt with lightly. The confirmation of Mrs. O'Connor is a signal to those who ignore our laws that they will pay for their actions.

Most importantly, the hearings before the Senate Judiciary Committee allowed us to see that Mrs. O'Connor will be a Justice who will stick to the business of interpreting the law and the Constitution. I personally feel assured that she will not attempt to legislate from the bench, but leave that responsibility with the Congress. It is essential to our system of government that the different branches of government respect the limitations of their authority.

We cannot fully predict the direction of the career of any Supreme Court nominee; nor can we predict the opinions that may be handed down by any potential Justice on future questions that may come before our highest court. We can, however, explore the questions of personal integrity and competence. Mrs. O'Connor, without doubt, deserves the highest marks for her record of integrity and competence. I have no reservations about predicting that her career on the Supreme Court will continue to prove that record.

● Mr. MATTINGLY. Mr. President, I believe Sandra O'Connor has the intelligence, the experience, and the ability to be one of the great Justices of the Supreme Court. She has excelled as a lawyer, a legislator, and as a judge on the Arizona Court of Appeals.

Beyond her obvious qualifications for the position, I believe all Senators were impressed by Judge O'Connor's appearance before the Senate Judiciary Committee. Her answers to the questions were clear, straightforward, and well reasoned. I believe the Supreme Court will greatly benefit from this type of reasoning.

It is so very tempting for some to focus on one current issue. But that should not be of paramount concern to the President in making a nomination nor to the Senate confirming it. What is important is judicial philosophy.

There is no way any of us can predict what the burning issues of the year 2000 will be. Those issues might very well be part of a process that will not begin to occur for another 10 years. Yet Judge O'Connor will very possibly be hearing cases and rendering decisions in the year 2000 and beyond.

She has a firm understanding of the constitutional responsibilities and limitations of the Supreme Court and we will all be proud of the votes we cast today. As a former legislator herself, I believe she will maintain the separation of powers in our Constitution. I hope and believe this appointment may be the beginning of the end for the activist court.

A word should also be said in praise of President Reagan for nominating the first woman to the Supreme Court. He has fulfilled a campaign promise. But this nomination should be the beginning, not the end. I hope we will not see develop a "woman's seat" on the Court with little hope for other women as long as Judge O'Connor is serving.

If the President had to make another nomination next week, I would hope he would feel confident in sending us another woman nominee. If she had the qualifications of Judge O'Connor, she too would receive speedy confirmation.

So, Mr. President, I will proudly cast my vote for Judge O'Connor and join with my colleagues in wishing her well as she assumes this most important position.●

Mr. LEAHY. Mr. President, if I had to choose one moment that explained the most about the way the American system of government worked, it would probably be the moment when we choose a Justice of the Supreme Court.

The Supreme Court has succeeded as the interpreter of the Constitution and the arbiter of great conflicts not only because of the Court's wisdom and sense of history, but because even in the most divided of times, the Court has earned and kept the respect of all Americans. Above all, this has been a Court of fairness and competence. It is these qualities that must characterize any nominee to the Court.

Judge O'Connor has amply demonstrated these qualities. She appeared before the Judiciary Committee and answered some of the most difficult questions put to a Supreme Court nominee in a long time. I think that she answered candidly and thoroughly, within the customary limitations imposed on any nominee, namely the avoidance of conflict regarding matters that might come before the Court. The overwhelming impression of fitness and competence was clear to all and was reflected in the committee vote.

If I were to stop here, I would invite the conclusion that this hearing process was an ideal example of separation of powers at work, the President and the legislative branch each contributing to the strength of the judicial branch. But the attempt to condition Judge O'Connor's confirmation upon her commitment to vote in a given way on given issues should sound a danger signal for all of us. A commitment on a future vote must never be the price of nomination or confirmation. No Justice on the Nation's Highest Court should be held hostage to any commitment, except the one to devote every moment on the Court to upholding the Constitution and the cause of justice.

The President had the right to make an appointment reflecting a philosophy that he agrees with, and he did so. To have asked more of his nominee than this would have been an intrusion by the executive on the independence of the Court. For us to have asked more would have been an equal intrusion.

I do not care if Judge O'Connor is a Democrat or Republican, liberal or conservative, She is a very able nominee, and this Senate should send her to join her colleagues on the Court with our strong support and our hopes for a fruitful and rewarding term on the Court.

Mr. STENNIS. Mr. President, I thank the Senator from Kentucky again for yielding me this time and assisting me in this matter.

In thinking about any nomination for the Supreme Court of the United States, I can think of nothing that is more important under our system of Government—and I do not know of any small group of people anywhere in the free world who are granted anything comparable to the power that these persons are granted under our Constitution. The exercise of that power has been a patent force for 200 years.

The Supreme Court is one of the strongest things I know in public life that generates faith and confidence in humanity when appealed to properly, when humans are appealed to do their best.

After all is said and done about the Court or any member thereof, it has an amazing record, and it gave me great strength and encouragement as a young man studying law and in public life—and I am not referring to any particular Justice; I am talking about the Court as an institution.

So I had some concern when there was a great deal of talk and media reports about "What are you going to do about this appointment of a lady to the Supreme Court?" I had absolutely no reservations about a lady being appointed, being capable and all, but I frankly was concerned that it might be kicked around as a political football by some. When this nomination came in I was pleased with the idea, if the lady was suitable, but I did not have the privilege of knowing her, and I was highly flattered that she came by the office for a visit.

I have never been more abundantly rewarded in public life than I was by the impression I had of Mrs. O'Connor. In the first place I judge her to be a lady of very fine and balanced judgment. I have previously stated the Supreme Court Justices must have an uncommon amount of commonsense. In addition to character that is really the major requirement of membership on that Court.

A Justice cannot make much of a contribution as a member of the Court on sheer book learning or other admirable qualities unless they are possessed with a generous amount of commonsense that runs through their thought processes and their understanding of the problems of government and the problems of human life.

To me there was in great abundance of unmistakable evidence of the lady's great competence in this field.

Another thing that pleased me—and I do not want to make a personal remark—but for several years I had the responsibility of being a trial judge in a court of unlimited criminal and civil jurisdiction. It was unlimited in that there was no ceiling all the way through to the gravest crimes or the most important civil suits where a great deal hung in the balance. The gravity of that experience in ruling on testimony, and the admissibility of it, that might be the deciding factor, on through to passing sentence on prisoners in serious cases involving human life was a very serious responsibility. There is nothing more searching than a judicial officer, I think nothing more searching of his qualities of character, of concept of responsibility,

and a desire to do his duty regardless of person.

So I was pleased with the concept, with the idea, that Mrs. O'Connor had been a trial judge and had had experience in the courtroom, in that way carrying those heavy responsibilities.

I notice by the reference of the American Bar Association, with all deference to them, I think her qualifications in the courtroom, of administering justice, would far outweigh some academic attainment that is measured often by some artificial rule.

So I was highly pleased with her experience and her uncommon amount of commonsense and, more particularly—in a day when the family is being tested and called into question by some of those habits and customs and all that goes to make up the strength of the family, challenged in legislative halls and everywhere else—that Mrs. O'Connor is a mother and has reared a family. That is no reflection on anyone who has not, but she is one who understands some fundamentals of our Constitution. But, more important than that, she understands the fundamentals of life itself and civilization itself and, more than all of that, the holy concept of having reared a family and, more particularly, having that greatest of all attainments of being a mother.

So I am really happy and have a great deal of satisfaction to know that she is willing to undertake this very difficult task, filled with hard work, at best.

There is nothing personal about this. I have said these words with great satisfaction and feel that she will have a splendid record in the Court which will be for the benefit and for the strengthening of our system, the common law of England and the constitutional law of the United States, based upon the family as we know it, and self-government as we try to make it. So the ship of state, for her part, will be in good hands. I am very glad, indeed, to vote in favor of her confirmation.

Mr. LEVIN. Mr. President, during the consideration of the confirmation of the nomination of Sandra Day O'Connor, a number of allegations were made with respect to statements she was reported to have made privately to various individuals relative to her position on substantive issues that might come before the Court. We read reports that, on one issue or another, she had assured one party or another, privately, as to what her position is.

I was very much intrigued by that, and I wrote her the following question:

During your private meetings with public officials since your appointment, did you make any statements relative to your position on the substantive issues which may come before the court? If so, please describe those statements.

Her answer was as follows:

Since my nomination I have not made any statements concerning my position on substantive issues which may come before the Court, either in private meetings with public officials or public testimony. Nor did I do so during the selection process leading up to the nomination

I believe judges must decide legal issues with the judicial process, constrained by the oath of office, presented with a particular case or controversy, and aided by briefs, arguments, and consultation with other members of the panel. I also believe it would be quite improper for a nominee to take a position on an issue which may come before the Court in order to obtain favorable consideration of the nomination.

Mr. President, I ask unanimous consent that soon-to-be Justice O'Connor's letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

Hon. CARL LEVIN,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR LEVIN: I have received from your office the following question: "During your private meetings with public officials since your appointment, did you make any statements relative to your position on the substantive issues which may come before the Court? If so, please describe those statements."

Since my nomination I have not made any statements concerning my position on substantive issues which may come before the Court, either in private meetings with public officials or public testimony. Nor did I do so during the selection process leading up to the nomination.

I believe judges must decide legal issues within the judicial process, constrained by the oath of office, presented with a particular case or controversy, and aided by briefs, arguments, and consultation with other members of the panel. I also believe it would be quite improper for a nominee to take a position on an issue which may come before the Court in order to obtain favorable consideration of the nomination.

Thank you for the opportunity to set forth my views in response to your question.

Sincerely,

SANDRA D. O'CONNOR.

Mr. BUMPERS. Mr. President, the confirmation of the nomination of an Associate Justice for the United States Supreme Court is a momentous occasion. The nine persons who form this Court are the guardians of the precious guarantees provided by the document that holds our Republic together, the Constitution of the United States of America.

James Madison, Alexander Hamilton, and the other primary framers of this solemn document must have been divinely inspired, because they managed to forge an agreement which, along with our Bill of Rights, has kept this Nation free for two centuries. In framing our delicate system of checks and balances, they had an uncanny understanding of the nature of power and the need to assure that it not be used tyranically. For all these years, it has been necessary to amend the basic text only 26 times.

Mr. President, article 1, section 1 places the full legislative power in the Congress of the United States. Article II, section 1, vests the executive power in the President of the United States, and he is also charged with the responsibility under section 3 to "take care that the laws be faithfully executed." Article III, section 1, makes clear that the judicial power is vested in the Supreme Court, and such inferior Federal courts are as established by Congress. The Supreme Court, in our constitutional scheme, is the final arbiter of what the law is and what the Constitution means.

It is true, as Justice Rehnquist recently pointed out in Rostker against Goldberg, that the Members of Congress take the same oath as do Supreme Court Justices to uphold the Constitution of the United States, and most of us take that responsibility seriously.

Sometimes, however, especially on emotionally charged issues, we allow political or other considerations to cloud our constitutional judgment, and the framers of the Constitution knew that this would happen. I, for one, am glad that the Supreme Court exists as the final arbiter on constitutional issues. Over the years, members of that body have usually managed to take a dispassionate view of what the Constitution says and means. They are above the fray. I have not always agreed with their decisions.

In fact, I strongly disagree with many of them, but the point is that it simply makes sense that the final word about what the Constitution means should come from a body which is above the day-to-day political pressures that guide many of our decisions.

Having said all this, let me point out that the Justices are not immune from our system of checks and balances. A potential Justice must be nominated by the President, and all of us know that the process of nomination is always preceded by an elaborate, if informal, screening process. An appointee must be confirmed by a majority vote of this body, and confirmation follows an exhaustive and, as Judge O'Connor can attest, grueling hearing process.

Once confirmed, a Justice will find that the wisdom of her opinions is debated ad infinitum in the press, in law reviews and other scholarly publications, and in Congress, and that kind of searching criticism has value to the Justice in providing a sounding board of thoughtful public opinion. Finally, Justices hold office only "during good behavior" under article III, section 1 of the Constitution, and of course may be impeached if they engage in conduct that renders them unfit for office.

It is against this backdrop that I comment briefly about the candidacy of Sandra Day O'Connor. I am not a member of the Judiciary Committee, but I followed the hearings closely. Judge O'Connor was an impressive witness. She is obviously a person of honesty and integrity. She responded to questions with confidence and sincerity, and she was generally unflappable. She impressed me as a woman of intellect and good commonsense. I do not necessarily agree with all of her opinions, but I am convinced that she will strive to discharge her duties with a high degree of competence and compassion. The office to which she is about to enter is one of awesome responsibility, and I wish her Godspeed.

Mr. COHEN. Mr. President, the confirmation today of Sandra Day O'Connor to be an Associate Justice of the U.S. Supreme Court is, as we all recognize, an historic event. It is one that I am proud to be able to take a part in by casting my vote in support of Judge O'Connor's nomination.

The debate surrounding Sandra O'Connor's nomination has focused almost exclusively on the fact that she will be the first woman to serve on the U.S. Supreme Court. Some view the appointment as significant primarily as providing women with representation on our highest judicial body. In voting on this nomination, I believe we must remember that the Supreme Court, unlike the legislative branch, is not a representative body. We cannot attempt to make it so without endangering the perception and reality of the Court as the preeminent symbol and protector of justice in this country. As George Will expressed it in a recent column:

> The Court, more than any other American institution, depends for its authority on the perception of it as a place where principle reigns. Judicial review is somewhat anomalous in a system of popular government, and its legitimacy depends on the belief that those who exercise it do so only as construers of the text and structure of a document that allocates powers primarily to other institutions. That belief cannot withstand a selection process that suggests that Justices somehow represent this or that group or interest.

The duty of a Supreme Court Justice is not to advocate a particular view or philosophy, but it is to act as an unbiased and detached arbiter of the law. To quote the late Justice Felix Frankfurter:

> The highest exercise of judicial duty is to subordinate one's personal pulls and one's private views to the law of which we are all guardians—those impersonal convictions that make a society a civilized community, and not the victims of personal rule.

Neither, however, should the Supreme Court be the exclusive domain of men—not because it would be unrepresentative of our society but because sex should not be, any more than race, religion or age, a criterion for either choosing or rejecting a candidate for a position on the Supreme Court. Rather, it is those qualities of judicial temperament, ability, and commitment to equal justice upon which we must select the individuals who will serve on our Nation's highest court.

Sandra Day O'Connor is well qualified for the position of Associate Supreme Court Justice and she will bring to the bench those qualities which are sought after in all members of the judiciary—integrity, fairness, and legal ability. She has excelled both academically and professionally, and has had a successful and distinguished career in public service and as a community leader.

Judge O'Connor will also bring to the Court a wide range of experience, having served in both the legislative branch, as a member of the Arizona State Senate, and in the judicial branch, as both a State trial and appellate court judge. In addition to spending several years in private practice, she also served as an assistant State attorney general.

Judge O'Connor's record shows her to be a temperate jurist. During her confirmation hearings, she displayed a thorough knowledge of the law and an appreciation for the respective roles of our branches of Government, and of the State and Federal courts. Characterized by those who have known, worked with, and appeared before her as intelligent, conscientious, objective, and openminded, Judge O'Connor possesses the qualities which will make her a skillful and highly respected member of the Court.

Judge O'Connor's nomination has been highly praised by many across the country. She has received resounding endorsements from individuals with divergent political philosophies and views on the role of the judiciary. I am confident that the expectations of her many supporters will be realized, and that Sandra Day O'Connor will make a significant contribution to the Court.

Mr. President, not only is the confirmation of Judge O'Connor historic in that she happens to be the first woman to sit on the Supreme Court, but it is equally important as a symbol of the advances women have made in recent years in breaking down the barriers which have traditionally restricted their participation in many segments of our society. Judge O'Connor is only the first of many highly qualified and competent women which this country can look forward to seeing serve on the U.S. Supreme Court in the years ahead.

Mr. HEFLIN. Senator BAUCUS is unable to be here this afternoon. He is participating in an investment conference in Montana. However, he did want his statement in support of Judge O'Connor's confirmation as Associate Justice of the Supreme Court to be made part of the record, and for it to be noted that he did vote in favor of confirmation last week at the executive session of the Senate Committee on the Judiciary. Senator BAUCUS' statement follows:

● Mr. BAUCUS. Mr. President, the week before last the Senate Judiciary Committee spent 3 full days conducting hearings on the nomination of Sandra Day O'Connor as Associate Justice of the U.S. Supreme Court. Today we are asked to cast our vote on that nomination.

We are all agreed that we want a Justice of the highest integrity and the utmost competence.

The issue raised by this nomination is the degree to which personal views and judicial philosophy are relevant factors in deciding whether to vote to confirm a Supreme Court nominee. I personally believe such factors are relevant.

In my view, a Senator must be convinced that a nominee's conception of our form of Government, conception of the Constitution, and conception of the role of the Supreme Court are consistent with the best interests of the entire Nation. The advise and consent power of the Senate under article III of the Constitution has little meaning if Senators are not willing to assess whether or not the nominee is dedicated to uphold the basic principles of the Constitution.

This is an appropriate test. The nominee, as a Justice, is likely to make many far-reaching decisions on a wide range of issues during his or her life tenure on the Court. A Senator should be satisfied that the nominee will have the prerequisite sense of fairness and a principled understanding of the Constitution to serve as the basis for that decisionmaking.

It is in this light that I have decided to support the confirmation of Sandra Day O'Connor as Associate Justice of the U.S. Supreme Court.

I know there are some who disagree with her views on specific subjects. I, too, have found myself in disagreement with her in several areas.

However, I believe it is in the best interests of this country to make a decision on her overall philosophy and her overall approach to Government and our Constitution.

No one knows just what decisions Justice Sandra O'Connor will be called upon to make over the decades to come.

Based on her performance at her confirmation hearing, I think we can say that she will bring to that decisionmaking a sensitivity and a commitment to fairness.

As I sat at the hearings I became convinced that if issues concerning my personal property or liberty were before Justice O'Connor, my case would be given a fair and thoughtful hearing.

I would not be able to predict what decision she would render, but I do know I would walk away from the process with a sense that the interests of justice had been served with her participation.

This is the kind of Associate Justice to the Supreme Court I want to vote for. I believe that this is a vote which all of us today will be able to look back upon, not only with a sense of history, but more importantly, with a sense of pride.

Thank you.●

● Mr. RIEGLE. Mr. President, I rise in strong support of the nomination of Judge O'Connor to the Supreme Court, and welcome the chance to be a part of this historic action by the Senate. Judge O'Connor has proven herself to be an able candidate for a position on the Court, and I think that all Americans can take pride in the fact that we will have a person of her caliber serving on our Nation's highest court.

Judge O'Connor is an accomplished legal scholar, as her educational and professional career demonstrate. She graduated from Stanford University Law School magna cum laude, and distinguished herself as a member of the Law Review. Judge O'Connor also became the first woman to serve as majority leader of the Arizona State Legislature, a measure of her leadership ability and her breadth of experience.

Mr. President, much has been written and spoken about the fact that Judge O'Connor will be the first woman to serve on the Court. I find it incredible that it has taken until 1981 for a woman to become a Supreme Court Justice, and I commend this important and historic breakthrough. Judge O'Connor has met the highest standards that we expect from an Associate Justice, and I think that all citizens can be proud of her nomination and confirmation.●

● Mr. BENTSEN. Mr. President, in consideration of the nomination of Sandra Day O'Connor to be an Associate Justice of the Supreme Court, the Senate should seek the answers to three questions: Is her integrity above reproach, is she qualified, and does she have the judicial demeanor and knowledge to apply the law objectively in the cases that will come before the Court.

I will deal first with the simplest question to answer, that pertaining to her integrity. Who would know better than her neighbors in Paradise Valley, Ariz.? The town council there unanimously adopted a resolution, and I want to thank my good friend, the senior Senator from Arizona, for placing that resolution in the RECORD. It said:

Judge O'Connor is possessed of an uncommon intellect, and the highest degree of ability, integrity, and dignity.

Senator GOLDWATER advises that this resolution reflects the views of all the citizens of Paradise Valley. The resolution also urged Judge O'Connor's unanimous confirmation.

Likewise, no serious case has been raised against Judge O'Connor's ability. The words that have been used to describe her—perfectionist, meticulous, hardworking, intelligent—accurately mirror her record of achievement. She entered Stanford University at 17 and left 5 years later with undergraduate and law degrees magna cum laude. She spent 20 years in Arizona politics as a member of her precinct committee, legislative district chairman, assistant attorney general, and as the State of Arizona's Senate majority leader. She spent 6½ years serving in the State judicial system, first on the superior court, and then as a justice on the court of appeals. She received high ratings each time the Arizona Bar Association has reviewed the performance of the members of its bench. In their private conversations with the nominee, I am sure my colleagues were as impressed as I was with her extremely bright mind and judicial perfectionism. She has been an insightful judge with a razor-sharp ability for equal and fair application of the law.

Her judicial record shows her commitment to interpret rather than expand the law. Although given ample opportunity to broaden statutory applications, she has not expanded statutes to situations never contemplated by its drafters. I am confident that as a Justice of the Supreme Court, Judge O'Connor will respect the historic constitutional boundaries between the judiciary and the Congress.

Her criminal decisions reflect a fair but tough approach in balancing the rights of the accused and the compensatory duty of enforcing the criminal laws of this Nation. Her record is one of defending private property rights, preserving State sovereignty, and strict judicial restraint. Her philosophy and temperament are well suited for the Supreme Court, and she has the potential of becoming a Justice of superior distinction.

I want to deal quickly with an issue that some have raised relative to Judge O'Connor's morality. I find it very difficult to believe that a woman with three sons can be called antifamily. Everything that I have read about her personal life indicates a strong enthusiasm for her family.

I am sure that I am not the first to quote her remarks at a wedding of two people she introduced, in which she said that:

Marriage is the single most important event in the lives of two people in love . . . marriage is the foundation of the family, mankind's basic unit of society, the hope of the world, and the strength of the country.

The issue of Judge O'Connor's morality is a false one; above all, she is an individual of very high moral principles.

Mr. President, our debate today about Judge O'Connor's nomination is an historic one. I want to join the chorus in sounding my pleasure with President Regan's fulfillment of his campaign pledge to nominate the first woman to the Supreme Court. In saying that, I do not want to demean her ability, integrity or knowledge.

She enjoys my support for one reason, and one reason only, because she will be a great asset to the U.S. Supreme Court. I join with the good citizens of Paradise Valley in urging the Senate to confirm Judge O'Connor's nomination unanimously.

Mr. PERCY. Mr. President, I wish first to express deep appreciation to the members of the Committee on the Judiciary, to its distinguished chairman (Mr. THURMOND), and to the ranking minority member (Mr. BIDEN). In an expeditious manner, consistent with thoroughness, they have conducted hearings and processed the nomination of Sandra Day O'Connor and are now placing it before this body for our decision. The committee has performed, once again, a great service to the Nation.

I am honored and privileged to address the Senate today on Sandra Day O'Connor, whose name is before this body for consideration to be an Associate Justice of the Supreme Court of the United States.

In considering her nomination, we as Senators will be fulfilling one of our important constitutional responsibilities in deciding whether or not to consent to this nomination. The individual we confirm will participate in and render decisions on some of the most complex and critical issues in the history of the Court. Therefore it is important that this individual is of the highest caliber—one who combines intellect, decency, and experience with judicial temperament, scholarship and integrity.

As her distinguished record clearly indicates, Sandra Day O'Connor is such an individual. She graduated from Stanford University in 1950 and received her law degree from the same institution in 1952. It was also in 1952 that she became deputy county attorney for San Mateo County in California.

In 1954 she traveled to Frankfurt, West Germany, where she served as civilian attorney. She returned to the United States in 1958 to engage in private practice in Arizona. As a wife and mother of three children, she devoted the years from 1961 to 1964 solely to her family. She returned to the law in 1965, this time as assistant attorney general for the State of Arizona. In 1969 she became an Arizona state senator, serving until 1975 as senate majority leader. In 1975 she became a trial judge on the Maricopa Superior Court of Arizona. From 1979 until the present she has served as a judge on the Arizona Court of Appeals.

In reviewing her outstanding legal career, it should be noted that she has served with distinction in all three branches of government—legislative, executive, and judicial. As it is one of the three coequal branches of our Government, the judiciary has the crucial role of applying the laws of Congress and interpreting the Constitution. With experience in all three branches, Judge O'Connor promises to bring to the Supreme Court a thorough understanding of how the Constitution divides authority among them.

In her exercise of judicial authority, Justice O'Connor is neither doctrinaire nor adventurous. She is a judge. Her record on the bench indicates that she sees it as her duty to apply the law, and not to make it.

In response to anyone who may question her views concerning certain issues, let me strongly emphasize that assessing a candidate on the basis of his or her views on specific issues should play no part in the process of selecting a Supreme Court Justice. It would be inappropriate for a judge or a prospective judge to have a preconceived position on something that might be an element in a case which should be decided on its legal merits alone. We must strive for an independent judiciary, one that decides issues solely on their legal merits and not upon some extra constitutional litmus test. I commend Judge O'Connor for taking this position herself during the recent Judiciary Committee hearings.

There can be no dispute that Judge O'Connor's record is an outstanding one. Her experiences as an attorney, legislator, and judge indicate that she is eminently qualified for the position of Supreme Court Justice. She has also demonstrated that she possesses the integrity, intellect, and the temperament so necessary for a Justice of the Supreme Court. I have no doubt that Sandra Day O'Connor is exceptionally well prepared to serve with distinction on the Supreme Court of the United States. A large, empty space exists in the Court. Sandra Day O'Connor can fill it. She deserves not only my personal support, but the support of this Senate as well.

My daughter served as a fellow trustee with Sandra O'Connor at Stanford University for a number of years, and as a result of her outstanding work there has long held her in the highest possible regard from every standpoint.

I hope and fully expect that our vote today will be a unanimous one.

Mr. NICKLES. Mr. President, today I rise in support of the nominee, Sandra Day O'Connor, to be an Associate Justice of the U.S. Supreme Court. I say, with all of my colleagues, that the appointment of a woman to the high court is long overdue. In Judge O'Connor, we have a very bright, articulate, and accomplished judge. I am sure that as an Associate Justice to the Supreme Court, Judge O'Connor will be an example of tremendous commitment and achievement not only to all women, but to everyone who works in the field of law and strives for excellence.

This is my first opportunity to participate with the Senate in the confirma-

tion of a Justice to the Supreme Court. As I understand it, our role is one of advice and consent on the President's nomination. We are asked to examine the nominee's background, character, academic achievement and judicial philosophy based upon his or her past record of activity. We are then asked to decide if the nominee is qualified to serve in the lifetime position of Justice to the Supreme Court.

Because of the magnitude and far reaching influence that a Justice may have on the Supreme Court, the advice and consent function of the Senate is indeed a very serious and important one. I, for one, have given much time and thought to this matter. And in the end, I feel compelled to say that even despite the obvious integrity and intelligence of the President's nominee, Judge O'Connor, I do not stand in support of this nomination without some unanswered questions.

I, like many of my colleagues, feel very strongly that the Supreme Court's 1973 decision in Roe against Wade, which legalized abortion by declaring that the unborn is not a person, was not only a moral fiasco, but a thoroughly unconstitutional court decision. In his dissenting remarks, Justice Byron White stated:

> I find nothing in the language or history of the Constitution to support the Court's judgement. The Court simply fashions and announces a new constitutional right for pregnant mothers and, with scarcely any reason or authority for its action, invests the right with sufficient substance to override most existing State abortion statutes.

I stand in total agreement with Justice White's words.

During the confirmation hearings, Judge O'Connor was asked many questions about abortion. From her testimony, I know that she is personally opposed to it. For this I am glad, but, as she pointed out, this should in no way influence her opinion as a judge.

As a participant in the Arizona State Senate, Judge O'Connor had five votes that related to abortion. The first—House bill 20—which came prior to Roe against Wade, sought to totally decriminalize abortion. In her explanation, Judge O'Connor states that her knowledge and perception of this issue has increased greatly in the years following that vote and that if she were a State senator today and this issue were to come before her framed in the exact same way, she would not vote for a total repeal of the Arizona laws prohibiting abortion. However, nowhere could I find, even in a personal visit with the nominee last week, an explanation of what she would support as appropriate public policy in this area. So, what I am left with is some indication that Judge O'Connor has modified her position as to appropriate public policy in regard to abortion, but I have no idea as to what this new position might be.

Thus, from the information available, I can conclude that first, as a person, Judge O'Connor is personally opposed to abortion. Second, as a legislator, Judge O'Connor is against abortion on demand. But, the final and most important area—in fact the only truly important area—is what Judge O'Connor's position as a judge is concerning the constitutionality of Roe against Wade. And, it is precisely in this area that I know the least about Judge O'Connor's position.

I can appreciate the fact that it would be improper for a nominee to the Supreme Court to speculate on cases that might come before the Court during his or her tenure on the Court. However, I do not understand why a nominee cannot respond to questions concerning the constitutionality of cases already decided by the Court, such as Roe against Wade. If the Senate is to perform its advice and consent function, we must be able to determine the judicial philosophy of the nominee. As a Senator, I have a responsibility to represent the concerns and wishes of my constituents. As a human being, I feel it necessary to live within the confines of my conscience. However, to fulfill either of these becomes virtually impossible without the necessary information from Judge O'Connor as to how she will stand as a Supreme Court Justice in her interpretation of the Constitution.

I am also concerned that this refusal to answer questions on past Supreme Court cases will set in stone the precedent for future nominees in their approach to the Senate's confirmational inquiries. If this becomes the precedent, the Senate would then be asked to confirm nominees to the High Court without having any idea as to what their judicial philosophy is and how their appointment will influence generations to come.

I have labored long and hard over whether, in the midst of such unanswered questions, I could vote for the nominee, Sandra Day O'Connor, to be an Associate Justice of the Supreme Court. In the final analysis, I have to say that I do not feel that I have a strong enough basis from which to vote against Judge O'Connor's confirmation. I simply have unknowns. Therefore, I feel forced to resolve this issue based on outside considerations, the greatest of which is the trust, faith, and confidence that I have in the ideals and judgment of our President. I also have confidence in Judge O'Connor's overall judicial restraint and her claim to be a strict constructionist in her interpretation of the Constitution.

So, I stand with my colleagues in support of Judge O'Connor, with much hope in my heart that her appointment to the Supreme Court will herald a new era in the Court's history—one that will be characterized by restraint, wisdom, and devotion to God and to the Constitution which have preserved our freedoms for so many years.

Mr. JEPSEN. Mr. President, I rise today to speak to the question of whether Judge Sandra D. O'Connor should be approved by this body to serve as an Associate Justice to the Supreme Court of the United States.

I intend to vote in support of the nomination of Sandra Day O'Connor. I have no doubts about the capability, intelligence, or judicial temperament of Judge O'Connor. She brings to the Supreme Court the qualities necessary to be a competent jurist.

As a Senator from Iowa, I am pleased to advise the Senate that it was the great State of Iowa that produced the first woman attorney in the United States, Arabelle Mansfield, of Mount Pleasant, Iowa. It was the Iowa education system that trained her. Finally, it was the Iowa Bar Association, one of the oldest bar associations west of the Mississippi, which admitted Miss Mansfield to the bar.

Mr. President, history and time have afforded me the opportunity to represent Iowa and vote today for the first woman to be appointed to the U.S. Supreme Court. I shall vote "aye" for her confirmation.

Mr. CRANSTON. Mr. President, I am extremely pleased that the Senate Judiciary Committee has concluded that Sandra Day O'Connor is extraordinarily well-qualified to be an Associate Justice of the U.S. Supreme Court. She is eminently qualified. I support her nomination.

Judge O'Connor's direct experience with both the legislative and the judicial process augurs well for an outstanding term on the Supreme Court bench.

As a Californian, I am particularly pleased by the prospect of having a southwesterner on the bench. As a lifelong resident of California and Arizona, our sister State to the east, Judge O'Connor is familiar with the special problems of the Southwest such as water, land resources and their uses. These will be important issues before the court in coming years and her knowledge in this area should be most helpful.

President Reagan is to be especially commended for naming a woman to the Supreme Court—the first such nominee in our Nation's history and one that is very long overdue.

Judge O'Connor's nomination is a major step in the battle to eliminate sex discrimination in our society and a major step toward achieving full equality of opportunity for women. Furthermore, Judge O'Connor has displayed sound judicial temperament, brilliant legal scholarship, personal integrity, sensitivity to individual rights and a firm commitment to the principle of equal justice under the law.

Mr. President, I am honored to join my colleagues in support of this history making nomination.

Mr. SASSER. Mr. President, with its action today, the Senate has taken a historic step. Sandra Day O'Connor is the first woman appointed to the Supreme Court—61 years after women were given the right to vote. My own State of Tennessee was the 36th State to ratify the 19th amendment, thereby making it a part of the Constitution and it gives me great pleasure to be able to vote today to confirm Judge O'Connor's nomination.

However, as significant as the appointment of a woman to the Court may be, it must be remembered that once confirmed Judge O'Connor becomes one of nine justices sitting on the Supreme Court. Therefore, the most important question in voting on this nomination is whether the person has the judicial temperament

and legal qualifications which are required of a member of the Nation's highest court.

In the 3 days of hearings conducted by the Judiciary Committee, Mrs. O'Connor's legal philosophy and record were subjected to a searching examination. Her responses showed a proper appreciation for the proper role of the judiciary—to adjudicate, not to legislate. The whole thrust of her responses on whatever topic, demonstrated a clear and well-defined philosophy, consistently applied. In addition, the nominee's experience in private practice, the Arizona State Senate, as well as on the bench give her a breadth of perspective which qualifies her for this position.

I congratulate Judge O'Connor, soon to be Madam Justice O'Connor, as she undertakes her new responsibilities.

Mr. MOYNIHAN. Mr. President, on this day that we are congratulating Judge Sandra Day O'Connor on her nomination and confirmation as Associate Supreme Court Justice—and for President Ronald Reagan for nominating her—I direct the Senate's attention to a serious problem facing our courts of which we are the authors, you might say.

Yesterday's New York Times magazine carried a brilliant essay by Judge Kaufman of the U.S. Court of Appeals for the Second Circuit. Judge Kaufman addresses an issue that has been central to our debates over the past few months—legislation designed to strip the courts of their jurisdiction.

Judge Kaufman, whose career on the bench has spanned 35 years, has written an article that contains lessons which I believe will be of value to all Members of this body. I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CONGRESS VERSUS THE COURT

(By Irving R. Kaufman)

The first Monday in October, the commencement of the new Supreme Court term, is normally one of the more exciting dates on Washington's calendar. The long summer recess over, the nine Justices don their black robes and enter the marble and oak courtroom where they will ponder questions of truth and justice. This year, however, Oct. 5 will also be a time of no little concern for these esteemed jurists—as it should be for us all. The reason: The role of the High Court as a counterbalance to the legislative and executive branches of government—a fundamental pillar of the American system—is under attack. Congress currently has before it more than 30 bills designed to sharply restrict the authority of the Federal judiciary and limit its power to interpret the Constitution.

These bills have been introduced by Members of Congress new conservative coalition, individuals who have been profoundly disturbed by many of the decisions the Supreme Court has made over the last two decades. For example, the Court has forbidden mandatory prayer in public schools, upheld a woman's right to abortion during the first three months of pregnancy, and characterized busing as the only constitutionally adequate remedy in some instances of racial imbalance in public schools. These decisions, all formed on the basis of constitutional principle—and constitutional principle alone—undoubtedly appear as obstacles to the social changes the new legislative coalition intends to make in this country now a number of individual liberties, but also the that the political pendulum is swinging in its direction. The way the coalition proposes to overcome these obstacles threatens not only very independence of the Federal courts, an independence that has safeguarded the rights of American citizens for nearly 200 years.

The current legislative outlook is ominous. A subcommittee of the Senate Judiciary Committee has already aproved a bill that would forbid the lower Federal courts to entertain challenges to state antiabortion legislation (even legislation that defined abortion as murder). In the last Congress, the Senate easily passed a proposal to withdraw lower Federal court jurisdiction in school prayer cases. A discharge petition to move the bill from the House Judiciary Committee to the floor failed by only 32 votes. The bill has been reintroduced and its chances for passage are rated better in this year's Congress. Other bills which would take from the Supreme Court the power to revise state and lower Federal court decisions in school prayer, abortion and busing cases, are now wending their way through the Senate-House Judiciary Committees.

Legal experts from all sections of the political spectrum have begun stepping forward to denounce these proposals. The American Bar Association calls them a danger to the fundamental system of checks and balances. And Prof. Laurence H. Tribe, of the Harvard Law School, has gone so far as to characterize one of the bills as "too palpably unconstitutional to permit reasonable persons to argue the contrary." Still, the possibility that some of these bills may be enacted into law cannot be dismissed. If that should happen, the Supreme Court would either have to accept the Congress's mandate or adjudicate the constitutionality of the laws. If the Supreme Court then decided that the laws were, indeed, unconstitutional, it would be up to Congress either to back down or to permanently reduce the Court's power through constitutional amendment.

Such dilemmas have come close to occurring in the past. Today, it is the conservative wing that is attempting to circumscribe the Court's historical role. At other times in the past, the attack against the Court has been led by liberal reformers—while conservatives stood as sentinels guarding the sanctity of the Constitution. In the early 20th century, the Court struck down many pieces of legislation that sought to promote social change, including laws regulating child labor, setting minimum wages and maximum hours, forbidding the use of injunctions in labor disputes, and providing compensation for accident and illness. In response, liberals, and progressive led by Robert M. La Follette, attacked not only the concept of judicial review but the judges themselves. Statutes were introduced in Congress to require the votes of at least six justices to invalidate legislation, and some Congressmen supported constitutional amendments that would have mandated the popular election and recall of Federal judges.

Some years later, after the Supreme Court invalidated much New Deal legislation, President Roosevelt proposed a bill that would have allowed him to increase the Court's membership. Had that bill passed, Roosevelt would have been able to "pack" the Court with political allies, insuring that it would always decide as he saw fit. Fortunately, that plan died in the Senate Judiciary Committee.

Efforts to curb the courts have, if anything, become more frequent in recent years, and they have been proposed by politicians of almost all political stripes. After the Supreme Court's 1954 decision in *Brown* v. *Board of Education*, which declared an end to the purposeful segregation of public schools, a number of bills were introduced in Congress proposing to remove all Federal court jurisdiction in desegregation cases. At about the same time, the call for popular election of Federal judges was renewed. Later, in 1958, at the height of the cold war, serious and widespread support gathered for a bill that would have overturned Supreme Court decisions guaranteeing First Amendment freedoms to political dissidents by removing appellate jurisdiction in cases involving alleged subversive activity. And in 1964, the House of Representatives (but not the Senate) passed a bill that would have deprived the Supreme Court and the lower Federal courts of the power to hear cases regarding enforcement of the Court's new rule of one-man, one-vote for apportionment of state legislatures, a rule that was intended to redress inequities in voting strength caused by racial animus. The reapportionment decisions spurred a furious attack on the Court led by proponents of states' rights, some of whom went so far as to propose that a "Court of the Union," composed of the Chief Justices of all the states, be established to review the decisions of the Supreme Court.

All the bills under consideration this year invoke the concept of jurisdiction, the basic authority of a tribunal to decide a case. Sponsors of the bills cite Article III of the Constitution, which assigns to Congress the power to define and regulate the jurisdiction of all Federal courts including the Supreme Court. Using this power, the Congress has, for example, denied Federal judicial authority in some cases involving lawsuits for less than $10,000. No one questions the legitimacy of that restriction. So why, the sponsors ask, can Congress not also declare, as one bill does, that "the Supreme Court shall not have jurisdiction to review . . . any case arising out of any State statute, ordinance, rule or regulation . . . which relates to abortion?" The answer is not simple. It rests on an understanding of the scope of Congress authority over the jurisdiction of the Federal courts, which, in turn, depends on an understanding of the Constitution and the role the Constitution mandates that the Federal courts play in the American system.

The framers and early expositors of the Constitution did not fear the power of the courts. With no innate authority either to enforce its own judgments or to control the purse strings, the judiciary was expected to be the weakest of the three branches of government. It was rather the legislative branch that the framers felt a need to restrain. Steeped in English parliamentary history, they knew the dangers of legislative tyranny. James Madison, the principal architect of the Constitution, observed: "The legislative department is everywhere extending the sphere of its activity and drawing all power into its impetuous vortex."

The framers set up the Federal court system as one means of checking the Congress. Using the power of judicial review, the courts would invalidate any legislative acts that were inconsistent with the strictures of the Constitution. The theory was, and still is, that Congress should exercise only a delegated authority, derived from the people. The Constitution, in contrast, was intended to represent the actual embodiment of the people's fundamental and supreme will. Thus, when presented with a case in which a legislative act contravenes the constitutional mandate, it is the duty of the courts to uphold the latter. "To deny this," said Alexander Hamilton, "would be to affirm that the deputy is greater than his principal; that the servant is above his master; that the representatives of the people are superior to the people themselves."

The Supreme Court has therefore struck down laws passed by Congress that conflict with the Constitution ever since the landmark 1803 case of *Marbury* v. *Madison*. For almost as long, the Court has invalidated constitutionally offensive state statutes as

well. That duty, scholars insist, is grounded in Article VI of the Constitution, which commands: "This Constitution, and the laws of the United States which shall be made in pursuance thereof . . . shall be the supreme law of the land."

It was inevitable that the judiciary, of the three branches of government, would be charged with the responsibility of assessing the constitutional validity of legislation. To insure the judiciary's ability to perform this sensitive duty faithfully and neutrally, the farmers deliberately shielded the judges from political pressures by guaranteeing them, within the Constitution itself, life tenure, and by further providing that their salaries could not be diminished through legislative act. Their independence, to quote Hamilton again, would insure "that inflexible and uniform adherence to the rights of the Constitution, which we perceive to be indispensable in the courts of justice."

This is not to say that the Federal courts' judgments relating to the constitutionality of legislation—including legislation on such issues as abortion, school prayer and busing—cannot be overridden. An unpopular Supreme Court decision on a constitutional issue can be overturned through a constitutionally prescribed means: an amendment of the Constitution. In fact, three times amendments have been proposed and ratified as a way of nullifying controversial Supreme Court decisions. (The 11th Amendment, which forbids a suit in Federal court against a state without its consent, was adopted to overrule a 1793 holding that the Supreme Court had jurisdiction over a case brought by two South Carolinians against the State of Georgia. In 1858, during the Reconstruction period following the Civil War, the 14th Amendment was enacted. This amendment, which proclaims that all persons born in the United States are full citizens of the United States, with all "rights and immunities" of citizens, overruled the infamous Dred Scott decision of 1857, which had declared that black slaves, as no more than pieces of property, lacked the rights of citizens. Finally, in 1913 the 16th Amendment was adopted to overturn a Supreme Court decision holding that the Federal income tax was unconstitutional.)

Constitutional amendments, however, are not a means most critics of the Court are eager to employ to bring about the changes they seek. Their passage requires a cumbersome procedure of ratification—as supporters of the proposed equal rights amendment well know. The framers deliberately made the amendment process cumbersome because they did not want expediency to prevail over constitutional rights. They believed that any alteration of the fundamental law of the land should enjoy the overwhelming and sustained support of the citizenry. A simple majority in both Houses of Congress, sufficient to pass the ordinary statute, should not be enough to justify permanent changes in the nation's charter of basic freedoms.

Herein lies the tactical appeal of the withdrawal-of-jurisdiction stratagem. Many supporters of the 30 or so divestiture bills now before Congress freely admit that they are attempting to bypass the amendment process. Their rationale is simple: Since the popular support to override Court decisions by amending the Constitution is difficult to garner, why not accomplish the same result with a simple statute restricting the power of the courts to consider the constitutional principles they dislike? In 1964, following the Supreme Court's landmark decision on legislative reapportionment, Senator Everett M. Dirksen introduced a bill to withdraw Federal court jurisdiction in apportionment cases. When asked whether he was attempting to enact a constitutional amendment in the form of a statute, he responded: "[There is] no time in the present [legislative] session to do anything with a constitutional amendment. . . . We are dealing with a condition, not a theory." A candid and revealing response, then as now.

The rationale of our Constitution is not to be lightly ignored. It was designed to protect individual rights by vesting the Federal courts with the final, binding authority to interpret the fundamental law. The only way to override the Constitution as so interpreted is to amend it. The backdoor mechanism of withdrawing the Court's jurisdiction is clearly antithetical to the judiciary's role in the constitutional scheme. If the bills depriving the Court of the authority to hear cases on such topics as abortion, school prayer and busing are considered constitutional, Congress might just as well pass laws depriving the Court of the authority to hear constitutional claims based on such freedoms as speech and religion. The potential consequences are astonishing.

There is another contention being put forward by the proponents of the withdrawal-of-jurisdiction bills that needs to be discussed. These legislators note that the Constitution states that "the Supreme Court shall have appellate jurisdiction, both as to law and fact, with such exceptions, and under such regulations, as the Congress shall make." The "exceptions-and-regulations" clause, they argue, grants Congress wide-ranging authority to restrict the substantive categories of cases that may be appealed from the state and lower Federal courts to the Supreme Court. But to assert that the framers, who clearly intended the Supreme Court to exercise the power of judicial review, also intended to grant Congress plenary authority to nullify that power is to charge the framers with baffling self-contradiction. Indeed, the history of the exceptions-and-regulations clause suggests that it was never intended to carry the heavy constitutional baggage with which the bill's supporters are now loading it.

The clause originated in the fears of some members of the Constitutional Convention that Supreme Court review of factual determinations (appellate review was to be "both as to law and fact") would impair the right-of-jury trial in the states. Hamilton stated: "The propriety of this appellate jurisdiction has scarcely been called in question in regard to matters of law; but the clamors have been loud against it as applied to matters of fact." Since the practices with respect to appellate review of factual determinations varied so widely from state to state, the framers decided to leave to Congress, in the exceptions-and-regulations clause, the authority to regulate the scope of Supreme Court review of facts.

The clause was never meant to confer a broad control over appellate review of substantive legal issues, including issues of Federal constitutional law. Indeed, the Convention considered and rejected proposed constitutional language that "the judicial power shall be exercised in such manner as the legislature shall direct," far from a mandate to effectively abrogate the vindication of constitutional rights, the clause was intended merely as a way to give Congress the authority to regulate the Supreme Court's docket with reasonable housekeeping measures. Thus, in the Judiciary Act of 1789, Congress restricted the Court's appellate jurisdiction over cases coming from the United States Circuit Courts to those in which the amount in controversy exceeded a prescribed minimum.

On only two or three occasions in its history, has the Supreme Court passed upon the constitutionality of legislation seeking to limit its appellate jurisdiction. Both cases occurred over a century ago and both reveal constitutional defects in the current proposals relating to jurisdiction. In the first case, *Ex parte McCardle*, decided in 1869, the Court upheld a restriction on its appellate jurisdiction. Although relegated to a small niche in history, this case was enormously important in its day, for it involved a challenge to the post-Civil War Reconstruction program, in which Congress had placed 10 of the former Confederate states under military rule. McCardle had been imprisoned by the military government of Mississippi for the publication of allegedly libelous material. Pursuant to a Federal statute passed in 1867, he applied to a lower Federal court for a writ of *habeas corpus* ordering his release. He asserted that the Reconstruction Acts were unconstitutional. The court denied his application, and he appealed to the Supreme Court on the basis of that same Federal statute. Before the case was decided by the Court, however, Congress repealed that part of the 1867 statute which authorized appeals to the High Court. "We are not at liberty to inquire into the motives of the legislature," the Court held. "We can only examine into its power under the Constitution; and the power to make exceptions to the appellate jurisdiction of the Court is given by express words."

Despite this pronouncement, the McCardle case is not ordinarily read as authority for a broad Congressional power to restrict the enforcement of constitutional rights in the Supreme Court. Under the Judiciary Act of 1789, McCardle could still apply for an original writ of *habeas corpus* in the Supreme Court. Therefore, the repealing act actually cut off only one avenue of *habeas* relief. The Court concluded as much in the 1869 case of *Ex parte Yerger*, a case that was in many ways strikingly similar to *McCardle*. Yerger held that the repealing statute did not affect the petitioner's right to apply for an original writ pursuant to the act of 1789. In contrast with the statute under consideration in *McCardle*, the bills that would forbid any Supreme Court review of busing, school prayer and abortion decisions would totally foreclose the possibility of a Supreme Court hearing on a claim of Federal constitutional right. Surely, *McCardle* cannot be considered a precedent for that.

This view is confirmed by *United States* v. *Klein*, decided in 1872, in which the Court struck down a limitation on its powers of appellate review. Klein administered the estate of a cotton plantation owner whose property was seized and sold by Union agents during the Civil War. Under legislation providing for recovery of seized property of noncombatant rebels upon proof of loyalty, Klein sued and won in the Court of Claims, proffering a Presidential pardon as proof of loyalty. The Court had previously interpreted a Presidential pardon as carrying with it a proof of loyalty. But pending the Government's appeal to the Supreme Court, Congress passed an act which legislated that acceptance of a pardon was, on the contrary, conclusive proof of disloyalty and one which, in addition, required the Supreme Court to dismiss for want of jurisdiction any appeal in which the claim for recovery was based on a pardon.

Invalidating that legislation, the Court concluded that Congress had unconstitutionally attempted to interfere with the Court's duty to interpret and give effect to a provision of the Constitution: "The language of the proviso shows plainly that it does not intend to withhold appellate jurisdiction except as a means to an end. Its great and controlling purpose is to deny pardons granted by the President the effect which this Court had adjudged them to have. The proviso declares that pardons shall not be considered by this Court on appeal. We had already decided it was our constitutional duty to consider them and give them effect, in cases like the present, as equivalent proof of loyalty."

In a similar manner, the current withdrawal-of-jurisdiction proposals do "not intend to withhold appellate jurisdiction except as a means to an end." And the end, in

this instance, is precisely the same as it was in *Klein*, the circumvention of the Supreme Court's authoritative interpretation of a constitutional provision. As *Klein* demonstrates Congress does not have the power to subvert established constitutional principles under the guise of regulating the Court's appellate jurisdiction.

Those who would read the exceptions-and-regulations clause broadly also argue that state courts, which frequently rely on the Federal Constitution in striking down state legislation, could adequately protect constitutional rights without review in the Supreme Court. The short answer to this contention is that a Federal constitutional right is of dubious value if it means one thing in Mississippi and another in Minnesota. State courts have at times differed profoundly on the meaning of constitutional provisions. To cite but one illustration, in 1965, the Supreme Judicial Court of Massachusetts concluded that the book "Fanny Hill" was unprotected by the First Amendment. At about the same time, the New York Court of Appeals found that it was. Obviously the need for uniformity in matters of Federal constitutional interpretation is essential, and the appellate jurisdiction of the Supreme Court was designed to meet that important need. Chief Justice John Marshall said in *Cohens* v. *Virginia*: "The necessity of uniformity as well as correctness in expounding the Constitution and laws of the United States, would itself suggest the propriety of deciding, in the last resort, all cases in which they are involved. . . . [The framers of the Constitution] declare that, in such case, the Supreme Court shall exercise appellate jurisdiction."

In connection with this uniformity function, there is an interesting tale concerning one of the most eminent jurists in American history, Judge Learned Hand of the United States Court of Appeals for the Second Circuit. In 1958, at the ripe age of 86, Hand, still nimble of mind and capacious of spirit, was asked by Senator Thomas C. Hennings, Jr. of Missouri, chairman of the Senate Judiciary Subcommittee on Constitutional Rights, to comment upon a then-current bill to remove Supreme Court appellate jurisdiction in cases regarding internal security. Hand promptly responded: "It seems to me desirable that the Court should have the last word on questions of the character involved. Of course there is always the chance of abuse of power wherever it is lodged, but at long last the least contentious organ of government generally is the Court. I do not, of course, mean that I think it is always right, but some final authority is better than unsettled conflict."

It should also be self-evident that the framers saw independent, tenured Federal judges—knowledgeable in Federal law, drawn from all over the country and, as prescribed in the Constitution itself, appointed by the President and confirmed by the Senate—as more appropriate arbiters of conflicts between constitutional and state law than elected state judges, many of whom are popularly elected and who might be partial to state law. The framers realized that only the Federal judges could insure the supremacy of Federal law. As James Madison said: "In controversies relating to the boundary between the two jurisdictions [Federal and state], the tribunal which is ultimately to decide is to be established under the general Government. . . . Some such tribunal is clearly essential to prevent an appeal to the sword and a dissolution of the compact."

The argument for giving Congress the authority to determine the kinds of cases and the types of remedies that the inferior Federal courts may hear is a bit more complicated—if equally unpersuasive. It too is based on Article III of the Constitution, which gives Congress the right to establish "such inferior courts as the Congress may from time to time ordain and establish." Since this provision has been interpreted by many legal experts as giving Congress the right to establish or abolish the lower courts, does it not follow that it also gives Congress the authority to regulate the subject matter of their jurisdiction? The fallacy of this argument is that the framers predicated Congressional discretion on the assumption that litigants would in all cases be able to present their Federal claims or defenses to *some* Federal court, either in the district court or on appeal. And it was further assumed that, even if no lesser Federal courts were created, the Supreme Court itself would serve as the requisite forum by hearing all constitutional cases appealed from the state courts.

Throughout most of the 19th century, this was possible. The Court's docket was almost empty by today's standards and it could ordinarily hear a constitutional case any time one of the parties so desired. But beginning about 1875, the Supreme Court's case load began to grow enormously, giving rise to a series of acts, culminating in the Judges Bill of 1925, which gave the Court the discretion to decide which cases, within certain categories, it would hear. In the process, the Supreme Court was transformed from a general court of appeal into a court which would decide only cases of great constitutional moment or high precedential value.

As the Supreme Court has found itself deciding a progressively smaller percentage of the cases involving Federal, constitutional and statutory law, the role of the lower Federal courts in protecting constitutional rights has expanded to the point of practical and effective primacy. And over the last two decades, a period during which there has been an explosive growth of litigation, the inferior Federal courts have become, in most instances, the only forums in which a litigant could secure a decision on his constitutional claims by a judge life tenured under Article III of the Constitution. If Congress were now to abolish the lower Federal courts, it would effectively cut off almost all opportunity for Federal adjudication of Federal rights. And clearly, the framers did not wish to leave to the states final authority to decide matters of Federal constitutional law. For this reason, the argument that Congress can withdraw jurisdiction over certain classes of Federal cases or rights because it has discretion to abolish the lower courts does not hold up under examination.

Authoritative precedent also strongly suggests that even if Congress had the power to abolish some or all of the lower Federal courts, it may not use its power over lower court jurisdiction to thwart the vindication of constitutional rights. The Court of Appeals for the Second Circuit said in Battaglia v. General Motors Corporation, decided in 1948, that, "while Congress has the undoubted power to give, withhold and restrict the jurisdiction of courts . . . it must not so exercise that power as to deprive any person of life, liberty, or property without due process of law."

The conclusion that can be drawn from all of these arguments is this: Congress does indeed have broad discretion to withdraw jurisdiction from lower Federal courts—where no substantive constitutional rights are at issue. The statutory rights that owe their existence to Congress, as distinguished from constitutional rights, may be taken away either by a repealing statute or by a provision withdrawing Federal court jurisdiction. Where rights embodied in the Constitution are concerned, however, the discretion of Congress is limited. When Congres deprives a Federal court of the authority to hear a litigant's constitutional claims or defenses, it must provide that litigant with another Federal forum in which to seek an adequate remedy. The distinguished legal scholar Henry Hart once decried the use of statutes withdrawing lower court jurisdiction to undermine constitutional rights: "Why, what monstrous illogic! To build up a mere power to regulate jurisdiction into a power to affect rights having nothing to do with jurisdiction! And into a power to do it in contradiction to all the other terms of the very document which confers the power to regulate jurisdiction!"

Applying these lessons to the divestiture bills now before Congress, there can be no doubt that all of them trench upon established constitutional rights. The Supreme Court has determined that busing may be a constitutionally required remedy in an appropriate case for violations of schoolchildren's equal-protection rights to an education in a desegregated public school. Chief Justice Burger has written for the Court: "Bus transportation has long been an integral part of all public educational systems, and it is unlikely that a truly effective remedy could be devised without continued reliance upon it." In the landmark case of *Roe* v. *Wade*, the Court firmly established a woman's constitutional right to an abortion. And for nealy two decades, the Court has found mandatory prayer in the public schools to violate the constitutional principal of separation of church and state.

One may disagree with these decisions; they may even transgress one's deepest moral convictions. But one cannot doubt that they were based upon informed interpretation of the Constitution—and not on the basis of political or ideological expediency. It is worth recalling the pungent words of Chief Justice Charles Evans Hughes: "We are under a Constitution, but the Constitution is what the judges say it is, and the judiciary is the safeguard of our liberty and of our property under the Constitution." Depriving the Federal courts of the power to adjudicate cases relating to such issues as desegregation, abortion and school prayer effectively precludes Federal protection—the constitutionally envisaged and most reliable form of protection—of our cherished constitutional rights.

The result of the proposed legislation would be to deny citizens the protection of constitutional rights that the Supreme Court has declared they possess. It would be strange indeed if Congress could accomplish through a jurisdictional bill what it clearly must not accomplish directly: a reversal of constitutional principle by an act of Congress The law is clear, for example, that Congress has no power to declare racial discrimination in Federal Government employment legal. The "logic" of the arguments raised by the proponents of the divestiture bills would, however, permit Congress to remove from the Federal courts all jurisdiction to hear cases involving racial discrimination against Government employees. The motive, discrimination, would be equally patent in either instance.

If one needs to find language in the Constitution as a source for these restrictions on the power of Congress to control the jurisdiction of the lower Federal courts, it is in the due process clause of the Fifth Amendment. The overarching guarantee of due process is the sacred assurance that the Federal Government will govern fairly, impartially and compassionately. All the powers of Congress—to tax, to make war, to regulate commerce—are constrained by its constitutional inability to deprive us of our rights to life, liberty and property without due process of law. As a power of Congress, the authority to control jurisdiction is therefore restricted by the right of due process. That is the wonder of the American Constitution as it lives and breathes.

Should Congress insist upon restricting the judiciary in ways that the Supreme Court may view as unconstitutional, the Supreme Court might well strike down the withdrawal-of-jurisdiction legislation, leav-

ing Congress and the judiciary in conflict. This institutional dissension would continue, until Congress either accepted the Court's determination or passed a constitutional amendment restructuring the basic relationship between the judicial and legislative branches of government.

It is understandable that politically vulnerable legislators would react adversely to judicial nullification of their enactments. Yet those who criticize the courts for their unresponsiveness to the present national mood tend to forget that the judicial branch was not designed as just another barometer of current public opinion. Congress is superbly adequate for that function, and we ought not to presume that the framers intended the judiciary as an institutional redundancy. In exercising their power of judicial review, the courts have represented the long-term, slowly evolving values of the American people, as enshrined in the Constitution. And when the people have recognized Congressional court-curbing efforts for what they are—assaults on the Constitution itself—they have in every instance rejected them.

It is of no small interest that even some of the supporters of the divestiture bills have begun to question the constitutionality of these proposals. And, indeed, there is a glimmer of hope that these doubts will eventually permeate Congress. The long history of Congressional court-curbing measures reveals that the legislative branch has in every instance ultimately yielded to the judiciary's duty to interpret the Constitution and has not (at least since passing the statue involved in the *Klein* case more than a century ago) challenged the courts with a jurisdictional bill that would impinge upon the fulfillment of that duty. Robert McKay, former dean of the New York University Law School, wrote of bills to withdraw jurisdiction over apportionment cases: "Once again, as so often in the past, when the implications of the proposed legislation were made clear, the Congress would not quite cross the threshold of no return."

The political risks attending bills to withdraw Federal jurisdiction create another check on the legislative goal of certain Congressmen. Groups of all persuasions have attempted to achieve their politcial aims through attacks on the Court's authority to decide constitutional cases. While it is true that political conservatives are the strongest supporters of the current efforts to withdraw jurisdiction, liberal reformers have also utilized this strategy in the past. Employed successfully by today's political majority, it could easily be manipulated tomorrow by a different majority—and to other ends.

In the final analysis then, while the current divestiture bills should be a cause for concern about the ability of our constitutional system to withstand the onslaught of restrictive legislation, there is also room for hope. In the long history of court-curbing efforts, the majority has always, in the end, acknowledged the clear intention of the framers. To preserve the rights of the people, the Federal judiciary must interpret and apply the Constitution unfettered by unseemly limitations on its jurisdiction. The current Congress is a body of distinguished and wise legislators who are unlikely to sacrifice the long-term good of the Republic for speculative and short-term political gain. As the New England poet James Russell Lowell once said, "Such power there is in clearеyed self-restraint." As the first Monday in October draws near, there is reason to believe that Congress will be instructed by the lessons of history and see that the constitutional powers of the highest court in the land—and of other Federal courts—should remain inviolate.

Mr. DURENBERGER. Mr. President, 5 months ago I prefaced the introduction of the Economic Equity Act by noting that in the first 200 years of the American experience only two women had been elected to the Senate in their own right; only 14 women had served on the Federal bench; and that no woman had ever served on the Nation's highest court.

I must confess a special satisfaction in the realization that just 9 months into the new beginning we proclaimed for this country in January, the most significant of those barriers is about to fall.

The nomination and confirmation of Sandra O'Connor is an affirmation of the President's and the Senate's faith in a remarkable woman. Her intellectual ability has been evident in every phase of her life, from law school—where she was third in a class that included Supreme Court Justice William Rehnquist—to her years of service on the Arizona bench. She is an extremely intelligent woman and a very capable jurist. Her command of the law was evident throughout the confirmation hearings. Her ethical background is spotless and her integrity has never been questioned even by her most critical foes. Her life's record is impressive evidence of the competence, intellect, and leadership she will bring to the Nation's highest court.

The nomination of Sandra O'Connor is also an affirmation of faith in every American woman. It is recognition of the fact that every person in this Nation feels the loss when society fails to utilize the talents, judgment, and intellectual capacity of half its people. The decisions reached by the Supreme Court touch the lives of every woman, just as they touch the lives of every man. It is a paradox that a nation born in reaction to legislation without representation should have allowed the same inequity to remain for so long in its judicial system. When Mrs. O'Connor takes her seat on the Supreme Court, the stakehold of every American in that Court will be more real and visible than ever before.

The O'Connor nomination, and the Senate's vote to confirm that nomination, are also reaffirmations of the unique balance of power that underlies our system of government. As I listened to her testimony during last week's hearings, I became convinced that Mrs. O'Connor's greatest qualification for the Court is her perspective on the role a Supreme Court Justice—or any justice for that matter—plays in the formulation to policy. Mrs. O'Connor has served both on the bench and in the legislature. She understands the difference between the judicial and legislative role. Her testimony—like her judicial record—emphasize the primacy of the Congress and the legislatures of the 50 States in defining legislative policy. She well understands that while the courts play an essential role in applying these policies on a case-by-case basis, they cannot preempt the role of policymaker without disrupting the constitutional balance that has supported the federal system for more than two centuries.

There are areas where I agree with Mrs. O'Connor and areas where we take different views. But as we prepare to vote this evening, it is equally essential that every Member of this body bear in mind the limits as well as the responsibilities of the Senate's power to advise and consent on Presidential nominations. That power was never intended as authority for any Senator to substitute his or her judgment for the Presidents on judicial nominations. The issue is not whether I or any other Senator would have chosen Sandra O'Connor from the field of men and women qualified to fill the Stewart vacancy. The responsibility of advise and consent is the limited but essential responsibility to insure that the Presidents choice does fall within that field, that she meets the ethical and intellectual requirements to serve on the highest court. The intellectual and ethical capabilities of this nominee are beyond question, and by making that judgment the Senate has fulfilled its role. The nomination of Mrs. O'Connor should be confirmed.

The vote we are about to cast is truly an historic vote. It is an affirmation of faith in this nominee, and in the millions of American women she represents. It is a reaffirmation of the willingness of the Senate and the members of the Court to accept the limits as well as the responsibilities of their constitutional roles. I am convinced that this nomination is not the culmination of a 200-year effort by American women to add their wisdom to the accumulated wisdom of the Court. It is just the beginning of that process, and it is a privilege to play a role by casting my vote for Sandra O'Connor this evening.

Mr. MITCHELL. Mr. President, since I was sworn in as a U.S. Senator last year, I have missed only a handful of Senate votes. I consider each vote I have cast significant and important. But there are occasions when the Senate considers a matter which is of utmost significance and of the highest importance.

The approval of a nomination to the U.S. Supreme Court is such a matter. The vote each of us is about to cast will have an indirect effect on the development of American law which is far greater than the direct effect of most legislation considered by this body. The confirmation of Judge O'Connor to the Supreme Court is a responsibility which we should not, and do not, take lightly.

I am pleased to be able to vote to approve the appointment of Judge O'Connor. I have carefully reviewed her record as a judge and have read with great interest her intelligent and comprehensive discussions of the law with the members of the Senate Judiciary Committee. I was extremely impressed with her knowledge of Federal law and Supreme Court precedents. She has already established her scholarly qualification for her appointment.

In addition, Judge O'Connor has demonstrated a demeanor and temperament appropriate for a Supreme Court Justice. I am especially pleased that a jurist of this caliber is being elevated to the Supreme Court.

Mr. BRADLEY. Mr. President, Emerson once wrote that "integrity is better than a career." Fortunately with President Reagan's nominee for Supreme Court Justice we do not have to make a

choice between the two. For Sandra Day O'Connor combines a distinguished career with great personal integrity.

I am pleased to say that in this nomination I have found a common ground on which to stand with the Reagan administration. As House Speaker O'NEILL stated in the New York Times of July 9, 1981, "It's the best thing he's (Reagan) done since he was inaugurated." I extend my support to the appointment of Mrs. Sandra Day O'Connor.

As we consider this nomination, I know it is not necessary to remind my fellow Senators that not only is Mrs. O'Connor highly capable, highly skilled and highly educated, but she will be the first woman to sit on the Supreme Court in a nation where women comprise 52 percent of the population. Clearly her qualifications, which are impressive, are more important than her gender. The important point is that it is noteworthy whenever our society becomes more inclusive and truly integrated.

The role of the Supreme Court in American society is an extraordinary one for a group of nine people. The Justices must balance conflicting societal interests to determine what is in the best interests of the American society as a whole.

The Court's impact is not always easy to predict, especially in areas such as the status of minorities and labor management relations. It is also more limited than one might imagine. For instance, criminal penalties are designed to deter people from committing crimes. Civil rights policies are intended to prevent discriminatory behavior. But the behavior of people is not changed that easily. A variety of influences are beyond the reach of government.

The Supreme Court is one of many public and private institutions that shape American society. However, it is clearly a strong force in defining a direction for our society. It is the final assurance that we are a Nation of laws, not men—and women. For this reason, its members have significant responsibility. Sandra Day O'Connor is able to fulfill this responsibility.

To elaborate on her credentials, she graduated among the top 10 of the 1952 class of Stanford Law School. For 3 years she was a civilian lawyer for the Army in Germany. When she returned to Arizona she practiced law for 2 years. When her youngest son entered into school she returned to her legal practice, then became Assistant Attorney General of Arizona and entered Republican Party politics.

She was elected to the Arizona State Senate and later became the majority leader in 1973. Arizona politicians describe her as a conservative which is supported by her record on the abortion issue. But on some issues concerning women she often took the liberal position and led fights to remove sex-based references from State laws. In addition she led the way toward the elimination of job restrictions in order to open more positions for women. Mrs. O'Connor left the Senate and won election as a Phoenix trial judge in 1975. In 1979 she accepted an appointment to the Arizona Court of Appeals from Governor Babbitt, a Democrat.

Naturally, there are those who differ with Mrs. O'Connor because of political affiliation or opinions. I say that Sandra Day O'Connor is an excellent choice because she has the ability needed to do the job. I have every hope that she will consider and decide the issues before her—not as a liberal or conservative, not as a woman, not as a Republican—but based on the facts of the case and the Constitution, which we are all sworn to uphold.

● Mr. WILLIAMS. Mr. President, I am extremely pleased to cast an affirmative vote for the confirmation of Sandra Day O'Connor. While I have my differences with many aspects of the President's program, his fulfillment of his campaign pledge to nominate a qualified woman jurist to our Nation's highest legal forum deserves the praise of every American devoted to equality.

Judge O'Connor has, I feel, impressed every Member of this body and the vast majority of the American people with her cool and reasoned demeanor through an exhaustive hearing examination. She forthrightly outlined her view of the role of the courts and the nature of our federal system, while respectfully demuring when asked to comment on issues which may come before her as an Associate Justice. It is clear that Sandra O'Connor will not let her own personal views interfere with reaching opinions based solely on the facts before the Court and on the law as it presents itself to the Court.

Mr. President, this does not mean that I agree with all of Judge O'Connor's personal views, or that I will necessarily concur with the understanding of the Constitution which emerges in her opinions as a Supreme Court Justice. But that, in my view, is not the proper role of the Senate when presented with an occasion to advise and consent to the nominations of a President. I believe that the President is entitled to those individuals who he, or perhaps someday she, feels is best suited to the position at issue. Our duty as Senators is not to decide whether that nominee agrees with us on any single issue or is in substantial agreement on a wide range of issues. Rather, our job is to ascertain that the individual is qualified by training, experience, and temperament for the post in question, and will abide by the paramount duty to uphold our laws and our great Constitution. The 17-to-0 vote of the Judiciary Committee in favor of reporting this nomination to the Senate tells me that Sandra O'Connor meets and exceeds that criteria of judgment.

In concluding, Mr. President, let me add a personal note which underlines the historic importance of this occasion. Last night I spoke on the telephone with my mother. She is 92 years old, and has personally lived through nearly half of our Nation's history. When I noted that this vote was to occur today on the first woman to be confirmed as an Associate Justice of the Supreme Court, she commented, "You know, I'm so glad that I was able to live to see this day."

Mr. President, when Sandra O'Connor ascends the Supreme Court bench, the words "Equal Justice Under Law" which [illegible] the Court's portals will take on new meaning for our Nation which has indeed waited its whole life for this great occasion.●

Mr. THURMOND. Mr. President, I suggest the absence of a quorum under the same conditions.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. Mr. President, I yield to the majority leader such time as he wishes.

The PRESIDING OFFICER. The Senator from Tennessee is recognized.

Mr. BAKER. Mr. President, I thank the Chair.

Mr. President, what is the next order of business under the order previously entered?

The PRESIDING OFFICER. The Senate is to proceed to the consideration of the nomination of James C. Miller III, to be a Federal Trade Commissioner.

Mr. BAKER. Mr. President, is the time for the control of debate for the proponents assigned to the majority leader?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. Mr. President, I assign that to the distinguished Senator from Wisconsin (Mr. KASTEN).

The PRESIDING OFFICER. Without objection, it is so ordered.

Who yields time?

## FEDERAL TRADE COMMISSION

NOMINATION OF JAMES C. MILLER III TO BE A MEMBER OF THE FEDERAL TRADE COMMISSION

Mr. KASTEN. Mr. President, in accordance with the previous order, I call up the nomination of James C. Miller III to become a member of the Federal Trade Commission.

The PRESIDING OFFICER. The nomination will be stated.

The assistant legislative clerk read the nomination of James C. Miller III, of the District of Columbia, to be a Federal Trade Commissioner.

The Senate proceeded to consider the nomination.

Mr. KASTEN. Mr. President, there is a time limit on this nomination of 2 hours of debate to be equally divided between the majority and minority leaders, or their designees, and 1 hour will be under the control of the distinguished Senator from Ohio (Mr. METZENBAUM).

Is that the Chair's understanding?

The PRESIDING OFFICER. That is correct.

## THE SUPREME COURT OF THE UNITED STATES

The Senate continued with the consideration of the nomination of Sandra Day O'Connor to be an Associate Justice.

The PRESIDING OFFICER. The Chair inquires of the chairman of the

Judiciary Committee and the Senator from Delaware whether or not they have yielded back their time on the nomination of Sandra Day O'Connor and whether or not the Senate will now proceed to this nomination?

Mr. BIDEN. Mr. President, the Senator from Delaware at this point has not yielded back the remainder of his time. I wish for this time for the purpose of continuing on the O'Connor nomination to yield whatever time I have remaining to the last person on our side who indicated an interest in speaking, and that is the Democratic leader.

Mr. BAKER. Mr. President, if the Senator will yield to me just for a moment, there are Members on this side, including the majority leader, who wish to speak. I am perfectly willing to do that whenever it is most convenient, but when I was brought to the floor I was under the impression we were prepared now to proceed to the Miller nomination.

The PRESIDING OFFICER. The Chair will advise the majority leader that presently 2 minutes and 26 seconds remain to the chairman of the Judiciary Committee and 22 minutes and 31 seconds remain to the Senator from Delaware.

Mr. BAKER. Mr. President, I am prepared to do it either way the Senator wishes or the minority leader wishes.

Mr. President, I ask unanimous consent that the Miller nomination be temporarily laid aside so that the Senate may resume consideration of the O'Connor nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I thank the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. THURMOND. Mr. President, I yield such time as the majority leader desires, and if he desires, if we have time, I have been promised time by the ranking member, Senator BIDEN.

Mr. BIDEN. I would be delighted to yield the time I have left beyond what the Democratic leader will use, but I believe I only have 2 minutes.

The PRESIDING OFFICER. The Senator has 22 minutes.

Mr. BIDEN. I beg your pardon. There is plenty of time.

Mr. BAKER. Mr. President, will the Senator from South Caroina give me a minute and a half and the minority leader whatever time he wishes?

Mr. BIDEN. We have plenty of time for us all.

The PRESIDING OFFICER. The majority leader.

Mr. BAKER. Mr. President, I thank the minority leader for permitting me to proceed at this point, and my thanks to the distinguished ranking member of the Judiciary Committee and, of course, to the distinguished chairman of the Judiciary Committee, the Senator from South Carolina.

Mr. President, today is truly a historic day, a rare historic day, that embraces all three branches of our Federal Government—the executive branch, for President Reagan's courageous decision to nominate Judge O'Connor to the Supreme Court: The legislative branch, for supporting and confirming Judge O'Connor; and for the judicial branch, the new home of the first woman to serve on our highest court and only constitutional court.

I would like to take this opportunity to thank Judge O'Connor for her cooperation with the Senate Judiciary Committee. It seems that the more we get to know her, and the more we come to recognize her judicial prowess, the more honored we become to have her serve on our Nation's Highest Court.

The chairman of the Judiciary Committee, Senator THURMOND, and his entire committee should be commended for their swift and responsible action on this nomination.

I express my appreciation as well to the distinguished ranking member, and all of the members on the minority side of the Judiciary Committee who handled this nomination, in my judgment, in a most responsible and most nonpartisan way.

I expect that Mrs. O'Connor will be confirmed. I hope she is confirmed overwhelmingly, even unanimously, for I believe this is a milestone in the further evolution and development of the democratic process in this great Republic.

My thanks to Judge O'Connor for permitting her nomination to be submitted, my congratulations to the President for making it, and my hope that she will serve with the distinction I feel confident she will bring to our highest court.

The PRESIDING OFFICER (Mrs. KASSEBAUM). Who yields time?

Mr. BIDEN. I yield time to the Democratic leader.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. ROBERT C. BYRD. Madam President, first of all, I wish to thank the distinguished Senator from Delaware (Mr. BIDEN) for his courtesy, and also to thank him for the fine way in which he has gone about the consideration of this nomination.

I congratulate the entire Committee on the Judiciary for the hearings that have been held, for the questions which have been asked and, most of all, I commend Mrs. Sandra O'Connor for the way in which she succinctly and cogently responded to those questions.

I marveled at her equanimity, I admired her judicious responses to questions, and I think she came through those hearings with flying colors.

Several weeks ago, I had the good fortune of meeting Judge O'Connor shortly after she had been nominated by the President to serve as an Associate Justice of the U.S. Supreme Court. I told her then that I intended to vote for her confirmation unless something of an adverse nature that was then unforeseen should come to light.

I followed the hearings carefully, and I observed her day-to-day conduct at those hearings, her demeanor and her bearing, and I was impressed. Today, I shall cast my vote in favor of her nomination.

I would also like to take the time on this occasion to commend President Reagan for this outstanding nomination. I have been persuaded, both in her testimony at the Judiciary Committee hearings and from the record of her distinguished career in public life, of her commitment to the fundamental values that made this country great.

I believe that her philosophical approach to the proper role of the Supreme Court has evolved from her own experience in State government, as a State's attorney, as a State legislator, and, most recently, as a State Appellate Court judge, and I would expect, of course, that what she has learned from all of these various perspectives has had a great deal to do with the shaping of her present attitude concerning the scope of the Supreme Court.

I trust that she will always be mindful of the necessity of maintaining a proper balance between national and local responsibilities.

I also commend her on taking a position with regard to her very own personal views on given matters. She should not in advance attempt to state what her position will be with regard to any given subject area that might come before the Supreme Court at a future time, and she did not so state.

I commend her on taking a position with regard to one's own personal views. One's responsibility in a position such as serving on the Supreme Court is to interpret and to construe the Constitution of the United States, not according to one's own personal opinion or viewpoint, not according to one's own personal biases and prejudices—we all have them at one time or another—but only in light of the Constitution, which is a living document for all time.

I congratulate the Senators who asked her difficult questions, and I find no fault in those who sought to satisfy their own personal views in asking some questions, hoping the responses would be similar to their own feelings about a given matter.

I congratulate Judge O'Connor on maintaining throughout those days of questioning that she would construe the Constitution on all fours and apply that Constitution to the circumstances as they came before the Court on future matters.

She also stated that the doctrine of stare decisis—let the decision stand—would be a very compelling one with her, but that, nevertheless, there come times when new precedents have to be set and occasionally, in the light of changing circumstances, old precedents have to give way. However, she maintains that precedents will have a very persuasive and heavy weight in her deliberations, and that is the way I think it ought to be.

I am satisfied that when she goes to tend to cases that come before the Court, she will attempt to see beyond her own personal viewpoint, and view cases in the light of what the Constitution says, what the Constitution forefathers thought as they wrote, and what the precedents are that have been handed down from generation to generation in the various constructions and interpretations of that Constitution.

So, Madam President, I would like to express my deep sense of pride in my country and in our elected officials as we have finally reached a moment in our history when gender is not a factor to be considered in the selection of Associate Justices to the Supreme Court of the United States. By force of her intellect, character, integrity, and temperament, Judge O'Connor has brought distinction and honor, not only to the women of this country, but to all of us. And she will continue to do that, I am confident, as she sits on the highest Court of the land.

I am proud to vote to confirm Judge O'Connor as an Associate Justice of the U.S. Supreme Court.

I again thank my ranking member, Mr. BIDEN, for his courtesy in yielding to me.

Mr. BIDEN. I thank the Senator.

I was about to yield back the time, but there has been a request from the distinguished Senator from Florida. She asked whether I would yield her some time. I would be delighted to yield time for the purpose of discussing this nomination.

The PRESIDING OFFICER. The Senator from Florida.

Mrs. HAWKINS. Thank you, Madam President.

Madam President, it is great pleasure to participate in this historic event, the confirmation proceedings of the first woman to be nominated to the Supreme Court. The pleasure is the sweeter in that the nomination was submitted by a Republican President, who is perceived by some as a hidebound conservative. This nomination demonstrates conclusively that conservatism does not imply denigration of women, or less than a full commitment to equal rights for all.

John Ruskin said that there is not a war in this world, nor an injustice, but that women are responsible; not that they provoke them, but that they do not stop them. I have felt the accuracy of that charge all my life, and it is part of the reason I have been active in politics. It is evident to me that Sandra Day O'Connor is moved by the same sense of responsibility. I welcome her to Washington, and will be happy to vote to confirm her as an Associate Justice of the Supreme Court.

There was concern about this nominee, given the intensity of feeling surrounding certain social issues, and her record as a member of the legislature of the State of Arizona. But there was never the slightest hint, that I ever detected, that opposition to her was based on her sex. All of the debate has taken place over policy issues and technical qualifications, and that is as it should be.

The debate has shown that Judge O'Connor is well qualified for this position. Her record as a law student was excellent, leading to academic honors and a spot on the staff of the Stanford Law Review. She practiced law, in both public and private practice, and then held elective office for 5 years, one of the very few judicial nominees to have that kind of important experience. If her judicial experience has not given her the opportunity to break new ground on constitutional issues, it has demonstrated that she has a remarkable degree of legal competence and commonsense.

In general, the hearings disclosed that Judge O'Connor is sensitive to the social issues that are of so much concern to millions of families today. She showed a reluctance to justify the intrusion of government power into the intimate details of family life, and a good understanding of the delicate nature of our complex civilization. She will have, of course, a responsibility to carry out the promise she showed in the hearings, by adhering closely to a doctrine of judicial restraint and true constitutionalism. Our social fabric has been strained in recent decades by an unwarranted judicial activism, and in my view Judge O'Connor has the appropriate view of the proper role of the courts. In many ways, it appears to me that Justice O'Connor will continue to be a part of the recent tendency of the High Court to defer to the political branch of government, and to permit many more decisions to be made at local levels. If she does fulfill that promise, she will be welcome news to those who now oppose her, and a far better justice than they now appear to think she will be.

There is no reason to think that Sandra O'Connor will be a doctrinaire feminist or other sort of judicial activist. During the hearing she was asked if she had experienced sex discrimination herself. Her response was perfectly in keeping with her understanding of the complexity of society and human emotions, and attuned to the differences in attitude that come with the passage of time. Her views appear to coincide with my own on this issue: That it is needlessly divisive and inaccurate to talk about "women's issues," when there are so many "people's issues" that have to be dealt with. We do not have surplus time and energy to waste on breaking people up into separate blocks.

As a strong opponent of abortion myself, I was concerned about the charges that Sandra O'Connor had a proabortion record as a State legislator. In evaluating Judge O'Connor on this issue, one of the most persuasive aspects of the hearing was the appearance of numerous Arizona legislators who know Judge O'Connor well as a fellow legislator. Many of these legislators are strongly antiabortion. One of them, in fact, Tony West, is a leader in the Arizona prolife movement. These legislators endorsed the nomination with great enthusiasm, and that endorsement has to carry a great deal of weight.

In addition, of course, we have the recommendation of President Ronald Reagan, a strongly prolife President, who has assured us that we will not be unhappy with this nomination. These endorsements have to be taken into account by anyone attempting to evaluate this nomination. Certainly they should be considered at least as important as a legislative voting record almost 10 years old, 10 years during which much more has been learned about abortion and the unborn child.

The Court has recently shown some disposition to withdraw from its mode of judicial activism. In several decisions last term there were clear indications that the present membership of the Court feels uncomfortable with the legislative role, and that restraint is likely to be more the order of new term as well. Judge O'Connor, it appears to me, will fit very well with that more restrained attitude. Her opinions and her writings show that she understands the problems created by judicial activism, and her experience as a State legislator certainly gives her the practical exposure to dictation from above that should lead her to shun it.

I expect, then, that in confirming Judge O'Connor as the first woman justice on the Supreme Court, we will be setting the stage for many long years of decisions which will be truly satisfying to those of us interested in defending the family, neighborhood, work, prosperity, and peace. These are the values of our President, and the Republican Party who campaigned on them, and of our constituents. I expect history to show that Justice O'Connor effectively championed these causes, too. Madam President, I yield back the floor.

Mr. THURMOND. Madam President, I wish to take this opportunity to thank Senator BIDEN for allowing several of those on our side extra time. I appreciate his agreeing to give extra time, and I wish to thank him for doing it.

I am so glad that Senator HAWKINS got here to make her speech, because we certainly wanted her to speak on this subject.

Madam President, I also wish to take this opportunity to express my appreciation to the ranking member of the Judiciary Committee. Senator BIDEN of Delaware, for the fine cooperation he has given throughout these hearings.

No one could have cooperated more than he did. I am very grateful to him and those on his side of the aisle for every cooperation extended in expediting these hearings and completing them on time. I just want him to know how much we appreciate it on this side of the aisle.

Mr. BIDEN. I thank the Senator. We are always delighted to expedite excellence, and that is what we have the opportunity to do today.

I notice at one point in the record when the managers of a bill were about to yield back their time any student of the record, as they read it, would assume it is an automatic, mutual admiration society, but I would like to say something, and I mean this sincerely.

I would like to thank the Senator from South Carolina for his judicial demeanor. Quite frankly, when I had the opportunity to become the ranking minority member, I was not sure how the young fellow from Delaware would be able to get along with that older fellow from South Carolina because he had a reputation for being a hardbitten, tough old boy you did not want to get in the way of, and our views are not always compatible.

But I would like to say this to this body; there probably would be a more appropriate time but I may not have it, and I hope he will forgive me for re-

peating a conversation we had in private that he did not expect to be made public.

About a month ago I said:

You know, Strom, it has only been 8 or 9 months that we have been working together. You have been as good as I can ask for. You have been a real chairman. You have even sometimes submerged your own views for the good of the committee in order to expedite movement in the committee, which any leader in this body must do. I am impressed.

We got off the elevator and he turned around as he is wont to do and he put his hand on my arm.

When you talk to STROM, he is not quite like RUSSELL LONG, he does not pull you closely and whisper in your ear. But he put his hand on my arm and said:

Joe, the only thing I want to be known as is the fairest chairman that the Judiciary Committee has ever had.

I must tell all Senators that based on his track record so far he will meet that goal that he has, being known as the fairest chairman the Judiciary Committee has ever had.

I wish I could change his views on many issues. I wish he was as amenable to those changes as he is to being fair. But I guess you cannot have everything.

This really does not have much to do with the nomination, but I wanted to thank the chairman for the gentlemanly way in which he conducts his committee business.

Madam President, I am not prepared at this point to yield back the remainder of my time.

With the permission of the chairman, I will ask unanimous consent that the remainder of the time not have to be yielded back at this point but that we proceed to the Miller nomination so that the few minutes left would be available to anyone who might want to speak about this nomination prior to 6 o'clock.

Mr. THURMOND. Madam President, if the distinguished Senator will yield, I first want to thank him for his kind remarks. I deeply appreciate what he had to say. Also, I presume by now the Senator from Delaware has found that the Senator from South Carolina is younger than he thought.

Mr. BIDEN. That is precisely true. I never doubted that.

Mr. THURMOND. Madam President, since we are now ready to go to another matter, I ask for the yeas and nays on the O'Connor nomination.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BIDEN. A parliamentary inquiry, Madam President. How much time remains on this nomination?

The PRESIDING OFFICER. The Senator from Delaware has 4 minutes and 12 seconds.

Mr. BIDEN. I ask unanimous consent that that time be made available just prior to the vote at 6 o'clock.

The PRESIDING OFFICER. Without objection, it is so ordered.

## FEDERAL TRADE COMMISSION

### NOMINATION OF JAMES C. MILLER III, TO BE A FEDERAL TRADE COMMISSIONER

The PRESIDING OFFICER. Under the previous order, the Senate will now proceed to the consideration of the nomination of James C. Miller III, of the District of Clumbia, to be a Federal Trade Commissioner. Time for debate on this nomination is limited to 2 hours to be equally divided between majority and minority leaders or their designees, with 1 hour under the control of the Senator from Ohio (Mr. METZENBAUM).

The Senator from Wisconsin.

Mr. KASTEN. Madam President, I rise today to urge the Senate to act promptly to confirm Dr. James C. Miller as Chairman of the Federal Trade Commission.

Jim Miller is uniquely qualified to Chair this important agency. As you know, Madam President, Dr. Miller received a Ph. D. in Economics from the University of Virginia in 1969. He has distinguished himself since that time both in the academic world and working for several Government agencies in the areas of transportation, regulation, and antitrust policy.

Most recently, of course, Dr. Miller has served as Administrator of the Office of Information and Regulatory Affairs at the Office of Management and Budget and as Executive Director of the President's Task Force on Regulatory Relief. In that capacity, Dr. Miller has made a great contribution to President Reagan's regulatory reform initiatives. Under Dr. Miller's leadership, more than 180 potentially unnecessary or burdensome regulations have been withdrawn, modified, or reviewed by the task force, generating a possible one-time savings of $15 to $18 billion and an annual savings of up to $6 billion.

Madam President, I share the view expressed by some of my colleagues both in committee and on the floor, that the antitrust laws should be vigorously enforced.

The Government must actively police competition to preserve its effectiveness. It is with good reason, therefore, that maintaining a vigorous antitrust enforcement effort has been a traditional Republican concern.

At the same time, it is counterproductive to rely only on a limited number of judicial decisions or a certain body of economic thought. To do so would establish an inflexible basis for our Nation's antitrust policy. Economic research constantly adds to our understanding of market operation and competition. Furthermore, American industries is constantly evolving. For example, many American industries are facing increased competition from abroad. Antitrust policy must be reviewed periodically to account for new economic developments, to insure that law enforcement continues to serve consumers in the most effective and efficient way.

This process of review is underway both inside and outside of the administration. Assistant Attorney General William Baxter has announced that the Justice Department merger guidelines are being revised. On August 26, the House Judiciary Committee held a hearing on merger policy. Legislative proposals would provide for the creation of a Presidential Commission to study the international application of our antitrust laws. In addition, we can expect appropriate Senate committees to continue to insure that the antitrust laws are applied in a manner than is consistent with the national interest. This kind of review, the debate that has been initiated, and the concerns that have been expressed are extremely important.

At his confirmation hearing, Dr. Miller committed himself to a vigorous antitrust enforcement effort. He indicated that if confirmed as chairman, he would enforce the laws administered by the Commission, including the Robinson-Patman Act. He repeatedly made clear that there is no understanding of any kind with the administration to "gut" the FTC or phase out the agency's antitrust mission. Rather, he made perfectly clear that he would work through and consult with Congress to achieve any proposed reforms suggested by a broad review of antitrust policy.

I strongly believe in the merits of our antitrust laws, and I want to emphasize as chairman of our Consumer Subcommittee that it is the responsibility of Congress to determine whether and when these laws should be amended. It is not a determination to be made by the executive branch, and it is not a determination to be made through the budget process. If a change is to be made in the substance of the antitrust laws, it should be made by the committees with authorizing jurisdiction, the Commerce Committees and the Judiciary Committees.

For these reasons, and because of his personal qualifications, Madam President, I believe that Dr. Miller is uniquely qualified to assume the chairmanship of this important enforcement agency. His commitment to relieve unnecessary regulatory burdens at the FTC and to modernize antitrust policy does not mean that he is closeminded on broad policy issues, such as dual enforcement, that must be studied in consultation with Congress. Madam President, I am pleased to support Dr. Miller, and I urge the Senate to act promptly to confirm his nomination.

I reserve the remainder of my time, Madam President.

I understand that, at this time, the Senator from Kentucky may wish to make a statement.

The PRESIDING OFFICER. The Senator from Kentucky.

Mr. FORD. Madam President, I thank the chairman of the Consumer Subcommittee for his fine remarks. Let me say that I find myself in the same position as some of my colleagues—wanting to support the view that a President should have those people in the administration that he desires. Some differences of opinion, I guess, as to Mr. Miller's views have

developed in the committee. Hopefully, as my distinguished colleague from Wisconsin has stated, there will be vigorous leadership from this body.

I might say, Madam President, that I was insistent last year that we place in FTC legislation that the Consumer Subcommittee would hold oversight hearings of the FTC once every 6 months. I was told at that time that I was somewhat foolish about putting that into the law, because I would be compelled, then, to have oversight hearings. I was a little bit smarter than some of those who fussed at me, because there is another chairman of the subcommittee and he now is compelled to hold those hearings. I shall encourage him and call that to his attention—that we do look at the FTC at least every 6 months, find out where they are going, how they are going to spend their money, their attitude, the regulations they are about to promulgate and put into the record, and so forth. At the end of that 6-month period, we shall find out if they have accomplished those things they presented to the committee and where they will be going in the next 6 months.

Madam President, I think it is a proper approach, because oversight has not been used as much as it should have been used, as Congress has the ability to do. Hearings on the Bureau of Competition are needed. I think we ought to get into that arena. I look forward to the discussion on the floor this afternoon by my colleagues as it relates to this nomination and to the vote later on.

Madam President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

● Mr. PACKWOOD. Madam President, as chairman of the Commerce Committee, I want to express my strong support for the nominee whom we are considering today to be Chairman of the Federal Trade Commission. Jim Miller's past record, particularly in his most recent position as Executive Director of the President's Task Force on Regulatory Relief, demonstrates his deep commitment to preserving free-market competition and to reducing excessive Government regulation. His excellent credentials as an economist and his extensive work in the field of Government regulation will serve him well as Chairman of the FTC. Jim Miller has a broad understanding of the problems that can and do result from unnecessary and burdensome regulation, while also appreciating the economic, social, and other benefits gained from both well-designed and properly enforced regulation.

Madam President, I share the view expressed by many of my colleagues that the antitrust laws should continue to be vigorously enforced. I am confident that under the new leadership of Jim Miller, vigorous enforcement of the antitrust laws will continue. I strongly believe in the merits of the antitrust laws and wish to emphasize that it is Congress obligation to determine whether and when these laws should be amended in the best interest of the public. It is the job of the Federal Trade Commission, as an independent agency, and the Department of Justice, as part of the executive branch, to enforce the antitrust laws as Congress directs and intends.

I fully believe that Dr. Miller will bring to the Commission not only a true expertise in the field of economics, but also a strong interest in redirecting and revitalizing the agency so that it more effectively carries out its mission. There are many challenges waiting to be tackled down at the Commission. However, I anticipate that Jim Miller will meet those challenges with the same thoughtful leadership, fairness, and strong commitment that have characterized his past tenure at OMB and other Government agencies.●

Mr. KASTEN. Madam President, I yield such time as he may desire to the distinguished Senator from Washington (Mr. Gorton).

The PRESIDING OFFICER. The Senator from Washington is recognized.

Mr. GORTON. Madam President, I thank the Senator from Wisconsin.

The debate over Mr. Miller's nomination has centered almost exclusively on this Nation's antitrust policies and the role of the Federal Trade Commission in enforcing the Nation's antitrust laws. The distinguished Senator from Wisconsin, ably seconded by the Senator from Kentucky, has already pointed out, however, that the Federal Trade Commission has many other duties as well. That is an appropriate fact to remember during the discussion of this nomination, which, in my case, will center on concerns with antitrust laws.

Madam President, the administration, with the consent of the Congress has embarked on a program to rid the country of excessive, unwarranted and inefficient regulations. This program is a crucial part of the President's program for economic recovery which I have vigorously supported. I am troubled, however, about the administration's position on the antitrust laws. I have the impression that some in the administration, indeed, perhaps even the nominee himself, believe that some of our antitrust laws are excessive, unwarranted, and inefficient.

I am troubled by this attitude for two reasons. First, I would think that, if deregulation is to work, a competitive economy is absolutely essential, and the antitrust laws and their strict enforcement are indispensable in insuring that condition. Second, I am troubled that the administration would consider changing the law by announced policy of selective enforcement, rather than proposing legislative changes to the laws themselves.

In my remarks today, I would like to pose a few questions to the administration in the hope that their answers will eliminate my concerns.

Congress has determined in enacting the Sherman, Clayton, and FTC Acts, that price enhancement can best be prevented by insuring that price and production levels be determined by the unfettered free play of vigorous competitive markets, not by the individual or collective judgment of business firms who participate in those markets. Since it is the natural and proper central goal of business firms in our free enterprise system to maximize profits, which is most likely to result from agreements which limit the scope of competition, the natural and virtually certain consequences of any significant relaxation of the antitrust laws in some industries will be higher prices and less competition.

As I indicated at the time of the Commerce, Science and Transportation Committee's consideration of the President's nomination of Dr. Miller to chair the FTC, I have serious reservations about the administration's commitment to vigorous enforcement of some portions of these laws. The report of the FTC transition team, chaired by Dr. Miller, more recent public statements by Dr. Miller, Mr. Baxter, and other administration spokesmen, and the lack of new filings by the Antitrust Division have contributed to this concern. Although its position has remained rather vague, the administration appears to be sending signals to the business community that it does not agree with some elements of established antitrust law, and that it intends simply to abandon all enforcement activity in those areas. There are some indications that these signals have already reached the business community and have begun to alter business practices. This is alarming.

Any administration disagreement with the current laws must be brought to Congress for full consideration and approval before longstanding policies should be summarily changed. In the meantime, it is the duty of the FTC and the Antitrust Division fully to enforce the laws as they stand. Although executive discretion in the allocation of limited resources for enforcement is certainly necessary, it is improper for the administration to announce a tolerance policy for certain types of law violations, and thus, in effect, amend legislation by fiat.

Madam President, I am also concerned that the economic views underlying the administration's apparent approach are the subject of great dispute. There is an ongoing vigorous debate in antitrust circles concerning the most effective means of antitrust enforcement. The administration seems to be ready to undertake a significant departure from the traditional viewpoints in full. Highly respected authorities representing the other viewpoint strenuously argue that such an approach will lead to serious anticompetitive consequences. I am not particularly an advocate here today of one or the other of these viewpoints; but I do think that great care must be exercised to insure that all points of view and potential economic consequences are fully considered before boldly embarking on such a new approach in law enforcement. In any case, again, any approach that amounts to a change in existing law must first come before Congress.

The first specific area where I have concerns regarding the administration's approach is section 7 of the Clayton Act concerning mergers and acquisitions.

The transition team's report clearly implied a significant change in the enforcement approach. It concluded that previous efforts "to restrain vertical mergers are by and large misdirected." As for conglomerate mergers, they should

be disallowed only upon "weighing the anticompetitive consequences and the expected efficiency gains." It was recommended that enforcement concerning large-scale horizontal mergers should be strengthened; but that with smaller horizontal mergers, the concern should be limited to cases where the "elimination of a competitor may facilitate collusion among the remaining firms." Mr. Baxter has stated unequivocally that—

Vertical mergers are never anti-competitive and that conglomerate mergers can lessen competition only through horizontal effects. (U.S. News & World Report, Aug. 3, 1981, p. 51.

It has been reported that such statements have had a significant impact upon the business community—

Wall Street financiers are being told by their lawyers that almost any merger is apparently worth a try. "Things are being proposed that never would have been proposed" by companies before the Reagan administration took office. (Washington Post, August 23, 1981.)

This is undoubtedly contributing substantially to the merger wave we seem now to be experiencing.

Our economy today is rather highly concentrated. Merger has been the major means of achievement of that concentration. It is unquestionably extremely difficult to deconcentrate an already concentrated market using the antitrust laws. In enacting the Celler-Kefauver amendments to section 7, Clayton Act in 1950, Congress clearly intended to stop the trend toward concentration, using a more vigorous attack on mergers as a major tool. These amendments made it clear that section 7 now prohibits all mergers—horizontal, vertical, and probably conglomerate—that may substantially lessen competition or tend to create a monopoly in any line of commerce. Congress was concerned with the concentration trend in a very broad sense; the commitment was not solely to competition as a self-regulatory process, but also for the desire to preserve local control of business and to protect small business. See *Brown Shoe Co.* v. *U.S.*, 370 U.S. 294, 312–23 (1962) for review of legislative history.

This congressional policy, as reflected by the courts since 1950, has been quite strict about both horizontal and vertical mergers, although admittedly somewhat less so about conglomerate mergers. Possible economies have not been a recognized defense where the proscribed anticompetitive effects are present. (See *FTC* v. *Proctor & Gamble Co.*, 386 U.S. 568, 580 (1967.) I am concerned that the administration is saying that it is its intent unilaterally to retreat from this congressional policy without bothering to amend the current laws or to consult with the Congress; that its statements amount to a signal to the business community that violations of current law will be tolerated in certain areas—a signal that may have already been received and acted upon.

A relaxation of the antitrust laws in the merger field could have serious consequences beyond those strictly relating to antitrust. I am concerned that the current merger wave, involving some large individual merger drives, has already tied up substantial amounts of credit, making it even more unavailable to small businesses which seek to expand, and contributing further to the continuing intolerably high levels of interest rates. Certainly, the acquisition of existing facilities rather than investing in new plants and equipment does not lead to economic growth.

Most of the individual statements by spokesmen of the administration, taken in isolation, may not provide cause to become overly concerned. They may simply be setting an appropriate order of priorities. But the meaning of many of the statements are vague, and collectively they appear to show a pattern of indifference to enforcement of the antitrust laws of the United States in certain areas. Nonetheless I believe it would be useful to set out some of my specific questions.

In the area of horizontal mergers, I am happy to note that there have been strong statements concerning policing large-scale horizontal mergers, at least where monopoly power would be created. The transition team report implies, however, that the sole concern regarding smaller horizontal mergers will be cases where the elimination of a competitor may facilitate industry collusion. My question is: Does this mean that the administration intends to tolerate horizontal mergers even if they may create new oligopolies, so long as the administration is convinced that no one firm will obtain monopoly power and that the likelihood of direct collusion among the remaining competitors will not be enhanced? Such a narrow approach would seem to be an example of a significant unilateral departure from existing law and policy, and could lead to rebirth of the pre-1950 trend toward concentration that alarmed Congress, and resulted in the Celler-Kefauver amendments.

As I noted previously, Dr. Miller and Mr. Baxter have each left a rather strong impression that enforcement efforts concerning vertical mergers will be abandoned totally. I am pleased to report, however, that in his responses to questions which I have previously raised with Dr. Miller, he indicated that he believed that the FTC, in coordination with the Antitrust Division, should carefully review vertical mergers and acquisitions for anticompetitive effects. I hope this indicates that the nominee has rethought some of his previous positions. He qualified his remark, however, by saying his emphasis would be on—

cases against vertical acquisitions which had the effect of diminishing competition among direct competitors.

This latter statement may simply represent a very appropriate indication of Mr. Miller's priorities in this area. It is vague, however, and may also indicate an overly narrow interpretation of existing law, which has treated vertical mergers rather severely.

For instance, I assume Dr. Miller intends to include within the FTC's review of vertical mergers, cases where the effect may be to foreclose customers and potential customers of unintegrated firms which might, therefore, be driven from the market, and even cases where the vertical merger may create a severe supply squeeze for competitor firms. My question is, as a result will the scrutiny also apply to other areas of concern such as: Where the vertical merger may raise barriers to entry by reducing the unintegrated portion of the customer market such that integration becomes a practical necessity for entry at the manufacturer level; and where the vertical merger co-opts the most likely potential new entrants, especially in an already highly concentrated industry?

As I mentioned previously, the congressional intent in passing the Celler-Kefauver amendments included a concern that small locally controlled firms should not be permitted to disappear from the market. In answering one of my questions to him, Dr. Miller stated, that—

Non-economic reasons for concern with market concentration are more appropriately addressed by Congress than by the FTC.

Congress has spoken on this issue. I have been unable to determine whether Dr. Miller means to imply that this particular concern of Congress, reflected in the legislative history, but often termed "a political—or social" matter, is not recognized by the administration as a valid consideration in decisions regarding merger enforcement, including in the areas of vertical and conglomerate mergers.

Concerning conglomerate mergers, the administration has implied that enforcement will occur only when horizontal effects become apparent. I can again agree that as a matter of priorities, this is a proper emphasis. But does it mean to limit enforcement strictly in this regard? Other concerns have been identified, including the social and political issue which I mentioned a moment ago. I am bothered that conglomerate mergers can also lead to enhanced opportunities for predatory pricing. I will address my concern for the administration's position on this subject in a moment.

It is settled law that resale price maintenance—vertical price fixing—is a per se violation of section 1, Sherman Act. The Supreme Court first spoke in this regard in 1911, *Dr. Miles Medical Co.* v. *John D. Park & Sons Co.* (220 U.S. 373) and most recently reiterated this position in 1980, *California Retail Liquor Dealers Assn.* v. *Midcal Aluminum, Inc.* (100 S.Ct. 937).

I am pleased that the administration says that it intends to continue, and even to expand, enforcement in the area of horizontal price fixing. Its statements on this subject have been strong indeed. But, I am alarmed by its statements regarding resale price maintenance. The transition team report said:

In the absence of cartelization of either the manufacturer or dealer levels, there is nothing anti-consumer about this use of retail price maintenance. (FTC Watch No. 117, P. 4 (April 3, 1981)).

A spokesman for Mr. Baxter recently announced that the Department of Justice might seek the vacation of judgments that ban resale price maintenance, contending that such arrangements "almost never hamper competition and can increase efficiency" (Wall

Street Journal, September 2, 1981). One lawsuit filed during the Carter administration involving alleged resale price maintenance has been dismissed by the Department (Mack Trucks, Inc. case). In this regard, Mr. Baxter was reported to say that resale price maintenance is anticompetitive only where it facilitates collusion either at the manufacturing or distribution level.

It would be difficult to imagine a stronger case of the administration unilaterally announcing an intention to tolerate violations of clearly and undisputedly established antitrust laws. This conduct by the chief antitrust law enforcement officials is of serious concern, regardless of whether the economic theories underlying their approach are sound.

Moreover, I question the soundness of these theories. Has the administration considered the effect of product differentiation on the competitive picture? If consumer loyalty has been created by this process, interbrand competition would not seem fully to protect some consumers. In such case, will not resale price maintenance deprive these buyers of the benefits of intrabrand competition among retailers, their only remaining protection against price enhancement? Why should not independent distributors remain free to resell at prices established by their own individual responses to the competitive conditions which they face in the resale market? In setting a price floor the manufacturer may preclude discounters in order to protect full service outlets. In setting a price ceiling, it may preclude promotion and service competition at the retail level or squeeze out smaller neighborhood distributors. Why should we assume that the manufacturer can make better judgments about consumer desires at the retail level in these regards, than a free market could make unfettered? Why should we permit this tampering with the sensitive central nervous system of the free market, when we depend so heavily in our free enterprise system on competition as a self-regulatory process? I would be interested in the administration's response to these questions. But again, I am especially concerned that it is changing policies established by Congress, and interpreted by the Supreme Court without due process.

Finally, the transition team report appears to recommend abandonment of enforcement in the area of predatory pricing. This seems to be based upon a doubt that it really occurs, at least very often, because in theory it is likely to cost the firm using it more than can be gained from it. (FTC: Watch No. 117 p. 3 (April 3, 1981).) It may not occur frequently, but there is a sufficient body of reported cases to indicate that it does, in fact, occur. During the last year, in what I believe to be one of the first cases in my own State to go to a jury under the Washington State equivalent of section 2 of the Sherman Act, the jury found that a form of predatory pricing occurred, driving a small business bankrupt. Evidence showed that this ultimately cost consumers a considerable amount in enhanced prices. (*Consolidated Dairy Products* v. *Bar T Ranch Dairy*, Spokane Co. Sup. Ct. No. 235205 (1980).) Even if it is rare, when this conduct does occur, it is pernicious and without redeeming social value. It is also illegal in most circumstances in which it occurs. It may be wise to allocate it a low priority, but how could it possibly be wise to announce a policy of non-enforcement in this area?

These are my questions and concerns. They are extremely serious ones. I hope that answers which will relieve my fears that in its apparent indifference to antitrust enforcement, the administration is working against its own program for economic recovery that I strongly support will nevertheless be forthcoming. I certainly look forward to working with Dr. Miller toward this end.

As I have stated, conflicting views on antitrust policies are held by equally thoughtful persons on both sides. Dr. Miller and I differ on a number of these issues. There seems to me to have been, however, distinct movement, though not nearly the movement I would have preferred.

I believe that his actions now are somewhat more likely to reflect the vital importance of antitrust laws to the successful operation of the free marketing economy than they would have had these questions not been raised during the course of this confirmation process.

I am frustrated that they were not raised during the confirmation process of Mr. Baxter, as it is the antitrust division of the Department of Justice, which is more central to many of these concerns than is the Federal Trade Commission.

I do wish to do all that I can at this point to facilitate Dr. Miller's ability to move aggressively in the direction of a more activist antienforcement policy than his original views indicated would be the case.

In this spirit, I have decided, with some reservations, to vote in favor of confirming this nomination. Dr. Miller is an exceptionally able person who has done a solid job in leading the President's efforts to reduce regulation as Administrator of the Office of Information and Regulatory Affairs in the Office of Management and Budget. During the Commerce Committee headings, and in his responses to my later questions he repeatedly promised to continually consult with the Committee before undertaking significant changes in the FTC enforcement policy.

We can, I believe, hold him to that promise, and I am convinced if the Senator from Wisconsin in his oversight responsibilities will do exactly that, I look forward to participate in that consultative process.

Mr. DANFORTH. Madam President, I support the nomination of James C. Miller III, to be Chairman of the Federal Trade Commission. During this year I have had the pleasure of working with Jim Miller in his efforts to reduce Federal regulation and Government paperwork. He is a person of ability and imagination. I am confident he will prove to be a strong Chairman of the FTC, and I wish him well in his new job.

My purpose in speaking today is not simply to praise Jim Miller, however, but also to express my hope that during his tenure as Chairman of the FTC, he uses his considerable talents to assure the continued, vigorous enforcement of the antitrust laws.

It should not be difficult to understand the reasons for my concern. One of the first acts of the Reagan administration was to propose an end to antitrust prosecutions by the Federal Trade Commission. And while that initiative was later withdrawn, the proposal proved to be only the first sign of what I can only call a lack of resolve on the part of the administration to uphold antitrust enforcement. I am not talking about particular cases or prosecutions, but the general tone the administration has taken in its statements.

It is all well and good to talk of prosecuting price-fixing cases and bid-rigging cases, as the Attorney General has done in response to criticism, but I should not need to remind the administration that vigorous antitrust enforcement involves more than going after cases that reach out and bite you on the ankle. It means continued vigilance.

Let me explain why I care so much about this. First, as a Republican, I believe that antitrust law lies at the heart of the Republican commitment to a free and open marketplace. If we are to continue efforts toward deregulation—and I hope that we do—we should, if anything, step up antitrust enforcement efforts, not tone them down, in order to assure that the marketplace is competitive. Yet, the rhetoric of the administration has been less than sympathetic to antitrust enforcement—and when it comes to enforcement by the Federal Trade Commission, downright hostile. As a Republican, I think it is ill-advised for the administration to give short shrift to antitrust law. The anticompetitive effects of corporate decisions are often not felt for years—and are not easily undone. The administration would do well to keep this in mind.

Second, as a Member of Congress, I find it necessary to state, as clearly as I know how, that whatever the views of the administration may be respecting the antitrust function of the FTC, and whatever the administration's expectations may be for antitrust enforcement under Dr. Miller's leadership, I expect the Federal Trade Commission to continue to fulfill its mandate to enforce antitrust law—and to enforce it vigorously—unless and until Congress decides otherwise. I questioned Dr. Miller closely on this score during his confirmation hearings, and I ask unanimous consent that the transcript of that exchange be printed at this point in the RECORD.

There being no objection, the transcript was ordered to be printed in the RECORD, as follows:

Senator KASTEN. Senator Danforth.

Senator DANFORTH. Mr. Miller, last winter the Administration announced a plan to begin phasing out the antitrust functions of the FTC. Is it my understanding then that the Administration intends, at least as of now, to continue the antitrust functions of the FTC?

Dr. MILLER. Sir, let me emphasize that my answer to Senator Ford was my own personal opinion.

The Administration's formal position I believe, as implied in its formal budget submission to the Congress, was that the antitrust mission at the Federal Trade Commission would continue perhaps at reduced funding.

It was my understanding, last February I think, that they made the decision to phase it out over a period of years. That is not your position?

Dr. MILLER. Senator, my recollection is that the original budget that was transmitted from OMB to the FTC for their review and for their comment contained a phaseout, but they commented—the Federal Trade Commission commented adversely to that proposition.

And based upon those comments and comments of others, the Administration chose not to initiate a complete phaseout of the Bureau of Competition, but instead to ask for a lower level of funding.

Senator DANFORTH. What is your view? Is it your view that you should be an advocate for continued antitrust responsibility in the FTC? Or is it your position that we should reduce the funding and, in effect, reduce the FTC or the antitrust effort within the FTC?

Dr. MILLER. I believe that the FTC can accomplish its mission on less funding, as was envisioned under President Carter's budget.

The second point is that, with respect to my advocacy of a continuing substantial mission for antitrust in the Federal Trade Commission. I am a careful observer of additional data that I would need in order to make a strong decision or to have a strong opinion. I would expect to arrive at a preliminary opinion after subsequent study at the Federal Trade Commission itself.

But as for now, as I indicated to Senator Ford, I think that we should have a thorough going review of the antitrust laws and their enforcement to decide whether they are modern in today's society, whether they accomplish what Congress originally intended, and what perhaps would be the goals of the antitrust laws, and just what kind of institutional arrangements make most sense for public enforcement of the antitrust laws.

Senator DANFORTH. Mr. Miller, last winter the Administration proposed phasing out the antitrust function of the FTC. You believe that the antitrust function can be pursued at a lower level of funding.

And you also believe that the whole matter of antitrust enforcement, the antitrust laws, should be studied. I must say that that does not give me great encouragement that either you are going to be vigorous enforcer of the antitrust laws or that the Administration is committed to vigorous enforcement of the antitrust laws.

Some feel that the tone of the Administration is to a much looser view of antitrust enforcement than has historically been the case. My own view is that if the Administration is going to take the position that it wants to reduce the quantity of regulation—and I certainly support it, as you know, in that effort—then we have to rely to even a greater extent on competition within the marketplace being the self-regulator.

And so I have to tell you that I am not encouraged by what you are telling me, because it seems as though we are headed in the direction of not only less regulation but perhaps less competition as well or at least less policing of the competition by this Administration.

Have I read the situation wrong?

Dr. MILLER. I think you have, sir. My position is that I'm very strongly in favor of enforcement of the antitrust laws. However, I think my reading is that the best enforcement is that which attacks the kinds of relationships that are not only anticompetitive but have substantial economic efficiency costs, that I and the consumers pay in higher prices.

Now those are the kinds of antitrust violations that I would strongly prosecute. The Administration—I share the goal of the Administration in firm and acti e enforcement of the antitrust laws. Where I was demurring, sir, was on the question of whether I am personally, as a scholar, sure, absolutely confident that the most appropriate arrangement for the public enforcement of the antitrust laws is the current one with shared jurisdiction by the Department of Justice and the Federal Trade Commission.

Sir, I realize this is a very sensitive issue, but I am giving you my honest judgment.

Senator DANFORTH. I know you are. I just want to find out what your honest judgment is.

Dr. MILLER. Let me go on to say that the reason I believe that the Federal Trade Commission's mission in the antitrust area can be accomplished at lower funding has to do with the kind of cases that in recent years they have been pursuing. I would give less emphasis to so-called shared monopoly cases, less emphasis to pursuing things on a "bigness is bad" thesis—not that "bigness is bad", but "bigness is not good either." One should be neutral, it seems to me, on this question of bigness. Or if bigness itself is bad, that is something that the Congress should decide. I don't think it should be for the Federal Trade Commission to decide.

And I would also—I believe that many of the Commission's activities in the vertical area have been misdirected. So I think that a number of the things—in summary, I think a number of the antitrust, the Bureau of Competition's efforts have been misdirected. I would put more resources in the horizontal areas. And for that reason, I think it could accomplish its mission at a lower level of funding.

But I will surely come back to you, sir, when I have more knowledge of the funding needs for the Commission and recommend to you those views.

Senator DANFORTH. Now the FTC Act was enacted in, I think, 1914; isn't that correct?

Dr. MILLER. Yes, sir.

Senator DANFORTH. That was 67 years ago. One of the questions we faced when we went through the FTC authorization last year was the role of Congress in determining the jurisdiction of the FTC and the whole question of does Congress set forth the mission before the fact or second-guess the Commission after the fact—was, I think, the essence of the argument a year ago.

But in the field of antitrust, Congress spoke 67 years ago. And I would think that until Congress decides or unless Congress decides that the antitrust mission of the FTC should be in any way diminished, then the role of the Commission and the role of the Chairman should not be on its own motion, so to speak, to diminish that antitrust role.

Would you agree with that?

Dr. MILLER. I do agree with that.

Senator DANFORTH. Will you keep us abreast on a continuing basis of what your intentions are in antitrust?

Dr. MILLER. Absolutely.

Senator DANFORTH. And it seemed to me as you were going through the list of what the FTC was doing in the antitrust field, in most cases you think it is doing too much right now; is that correct?

Dr. MILLER. Well, it's not so much it is doing too much, although I think in terms of—let me put it another way.

I think the American public is not getting a good bang for its buck, and I think trimming away some of the kinds of cases that don't make a lot of sense and transferring some resources from those areas to areas that make a lot more sense will not only give more bang for the buck, but I think it would give a larger bang for smaller bucks.

Senator DANFORTH. Could you give us a list of what areas you think we should be doing less in and what areas we should be doing more in before we vote on your confirmation?

Dr. MILLER. Yes, sir. I would respond to any questions you have.

Senator DANFORTH. Are you wearing your Adam Smith tie today?

[Laughter.]

Dr. MILLER. Yes, sir, I am.

Senator DANFORTH. How does that tie fit into your own views on antitrust enforcement?

Dr. MILLER. Well, sir, as I read in my opening statement, Adam Smith was a firm believer in competitive enterprise, and I think the maintenance of competition is extraordinarily important in this economy for the delivery of goods and services at low prices to consumers. And I plan to pursue that.

But could I just amplify by saying, you know, Adam Smith had some wonderful messages in his book of 200 years ago. It is an extraordinary book because it has so many good ideas in it. But if you recall, the setting of Adam Smith was really a criticism of the proposition that was in vogue then that the wealth of the nation was really the amount of gold and silver that they were able to accumulate, and he was saying, "No, it is the productivity of its citizens and the resources that it brings to bear in satisfying consumer wants." And one conclusion he drew is summed up in the acronym, TANSTAAFL; that is, there ain't no such thing as a free lunch. And what he's pointing out there is, government intervention really has many ramifications beyond what was originally thought to be the case.

And one thing I will insist upon, if confirmed, is that the analysts at the Federal Trade Commission trace through very thoroughly the full ramifications of their proposed remedies and trace through very thoroughly the ramifications of market imperfections.

Senator DANFORTH. Well, analysis and thinking before you act is always laudable. My concern is that the drift of this Administration and perhaps the drift of this country is perhaps to turn the clock back, if not to the day of Adam Smith, then at least to the day of pre-1914, and that one of the hallmarks of Republican doctrine has been a competitive marketplace, that competition has been a necessity in the marketplace, and that government does have a role in assuring that competition exists.

Back in 1914 and prior to 1914, in the early 20th Century and the late 19th Century, with the development of the trusts and of predatory practices, the need was felt by Republican leaders and a Republican President at that time for effective Federal Government tools to assure a competitive marketplace. And while big is not necessarily bad, big can be bad if it is monopolistic and if it is predatory.

And I have to say, as I understand it, our own Judiciary Committee has, I think—I might be wrong in this, but I believe it is true—terminated its Antitrust Subcommittee. And I'm not on the Judiciary Subcommittee, but some say the Antitrust Division of the Justice Department is not as aggressive as it should be. And now there is a proposal by the Administration last winter to phase out the antitrust enforcement of the FTC. And you say that the role should at least be under study.

And all I want to do is to say to you that first of all, I hope that Congress is continually consulted on this and that any decision that is made is made very publicly and very openly, because if the decision is that competition isn't so important or if the government no longer has the role that we considered 67 years ago that it did have and if the FTC is going to start winding down its antitrust enforcement, this Senator wants to know about and talk about and perhaps

introduce some legislation dealing with it—the question.

Dr. MILLER. Senator, it would be the height of folly for me to take a precipitous action like that without close consultation with the Congress. I do not anticipate taking such a precipitous action.

As I indicated, I have strong reservations about some of the kinds of antitrust activity the Commission is engaged in, has engaged in, in the past few years. I have a feeling that other kinds of antitrust activity has been neglected. So I would see a shifting of resources from one type of antitrust activity to another.

Senator DANFORTH. That is the list I would like.

Dr. MILLER. I shall provide that to you, sir.

---

ANSWERS OF JAMES C. MILLER III TO QUESTIONS OF SENATOR JOHN C. DANFORTH PRESENTED IN CONFIRMATION HEARINGS JULY 24, 1981

Q. What areas of antitrust enforcement would you emphasize and which would you de-emphasize?

A. Sound antitrust enforcement facilitates competition, increases economic efficiency, creates opportunities for entrepreneurs, and enhances consumer welfare. In general, I would emphasize cases that meet these goals and de-emphasize cases that are wide of the mark, or where the ultimate effects are highly uncertain. I should stress, of course, two things: (a) the Commission is a collegial agency, and decisions about which kinds of cases to bring are reflective of a majority view, and (b) each case that comes before the Commission must be judged on the merits.

Among the types of cases I would emphasize are: (a) acquisitions by one competitor of another, where the result would likely be a substantial diminution in the competitive performance of the industry; and (b) agreements among competitors to limit competition with respect to price, quality of product or service, or markets in which output is sold. I would also be especially interested in cases in which government policy tends to lessen competition.

Types of cases I would de-emphasize include: (a) those based solely on attacking concentration without regard to evidence concerning industry performance; (b) conglomerate mergers, where it is not likely that the competitive performance of direct competitors would be impaired; and (c) vertical practices, except those diminishing competition among direct competitors.

I want to emphasize my commitment to enforcing the nation's antitrust laws. My criticisms are directed not to antitrust enforcement per se, but to the relative emphasis the Commission has recently given to different types of cases.

My answers to policy questions 1, 3, 4, and 7 previously submitted to the Committee provide further elaboration of my views concerning antitrust enforcement.

Q. What do you perceive to be the major shortcomings, if any, of the Federal Trade Commission today? Please be specific.

A. In its antitrust and consumer protection work, the Commission's major goal should be to increase economic efficiency and thereby improve the well-being of consumers. In recent years, the Commission has not served this goal well (although under the leadership of Chairman Clanton the Commission's performance has been improving).

Specifically, with respect to antitrust enforcement, I believe that the Commission has placed too little emphasis on attacking horizontal restraints and too much emphasis on attacking bigness for its own sake. With respect to consumer protection, I believe that the Commission has placed too little emphasis on cases and rules that reinforce market forces and too much emphasis on cases and rules that merely add a layer of costly regulation.

Finally, I would point to two other major shortcomings. First, the agency has adopted an overly adversarial posture with respect to the private community, especially those directly affected by its actions. Second, the Commission has too often inadequately supervised the staff's work, resulting in many ill-conceived proposals. Even when the Commission has eventually declined to follow the staff's recommendation, the costs of many such efforts have been substantial and have been passed on to taxpayers, businesses, and consumers.

Q. What areas of present FTC activity do you believe should be given the highest priority? Please specify the reasons for your choice.

A. As noted in my answer to the first question, I feel that the focus of the Commission should be on economic efficiency and the improved economic well-being of consumers. With this goal in mind, basic antitrust and consumer protection enforcement against horizontal restraints and against fraudulent practices deserve high priority. Moreover, the Commission can serve a very useful function in intervening before other government agencies to present the case for competition, economic efficiency, and the consumer's interest in receiving the benefits of a free market. Also as indicated above, other priorities include reducing the overly adversarial nature of the Commission's relations with Congress and with the business community, and increasing staff supervision.

Q. Are there particular FTC activities that you believe should be redirected or discontinued? Please specify.

In addition to those items previously mentioned, I would emphasize my view that the Commission has too often strayed beyond its goal of buttressing market forces into the realm of regulatory actions that generate more costs to consumers than benefits. For example, in its case selection, the FTC has over-emphasized the importance of market structure. As I discuss in my answer to question 7, concentration is but one of several variables that explain market performance.

Q. Do you believe that a more competitive market structure is always beneficial to the consumer? If not, would you please provide the Committee with specific examples of industries in which oligopolistic or monopolistic structure, due to economies in scale or for other reasons, have provided benefits to the consumer in terms of price and increased quality that should allow such structure to continue without antitrust action from the Federal Trade Commission or the Justice Department?

Under one definition, competition is a process through which producers seek to satisfy the wants of consumers. That, obviously, is of benefit to consumers. On the other hand, if one adopts a structural definition of competition—many producers and many sellers—I disagree. In determining whether an industry is performing well (in an economic efficiency sense), one should address several variables, including conditions of entry, the overall level of concentration, and the extent to which government regulation or private action has limited the competitive process. Therefore, in analyzing any specific industry, I would have to address many facts regarding its particular situation before concluding whether the law was violated. Because I lack sufficient data and because, if confirmed, I will be called upon to evaluate many industries for possible antitrust violations, I respectfully submit that it would be premature for me to comment on the economic performance of any given industry and whether its conduct violates the antitrust laws.

Senator DANFORTH. Thank you very much.

Thank you, Mr. Chairman.

Senator KASTEN. The FTC transition report recommended that the new Chairman critically evaluate the status of certain initiatives and develop guidelines for the staff concerning future proposals. And on the same basic line of questioning that Senator Danforth was talking about with respect to the shared monopoly cases, the report states the following. It said that "these cases have dragged on far longer than would appear warranted. More importantly the economic rationale for such cases is extraordinarily weak and does not command widespread support."

What is the meaning of the statement, "The economic rationale for such cases is extraordinarily weak and does not command widespread support"?

Dr. MILLER. Sir, of course let me emphasize that perhaps I need to emphasize initially that I can't, having been a member of the team, I am really not authorized to discuss anything about the report itself except to stress that it was more or less a consensus document.

I will just take what you read and with your permission just comment on that.

I believe that the case—the shared monopoly case—the economic case is weak. The argument is whether so-called shared monopoly exists and whether it has adverse * * *

The only question that gives me pause is the question of whether the firm—there are some scenarios that one could imagine where a conglomerate merger would have substantial anticompetitive effects, and I would of course stress that. But the residual question, it seems to me, is the bigness issue.

I just don't think the Federal Trade Commission is appropriately equipped to answer that question. It might study it and make recommendations to Congress. But just to decide that a firm is too large—is just too large—I think is an issue that should be addressed by Congress.

Senator KASTEN. Senator Danforth?

Senator DANFORTH. Just one other question, and I don't want to beat a dead horse, but I do want to say this. You now are—you work for Mr. Stockman, don't you; he is your superior?

Dr. MILLER. Yes, sir.

Senator DANFORTH. And he, I believe, has taken the position that the antitrust function of the Federal Trade Commission should be terminated?

Dr. MILLER. Yes, sir.

Senator DANFORTH. And the Assistant Attorney General in charge of antitrust, it is my understanding that he also has said that the antitrust aspect of the FTC should be terminated.

Dr. MILLER. I do not know that for a fact.

Senator DANFORTH. That is what I'm told; I don't know if that is so or not.

Is there a concerted Administration position, to your knowledge, to terminate the antitrust function of the FTC?

Is there any understanding that you have with the Administration that you will be the person who sets in motion the termination of the atni-trust function of the FTC?

Dr. MILLER. Absolutely not.

Senator DANFORTH. Has it ever been expressed to you by the Administration that selecting you and in talking to you about this job that the antitrust function of the FTC is a mistake or that it should be for any reason ended?

Dr. MILLER. Absolutely not.

Senator DANFORTH. There is no understanding of any sort that you are to preside over the demise of the antitrust function of the FTC?

Dr. MILLER. Absolutely not.

Senator DANFORTH. And it is not your intention to do so?

Dr. MILLER. That is correct.

Senator DANFORTH. Thank you, Mr. Chairman.

Senator KASTEN. Thank you, Senator Danforth.

I know that there are questions that will be submitted by other members of the Committee, and they will be submitted to you. We will try to hold the record open for roughly one week. And if you could get back to us with answers to those questions, including Senator Danforth's list, we will then proceed to vote out your nomination.

(Committee insert.)

* * * * *

It is simply my hope, as pointed out by the questions, that his ability will be one that is used for the purpose of having an effective Federal Trade Commission, and espcially one which fulfills its longstanding antitrust mission—rather than one which presides over the demise of that mission.

Thank you.

Senator KASTEN. Thank you, Mr. Miller.

Dr. MILLER. Thank you, sir.

Mr. DANFORTH. Dr. Miller has given me his word that he is not going to the Federal Trade Commission to preside over the demise of the antitrust function of the FTC, that he has no understanding with the administration to that effect, and that he has no intention of attempting to unilaterally disarm the FTC of its antitrust activities. He has assured me that he recognizes the primacy of the Congress in determining the future of the FTC's antitrust efforts, and he has promised to keep the Congress, and in particular the Commerce Committee, abreast, on a continuing basis, of his intentions respecting antitrust matters. I take him at his word, and I look forward to a close and cooperative working relationship with him over the next several years.

Mr. KASTEN. Madam President, I appreciate the comments of the Senator from Missouri and his support for this nominee and also the comments of the Senator from Washington.

I simply wish to point out that while Dr. Miller has frankly acknowledged a desire, shared by many antitrust scholars, I might add, to shift the emphasis of FTC antitrust enforcement efforts toward horizontal acquisitions and agreements and away from conglomerate measures and vertical restraints, he could not have more clearly emphasized his commitment to enforce the antitrust laws in his appearance before our subcommittee.

He said that the current merger wave is cause for concern and that the FTC should scrutinize mergers and increasing concentration carefully.

He stated that he will enforce the Robinson-Patman Act and monitor industry self-regulation. He favors the continuation of FTC antitrust authority, and he has promised to consult with Congress on any proposed changes.

He made clear that he has no agreement with the administration to gut the Commission.

I believe that Jim Miller will enforce the antitrust laws responsibly, carefully, and diligently. I believe that on that basis he should be confirmed.

● Mr. LAXALT. Madam President, I am pleased to rise in support of Dr. Jim Miller's nomination to the Federal Trade Commission.

I have had the pleasure of working with Dr. Miller during the transition and during this session of Congress relative to regulatory reform. I know that his expertise in the area of Government regulation and his outstanding background in economics will serve Americans well at the FTC.

Though I am glad that we will have Dr. Miller at the FTC, I must say I am sorry to see him leave OMB, where he has played a lead role in the President's regulatory relief effort. He has done an excellent job.

I ask my colleagues to join with me in voting for Dr. Miller's nomination.●

● Mr. EAST. Madam President, I stand in support of the nomination of James C. Miller to be a member of the Federal Trade Commission.

In almost 9 short months at the Office of Management and Budget, Dr. Miller has established his qualifications for an important post involving leadership in regulation and government-business relations. His extensive economic training and knowledge of economic analytical tools, such as benefit-cost tests, will insure that taxpayer dollars are spent sensibly at the FTC, where they can do the most to help the consumer.

Madam President and my distinguished colleagues, I am proud to cast my vote to confirm Dr. Miller's nomination to the Federal Trade Commission.●

Mrs. HAWKINS. Madam President, I rise in support of the nomination of James Miller to be Commissioner of the Federal Trade Commission. Over the years, the Commission has earned a reputation for pursuing its investigations with an inadequate appreciation for fundamental economic principles. While I do not doubt that the Commission's employees have always meant well, Mr. Miller's appointment will mean a better day is ahead for both consumers and producers because Mr. Miller's qualifications as an economist are first rate.

In 1969, James Miller earned his Ph. D. in econom'cs from the University of Virginia, an institution whose excellence in economics is recognized nationwide. In the intervening years, he has used his analytical skills to improve the quality of public decisionmaking in a number of different and impressive fora. He was a senior staff economist at the Department of Transportation. And a senior staff economist for the U.S. Council of Economic Advisers. And most importantly, he spent 4 years at the American Enterprise Institute Center for the study cf government regulation as codirector until he became executive director of the Presidential Task Force on Regulatory Relief earlier this year.

This background means that Jim Miller will have the knowledge and experience to serve in his difficult position, at a controversial Commission, with distinction.

It seems to me that some of the rhetoric heard today reflects more on the fact that the Commission is controversial rather than on the qualifications of the nominee before us. If Senators will acquaint themselves with his background, they will rightfully conclude that James Miller is qualified and that is the only question which should concern us today. I yield back the floor Madam President.

Mr. FORD. What is the parliamentary situation at this time?

The PRESIDING OFFICER. The Senator from Kentucky has 56 minutes and 42 seconds remaining.

Mr. FORD. Is it appropriate then to yield to the dist'nguished Senator from Ohio, who has an order for an hour, if he is ready?

The PRESIDING OFFICER. Yes, it would be appropriate. The Senator from Ohio has an hour.

Mr. FORD. Madam President, before I do that, let me say that I have listened with interest to my distinguished colleagues on the other side of the aisle. This discussion points out the lack of clear direction in the administration's antitrust policy. This concerns me as I believe that clear direction in the enforcement of our antitrust laws should be as important as, and indeed a part of, any long-term strategy for the Federal Government to pursue anti-inflationary policies, to reduce the size of the budget deficit, and to bring interest rates down.

I think it is clear that one of the major concerns of Congress and the administration is the high interest rates that continue to linger around 20 percent and play havoc with the Nation's economy. My office has received hundreds of letters from people across Kentucky pleading that something be done about high interest rates. Every weekend I go back to my home State and am beseiged by farmers, realtors, car dealers, and a host of small businessmen who are searching for an answer. They want to know when high interest rates will be brought down and what we, in Washington, are doing to bring them down.

While there have been many suggestions made, most people realize that we are not going to bring interest rates down immediately. The major reason we have high interest rates is the deliberately tight monetary policy of the Federal Reserve Board. The Federal Reserve is trying to control inflation by controlling the growth of the money supply. We have a slowly growing supply of money that is going smack up against a high demand for money. As we all know, when there is a high demand for any commodity and a small supply of that commodity, you are going to see the price go up. One way to confront this problem is by increasing the supply of money, but economists now say that would only encourage inflation and send interest rates up even higher. In any event, the Federal Reserve has remained steadfast in its stringent monetary policy. So we have to look at another approach; we have to look at the demand side of the equation.

One realistic solution is a Senate resolution, introduced by Senator BENTSEN, which I have cosponsored, directing the Federal Reserve Board to discourage bank lending for speculative and unproductive purposes such as giant business mergers. The intent is to ease demand for bank credit and permit interest rates to fall.

I am concerned that banks should reduce the volume of credit made available for speculation or for mergers by

large business concerns. These activities add to credit demand while contributing little to productivity growth or investment in new plants and equipment. A reduction in such lending activity would definitely ease pressure on interest rates.

An analysis of the necessity for such measures to be taken to discourage use of credit for unproductive mergers by large business concerns also points out the necessity for enforcement of the antitrust laws to discourage those mergers which would have anticompetitive results. And, I think the Federal Trade Commission should play a role in this arena by virtue of its antitrust jurisdiction. In the last few months, we have seen a wave of corporate takeovers—not just of small companies, but of some of the largest corporations in this country. This is due, in part, to the administration's policy to take a "hands-off" approach to antitrust issues.

Recently, my colleague, who is the chairman of the Commerce Committee, Senator PACKWOOD, sent a letter to the Appropriations Committee in which he indicated intent to hold thorough oversight hearings on the activities of the Bureau of Competition at the Federal Trade Commission. I want to stress that I am not now making a judgment on current antitrust policy—whether it is right or wrong; whether we need to modify Government antitrust policy. I too think we need to have comprehensive hearings on the subject later in the year.

However, I do hope that Mr. Miller is well aware of congressional concern for the antitrust policy of the Federal Trade Commission, not only because of the historical policy behind antitrust law, but also because of the tight money supply situation we find our economy in today.

Madam President, the Commerce Committee held extensive hearings over the FTC's Bureau of Consumer Protection during the agency's reauthorization which resulted in enactment of the FTC Improvement Act of 1980.

During Mr. Miller's nomination hearing, I was pleased to note his concern about the FTC's future actions in this area—for example, he suggested a return to case-by-case adjudication, rather than initiation of broad rulemaking's which contained an unbounded definition of "unfairness."

I hope that future congressional oversight in this area will find the FTC responding to the new law and to strict congressional intent rather than to its own view of public policy—which may not be the view of the elected representatives.

I yield to the Senator from Ohio.

The PRESIDING OFFICER (Mr. WARNER). The Senator from Ohio is recognized.

Mr. METZENBAUM. Mr. President, I commend the distinguished Senator from Washington for his very erudite and accurate statement concerning Mr. Miller and Mr. Miller's lack of concern for adequate antitrust enforcement. adequate enforcement by the FTC of appropriate measures in this area.

Mr. President, what we have here is again an instance of this administration's appointing people to head up an agency who do not believe in the agency. They appointed Mr. Watts to head up the Interior Department, preside over the lands, forests, rivers, and waters of this Nation, and Mr. Watts does not believe that the people have any rights in those areas, but would like to industrialize all of America.

The administration appointed an orthodontist to run the Department of Energy, and the first thing out of his mouth was that he wanted to eliminate the Department of Energy. Of course, that was up until he came before Congress and then switched his tune. Now the President may be reversing signals on him, and doing exactly that which was talked about originally, and that is closing down the Department, and it might be helpful if he started right at the top.

As you look across this whole galaxy of appointments by this administration you find that where they could not change the laws or had concerns about coming to Congress to ask to change the laws that they put somebody in whose views are 180 degrees opposite from that which the laws were originally intended to do, somebody who wants to turn the clock back totally.

One after the other this administration has been sending appointments of that kind to the Senate to confirm, and because we all recognize the right in the President to have his appointees in position we go along with those appointments. We say, "OK, you have the right to make the appointments." And we abandon our responsibility in the confirmation process because we are somehow afraid to speak up and carry out our own responsibility as Members of the U.S. Senate.

We talk about what is wrong with the appointments and then we wind up voting "Aye," and I can count, and I am aware of the fact that if there were a vote on the floor of the Senate today for this man, which there will be, a rollcall vote, there will be an overwhelming "Aye." Do not speak up against the President, do not challenge his appointments.

Yet I wonder to myself whether or not we are meeting our own responsibilities as Members of this body who have a constitutional obligation to be a part of the confirmation process when we sit and we rubberstamp the President's appointees?

There is only one agency in Government today which speaks for the consumers of this country, and it is not doing too much of that any more. Under Mr. Miller it is going to do a whole lot less. Mr. Miller really does not believe in what the FTC was created to do, and he has made it very clear in his statements time and time again that he does not believe in it.

And, of course, maybe it is logical. He probably would not have gotten the appointment if it looked as if he were going to be a tough leader of the FTC and prepared to provide strong enforcement of the mandates that Congress had given to the FTC over the years.

It is a rather shameful fact of life that there is not, or will not be after Mr. Miller's confirmation, there will not be any agency in this entire Government that is really concerned about the consumers of this country. The FTC tried, and Democrats and Republicans alike ganged up on the FTC. The lobbyists did their work. They were well paid. They presented their arguments and they had the political muscle to prevail, whether Democrats or Republicans.

But, at least, there was some semblance of honesty in that effort, because it was going after the law, it was attempting to change the law. This administration does not want to change the law, it wants to change the players and let the players, by their lack of action, inaction, or contrary action, change the law in that manner.

Well, you find a situation in this country where consumers and small business people are in trouble. They have never had it worse. And what are we saying today? We are saying, "The Government has already abandoned you but we want to be certain that you understand full well that we are appointing Mr. Miller to head up the one agency that might have been out there speaking for you."

There is somebody now heading the Antitrust Division who does not believe in the antitrust laws. If he does not, why does he not go back to the world of academia? Why does he want to head up the antitrust department if he does not believe in enforcing the law?

Now we are placing at the head of the Federal Trade Commission someone who absolutely, by word and mouth and action, has indicated time and again that they are not for the FTC; they are not for the consumer; and they are not for the small business person.

At his confirmation hearings and as head of the FTC transition team, Mr. Miller made it absolutely clear that, as head of the FTC, he would rewrite the antitrust laws; he would ignore vertical mergers and agreements; he would ignore conglomerate mergers; he will ignore predatory pricing and Robinson-Patman Act cases; and he will not even stand four square in support of the FTC's antitrust mission itself.

The distinguished Senator from Washington made these points very clearly when he enunciated them so well.

As a matter of fact, not only may there no longer be dual enforcement of the antitrust laws in this administration, there may not be any meaningful enforcement if Messrs. Miller and Baxter have their way.

Mr. Miller has also made it clear that he thinks the FTC's past consumer protection efforts have been misguided. Sad is the day; woe to the consumers of America, the forgotten people of America. Who cares about the consumers? They do not have any high-priced lobbyist down here. Let us all move in on them, regardless of what the issue is.

If a practice prevails in the marketplace. according to Mr. Miller. it must be because that practice is efficient and Government should not intervene to protect these consumers. Wake up, Mr.

Coolidge; come back from the grave, Mr. Coolidge, and listen to Mr. Miller tell it the way it is.

As Mr. Miller sees it, if defective products are being sold, then consumers will be aware of the defects and will simply pay less for the products. If members of an industry force consumers to contract for services they do not need, then it is simply not efficient for the industry to conduct their businesses otherwise and the Government should not intervene.

How absurd can the man possibly be to advocate such points of view? He, obviously, is an intelligent man. He has to know better. Efficiencies of the marketplace, he talks about, and people would not buy if they are getting rooked. What fantasy land is Mr. Miller living in? I am not sure. I hope that he knows. It is sad. It is enough to bemoan more than in a Senate speech.

Let us make hay with the FTC; let us zero in on antitrust. Is it not amazing that antitrust, which was the creature of members of the Republican Party in days of yore, which had some of the strongest advocates coming from the Republican Party, that now it is that very same party that is prepared to dismantle everything that stands for competition in the free enterprise system? The free enterprise system was based upon competitive forces being able to work. This administration does not seem to accept that reality.

John Sherman, the Senator who introduced and caused to come into being the Sherman antitrust law, was an extremely able member of the Republican Party from my own State of Ohio. My guess is he is turning over in his grave at this very moment, as he sees the dismantling of everything that he fought for during his period of time. And so many other members of the majority party who have stood up and fought for effective antitrust enforcement over the years, all of them have to find this a rather dismal day.

Mr. Miller is prepared to gut a major portion of the FTC's antitrust enforcement mission. On conglomerate mergers, Mr. Miller said at his hearing:

> I really do not perceive it to be the role of the Federal Trade Commission to decide that that so-called concentration of wealth or power is excessive . . . So there are efficiencies that can be gained from conglomerate mergers. That is the focus—the economic efficiency.

On vertical mergers and agreements, Mr. Miller's transition team report says:

> The foreclosure argument erroneously assumes that the merger would not result in increased efficiencies . . . It would seem that agency efforts to restrain vertical mergers are by and large misdirected.

"Sure," says Mr. Miller, "let the oil companies own everything from top to bottom; let them own the producing efforts, let them own the refineries, let them own the pipelines, let them own the marketing facilities, let them own everything across the board. What do we care about the small business person? Drive them right out of business. What right has he or she to stand up for their rights?" "Forget about it," says Mr. Miller. "It would seem that agency efforts to restrain vertical mergers are, by and large, misdirected," says Mr. Miller. Well, I think not.

On predatory pricing and the Robinson-Patman Act, Mr. Miller's transition team report says:

> That price cutting is a serious problem is dubious on both theoretical and empirical grounds.

What wonderland does this man live in? Does he believe anything that business does must be efficient because, otherwise, business would not do it? A business person would never cut prices in order to drive his competitors out, because that would not be efficient. Who is he kidding? And if the consumer gets hurt in the process because these efficient business acts lead to greater and greater concentration of wealth and power, that is not a concern of our antitrust laws?

Mr. Miller says that is simply not what our antitrust laws are all about.

Justice Harlan in the Standard Oil case of 1911, 70 years ago, said:

> The conviction was universal that the country was in danger from the aggregation of capital in the hands of a few individuals and corporations.

Seventy years ago, I repeat, "The conviction was universal that the country was in danger from the aggregation of capital in the hands of a few individuals and corporations."

That is not a quote from some left-wing radical. That is not a quote from a very, very liberal Democrat. That is a quote from Justice Harlan in the Standard Oil case in 1911.

Mr. Miller's supposed efficiencies cannot be measured. Nobody agrees on them. These theories were not what was in the minds of those who passed the Sherman Act, the Clayton Act, the Celler-Kefauver Antimerger Act of 1950.

Woodrow Wilson, whose distrust of concentrated power gave rise to the FTC Act itself, was not concerned about myths about business efficiency. He was concerned about protecting consumers from the ravages of concentrated wealth and power. Let me quote Woodrow Wilson:

> There is a power somewhere so organized, so subtle, so watchful, so interlocked, so complete, so pervasive, that they had better not speak above their breath when they speak in condemnation of it . . . They know that somewhere, by somebody, the development of industry is being controlled.

Continuing the quote of former President Wilson:

> The masters of the government of the United States are the combined capitalists and manufacturers of the United States . . . The government of the United States at present is a foster-child of the special interests.

And with respect to Mr. Miller's views concerning the efficiency resulting from mergers, let us take a look at what some others have said about this very same subject.

In the Harvard Business School studies by Hayes and Abernathy, as well as a recent Wall Street Journal article, there is a suggestion made that mergers do not generally produce efficiency. The Harvard Business School indicated that mergers result from the short-run profit horizon of chief executive officers who are not production men but lawyers and short-run financiers. Short-run thinking, indicated the Harvard Business School, is hurting productivity improvement.

Mergers are not, by nature, efficient. Mergers are only something that somebody works out when they figure out what the price-earnings ratio is of one company as against the other; when they figure out how they can use their dollars and get some leverage. Nobody ever goes out into the shop and asks the people who run the shop, "Do you think we can work out some efficiencies if we put these two companies together?"

The Wall Street Journal said it well on September 10 when they indicated that mergers do not meet expectations and said that all of the following involved heavy losses. Look at them, some of the biggest in the country: Pan American acquiring National Airlines; Mobile acquired Marcor and has been the laughing stock of the market ever since, Marcor which operated Montgomery Ward and continued to do badly in the hands of Mobil; Exxon acquired Reliance Electric in my own community and came before us with a halo around their head and told us how they would save 1 million barrels of oil a day. You know that 1 million barrels a day. Every single proposition that anybody comes forward with around this Congress is going to save 1 million barrels a day. Exxon had a new motor and if they could squeeze it by and purchase Reliance Electric, over the objections of Reliance, they would be able to market this new motor of theirs which was so efficient.

So they went forward and made their acquisition of Reliance Electric. A year later they say, "Oops, sorry about that, old buddy. That great motor we had is not working. We thought it was going to be all right, but it is still a failure." They still wound up with Reliance.

Arco bought Anaconda and Rockwell bought Westcom and oil companies have gone into farming operations. According to the Wall Street Journal, none of them have proven to be successful acquisitions.

The reasons are understandable. It is difficult for the acquiring companies to know how to run their acquired companies better than those who built those companies. They do not have the know-how. All they have is the financial genius in order to cause the acquisition to occur, but not necessarily to make it work once the acquisition is under their belt.

Now we find that Mr. Miller not only wants to rewrite the substantive antitrust laws but he probably will not even support the FTC's traditional antitrust mission.

Mr. Miller said at his confirmation hearings:

> I think the administration and the Congress, perhaps with the participation of the Federal Trade Commission, should initiate a thorough going review of this Nation's antitrust laws and their enforcement. And the question of so-called dual enforcement, the question of proposals to separate the adjudicatory and prosecutorial roles of the Federal Trade Commission should be evaluated in that context.

With all the pressure within the administration to eliminate the FTC Bureau of Competition, who will be the voice for continuing the Commission's

antitrust mission if the head of the Commission itself does not wholeheartedly support that mission?

Mr. Miller, unfortunately, does not feel very strongly about many things that the FTC does. One of those has to do with the whole issue of consumer protection. Mr. Miller brings to the consumer protection area the same view that he brings to antitrust enforcement. If it is happening in the marketplace, if business is doing it, it must be more economically efficient and, therefore, is good.

Living can be beautiful, according to Mr. Miller, if we just have total confidence in the business community.

This Senator does not rise to chastize the business community, and this Senator does not rise to blame the business community for Mr. Miller's appointment. As a matter of fact, if you look over the entire spectrum of businessmen and businesswomen in this country you will find that by and large they are ethical, they are well meaning, and they are trying to do a good job for their companies.

That does not mean that there are not those instances in which someone has to be available and able to speak up for the consumer.

That does not mean, Mr. President, that there are not transgressors; that does not mean that there are not some bad apples in the barrel. What Mr. Miller is saying is we do not need anybody to be the watchdog; the market will take care of itself; the consumer can protect himself or herself.

Consumers benefit, according to Miller, mainly if businesses run efficiently. Let me quote from the FTC transition team report which Mr. Miller headed up:

> Avoiding defects is not costless. Perhaps more importantly, we have products of different degrees of reliability competing with each other in the same market because consumers have different preferences for defect avoidance. Those who have low aversion to risk (relative to money) will be most likely to purchase cheap, unreliable products. Those who have a greater aversion to risk will be most likely to purchase more expensive and more reliable products.
>
> Agency action to impose quality standards intereferes with the efficient expression of consumer preferences that will occur as long as consumers have adequate information . . .

Mr. President, it is a well-known fact that the FTC attempted to get into one area having to do with consumer preferences, having to do with TV advertising for children. Here is Mr. Miller telling us that those little kids who decide which of the cereals they want to buy know what they are doing and they can fend for themselves when they go to the supermarkets with their parents and say, "I want this one instead of that one."

Come on, Mr. Miller. You cannot really believe that yourself.

Mr. President, how naive can he expect us to be? That is not how manufacturers and retailers conduct their business in the real world. If you want to conduct your business in the real world and convince the consumer what he or she should or should not buy, get the best advertising agency in the country. Give them the super hype. Give them the best, slickest ads that are available. They will like the advertising.

Mr. Miller presumes that prices are set only on quality and workmanship and not whatever the market will bear. That thinking is about as fallacious as any man or woman up for confirmation could possibly suggest. It was just unreal.

Nobody is saying, Mr. President, that the FTC is trying to make Chevrolets meet the standards of Cadillacs. What they are saying is that they want to see to it that people just do not get defective Chevrolets. What the FTC was trying to say when all hell broke loose was that when a person bought a used car, that person ought to have some idea of what was wrong with that used car.

What a terrible thing for the FTC to have advocated. Did not those men and women down there know better than to suggest that the people were entitled to know the facts? They should have just let those people go out and buy a car. They can find out what is under the hood.

Yes? How?

The FTC tried to do something about it and Congress raised cain. They will not have to raise any more cain. Mr. Miller will take care of all those problems for them.

Just because somebody can only afford to pay a given amount for a product does not mean that they do not have a right to expect certain performance from that product. Of course they have a right to expect that performance. The question is how are they going to get it? Who is going to protect them when they get the car, when they get the furniture, when they get an appliance or whatever they buy it is shoddy? Who is going to be there to give them assistance? Mr. Miller? Not on your tintype. His door will be slammed shut on the American consumer.

Again, on the contracting issue, Mr. Miller made the incredible assumption that if it is not happening naturally in the marketplace, it is not efficient and therefore does not benefit consumers. For example, the FTC has ordered that all contract provisions be designed to insure that sellers make all disclosures required under the truth-in-lending laws—in other words, finance charges and annual percentage rates. I remember many, many years ago, better than 20 years ago, when I was a member of the legislature in Ohio, we insisted then, back in those historical times, that the consumer had a right to know what he or she was paying and what the amount of the finance charge was and what the annual percentage rate was.

What is wrong with consumers having finance charge information? Are we afraid to share the facts with them? What could possibly be wrong with letting them know the truth?

What is wrong with consumers knowing about the actual credit costs they will have to pay? Not a thing is wrong with that, but I'm afraid Mr. Miller would not agree.

Tell us, Mr. Miller, what is so terrible about that? Are we going all the way back, all the way back with Mr. Miller, to the days of caveat emptor? Caveat emptor did not work in the past and caveat emptor will not work now.

Mr. President, the FTC has not done as good a job as it should have done in the past, but you can be certain it will do a lot worse job in the future. I am afraid that Mr. Miller just does not share the concerns that some Members of this body have about effective antitrust enforcement; about consumer protection; about whether or not the people of this country need some assistance from their Government in finding out not what to buy or what not to buy, but nothing more than just the truth—just the truth.

Mr. President, in the FTC transition report Mr. Miller said the agency sometimes believes that it can prevent consumers from giving away certain rights. Is it not possible these rights are being taken away and the consumers have no say in it?

Let me say in conclusion that, sometime ago, when Mr. Stockman appeared before our committee, I said to him that the budget program, the budgetary cuts of this administration were cruel and inhumane and unfair and unjust. Indeed, the facts are bearing that out. But what we are finding now is that this administration is appointing people, day after day, who, themselves, really seem to be indifferent. There is a certain element of cruelty, a certain element of unfairness, a certain element of unjustness. No concern for people. No concern for those who cannot fend for themselves. No concern for those who do not have the able lobbyists traversing the halls of Congress. Only a concern for the affluent.

We find articles now being written, Mr. President, about the administration and the affluent society. We find spokespersons for parts of this administration talking publicly about the fact that the people of this country are enjoying the affluence of those who are in office, living the better life.

We find them trying to convince us that, although this administration is budget minded, the people of the country really enjoy the fact that they spent several hundred thousands fixing up their new offices and are spending tremendous amounts of money in the new White House.

I think that Mr. Miller's appointment is symbolic. It is the cap upon all of the other efforts that have been made. It is the administration's way of saying "Mr. Consumer and Ms. Consumer, we could not care less about you. We are going to change the laws; and where we cannot change the laws, we are going to cut down the budget. Where we cannot cut down the budget, we are going to change the players."

That, indeed, is what they are doing.

I seriously question whether this administration is using good judgment in sending Mr. Miller to head the FTC. I believe the Nation will rue the day, and it is indeed a sad day for the people of this country.

Mr. President, I ask unanimous consent to have printed in the RECORD, the FTC transition report.

There being no objection, the report was ordered to be printed in the RECORD as follows:

FTC TRANSITION REPORT

I. INTRODUCTION

This final report of the Reagan-Bush Transition Team on the Federal Trade Commission (FTC or Commission) sets forth our findings regarding the FTC's policies and programs, personnel, budget, and FTC-related legislation expected in the 97th Congress. The report concludes with a set of recommendations as to ways in which, through internal policy and procedural changes and/or legislative initiatives, the Administration can enhance the FTC's ability to perform its intended consumer protection and antitrust functions more effectively and efficiently.

Because the FTC is an independent regulatory agency and because a vacant seat on the Commission is not scheduled to become available until September 25, 1981, President Reagan's ability to bring about immediate change in the FTC is relatively limited. The President's major avenues appear to be: (a) designation of one of the incumbent commissioners to be interim chairman (presumably one of the two Republicans), (b) discussions with the new chairman concerning policies and personnel, (c) review and possible modification of the FTC's budget request, and (d) consultations with Congress concerning oversight hearings and proposals for new legislation.

The President's most important responsibility, of course, will be selecting a new permanent chairman, either now (if a resignation occurs or if he chooses one of the incumbent commissioners), or as soon as a seat on the Commission becomes available.

The members of the Transition Team are:

Harry Diffendal, James C. Miller III (Captain), Jeffrey A. Eisenach, Timothy J. Muris, Michael Horowitz, and Robert D. Tollison.

The Team's Senior Congressional Advisors are:

Senator Robert Packwood, Congressman James T. Broyhill, Senator Lowell P. Weicker Jr., and Congressman George M. O'Brien.

The Team's other Senior Advisors are:

Donald I. Baker, Esq., Kenneth A. Lazarus, Esq., John W. Barnum, Esq., Richard Leighton, Esq., Professor Yale Brozen, Wesley J. Liebler, Esq., Professor Kenneth Clarkson, Dr. Donald Martin, Calvin Collier, Esq., Peter K. Pitsch, Esq., Carol T. Crawford, Esq., Professor Richard Posner, Richard Davis, Esq., Bert W. Rein, Esq., Lewis Engman, Esq., Edwin S. Rockefeller, Esq., M. Kendall Fleeharty, Esq., Professor Antonin Scalia, Professor Mark Grady, Governor Raymond Shafer, Professor Clark C. Havighurst, Joseph Sims, Esq., Professor Joseph Kalt, and Richard Williamson, Esq.

The Team's legal advisor is Marcy Tiffany, Esq.

In preparing this report, the Team solicited the views of our Senior Advisors and received many helpful comments from them. Second, we received many useful ideas from outside parties. Third, we had fairly extensive contact with Agency personnel—both the Commissioners and agency's general staff. We wish to acknowledge our appreciation for the cooperation we received from the agency and the professional manner in which our dealings were conducted.

Finally, a word on how this report was written. In the course of our work on the project, various Team members took principal responsibility for individual chapters and portions of the Appendix. Drafts were circulated among members of the Team, and comments were received. Though remarkably little disagreement existed among Team members for so sensitive an institution as the FTC, some compromises had to be struck, and in those cases the Team Captain was the final arbitrator. Thus, it should be noted that while each Team member endorses the report's overall thrust, they do not necessarily agree with each and every point.

II. POLICIES AND PROGRAMS

The Federal Trade Commission has three major responsibilities. First, under the Federal Trade Commission and Clayton Acts, the agency scrutinizes business practices it believes to be violations of the nation's antitrust laws (e.g., certain types of mergers, certain distributing and collusive arrangements, and certain discriminatory acts). Second, primarily under the Federal Trade Commission Act (as amended by the Wheeler-Lea Act of 1938), it scrutinizes unfair or deceptive advertising and other business practices concerning the relationships between producers and consumers. Much of this work is pursued under the agency's power, clarified by the FTC Improvements Act of 1975, to promulgate and enforce broad trade regulation rules affecting entire industries. Third, the FTC prepares a variety of economic and statistical reports concerning the organization and performance of U.S. industry.

In addition to the three major responsibilities just described, the Commission enforces a variety of other statutes, dealing with such matters as trademarks, truth-in-lending, and equal access to credit. (For a complete list of the Commission's legal authority and duties, see Appendix A.)

The Commission consists of a Chairman and four members, all appointed by the President, with advice and consent of the Senate. (For more detail, see Chapter III)

The Commission's organization structure is summarized in Figure I on the following page. Within this structure, the agency's policies and programs may be summarized and evaluated under three major topics: (a) antitrust, (b) consumer protection, and (c) economic reporting and analysis. Before discussing each of these areas, however, we shall describe briefly the criteria we think most relevant for evaluating the agency's overall performance.

There are two strongly-held views about the proper role of the FTC. First, that it should be a traditional law-enforcement agency (i.e., the perennial "cop on the beat"). Second, that it should be an economic agency, out to achieve an efficient working of the marketplace, and thus improve consumer welfare. As between these two extremes, we believe the latter is the more appropriate role for the Commission, although we are also of the opinion that the operational distinction between these two views is not as great as would appear at first blush.

To anyone involved in law enforcement, the scarcity of resources has to be of significant concern. For example, a city police chief must decide how various resources under his or her command—foot patrolmen, detectives, research and data processing facilities, et cetera—should be allocated. Simply because crimes are being committed in a particular area is not sufficient reason for this police official to devote all the force's limited resources to that area. Obviously, the police chief must make trade-offs, and to do so intelligently must have in mind some objective he or she is trying to maximize.

It should be quite clear to anyone who has reviewed the FTC's legislative authority that the agency has extraordinarily broad powers. Depending on the interpretations it renders, a plethora of business practices are either legal or illegal. Not only does this create substantial uncertainty in the business community (a factor which increases costs and adversely affects consumers), it also means that unless the FTC carefully husbands its resources and allocates them to the appropriate areas, the agency's impact in the public interest will be diminished.

We believe that in allocating its scarce resources to various programs and activities, the Commission should be guided by the effects of its actions on consumers, or more explicitly the effects on economic efficiency. Obviously, this means that a decision to take issue with a particular business practice transcends the question of legality. One must ask whether the probable effects of the agency's actions would be to improve the functioning of the economy, bring about greater efficiencies, and increase consumer welfare. One must also ask whether these resources might be better used in other areas, where the potential impact might be even greater.

Our understanding of the Commission's purported historic role is that of promoting competition and fostering consumer welfare. As we shall see below, in recent years the Commission has deviated from this goal, taking on "new theories" to justify its actions and pressing at the "frontiers" of antitrust law and practice.

(This chapter only surveys the broad spectrum of FTC activities and their effects. Appendix B provides more detailed support for the conclusions and recommendations.)

*Antitrust*

The FTC shares responsibility for antitrust enforcement with the Antitrust Division of the U.S. Department of Justice (DOJ) and with private parties who bring antitrust cases. In recognition of this function and to administer its antitrust activities, the Commission has created a Bureau of Competition and has placed in it several enforcement programs. (The Bureau's organization, a description of the programs it administers, and the agency's current antitrust initiatives are all described in Appendix C.)

This section evaluates the FTC's enforcement of the antitrust statutes, according to the criteria described above. In brief, we find that the Commission has all too often mischaracterized certain business practices as anticompetitive, and, in making such determinations, has tended to ignore the effects these practices have in lowering costs or otherwise creating efficiencies that ultimately improve the well-being of consumers.

Business practices that violate the antitrust laws may be discussed under four broad headings: (a) agreements among competing firms concerning the prices they will charge or other limits on competition, (b) monopoly behavior, (c) mergers, and (d) distributional restraints between sellers and buyers. We will discuss each in turn and will also separately discuss the FTC's enforcement of the Robinson-Patman Act and problems arising from "dual enforcement" of the antitrust laws by both FTC and DOJ.

Agreements to restrain competition.—The antitrust laws unambiguously prohibit overt agreements among competitors to set prices or restrain other means of competing. Such agreements are per se illegal: that is, mitigating circumstances are irrelevant. There is widespread agreement that the application of this per se rule to overt agreements among ("horizontal") competitors is sound. The FTC has pursued several worthwhile initiatives against explicit collusion, including its recent efforts to expose guildism in the professions. We believe that the agency's work in this area is in the public interest and should be expanded.

On the other hand, under the guise of ferreting out what it believes to be instances of tacit collusion and poor industry performance, the FTC has embarked on a very ques-

tionable course to reshape the structure of American industry. In an apparent belief that "big is bad" and applying the "market concentration doctrine" (which holds that the extent of competition and the number of firms in an industry are highly, positively correlated), the FTC has brought several questionable cases in recent years, the most controversial of which are those defended on grounds that the industry contains a "shared monopoly."

We believe these industry-wide programs are basically flawed. Attacks on industry concentration per se do not enjoy widespread support among those who have researched the problem. At most, concentration is an extremely crude and preliminary indication of the extent of competition one is likely to find in an industry. Moreover, a focus on the level of concentration tends to shift the agency's attention and resources away from problems of horizontal collusion, where the payoffs are both positive and substantial.

Monopoly behavior.—With few exceptions, over the last decade the FTC has been very critical of successful corporations who have increased their market shares. Indeed, the more successful a firm, the more likely was the FTC to look into its operations.

There are two major, contradicting theories about how one or more firms may come to dominate an industry. One is that the firm(s) "monopolize" the industry; by and large, this has been the FTC's view. The other theory holds that firms come to dominate industries because of efficiencies—gains that ultimately redound to the benefits of consumers. Obviously, both theories should be explored and evidence brought before a decision is rendered. But we have observed that, in general, the FTC is unduly skeptical of the proposition that efficient operations can (and usually do) explain the long-standing success of individual firms.

The agency has also brought cases against firms for so-called predatory pricing. Many at the FTC believe that by pricing below cost a firm can easily drive its smaller competitors out of business and thereby attain monopoly profits. That price-cutting is a serious problem is dubious on both theoretical and empirical grounds. The theory is questionable in part because the predator will likely incur disproportionately large losses relative to those borne by its victims. (Besides, it may be less costly to "buy off" competitors through merger or acquisition.) Empirical studies of famous cases of alleged predation corroborate this point, finding successful predatory pricing to be rare, perhaps even non-existent.

Mergers.—There are three types of mergers: first, mergers among competing firms (i.e., "horizontal mergers"); second, mergers among firms not competing directly or not in the same chain of distribution (i.e., "conglomerate mergers"); and third, mergers among potential or actual producers and suppliers (i.e., "vertical mergers").

The type of mergers that should be of substantial concern from the standpoint of public policy are horizontal mergers that create monopoly power or that facilitate industry collusion. Obviously, any policy to restrain monopoly power should look askance at a proposed merger which would give the merged firm the vast majority of the market especially where no rationale for such action other than securing monopoly profits seems to make sense. The FTC's work in policing and evaluating large-scale horizontal mergers should be continued and strengthened.

With smaller horizontal mergers, the problem is that elimination of a competitor may facilitate collusion among the remaining firms. Whether an industry is in fact susceptible to collusion, however, depends upon more factors than the number of firms in an industry or the absolute level of concentration. For example, ease of entry will influence greatly the probability of successful collusion. Nevertheless, the FTC, both in its case-selection criteria and in its litigated decisions, has consistently ignored these other factors and has attacked horizontal mergers between firms with small market shares in markets where successful collusion is highly unlikely.

One final matter with respect to horizontal mergers we find particularly disconcerting is the FTC's apparent perverse reaction to economic efficiencies created by such mergers. A survey of FTC decisions between 1970 and 1977 found that in eight out of eighteen cases studied, arguments that the merger would create efficiencies counted against its legality or that the apparent absence of such efficiency creation counted for the merger. In not one of these 18 cases did the Commission conclude that increased efficiency should count in favor of the merger.

The principal argument against conglomerate mergers is that they may eliminate a potential competitor. Because the number of potential new entrants may be quite large, the factual burden of showing that the acquiring or acquired firms are unique potential entrants is usually quite substantial. Furthermore, conglomerate mergers of significant concern are those that actually involve substantial horizontal problems—that is, the potential entrant acquires one firm in an industry susceptible to collusion. On the other hand, conglomerate mergers tend to create economic efficiencies.

It would seem to us that whether a conglomerate merger should be disallowed should rest on a weighing of the anti-competitive consequences and the expected efficiency gains. On occasion, however, the agency has explicitly abandoned even the pretense of basing its decisions on a weighing of this type of evidence. Instead, in recent years the Commission seems to have been preoccupied with a "big is bad" perspective and has acted accordingly. We believe that questions such as whether "big is bad" should more appropriately be addressed by Congress than by the FTC.

The principal argument against vertical mergers is that they may foreclose competitors. The argument is that the acquiring firm can coerce the acquired firm into purchasing from it while the acquiring firm continues to sell to all of its old customers. But the foreclosure argument erroneously assumes that the merger would not result in increased efficiencies. If as a result of the merger costs fall, then consumers reap benefits. If the merger does not result in efficiency gains, the cost conditions previously limiting the acquiring firm's output and the price and quality conditions previously limiting the acquiring firm's purchases will still apply after the merger. Because neither firm presumably has an interest in acting inefficiently, intrafirm "sales" will only be made that would be justified without the merger. Thus, it would seem that agency efforts to restrain vertical mergers are by and large misdirected.

Distribution restraints.—Contractual relationships between suppliers and purchasers have often been the object of FTC interest. Examples include resale price maintenance (i.e., the manufacturer insists that dealers sell its products at or above a certain price) and vertical market division (i.e., the provision of exclusive territories by the manufacturer to its distributors). The agency continues to pursue vertical practices vigorously, particularly resale price maintenance.

In our judgment, the FTC's enforcement efforts with respect to distributional restraints reflect a fundamental misunderstanding of their effects. Most resale price maintenance cases have involved products appearing to require the production of at least some information on the local level to aid consumers in making informed judgments. Examples include high-fidelity sound equipment, hearing-aids, ski bindings, firearms, and cookware or kitchen gadgets. Manufacturers of such products appear to have used resale price maintenance as a means of fostering the creation and dissemination of such information to consumers. In the absence of cartelization at either the manufacturer or dealer levels, there is nothing anti-consumer about this use of resale price maintenance. The principal effect of FTC orders in these cases was to force manufacturers to use less efficient means of providing information to consumers and to reduce the total amount of information available.

Robinson-Patman.—Perhaps no facet of antitrust law has received as much scholarly and professional criticism as enforcement of the Robinson-Patman Act. A major problem with cases brought under the act is that they tend to ignore the fact that temporary "discriminations" occur in all active markets. With ever-changing supply-and-demand conditions, new profit discrepancies are constantly being created and destroyed. These temporary discriminations provide important signals leading to a better allocation of resources.

Long-term and systematic price differences, on the other hand, are either cost-justified or are a reflection of true monopoly power. In the former case, consumers benefit; in the latter, the problem can be addressed more effectively under other antitrust statutes. In enforcing the Robinson-Patman Act, the Commission has emasculated the cost justification defense and has assumed injury to competition from the existence of price differences. Consequently, its enforcement of the Robinson-Patman Act has tended to chill price competition and impede the efficient allocation of resources. Fortunately, the Commission has devoted few resources to Robinson-Patman cases in recent years, though a reversal of that policy seems evident.

Dual enforcement.—Many have questioned whether public antitrust enforcement should be shared by two agencies, or whether the FTC's activities should be consolidated in the DOJ. The proponents and opponents of the proposed transfer of the FTC's antitrust activities start from different premises, disagree as to the effects of dual enforcement, and draw different conclusions about the desirability of having an independent, administrative agency with broad quasilegislative authority to enforce the antitrust laws. The proponents of the change maintain that the transfer of antitrust authority would eliminate waste and reduce uncertainty (making business planning easier), and they contend that the FTC's administrative role has not produced the desired expertise, but rather has created problems of structural unfairness. The opponents counter that the current system works, that it results in little duplication, that it provides for two separate views on antitrust enforcement, and that the administrative process and the agency's broad authority facilitate the testing and extending of the frontiers of antitrust law and practice. (Appendix D reviews these arguments in more detail.)

### *Consumer protection*

While the FTC's antitrust efforts scrutinize relationships among businessmen that potentially affect consumers, the agency's consumer protection efforts scrutinize the direct relationships between businessmen and ultimate consumers. Under its mandate to prevent "unfair or deceptive acts or practices," in recent years the Commission has pursued cases on a broad front, primarily through extensive rule-making proceedings. Currently the FTC has underway some 19 such proceedings, the scope and status of which are summarized in Appendix (This Appendix also describes the bureau's organization and operations.

We shall discuss the agency's consumer protection efforts under six headings: (a) economic underpinnings, (b) advertising, (c) product quality, (d) rewriting contracts, (e) occupational regulation, and (f) consumer credit statutes.

Economic underpinnings.—Under a variety of specific initiatives, many of which are discussed in the materials that follow in this chapter, the agency has tried to reshape vital parts of the American economy to promote the theoretical vision, policy preferences, and social priorities of the incumbent commissioners and staff. All too often, the FTC has failed to ground its efforts upon sound economic analysis. Moreover, the FTC has manifested a willingness to prescribe the form and content of contracts and to impose other miscellaneous regulations with little justification, unsupported by any clear and consistent concept of what constitutes harm to consumers. In short, much of the agency's work in the consumer protection area has paid little attention to the effect on ultimate consumers.

Fundamental inconsistencies regarding economic analysis emerge among FTC programs. For example, some FTC actions reflect attempts to deregulate an industry on the theory that market forces best protect consumers, while others embody an attempt to impose regulations on industry based, at least in part, on a basic distrust of market forces. The agency's attitude toward economic analysis in the consumer protection area usually takes one of three forms. Sometimes, as in its efforts to deregulate an industry, the FTC concurs with the near-unanimous view of economists. In other cases, the Commission enthusiastically chooses one side in a raging debate among economists, as it appears to be doing in some of its recent initiatives regarding information. However, in these activities the Commission seems to be contrasting an imperfect market with an idealized view of the ability of government regulators correctly to perceive and remedy the market imperfection. In still other cases, the FTC runs against mainstream economic analysis, such as in its downgrading of cost considerations in rulemaking.

Advertising.—Consumers constantly search for the goods and services that best serve their wants. Everything else equal, any device that reduces this search produces consumer benefits. Advertising's main economic justification is that it reduces consumer search costs and makes consumer search more effective. The FTC's three principal standards for regulating advertising are its deception, substantiation, and disclosure doctrines.

Section 5 of the Federal Trade Commission Act does not define "deceptive advertising"; instead, it only declares "unfair or deceptive acts or practices" unlawful. The courts have given the agency considerable flexibility in specifying the kind of advertising that is unlawfully deceptive. The FTC may prohibit any advertising that has a "capacity and tendency" to deceive, by proving that at least a "significant" minority of consumers exposed to it were deceived.

There are major problems with the FTC's deception test. For one, the Commission has considered ads deceptive that would fool only a small number of gullible people, yet convey meaningful information to others. Second, the FTC does not require proof of actual harm to consumers.

In the past decade, the agency has relied less and less on its doctrine of deceptive advertising and increasingly on its new doctrine of substantiation, especially in cases challenging national, as opposed to local, advertising practices. The new doctrine works in the same way as the doctrine of deceptive advertising, except that the agency does not have to prove that the alleged interpretation is false, only that the advertiser did not, before the ad was run, have evidence to substantiate the truth of each interpretation that would be placed on the claim by a nontrivial minority of consumers. As a result of the new substantiation doctrine, many firms are forced to prepare costly "reasonable basis" reports, even for claims that are to be true without prior substantiation. Such costs, of course, are ultimately borne by consumers. The major justification for this requirement is the administrative savings from eliminating the agency's obligation under the deceptive advertising doctrine to prove claims false. It is extremely doubtful that these savings are worth the cost of the many reports that must be prepared needlessly. Not only are costs passed on to consumers, to some extent the agency's doctrine must deter useful advertising, as firms seek to avoid these costs.

Disclosure requirements account for a substantial number, perhaps the majority, of the FTC's recent rulemaking initiatives. Although these might seem relatively innocuous, and even occasionally beneficial when the information market is shown to have failed and consumers are shown to value the information disclosed more than the costs of disclosure, many of the Commission's efforts in this area are subject to question. For one, the FTC has been very lax in requiring a demonstration that the benefits of its disclosure rules exceed the respective costs. Indeed, particularly in its original rulemaking proposals, the agency seemed enamored of the proposals, the agency seemed enamored the idea that if some information is good, more must always be better. Moreover, the agency has been insensitive to the ability of the market to produce information that consumers desire.

Another problem is that the FTC has actually used disclosure requirements to suppress useful information. Occasionally, the FTC has required that if certain information is advertised, other information must be disclosed. The costs of developing and providing the FTC required information can discourage provision of any information. For example, in the vocational schools' rule, when reference to jobs or earnings were made in promotional material the FTC required disclosure of specific, costly-to-gather information on placement and salary data of graduates. Although the courts overturned this rule, presumably many of these firms would have chosen to say nothing rather than meet the agency's disclosure requirements.

Product quality.—Closely related in theory to the problems underlying information disclosure is the area of product quality. In recent years the FTC has expressed concern over quality through such activities as enforcement of the Magnuson-Moss Warranty Act, and its recent cases aimed at remedying product "defects."

The basic theory underlying FTC attempts to improve product quality is that of "asymmetric information." However, the present state of this theory, and especially the relevant evidence, would not appear to justify extensive governmental intervention of the type envisioned by the agency.

It is important to emphasize, moreover, that we should expect to find some imperfect products. Avoiding defects is not costless. Perhaps more importantly, we have products of difference degrees of reliability competing with each other in the same market because consumers have different preferences for defect avoidance. Those who have low aversion to risk (relative to money) will be most likely to purchase cheap, unreliable products. Those who have a greater aversion to risk will be most likely to purchase more expensive and more reliable products.

Agency action to impose quality standards interferes with the efficient expression of consumer preferences that will occur as long as consumers have adequate information about quality. If such information is not available, the answer would seem to be disclosure of product characteristics rather than the imposition of quality standards.

Rewriting contracts.—Some FTC programs in the area of consumer protection are based on a notion of "disparity in bargaining power." For example, the agency alleges that sellers employ their superior bargaining power to "impose" (or "force") take-it-or-leave-it contracts, containing "unfair" terms, upon consumers. The bargaining power thesis has no economic content and is, therefore, analytically defective. It fails to explain why contracts are take-it-or-leave-it and how these contracts harm consumers.

The agency sometimes believes that it can prevent consumers from "giving" away certain rights. This is in essence a restraint on alienation of these rights. The agency's theory seems to be that consumers are forced to give away these rights. But if they are so forced, they must lack alternatives. Alternatives, however, will be absent only in the presence of monopoly. If lack of competition is the problem, restraining alienation does not appear to be the solution.

Moreover, the agency is chagrined about the lack of negotiation. If we do not commonly see negotiation about these rights, then the costs of negotiation to either party —the analysis holds for the debtor as well— are probably greater than the benefit from negotiation. Most take-it-or-leave-it bargaining comes from the fact that transaction costs are too high in relation to the benefits from tailoring the contract to the different preferences of the bargaining parties. Prices would probably rise if bargaining were coerced in situations where it has not occurred as a result of market forces.

This is not to deny that there can be problems in the contract formation process. Such legal doctrines as fraud and duress are the appropriate tools, however, not the overbroad bargaining power approach. When the administrative process can more cheaply remedy these problems than private litigation, the FTC would be justified in taking action. Such distinctions, however, have not been fully appreciated by the Commission in recent years.

Occupational regulation.—Licensure requirements vary from one occupation to the next. They usually include, however, some combination of the following: (a) education, (b) apprenticeship, (c) written or practical examination, (d) good moral character, and (e) citizenship or residency. Under a licensure system the occupational board not only has jurisdiction over entry, but also over such matters as accreditation and permissible forms of competition. While licensing is a means to control the quality of professional services, it has almost invariably resulted in monopolistic practices. While many of these licensing schemes are supported by national organizations of the relevant occupations, in most instances the enabling institution is state law or regulation.

Numerous studies have found that many occupational rules and regulations harm consumers. Building on this evidence, the FTC has invested considerable resources aimed at reducing the anticompetitive impact of occupational regulation. In recent years the Commission has proposed a number of rules, the impact of which would be to preempt certain state economic regulations. These rules were designed to mitigate or eliminate the impact on consumers of state laws which directly fostered monopolistic privileges. Although the program has occasionally been sidetracked by FTC efforts to substitute its own rules for those of the states rather than merely preempt anticonsumer state laws, we feel that this program holds considerable promise for improving the well-being of consumers.

However, the FTC's asserted power to preempt state laws, as yet untested in the courts, raises serious questions of federal-

state relations. Federalism and decentralized government in general have basic advantages worth preserving, by no means the least of which is the provision of alternative governments under which citizens may choose to live. The competition that such citizen choice of preferred jurisdictions engenders improves the quality of state and local governments.

Against these fundamental advantages of federalism, however, we must weigh the advantages of the FTC's preemption rules. Generally, there is no real conflict between the underlying objectives of federalism and of the FTC cases. The abolition and control of monopoly rights granted by state legislatures can only serve to strengthen the principles of consumer sovereignty that underlie federalism. We believe, however, that this issue should be addressed by the FTC with great care, and, in fact, may most appropriately be decided by the Congress rather than the Commission.

Consumer credit statutes.—The Commission has exclusive and, in some cases, joint jurisdiction (essentially with the Federal Reserve Board, but also with other bank regulatory agencies) over credit practices and a variety of credit statutes enacted over the past decade. These statutes broadly divide into three categories. First, those that deal with disclosure of information prior to the obtainment of credit, of which the Truth in Lending Act is the most significant. Second, those that regulate the grant and denial of credit applications, of which the Equal Credit Opportunity Act ("ECOA") is the most significant. And third, those that deal with credit collection practices, of which the Fair Debt Collection Act ("FDCA") is the most significant.

While most of the agency's activities in the area of consumer credit are based on high ideals, a number of shortcomings are evident. First, the agency seems too concerned with technical violations, independent of their impact upon consumers. Second, the Commission has failed to integrate adequately the Bureau of Economics and the Office of Policy Planning in case and project selection. (The agency has a mandate to spend its limited resources wisely, and the expertise of these two staff units appears to be sorely needed in guiding the agency's work in this area.) Finally, because the effect of FTC actions is often to raise the price and reduce the availability of credit, we feel that the agency has given insufficient attention to the credit needs of the poor.

*Economic analysis and reports*

The FTC's Bureau of Economics provides economic support for the Bureaus of Competition and Consumer Protection, engages in long-range analysis, and collects economic data; its activities and organization are described further in Appendix C.

Economic support.—The primary function of the Bureau is to support the Bureau of Competition and the Bureau of Consumer Protection. The emphasis is on providing basic economic analysis as an input to Commission proceedings. Some have said that the primary problem in this area is the need for more involvement of the economists in Commission proceedings. Some points that have been made in this regard are: (a) the need for more contact between the Commissioners and their legal advisors on the one hand and the economists on the other; (b) the need for more direct consultation between the Director of the Bureau of Economics and the Commissioners; and (c) the explicit introduction of economic analysis into the memoranda that go to Commissioners in addition to bottom-line recommendations.

Generally, there is a need to end the isolation of the economists in the agency and to infuse economists and economic analysis at all levels of agency decision making. Some concrete suggestions along these lines are: (a) give the economists a greater role in deciding which proposals are brought before the Commission; (b) add an economist-advisor to each Commissioner's staff; and (c) integrate the Bureau of Economics physically with the rest of the agency. We generally feel that steps to end the isolation of the economists will significantly improve the performance of the agency.

Long-range analysis.—The long-range analytical work of the Bureau of Economics ranges from largely descriptive industry studies to highly technical working papers. The quality of these long-range analyses is generally very good, though some have questioned the relevance of this research for Commission activities. In this regard the following points need to be reviewed: (a) the need for a relevant long-term research agenda and more explicit deadline for the completion of projects; (b) coverage of more basic economic issues related to antitrust matters; and (c) an extension of the economic research agenda to include the economic analysis of legal criteria.

Most importantly, perhaps, long-range analysis should be expanded to cover the study of imperfections in government regulation and of the effects of government regulation on the marketplace. This analysis would supplement the work on market imperfections and would recognize that government intervention is justified only when market imperfections exceed the imperfections associated with government intervention. The real choice that we face is thus not between imperfect markets and perfect government, but between the market and government as two imperfect processes through which we seek to address the problems that confront us. This expansion in the coverage of long-range analysis would be an important input in the suggested expansion of the Commission's program of appearing before other agencies. (See below.)

Finally, some emphasis on long-range analysis should be given to the role of small businesses in the economy. These firms are a crucial part of the competitive order, and their role needs to be better understood and more appreciated.

Collection of economic data.—The bureau's principal responsibility in this area is its Line-of-Business (LB) reporting program, under which the Commission seeks to gather data on the largest corporations by product lines. Some 274 lines have been separated for monitoring, and such data are gathered from over 400 corporations. The reporting requirements are stiff. Firms must list all subsidiaries, allocate costs and revenues to product lines, and be able to reconcile this data with other corporate financial reports. At this point no rigorous estimate of the costs of compliance exists. A small sample of firms yielded a median compliance estimate of $40,000 per firm. The Commission's estimate per firm is $24,000. For some large firms compliance costs easily run into the $100,000-plus range.

Various justifications have been offered for the program. Among the more prominent of these are: (a) promotion of economic research in industrial organization, (b) identifying profitable industries for investors and potential entrants, and (c) providing guidance for the allocation of antitrust resources. Commentators have identified various analytical and conceptual difficulties with this data. These include: (a) the incompatibility of accounting profits and economic profits, (b) the sensitivity of the results to the allocation of joint costs and intracompany transfer, (c) problems of market definition, and (d) whether the data, even if reliable, would serve any useful purpose.

In light of these issues it would seem best at this point to institute a thorough review of the costs and benefits of this program. If the program does not show substantial benefits relative to costs, it should be terminated.

Another FTC data-collection program is the Quarterly Financial Report (QFR). The agency collects and publishes quarterly financial information from 15,000 corporations in manufacturing, mining, and trade. A primary use of the QFR report is in compiling the quarterly estimates of the Gross National Product. This program raises many of the same concerns as the Line-of-Business report program, particularly the reliability of the information, the cost of the data collection, and the possibility of transferring it to other parts of government. In addition, there appears to be substantial overlaps between the QFR and Line-of-Business reporting programs, providing a potential source of budget reduction. This program should also be evaluated with respect to its costs and benefits and consideration should be given to transferring it to the Department of Commerce.

Interventions before other government agencies.—Economists from the Bureau of Economics have played a key role in the past in assisting in preparation of comments filed by the Commission before other government agencies. (See Appendix C for a listing of recent comments.) Particularly noteworthy have been the Commission's recent interventions before the International Trade Commission (recommending against imposing import restraints on Japanese automobiles) and the Interstate Commerce Commission (in support of certain of the ICC's pro-competition initiatives). The Bureau is in many ways ideally suited to such activities, and the quality of the FTC's analyses has generally been quite high.

[Pages 31–46 of the report describe the structure of the FTC.]

BUDGET CUTS IMPLIED BY TEAM'S RECOMMENDATIONS

Using rough, but conservative estimates, our recommended programmatic changes would justify a 50 percent reduction in the agency's current budget. Assuming that our recommendations for increases in certain other activities are followed and giving the current programs the benefit of every reasonable doubt, we recommend a minimum reduction of 25 percent.

To obtain our recommendation, we used as a base the FTC's FY 1982 estimate of $75.8 million for expenses necessary to keep the agency at its current size. Reducing this number by 25 percent leaves $56.9 million. Although such a budgetary reduction does not necessarily require an exacting matching reduction in the number of employees, a 25 percent employee cut would appear to be a good working base and would leave the agency with 1,338 employees, roughly equal to the staffing level prevailing in FY 1971.

It is worth emphasizing that such a reduction in the size of the FTC staff would not require a massive dismissal of current employees. The FTC's professional staff turns over at an annual rate of 15 to 20 percent, and support employees also frequently leave, although not at as rapid a pace. Thus, curtailment of new hiring could accomplish the bulk of the recommended staff reductions.

Because the FTC does not report its budget among the functional lines discussed in our policy chapter, precise estimates of the size of our recommended cuts are impossible. Nevertheless, a good working estimate is that our recommendations would reduce both current antitrust and consumer protection activities by about 50 percent. Starting first with antitrust, at least 20–25 percent of the current budget involves vertical matters. At least a similar amount is spent on matters relying upon a "big is bad" theory, including the agency's misguided challenge to concentration. An additional amount of roughly 10–13 percent is spent on Robinson-Patman and predatory pricing cases. (Our budgetary adjustments for antitrust also include appropriate reduction in

support activities such as offices of the General Counsel and Executive Director, rental space, postage, and telephone.)

Because many of the FTC's consumer protection activities involve more than one of the functional categories in our policy chapter, estimates of consumer protection cuts are necessarily even rougher. Nevertheless, it appears that at least 50 percent of the resources are spent on proceedings involving overregulation of advertising (including requiring of unnecessary disclosures), proceedings to improve product quality more than economic analysis would justify, and proceedings concerning notions of disparity in bargaining power. (Again, we have included concomitant reductions in support services in our figures.)

Rather than halve antitrust and consumer protection, we recommend in Chapter VII several areas for increased emphasis. These include programs dealing with horizontal restraints, with occupational regulation, with interventions before government agencies, with increased use of economic expertise, with efforts to provide the business community with more certain guidance, and with a reevaluation of the Commission's current rules and policies. Our figures thus reflect both reductions and increases for these two bureaus.

We recommend no change in budget for the agency's third mission, economic activity. Within the Commission's budget, this included primarily industry studies and financial reporting. Although the latter function is a potential source of budget cuts, such cuts must await the results of the studies that we recommend concerning the financial data. We do believe that the role of the FTC economists should be significantly increased, but we think this can be accomplished within the current budget.

Within the context of this 25 percent reduction, we make several specific organizational recommendations. First, we recommend the elimination of the Regional Offices. These offices, which since 1970 have had the power to initiate investigations, have triggered controversy both within and without the FTC. Although they spend about 17 percent of the agency's resources, critics question the need for their existence, and assert that they have a disproportionate share of the problems that allegedly plague the FTC, such as delay and lack of priority setting. It is further alleged that their role is inadequately defined, that their activities, while in some cases prodigious, tend to be misguided, and that they are inadequately managed.

In the mid-1970's, something of a housecleaning of the Regional Offices began, a movement that was accelerated, at least at the staff level, under Chairman Pertschuk. Appendix I is a memorandum describing the activities of the Regional Offices and how the current FTC Executive Director believes that their performance and role has improved. Although some of his points would seem overstated, we believe that these offices are now more fully integrated into the Commission processes.

Nevertheless, these offices are difficult to justify on logical grounds. The concept of Regional Offices is poor, given the geographic and psychological distance between them and Washington, the greater cost required for effective control, and their checkered history. Moreover, the cases listed in Appendix I contain more than their share of the type of cases that, as indicated in Chapter II, seem contrary to the public interest.

We estimate that elimination of these offices would reduce the Commission's budget some 10 to 15 percent, with a partially offsetting two to three percent being added to the Washington office's budget to continue worthwhile cases and other activities. (A discussion of procedures for eliminating the regional offices is found at Appendix J.)

We propose the two other specific budget reductions. First, we recommend Congressional elimination of the intervenor funding program appropriation for FY 1982—$750,000. (Chapter VI evaluates this program in some detail.) Second, we note that the FTC not only has an Office of Policy Planning, but a significant portion of staff in the two major bureaus is devoted to this same activity. By consolidating and streamlining these offices, significant savings could be achieved. Because the agency does not break out the resources spent on these various activities, the exact amounts are indeterminate, but would seem to run in the neighborhood of several hundred thousand dollars annually.

*Summary of budget recommendations*

The table on the next page compares the FTC's expenditure requests with the Team's recommendations. In short, we believe that the FTC can do its part in President Reagan's effort to reduce the size of the federal budget.

BUDGET SUMMARY: FTC REQUEST VERSUS TEAM RECOMMENDATION, BY AGENCY MISSION

[Dollar amounts in millions, fiscal years]

| Mission | FTC request | Team recommendation | Difference |
|---|---|---|---|
| Antitrust: | | | |
| 1981 | $32.2 | $29.8 | −$2.4 |
| 1982 | 34.7 | 25.3 | −9.4 |
| Consumer protection: | | | |
| 1981 | 33.3 | 31.1 | −2.2 |
| 1982 | 34.9 | 25.4 | −9.5 |
| Economic reporting: | | | |
| 1981 | 5.5 | 5.5 | 0 |
| 1982 | 6.2 | 6.2 | 0 |
| Total: | | | |
| 1981 | 71.0 | 66.4 | −4.6 |
| 1982 | 75.8 | 56.9 | −18.9 |

V. LEGISLATION

Bolstered by support from the consumer movement, the Federal Trade Commission (FTC) in the 1970's developed a more agressive approach in its regulation of unfair acts, practices and methods of competition. The FTC adopted a particularly activist role in its consumer protection activities, utilizing its new rulemaking authority to initiate industry-wide rules governing a wide array of business practices in industries ranging from the used car business to funeral homes, optometry, and vocational schools. At the same time, the Commission continued to press far-reaching investigations into farm cooperatives and the automobile and oil industries.

Growing concern in the business community over impacts of the FTC's new activism focused on the costs of and benefits to be derived from the FTC's rules and investigations. Particular concern centered on the impact of FTC rules on small businesses. Affected industries were joined by the U.S. Chamber of Commerce, the National Association of Manufacturers (NAM), and the Nat'l. Federation of Independent Business, among others, in seeking help from Congress. Additional support was offered by several economists from the academic world, who pointed to the adverse impact many FTC activities were having on an already sluggish economy, and the dangers of market intervention in several areas of FTC activity. Both the academic and the business groups questioned whether the consumer benefits of various FTC activities would match the costs which would be added to consumer goods to meet FTC requirements.

Tensions between consumer activists on the Commission and the business-academic community were reflected in Congress. Questionable potential of consumer benefit, coupled with the structure of many industries chosen for regulation by the FTC (optometrists, funeral directors and used car dealers are located in virtually every Congressional District) created intense Congressional interest in the FTC's activities. By 1977 a heated controversy had developed over the FTC's role in the marketplace, the level of discretionary authority vested in the Commissioners and the staff, and the way in which that authority had been used. Congressional concern manifested itself in introduction of numerous proposals to prohibit or otherwise restrict specific FTC activities, and eventually, failure to renew the FTC authorization after its expiration at the end of 1976. For the next three years, the FTC existed without a formal authorization, and received funding through a series of continuing appropriations, resolutions, and agency transfers. During the ensuing three-year controversy, expiration of even temporary funding forced the FTC to close down for one day. In the interim, Congress seized upon the legislative veto as a vehicle to restrain FTC activities believed to be beyond the scope of its legislative mandate. However, the legislative veto itself became a stumbling block, with the Senate pressing for a two-House veto, and the House insisting upon a more stringent one-house veto. Compromise finally was reached in the FTC Improvements Act of 1980 (the "Act," the "Improvements Act") which was signed into law on May 28, 1980. (Public Law No. 96–252). The Improvements Act is an omnibus measure which renewed the FTC's authorization through 1982, included a two-House veto provision and several express restrictions and prohibitions against FTC activities affecting certain specific industries.

Although the Improvements Act formally restored the FTC's authorization, it preserved numerous highly controversial issues for subsequent Congressional consideration. Most specific restrictions or prohibitions contained in the bill are of a temporary nature, and industry pressures to extend or finalize the restrictions can be expected. In addition, the legislative veto process may function to stimulate or at least facilitate Congressional intervention in both procedural and substantive aspects of FTC rulemaking in 1980, 1981 and 1982. Industries affected by final rules can be expected to use the veto as a vehicle to obtain relief from implementation of new trade regulation rules. Some industries already have received commitments for such assistance from key members of Congress.

Although the intensity of the controversy may have subsided, industries affected by proposed and final rules promulgated can be expected to marshall support from larger business groups and from the Congress to keep the FTC and its regulatory activities an active battleground in the 97th Congress.

The Federal Trade Commission Improvements Act of 1980 was signed into law on May 28, 1980. The Act authorizes appropriations for the Federal Trade Commission for fiscal years 1980, 1981, and 1982. In addition to authorizing appropriations for the FTC, the Act modifies FTC procedures and administrative operations, and curtails specific rulemaking activities.

The Act substantially increases Congressional involvement in the FTC decisionmaking process through expanded oversight functions and authorization of a two-house legislative veto of any final trade regulation rule promulgated by the FTC. (See Appendix K for a summary of the Act's provisions, and Appendix L for the full text.)

*Current congressional sentiment toward the FTC*

General congressional concerns.—Although the 1980 Improvements Act has been described as a catharsis for most Congressional concerns and hostilities toward the

FTC, there remains a generalized sense of unease regarding the FTC and its activities. This concern, generally not well articulated, is perhaps a reflection of Congressional frustration over its apparent inability to make FTC Commissioners and staff responsive to the will of Congress.

As Congressional opposition to FTC activities has increased in recent years, Congress has been inclined to intervene on an ad hoc basis, for example curtailing investigations or rulemaking in particular industries, rather than develop institutional reforms.

Elevation of Congressman John Dingell to the chairmanship of the House Commerce Committee may signal a change in the Congressional approach to FTC-related problems. Both Congressman Dingell and ranking Republican Congressman James Broyhill have expressed interest in addressing underlying regulatory issues, including the structure and functions of the agency. Congressman Dingell already has initiated a high-level task force group to study issues surrounding government regulation of business, and Congressman Broyhill has expressed interest in examining structural and functional issues during oversight hearings in the next Congress.

Congressional concerns generally include a belief that the FTC is overreaching its statutory mandate, that it is imposing unnecessarily burdensome requirements on business, that its goals often are inconsistent with or otherwise hinder other federal objectives (for example, many rules add significantly to costs of consumer goods), and that the roles of investigator, charger, prosecutor, judge, and enforcer should not reside in a single agency.

There is a greater divergence of views as to the source of these generally recognized problems. Many in Congress feel that the FTC Act and other statutes within the FTC's jurisdiction are either too broadly drawn, vesting excessive authority in the FTC, or that the statutory language simply is not sufficiently precise (thereby permitting the exercise of excessive discretion by FTC staff and Commissioners.

Others in Congress focus on the regulator process as interpreted and applied by the Commission, for example, the use of formal rulemaking and cease and desist powers into areas not intended by the Congress.

Still others believe that neither the statute nor FTC regulatory procedures are at fault, but rather that the problems of recent years are a reflection of the individual Commissioners and staff, their personal missions and goals. According to this view, it would not be desirable to curtail the FTC's broad discretionary authority, which is seen as necessary to enable the agency to conduct its mission properly. Attention instead should focus on eliminating distortions of the FTC's role through personnel changes at both Commissioner and staff levels.

Concerns regarding the FTC's antitrust mission.—Specific concerns expressed regarding the FTC's antitrust mission generally include a feeling that the FTC is overreaching its statutory authority, for example in ordering divestitures, and in the development of new antitrust theories. There is a common perception that Congress should examine the apparent duplication of functions between the FTC and the Department of Justice. Congressional concerns focus on the inefficiencies inherent in duplication and on real or potential conflicts between and inconsistent policies adopted by the two different agencies. Another general concern relates to the FTC's role as investigator, charger, prosecutor, judge, and enforcer, a concern heightened by the subject matter of recent investigations and decisions.

Two different approaches are suggested as appropriate means to deal with these perceived problems. One view supports continuation of ad hoc legislation intervention in specific FTC activities. Another view supports a more generic, institutional approach which generally focuses on a realignment of the FTC's antitrust jurisdiction (most commonly articulated as consolidation of antitrust functions in the Justice Department), removal of the FTC's prosecutorial function to the Justice Department, adjudication of FTC cases in Federal district court, and/or creation of an independent corps of administrative law judges.

Concerns regarding the FTC's consumer protection mission.—If a consensus exists on any aspect of FTC activity, it is an apparent consensus that the FTC has exceeded the reach of its statutory authority, and that it has initiated rulemaking activity in areas felt to be inappropriate for FTC regulation. Criticism focuses specifically on FTC regulation of industries traditionally regulated by the States, regulation to an inappropriate level of detail, and allocation of resources to rulemaking not felt to be of sufficiently high priority relative to protection of consumer interests. (For example, the FTC reportedly is developing a standard for the manufacture of golf balls.) Substantial concern also exists regarding excessive reporting and recordkeeping burdens imposed on business, particularly small business, and the inconsistency of such burdens with the desire for expanded business investment.

So little unqualified support exists for FTC consumer protection activities that those who generally believe that the Commission should preempt individual marketplace decisions only in those areas where a person of ordinary intelligence, "a reasonable man," is unable to make an informed or rational judgement, are characterized as "FTC supporters." Only those who believe that the Commission should either preempt no individual marketplace decisions, or should limit its consumer activities to cases of fraud or deception, are viewed as "opponents."

The two general approaches to remedying perceived problems in FTC consumer protection activities parallel those proposed in the antitrust area. Some Members prefer ad hoc legislative intervention in specific rulemakings. This approach will be facilitated through the legislative veto procedures set forth in the Improvements Act. Advocates of the ad hoc intervention approach have differing views as to the full impact of the legislative veto. Those Members who supported the legislative veto generally feel that it will provide an orderly mechanism for dealing with specific rulemaking issues, removing such issues from the authorizing and appropriations process. Many Members however, remain skeptical about the impact of the legislative veto, and are withholding judgment until Congress has had some experience with the new process.

Other Members of Congress are less inclined to follow the ad hoc approach, and prefer to examine possible statutory revisions, for example reexamination and refinement of the FTC's consumer protection mandate. Such revisions could include a classification of the FTC's authority and more precise definitions of conduct intended by Congress to be deemed illegal.

*Expected congressional involvement in FTC activities*

Mandatory Functions.—Under the new Improvements Act, the Senate Commerce Committee will be required to conduct at least one oversight hearing on the FTC at least once during the first six months, and once during the last six months of each calendar year. Subject of the oversight hearing is within the discretion of the Committee and has not yet been determined. One likely subject is use of the unfairness standard. Hearings may focus on advertising or could examine application of the unfairness standard for all acts and practices.

The FTC authorization expires on September 30, 1982. Thus, the House and/or Senate Commerce Committees may begin consideration of a new authorizing bill sometime during 1981. Final action must be taken by the entire Congress no later than 1982, the Second Session of the 97th Congress.

Discretionary Functions.—The FTC is required under the Improvements Act to submit to the House and Senate Commerce Committees two forms of advance notice of proposed rulemakings: (a) advance notice of intent to develop a proposed rule, and (b) advance notice of proposed rulemaking submitted 30 days prior to publication in the Federal Register. The Committees may, but are not required to, conduct hearings on any such proposed rulemakings.

House and Senate Commerce Committees may, but are not required to, conduct hearings on all final rules submitted pursuant to the Act's legislative veto provisions, and Congress may, but is not required to consider a resolution of disapproval. Final rules promulgated by the Commission may be implemented only after a 90 day period of Congressional review, during which Congress may veto the rule.

The Act requires the Commission to submit to the House and Senate Commerce Committees a plan for revision of small business quarterly financial report forms and procedures designed to reduce the burden on small business. The Commission's report was required to be submitted no later than December 1, 1980. The Improvements Act provides no express provisions for Congressional response to such plans, and no Committee action is required.

The Act prohibits the Commission from initiating a study or preparing a report on the insurance industry, absent a specific request from Congress. Should Congress desire such a study conducted or report prepared, a majority of either the House or Senate Commerce Committee must submit a specific request to the FTC. However, no such action is required.

*Legislation and committee jurisdiction*

Primary jurisdiction over the FTC resides in the Senate Committee on Commerce, Science and Transportation and the House Committee on Interstate and Foreign Commerce. Ancillary jurisdiction resides in the House and Senate Judiciary Committees and the House and Senate Appropriations Committees. Membership of these committees is listed in Appendix M.

Expected Legislative Activity.—In the 96th Congress, the full Senate Judiciary Committee was chaired by Senator Edward Kennedy (D-Mass). The Antitrust Subcommittee was chaired in the 96th Congress by Senator Howard Metzenbaum (D-Ohio). Senator Charles "Mac" Mathias (R-Md.) was the Subcommittee's ranking Republican member. In the 97th Congress, Senator Strom Thurmond (R-S.C.) will chair the full Judiciary Committee, and Senator Joseph Biden (D-Del.) will serve as ranking Democrat. (Senator Kennedy will move to become ranking Democrat on the Labor Committee, but would be free to reassert his rank on Judiciary should Democrats regain control of the Senate.)

In the 97th Congress, the Committee is expected to eliminate the Antitrust Subcommittee, and vest jurisdiction over antitrust matters in the full Judiciary Committees.

Both Republican and Democrat members of the Judiciary Committee have expressed concerns regarding overlapping and duplicative functions of the FTC and the Justice Department. Antitrust areas which could be

examined by the Judiciary Committee in the 97th Congress include the FTC's exercise of its divestiture authority, the FTC's development of innovative monopoly theories, and the impact of the Magnuson-Moss procedures on FTC jurisdiction. In addition, Members of the Committee have expressed interest in studying the possibility of establishing an independent corps of administrative law judges, transferring some FTC antitrust functions to the Department of Justice, and/or transferring the FTC's adjudicatory functions to the federal district courts. The Commerce Committee held hearings in the 96th Congress on a proposal by Senator Howell Heflin (D-Ala.) to establish an independent ALJ corps, and it is likely that the Judiciary Committee on which Senator Heflin also serves will conduct additional hearings in the 97th Congress.

In the House, both the full Judiciary Committee and the Monopolies Subcommittee are chaired by Congressman Peter Rodino. Ranking Republican on the full Judiciary Committee and the Monopolies Subcommittee is Congressman Robert McClory (R-Ill.).

The House Judiciary Committee seems less likely to pursue the range of issues expected to be addressed by the Senate Judiciary Committee, with the exception that the House Judiciary Committee may examine certain issues associated with the FTC's dual function as prosecutor and judge. Additional attention may focus on international antitrust questions, and amendments to the Webb-Pomereme export trade association statute, currently administered by the FTC. Otherwise, the House Judiciary Committee is not expected to deal in any substantial way with the antitrust jurisdiction of the FTC.

Expected consumer protection activity.—The Senate Commerce Committee was chaired in the 96th Congress by Senator Howard Cannon (D-Nev.), and the Consumer Subcommittee was chaired by Senator Wendell Ford (D-Ky.). The Committee's ranking Republican, Senator Bob Packwood, will become Committee Chairman in the 97th Congress, and the Consumer Subcommittee's ranking Republican, Senator John Danforth (R-Mo.), will take over as Subcommittee Chairman. Senators Cannon and Ford will become ranking Democrats on the full Committee and Subcommittee, respectively.

The retirement of House Commerce Committee Chairman Harley Staggers moves the chairmanship to Congressman John Dingell (D.-Mich.) in the 97th Congress. Ranking Republican James Broyhill (R.-N.C.) will remain in that position. However, the Committee may vote to disband the Consumer Subcommittee, which in the 96th Congress was chaired by Congressman James Scheuer (D.-N.Y.), with Congressman Matthew Rinaldo (R.-N.J.) as ranking Republican. If the Subcommittee is eliminated, jurisdiction over consumer affairs would most likely be transferred to the Transportation Subcommittee, chaired by James Florio (R.-N.J.). No final decisions will be made until after the new Congress organizes itself in January.

Oversight activities are expected to consume the bulk of time the House and Senate Commerce Committees can be expected to spend on FTC issues in the 97th Congress. The Senate Commerce Committee is required to conduct at least one oversight hearing on the FTC at least two times per year. Review of proposed and final rules submitted to Congress by the FTC are expected to consume an unknown amount of Committee time. Specific rules and proposals expected to be transmitted in 1981 include those relating to the funeral industry, used cars, mobile homes, eye glasses, proprietary drugs, and FTC ex parte rules to be developed pursuant to the Improvement Act. In addition, the Senate Commerce Committee can be expected to honor its commitment to address FTC activities in the optometric and proprietary drug industries.

Both the House and Senate Commerce Committee will be required to examine the unfairness standard for acts and practices as it relates to children's and commercial advertising. In addition, it can be expected that the Senate Commerce Committee will examine the unfairness standard as it applies to all acts and practices. The Committee already has compiled a hearing record on the unfairness test, and additional hearings will be scheduled in the 97th Congress.

Both the House and the Senate Commerce Committees have expressed an interest in reviewing Magnuson-Moss rulemaking procedures to determine how those procedures have worked, what effect they have had on regulated industries and on the FTC's jurisdiction, and whether additional procedural safeguards are required.

Criticism of the intervenor financing program administered by the FTC resulted in restrictive language in the Improvements Act. However, some additional restriction on intervenor financing, or total elimination of the intervenor financing authority, can be expected in the 97th Congress.

VI. MISCELLANEOUS

In this chapter, we shall discuss two topics: (a) the Federal Trade Commission's intervenor funding program and (b) the perception on the part of many that the agency has been basically unfair in its treatment of those subject to its rules and regulations. Items on the Team Captain's checklist are found at Appendix N.

*Intervenor funding*

The 1980 Improvements Act mandated changes in the Commission's controversial and highly debated Public Participation Program in rule-making proceedings. The relevant portion of the Commission's memorandum to staff concerning this matter states:

"The Act places limits of $75,000 on the amount any group could receive over the course of a rulemaking and $50,000 on the amount a group could receive in any one year. Moreover, the bill sets aside 25 percent of the funds appropriated each year for small business and, in addition, requires the Commission to undertake a small business outreach program."

The present implementation of this policy has two objectionable features. First, the Commission has set a limit on the actual compensation rate for attorneys of $50 per hour. The alternative would be to set a cap on the subsidization of attorney fees, but not the actual fee charged. The unreasonably low dollar limit forecloses many potential private sector respondents. Second, the $50,000 per year limitation is construed as being a limitation on applicant groups only, thereby facilitating the role of such applicants as conduits for public interest lawyers able to receive more than $50,000 a year for services to more than one program applicant.

The above modifications aside, the more basic question is whether the program should be continued, except possibly as a means of assuring that the views of small business and other respondents directly affected by rule makings who are unable to bear the costs of effective representation are heard. Lengthy reviews of intervenor reimbursement programs and the program itself have been undertaken by the Senate and House appropriations committees and need not be repeated here.

Conceptually, intervenor funding would seem warranted whenever: (a) an agency's staff is captured by those who are regulated, or (b) such funding is the most efficient way of acquiring information. Because the FTC covers a broad spectrum of the economy rather than one industry, it is unlikely to be captured. Furthermore, while some information provided under this program is useful, there is no inherent reason why the staff cannot gather it at less cost. Put differently, the case has not been made that those groups have special insight into or nexus with the needs of consumers or the public interest, or that the Commission staff is itself unable to marshall evidence which such "public interest" intervenors now offer.

With appropriate direction the FTC staff could become more expert at representing the public interest. Of course, this role requires that they carefully analyze the costs and benefits of any proposed action. It is worth noting that one important component of that analysis is a sensitivity to whether an action will disproportionately affect small businesses and thereby lessen competition. For example, often regulatory costs are relatively insensitive to volume, meaning that larger firms can spread these costs over more sales. Thus, in seeking to delineate the impact of a proposed action on the public interest, the FTC staff should take special care to determine its effects on small business.

*Institutional fairness*

A host of issues bearing on the institutional fairness of the FTC have been raised in recent years. They include its *ex parte* policy, its accessibility to potential respondents, as well as events bearing on the agency's reputation.

Ex-Parte communications and accessibility. The FTC Improvements Act of 1980 mandated changes in the FTC's rules concerning ex parte communications with Commissioners in rulemaking proceedings. The relevant portion of the Commission's subsequent staff memorandum states:

"The Act requires the Commission to publish a proposed change to its rules of practice within 60 days which will permit outsiders to meet with Commissioners and to have a transcript or summary of the meeting placed on the rulemaking record. The Commission is also required to amend its rules to preclude staff from communicating to the Commission any relevant facts not on the rulemaking record unless that communication is made public."

The Commission has recently adopted new rules of practice which conform to the letter of the Act. The rule still remains controversial in that ex parte, unnoticed contact is still permitted between Commissioners and Commission staff when those contacts do not involve the communication of new facts by the staff members. In other words, staff counsel in rulemaking proceedings may still meet privately with Commissioners to summarize existing records and/or to issue ex parte pleas for rulemaking decisions—and may do so on an unnoticed basis so long as they do not assert the existence of facts which do not appear in the rulemaking record.

The above rule aside, a broader question remains regarding the accessibility of Commissioners to potential respondents. Overall there appears to be the need for more accessibility. In the case of adjudicative matters, the Commission should be open to ex parte meetings with potential respondents, albeit on the record, prior to the issuance of complaints. It should also be receptive to adversary argument prior to its issuance of such complaints. In the case of rulemaking proceedings, the Commission should likewise be more receptive to early respondent petitions, ex parte and otherwise. Occasions when such contact might be invited are the publication of potential Commission initiatives in the Calendar of Federal Regulations and the initiation of staff requests to the Commission for the issuance of subpoenas in order to pursue intended investigations. In the most general terms, what is critical for a new Commission, symbolically and in terms of real policies, is to create a perception on the part of the private sector that its input is respected.

Other institutional fairness issues.—It is

also important to note briefly that a series of events in recent years have cast a cloud over the FTC's reputation for fairness. Possible prejudgment, interference in independent decisionmaking, ex parte staff influences, carelessness with confidential business documents, and blanket investigatory resolutions which give broad authority to the FTC staff to issue subpoenas have cumulatively cast a pall on the Commission's reputation. Exacerbating this problem is the perception that the Commission's Administrative Law Judges (ALJ's) are biased in favor of the staff. The ALJ's are selected for their appointments by the Commission itself. With only rare exceptions in recent years, the ALJ's have been appointed directly from the FTC staff to the position they now hold. Notably, every ALJ now serving at the Commission has held employment elsewhere on the FTC staff.

[Pages 72–86, the Conclusions and Recommendations section, may be found at 999 BNA Antitrust & Trade Reg. Rep. at G–1 (Jan. 29, 1981).]

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. KASTEN. I yield such time as he may desire to the Senator from Arizona.

Mr. GOLDWATER. Mr. President, I support the nomination of Dr. James C. Miller III to the Federal Trade Commission.

Dr. Miller will bring to the Commission a strong academic background in economics. His economist's perspective on the effects of Government regulation on the free market has been much lacking at the FTC. Because of his notable background in regulatory reform, I expect that the FTC under his leadership will stop seeking regulations in knee-jerk fashion, and will instead concentrate on pursuing regulations where they are most needed, and where they most help the American consumer.

I respectfully urge my colleagues to join with me in supporting Dr. Miller's nomination.

Mr. KASTEN. Mr. President, I ask for the yeas and nays on the Miller nomination.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. KASTEN. Mr. President, I ask unanimous consent that the vote occur immediately after the vote on the nomination of Sandra Day O'Connor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KASTEN. I yield to the distinguished Senator from South Carolina, the chairman of the Judiciary Committee.

Mr. THURMOND. I thank the able Senator from Wisconsin for yielding to me.

Mr. President, I support the nomination of Dr. James C. Miller III, who has been selected by President Reagan to serve as Chairman of the Federal Trade Commission.

Dr. Miller is superbly qualified for this position by reason of his educational background, his experience, and, most importantly, because of his philosophy. Dr. Miller received his undergraduate degree in economics from the University of Georgia and was awarded his doctorate from the University of Virginia. He has served as a college professor and is the author of numerous publications dealing with governmental regulatory practices.

Dr. Miller is no stranger to Government service. He has served as Assistant Director for Government Operations and Research for the U.S. Council on Wage and Price Stability, as well as senior staff economist with the U.S. Council of Economic Advisors. In addition, Dr. Miller has worked in the Department of Transportation. Currently, Dr. Miller is Administrator for Information and Regulatory Affairs in the Office of Management and Budget and executive director of the Presidential Task Force on Regulatory Relief.

Mr. President, while Dr. Miller is unquestionably qualified for this appointment in terms of ability and experience, he is the proper choice for this job because of his commitment to the policies of the Reagan administration. In his testimony before the Senate Committee on Commerce, Science, and Transportation, Dr. Miller consistently stated his support for, and his plans to implement, the policies of this administration.

Important principles which Dr. Miller has emphasized are a need to replace the current adversarial relationship between the FTC and regulated industries with a cooperative one and the need to insure that the Commission staff, like every other bureaucracy, is more responsive to the instructions of the American people, as expressed through their elected representatives.

Mr. President, Dr. Miller is an excellent choice for Chairman of the Federal Trade Commission. I commend President Reagan on his selection, and I urge my colleagues to support this nomination.

Mr. KASTEN. I yield such time as he may desire to the distinguished Senator from Pennsylvania (Mr. SPECTER).

Mr. SPECTER. I thank the distinguished Senator from Wisconsin for yielding to me.

Mr. President, I speak at this time to express my concern about the current enforcement of antitrust policies, and I believe that debate on the nomination of Dr. James Miller poses an opportune time for these comments. I am concerned that antitrust enforcement is not sufficiently vigorous at the present time.

The new administration has dedicated itself to the policy of deregulation, and it is essential in order for deregulation to operate in the public interest to have effective competition.

An essential element of a competitive free enterprise system, in my judgment, is vigorous enforcement of the antitrust laws. I am concerned, from the hearings on Mr. Miller's nomination and from other things which are happening in antitrust enforcement, that this enforcement simply is not sufficiently vigorous at the present time.

I was concerned to note that the Office of Management and Budget earlier this year had proposed a phasing out over 3 years of the FTC's antitust mission. I was concerned to learn from Mr. Miller's testimony at his confirmation hearing that while he would not initiate a complete phasing out of the Bureau of Competition, he intended to ask for a lower level of funding. I am concerned that such a lower level of funding may be an indirect way of phasing out the FTC's antitrust function. Such a policy, when viewed in conjunction with what is happening at the Antitrust Division of the Department of Justice, raises very substantial questions about antitrust enforcement in this country at the present time.

I, for one, was very concerned about the efforts of the Department of Justice to delay the Government's suit against A.T. & T. That application had been made by the Assistant Attorney General in charge of the Antitrust Division, was based on the contention that delay was necessary in order to give Congress an adequate opportunity to pass pending legislation on deregulation, and included a representation by the Department of Justice that should that legislation be enacted, the suit would be abandoned.

The trial judge, Judge Greene, denied the application for a postponement and the case has proceeded. Judge Greene has recently denied A.T. & T.'s motion to dismiss, writing—and I believe this is a very important conclusion:

The testimony and the documentary evidence adduced by the government demonstrate that the Bell System has violated the antitrust laws in a number of ways over a lengthy period of time. On the three principal factual issues—whether there has been proof of anticompetitive conduct with respect to the interconnection of customer-owned terminal equipment (Part III), the Bell System's treatment of competitors in the intercity services area (Part IV), and its procurement of equipment (Part IX)—the evidence sustains the governments basic contention, and the burden is on defendants to refute the factual showings made in the government's case-in-chief.

That appears in Judge Green's memorandum opinion of September 11, 1981, at age 73. There is, of course, an opportunity for A.T. & T. to refute those findings and those conclusions. In that litigation which was commenced in 1974 and had proceeded for some 7 years until 1981, I thought it most inappropriate for the Antitrust Division to ask for postponement and to indicate its intention to withdraw from that prosecution, and I said so in a lengthy statement some weeks ago in this Chamber.

I think that the Justice Department's activities in the A.T. & T. case and the attitude of Mr. William Baxter, the Assistant Attorney General, on the A.T. & T. case are especially significant in view of his prior statement. As noted in Newsweek on July 6, 1981, "the Antitrust chief—referring to Mr. Baxter—had taken a tough position on the A.T. & T. antitrust case." Newsweek quoting Mr. Baxter as saying:

I have taught the phone company case for twenty years,

And the article then continues:

Baxter thinks that for a regulated monopoly like AT&T, the temptation is nearly irresistible to undercut competitors by using

the huge revenues from regulated services to subsidize divisions that compete in unregulated markets. The only way to guard against this, he insists, is to break Ma Bell up into a company whose only function is message-transmission services, with any nonregulated activities such as equipment manufacturing and data processing carried out through a new corporate entity. With this principle in mind, he has vowed, he will "litigate the case to the eyeballs."

Given his stated intention to "litigate the case to the eyeballs," which is a widely quoted statement of Mr. Baxter, it seems to me very strange indeed that Mr. Baxter should then appear before Judge Greene in that precise case and ask that it be postponed, and state the Government's intention to abandon that litigation.

I am especially concerned about Mr. Baxter's attitude in light of testimony which he provided in hearings before the Committee on the Judiciary when I question him about the anticompetitive effects of vertical and horizontal mergers. Mr. Baxter commented, as shown on page 17 of the hearings from March 19, 1981, that he, in effect, had less concern about conglomerate mergers and vertical mergers and was concerned only if they had direct horizontal impacts, which I suggested then and suggest now is an unduly restrictive reading of the antitrust laws of this country.

Responding to my questioning about the merger activity, which at that time was much less than what we have seen since March 19, 1981, and which now includes the Dupont-Conoco merger, Mr. Baxter replied that there were two effects, one relating to anticompetitive impact and the second relating to the "massive capital market transactions." He expressed concern only about those limited effects that are anticompetitive in the narrowest sense, as opposed to concern about massive capital market transactions.

My own sense is that matters involving the "massive capital market transactions," as Mr. Baxter put it, are matters of serious concern for the antitrust laws. At a time when we find interest rates extraordinarily high, we find many companies moving into the borrowing markets and reserving some $5 billion of funds for the purchase of another company, as a number of companies apparently did recently in connection with the Conoco takeover attempts. The heavy movement toward mergers which we have at present, characterized widely as merger mania, requires a much more vigorous attitude on the part of the Department of Justice and the FTC than we have seen up until the present time.

I personally believe that there is still great wisdom in the dictum of Judge Learned Hand from 1945:

> Great industrial concentrations are inherently undesirable regardless of their economic consequences.

While conventional wisdom on antitrust seems to shift and change from time to time, the warning that was handed down by Judge Learned Hand still points, in my judgment, to a major area of concern. I believe that concentration of political power is apt to follow the concentration of economic power. We are witnessing such concentration with the extensive and massive merger activity in this country at the present time. We are seeing mergers which are not based even prima facie on efficiency, mergers where the captains of industry are seeking profits from combination as opposed to innovation, and mergers which I believe should be subjected to very careful scrutiny under the antitrust laws of this country.

I think that the confirmation hearings for Mr. Miller pose an occasion and an opportunity when we should pause and focus on the antitrust policy that our Government is pursuing at the present time, both in the FTC, where Mr. Miller has been proposed for chairmanship, and in the Department of Justice's Antitrust Division.

I thank the Senator very much for granting me the floor, and I relinquish the floor at this time.

Mr. KASTEN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. KASTEN. How much time remains on the various sides for this debate?

The PRESIDING OFFICER. The Senator from Wisconsin has 12 minutes remaining; the Senator from Kentucky has 52 minutes remaining; and the Senator from Ohio has 25 minutes remaining.

Mr. FORD. Mr. President, the Senator from Ohio has authorized me to yield back the remainder of his time.

Therefore, I ask unanimous consent that I may do so.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FORD. Mr. President, I yield back the remainder of the time of the Senator from Ohio.

Mr. STENNIS. Mr. President, will the Senator yield to me?

Mr. FORD. Mr. President, I have 52 minutes. I am glad to yield to the Senator from Mississippi such time as he may desire.

Mr. STENNIS. I wish to speak out of order.

Mr. FORD. Mr. President, we are getting ready to close this out.

Mr. STENNIS. If I am in order fine.

The PRESIDING OFFICER. The Chair recognizes the Senator from Mississippi.

Mr. STENNIS. I thank the Chair.

Mr. President, I just came in the Chamber. I did not know what the parliamentary situation was. I wish some time, frankly 5 minutes, anyway, on the nominee for membership to the Supreme Court.

If I am in order, I wish unanimous consent that I, not having used any time today on any of these nominees, may have 5 minutes for that purpose.

Mr. FORD. Mr. President, I am delighted to yield the Senator 5 minutes on my time on another nomination, but there is some time saved for the minority side prior to the vote on the nomination by the ranking member of the committee.

Mr. STENNIS. Is that on the Supreme Court nominee?

Mr. FORD. Yes.

Mr. STENNIS. I thank the Senator very much.

Several Senators addressed the Chair.

ORDER OF PROCEDURE

The PRESIDING OFFICER. The Chair will restate the understanding with respect to the vote.

The Senator from Wisconsin asked for a unanimous-consent request a short time ago which was consistent with that order, but for purposes of clarity I should wish to state the order in its entirety.

Under the order previously entered, at the hour of 6 p.m. this evening the Senate will vote on the nomination of Sandra Day O'Connor to be an Associate Justice of the Supreme Court of the United States, to be followed immediately thereafter by a vote on the nomination of James C. Miller III to be a Commissioner of the Federal Trade Commission. At present there are orders entered for rollcall votes on both of these nominations. However, on the third nomination to be voted on tonight, namely that of James R. Richards, to be Inspector General of the Department of Energy, there has been no order entered for a rollcall vote.

I thank the majority and minority floor managers.

ORDER FOR YEAS AND NAYS ON THE RICHARDS NOMINATION

Mr. McCLURE. Mr. President, I wonder if there would be an objection on this side of the aisle if I were to ask unanimous consent that it be in order to ask for the yeas and nays on the confirmation of Mr. Richards?

Mr. FORD. I have no objection.

Mr. McCLURE. I make that unanimous-consent request.

The PRESIDING OFFICER. Is there a sufficient second? But first, is there objection to the request of the Senator from Idaho? There being none, it is so ordered.

Mr. McCLURE. Mr. President, I ask for the yeas and nays on the confirmation of Mr. Richards to be Inspector General of the Department of Energy.

The PRESIDING OFFICER. The Senator from California wishes recognition, and I will ask the Senator from California if he wishes to be recognized.

Mr. HAYAKAWA. If the Senator from Idaho will yield to me, are we talking about the Inspector General——

Mr. McCLURE. The Inspector General of the Department of Energy.

Mr. HAYAKAWA. I must enter an objection. I have not yet been sufficiently briefed to vote on this yet.

Mr. McCLURE. I am not asking that we vote now; I am asking that when we get to the vote, that it be by yeas and nays.

Mr. HAYAKAWA. I am perfectly agreeable to that. I have no objection.

The PRESIDING OFFICER. If the Senator from Idaho would restate his request——

Mr. McCLURE. I think we had obtained consent that it be in order to ask for the yeas and nays, am I correct?

The PRESIDING OFFICER. No objection has been lodged.

Mr. McCLURE. I ask for the yeas and nays on that nomination.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered on the nomination of James R. Richards to be Inspector General of the Department of Energy.

Mr. McCLURE. I thank the Chair and I thank the Senator from California.

Mr. FORD. Mr. President, I understand the distinguished Senator from Wisconsin has no further statements to be made on his side. I have no further statements on my side. I would like to propound a unanimous-consent request, if I may. Mr. President, I ask unanimous consent that at the conclusion of 10 minutes yielded to the distinguished Senator from Mississippi that all time on both sides be yelded back and that the next order of business be in order.

The PRESIDING OFFICER (Mr. HAYAKAWA). Is there objection? The Chair hears none, and it is so ordered.

Mr. FORD. Mr. President, do I understand and am I correct in understanding that the motion says that all time has been yielded back on both sides subject to the 10 minutes by the distinguished Senator from Mississippi?

The PRESIDING OFFICER. That is what I understand.

Mr. FORD. I thank the Chair.

The PRESIDING OFFICER. The Senator from Mississippi.

(The statement of Mr. STENNIS will be found at an appropriate place during the debate on the nomination of Sandra O'Connor.)

## DEPARTMENT OF ENERGY

### NOMINATION OF JAMES R. RICHARDS TO BE INSPECTOR GENERAL

The PRESIDING OFFICER. Under the previous order, the Senate will now turn to the consideration of the nomination of James R. Richards, of Virginia, to be Inspector General, which the clerk will state.

The assistant legislative clerk read the nomination of James R. Richards, of Virginia, to be Inspector General.

The Senate proceeded to consider the nomination.

Mr. McCLURE addressed the Chair.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. McCLURE. Mr. President, I rise in support of the nomination of James R. Richards for the position of Inspector General of the Department of Energy. Mr. Richards' nomination, upon receipt by the Senate, was referred to the Committee on Energy and Natural Resources. After a full review of Mr. Richards' background and professional qualifications, and after a hearing held on July 9, the committee unanimously reported the nomination on July 21 by a recorded vote of 17 to 0. Prior to the committee's action, Mr. Richards had fully complied with all of the committee's informational and conflict-of-interest requirements, and no issues remained unresolved.

The information that was made available to the committee indicates that Mr. Richards has had a distinguished career as a highly motivated, effective and objective public servant. I would also note that at no point during the committee's review of Mr. Richards' background was any question raised concerning Mr. Richards' integrity.

Mr. Richards has a distinguished record as a public servant in positions of responsibility which have prepared him and qualified him fully for the DOE Inspector General position. Early in his career, he was an assistant attorney general of Colorado. Later, from 1969 to 1973 he was employed by the U.S. Department of Justice as an assistant U.S. attorney in Denver, Colo; then as Chief of the Organized Crime Strike Force in Buffalo, N.Y.; and later as area coordinator in Washington, D.C., for the Department's Organized Crime Section.

Mr. Richards served from 1974 to 1977 as Director of the Office of Hearings and Appeals in the Department of the Interior. In that position, he had an independent status similar to that of an Inspector General. He was responsible for the successful resolution of many difficult legal disputes in the areas of energy and natural resources.

Unfortunately, as an apparent result of: First, Mr. Richards' most recent employment with public interest legal foundations; second, his testimony in an informal hearing before the Committee on Governmental Affairs; and third, his past professional association with Secretary of the Interior James Watt, Mr. Richards has been declared by some to be an "unsuitable nominee" for the DOE Inspector General position. I must respectfully disagree with such a conclusion.

The Senate has confirmed in this administration, and in the last one, a number of individuals who had been employed by public interest legal foundations and organizations. Some served in positions at the Justice Department with responsibility for enforcing Federal laws. Past employment by a public interest organization should not bar confirmation, particularly where an appropriate recusal has been prepared, as in Mr. Richards' case.

Mr. Richards' testimony before the Committee on Governmental Affairs reveals a man of convictions who was honest and forthright enough to express them candidly to the Senate. That candor and honesty should not render him "unsuitable," nor should his personal views, standing alone, act to disqualify him. Most importantly, Mr. Richards in that hearing reiterated his statement, made earlier before the Energy and Natural Resources Committee, that he would pursue objectively and zealously waste, fraud, and abuse in the Energy Department. That should come as no surprise, since he has done so throughout his distinguished career as a public servant.

Finally, Mr. Richards' past professional association with Secretary Watt should not have any bearing on this matter. DOE has a budget of over $13 billion and over a hundred thousand career and contract employees. The DOE Inspector General is responsible for audit and investigation of the direct DOE programs and employees. Secretary Watt, of the Interior, not of the Department of Energy. He is Chairman of the Cabinet Council on Environment and Natural Resources, with Cabinet-level responsibility for review of broad national policy issues. It is very difficult to demonstrate any arguable nexus between the respective responsibilities of these two men. There is no reason to suggest that their past professional association would impact in any way on Mr. Richards' discharge of his responsibilities as Inspector General.

I hope this discussion about Jim Richards' excellent qualifications and some of the allegations will set the record straight on his nomination. Mr. Richards is well qualified and will make an excellent and effective Inspector General at DOE. I would therefore urge each of my colleagues to support Mr. Richards' nomination.

Mr. President, I will close this portion of the discussion by reiterating what I said earlier: That on July 21, by a recorded vote, the Committee on Energy and Natural Resources unanimously reported the nomination by a vote of 17 to 0.

Mr. President, I call the attention of my colleagues to a letter I have distributed which discusses the Richards' nomination. I hope that all of my colleagues will review that letter before voting.

Mr. President, I have consulted with the distinguished Senator from Missouri concerning the allocation of time on this nomination. While the original consent agreement called for 3 hours, 2 hours to the Senator from Missouri and 1 hour to the Senator from Idaho, with 1 hour and 35 minutes remaining between now and 6 o'clock I ask that that time be allocated 1 hour to the Senator from Missouri and 35 minutes to the Senator from Idaho.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, I yield such time as he may require to the Senator from Virginia (Mr. WARNER).

The PRESIDING OFFICER. The Senator from Virginia is recognized.

Mr. WARNER. Mr. President, it appears to me that the opposition to Mr. Richards' nomination is centered on one fundamental argument, which is this: Because he has expressed strong views on a number of policy issues, there is the possibility that he would use the authority and independence of the Inspector General's office to somehow promote those views. For example, some have questioned whether Mr. Richards, in investigating DOE contracts with energy-producing companies, would vigorously pursue those investigations. The suggestion has also been made that he would not be fully responsive to complaints filed with his office by environmental groups.

Mr. President, I cannot accept the notion that Mr. Richards' policy views would adversely affect his performance

as Inspector General. The fact is, he would not have a policy position at DOE, nor would he even be an active participant in the policymaking function at the Department.

His role would be to serve as the internal agency watchdog, to make sure that the Department is run efficiently, and that its operations are free from fraud, abuse, and waste. In short, Mr. President, the concerns expressed about Mr. Richards, in my judgment, are not convincing, because there is an insufficient connection between his policy views and his actual role as DOE Inspector General. We are left with no reasonable basis for doubting the commitment he made when he appeared before the Committee on Energy and Natural Resources, of which I am a member—and I was present at that time—and stated unequivocally that, if confirmed, he intended to vigorously pursue his duties and responsibilities as the Inspector General of the Department of Energy.

Mr. President, it is for that reason and the reason that, in my judgment, he is well qualified to serve in this position, that I provide my unqualified endorsement of Mr. Richards.

The PRESIDING OFFICER. Who yields time?

Mr. EAGLETON. Mr. President, I yield 10 minutes to the distinguished Senator from Arkansas.

The PRESIDING OFFICER. The Senator from Arkansas is recognized.

Mr. PRYOR. Mr. President, the matter before us this afternoon in the Chamber is really a simple one. It relates to James Richards, who may be, and probably is, a nice guy, but he is being nominated for the wrong job.

James Richards is a policy person, Mr. President. He is a self-described ideologue. He is a man who has worked for the last several years, not only as a lawyer on behalf of his client's involvement in energy policies, but also as a columnist writing articles expressing his strong ideas on energy issues. In my opinion, he is a logical candidate for a policy position somewhere in the Government, but demonstrably ill-suited to be an Inspector General.

An Inspector General should be objective and present an appearance of detachment from the emotional dimensions of an issue. Mr. Richards, in his approach and outlook, is inconsistent with this objectivity. Here are some of the problems I have with his nomination:

First. He has an ideological stake in certain energy activities and does not approach his investigative role with a record of neutrality and objectivity on the subject;

Second. He has publicly attacked organizations—if one can imagine this—like the National Wildlife Federation because of policy differences, but he would need to work with them as Inspector General and command their confidence and respect;

Third. He has staked out a position as a "team player" with Secretary Edwards of the Department of Energy, rather than as a watchdog removed from policymakers in the administration. An Inspector General in any agency should not be a team player.

Fourth. He is the choice to become the Inspector General at the Department of Energy of James Watt, who is now the Secretary of the Interior, who, because of his current position, will be interested in the outcome of energy-related program audits and investigations.

Fifth. Mr. Richards would begin his job with serious deficiencies in a Department of Energy having enough problems with waste and mismanagement without the added burden of Inspector General. Should he be appointed, we are simply telling the taxpayers that we will cut Social Security and national defense spending—but we are giving waste in DOE the propensity to continue because we failed to send effective troops into the battle against waste.

Of all departments, the Department of Energy needs a strong Inspector General. It needs one who will look at the contractors spending tax dollars and making policy. Last year, the Governmental Affairs Committee looked at this issue and, as subcommittee chairman, I found the following significant facts:

While the DOE does not know how many employees work for it under contract, the number may well be 10 times the number of civil servant employees;

The Department's recordkeeping is so poor that it is apparently paying out money for contracts for which the official contract office literally lacks any records;

The Department was unable to produce, after repeated requests from my staff, much of the work paid for by taxpayers on millions of dollars in recent and ongoing contracts; and

Contractors today are running the Department of Energy. They prepare basic plans and budget documents, reports to Congress, and congressional testimony. They answer mail from the public and from Congress. They are paid to prepare basic components of their own contracts, and contracts for others as well. They virtually run the contract file room. They prepare the DOE organization charts and job descriptions of civil servants.

The contractors most heavily relied on by the Department are those who publicly boast of their oil and utility clientele.

Mr. President, do we need an Inspector General who might be questionable about looking into the oil and utility clientele of these contractors? Do we need an Inspector General who might be questionable in his or her zest for finding what the relationship of a contractor and the Department might be?

Mr. President, in a Department so rife with mismanagement and discredited because it is out of control, Mr. Richards fails to meet the test of the type of individual we need. Here is a man who seeks to be a prosecutor, an investigator who comes to the job saying unfavorable things about people who may bring investigative information to him. His comments about the National Wildlife Federation—that it is an extremist group—were not made as a lawyer and advocate but as a columnist. And they were made not in the ancient past but as recently as January 1981.

An Inspector General of any agency, especially the Department of Energy, should be so fiercely independent that he frightens policymakers. He must be the advocate for the citizen, the taxpayer. He should be the one person in a bureaucracy who looks under every rock for hidden misconduct, who encourages and supports whistleblowers, and who never settles for the simple and glib answer. He should be ready to fight for the taxpayer against Cabinet members, Presidents, and Congressmen.

Mr. President, let us face the facts: Mr. Richards is being put in this job by James Watt, who is in another Department as Secretary of the Interior. He owes his appointment to Watt and he knows it. He also knows that Mr. Watt heads the Cabinet's energy and natural resources task force. And he probably knows that the administration is considering moving some of the DOE jurisdiction to Interior. It sounds a little bit incestuous, Mr. President. Frankly, I wonder whether a whistleblower on Jim Watt's staff could confide in a Jim Richards, and whether an audit of Jim Watt's proposals could ever be initiated. It raises a question, and it is a serious question.

But the issue is not James Watt, the Secretary of the Interior. The issue is, do we want one of his people, one of his team players, to be a watchdog over the Department of Energy? The same would have been true of a friend of Cecil Andrus as his watchdog. It is in the best interests of everyone, including Secretary Watt, to have a watchdog who is nobody's pet.

In his testimony before our committee, Mr. Richards seemed to downplay the issue of inspector general independence. He made light of it.

In fact, I went over that day to listen to his testimony, not having any questions prepared, and frankly, not having any serious reservations about this man, James Richards. But after I heard the very pointed questions by the Senator from Missouri (Mr. EAGLETON) and the very fine questioning by the Senator from Michigan (Mr. LEVIN), I began to have deep reservations about this appointment.

He told us, in fact, in that hearing, that he wanted to be a team player, that he wanted to join Secretary Edwards' team and work cooperatively in that job. He even said he wants to dig for fraud, waste, and abuse. But he is not independent, and that is the problem. I thought we made very clear that work of this kind is tough to accomplish, if not impossible, except as an independent Inspector General. What we want is someone who will keep an eye on the team, who will challenge that team, and not be a part of it.

Mr. Richards worked for two organizations with close ties to oil and gas interests—the Capital Legal Foundation and the National Legal Center for the Public Interest. Such associations could

certainly lessen the public's perception that his audits would be as demanding, objective, and hard hitting as they should be. Yet, Mr. Richards himself has put us on notice that past associations are appropriate criteria for judging individuals and that officeholders are influenced by such associations.

In my opinion, we should ask the President of the United States to give us another name for the Energy Inspector General's role. This job is too crucial and the tax dollars too great to settle for a bad or a weak choice or for a choice who may not be independent.

I cannot help recalling the words of Henry Clay in this connection:

Government is a trust, and the officers of the Government are trustees; and both the trust and the trustees are created for the benefit of the people.

Mr. President, James Richards is the wrong man for the wrong job. and I cannot think of one reason why anv Member of the Senate would vote for the confirmation of his nomination to this critical job.

Mr. EAGLETON. Mr. President, I thank my colleague for his much deserved praise of me and Senator LEVIN.

Mr. WARNER. Mr. President, I ask unanimous consent to have printed in the RECORD additional material: A biographical sketch of Mr. Richards, and a recusal statement made by this nominee at the time of his hearing.

There being no objection. the material was ordered to be printed in the RECORD, as follows:

BIOGRAPHICAL SKETCH OF JAMES R. RICHARDS

Mr. Richards was born in Kinderpost, Missouri, on November 21, 1933, and at an early age, moved to Western Colorado. He attended public schools there and upon graduation from Delta High School in 1951 entered Western State College, a small liberal arts college located in Gunnison, Colorado. While there, he was twice all conference in football, President of the Student Body and elected to Who's Who in American Colleges and Universities. In 1955. he received a B.A. degree in History-Political Science and English.

After graduation, Mr. Richards spent the summer as an executive trainee with Goodyear Tire & Rubber Company in Akron, Ohio. He returned to Colorado in the fall of 1955 and became Admissions Counselor at Western State College.

In 1957, he entered the Law School at the University of Colorado where he was a member of Phi Delta Phi and Vice President of his class. He received his LLB in 1960.

After passing the Colorado bar examination, he was appointed Assistant Attorney General for the State and represented the State Highway Department and the State Patrol.

In late 1962, he was asked by U.S. Senator Peter Dominick (R. CO) to join his new Senate staff as Legislative Assistant. He accepted this appointment in January of 1963 and later became Executive Assistant to the Senator, assisting the Senator in his duties with the Senate Banking and Currency. Labor and Public Welfare, and Interior Committees. He also handled various administrative and political duties.

In 1966, he returned to Colorado to open a law practice. For the next three years he was both a sole practitioner and a partner in a small firm.

He decided to accept an appointment as an Assistant U.S. Attorney in Denver in February of 1969. During his two year tenure in that capacity he tried a variety of civil and criminal cases, including a grand jury investigation and litigation involving acts of sabotage in the Denver area. In late 1970, he left Denver to become Chief of the Organized Crime Strike Force in Buffalo, New York. While in Buffalo, he handled investigations and trials of organized crime figures and convicted two legislators of bribery and conspiracy in connection with a proposed $50 million domed sports stadium. In March of 1972, he became an area coordinator of the Organized Crime Section in Washington, D.C., and handled several major investigations and trials throughout the country.

In 1974, he was appointed by then Interior Secretary Morton to be Director of the Department's Office of Hearings and Appeals. This office handled all the quasi-judicial functions for Interior including public lands and energy resource matters.

With the change of Administrations in early 1977, Mr. Richards joined the National Legal Center for the Public Interest as a consultant and authored research on various public interest issues. In early 1978, he continued his work in public interest law and became Vice President of the Capital Legal Foundation, a newly formed non-profit litigating firm in Washington, D.C. In the fall of 1980, he again joined the National Legal Center, this time as General Counsel and Vice President.

Mr. Richards is, single and is a resident of Arlington, Va.

RECUSAL STATEMENT

If confirmed as Inspector General of the Department of Energy, I would recuse myself from participation in, or providing any advice with regard to, (a) any litigation in Federal or State court, and any administrative proceedings (other than the formulation or promulgation of a rule of general application) involving the adjudication of a specific matter, in which the Capitol Legal Foundation was or is a party, or represents a party, and (b) any litigation in which I participated as local counsel for the Mountain States Legal Foundation.

Mr. WARNER. Mr. President, I yield to the Senator from Alaska.

Mr. STEVENS. Mr. President, I join in endorsing James R. Richards as being fully qualified for the position of Inspector General of the Energy Department. The nomination of Mr. Richards was reported by the Committee on Energy and Natural Resources by a vote of 17 to 0, which should indicate great support from those of us having the most direct information on his qualifications.

We know of his extensive experience with the Justice Department and the Department of the Interior. In the Interior Department, as Director of the Office of Hearings and Appeals, he had an independent status much like that required by the Inspector General's position in the Department of Energy.

It seems to me that the attacks on Mr. Richards are primarily associated with his recent employment by public interest legal foundations and his contacts with the Secretary of the Interior, Jim Watt. To me, both arguments are without merit.

I believe we should emphasize that employment in public interest law firms has served as experience for numerous individuals appointed by this administration and prior administrations. The issue seems to be what type of public interest firm is involved.

In particular, Mr. Richards has been accused of taking a biased view of energy and environmental issues. Those who oppose Mr. Richards' nomination have claimed that he is strongly committed to a doctrinaire set of views on a range of energy, environmental, and regulatory issues. Various examples of his views have been provided, including his use of the term "environmental extremist groups" in referring to several major environmental organizations.

Before we draw any conclusions about his use of that phrase, we should hear the rest of the story. In testimony before the Governmental Affairs Committee, he was asked to define that phrase as he had used it. His response was most informative. He defined the phrase "environmental extremist groups" very precisely. He said they were groups that take a position that their position is right, that there is no compromise, and that no other position can be tolerated.

Mr. Richards' definition did not relate to the merits of the positions taken by the environmental groups. He did not suggest that they have extreme positions on issues. Rather, he did nothing more than provide his view of the method of advocacy used by certain environmental groups.

Many would agree with that view. I know that I do. I know that, on the floor of the Senate, I have used the same phrase, "environmental extremist groups," in precisely the same way.

Does Mr. Richards' use of that particular term render him an ideologue who is unsuitable for the position of Inspector General? I hope not, and I hope the Senate will vote for the confirmation of his nomination. I know that I shall.

Mr. EAGLETON. Mr. President, I yield 15 minutes to the distinguished Senator from Michigan (Mr. LEVIN).

Mr. LEVIN. Mr. President, I oppose the appointment of James Richards to be the Inspector General of the Department of Energy.

Like most of my colleagues, I believe that the President should be able to appoint those whom he believes can best meet the goals of his administration, for policy positions within the administration. Most of the positions the Senate is asked to confirm are policy positions, and the President's judgment of a particular individual's qualifications should be of great weight on the confirmation scale. It is our role to assure that the nominee has the integrity to serve the Government with honor and has a basic familiarity sufficient to adequately fill the assigned post.

The position of Inspector General is in somewhat a different category. In England, for example, such a position would be filled by a civil servant who had nothing to do with politics. The office of Inspector General was established because policymakers throughout the Federal Government were not judiciously moni-

toring the operation of their agencies' activities. One of the primary reasons for this was a lack of independence of investigatory and auditing responsibilities from the general administration of Federal departments.

To do the job properly, an Inspector General must be independent of the agency in which he or she serves, not sympathetic to or antagonistic toward the agency or its head, but almost indifferent to its policy goals. Unfortunately, Mr. Richards does not meet this standard. This is not a criticism of Mr. Richards' talents or his character, simply an analysis of his inability to meet this high standard that must be required for all Inspectors General.

During the Senate consideration of the Inspector General Act of 1978, four of the eight amendments offered by the distinguished Senator from Missouri, and accepted by the Senate, were aimed at strengthening the independence of the Inspectors General. All of these amendments are now part of the statute creating Inspectors General. The four do the following:

First, assure that the Inspector General cannot be prohibited from investigating certain areas by the head of the agency;

Second. Require that the President must explain to both Houses of Congress if he or she removes any inspector general from office;

Third. Require inspectors general to review legislation and regulations to judge if they are enforcible; and

Fourth. Give inspectors general power to protect confidentiality of those within the Department who provide information to inspectors general.

These amendments were accepted to emphasize the importance of the independence of the inspector general. The amendments were deemed necessary because of testimony like that of the General Accounting Office, stressing the need, "to insure that auditors are insulated against internal agency pressure so that they can conduct their auditing objectively and report their conclusions completely without fear of censure or reprisal."

As the Government Affairs Committee stated in their report—

The alternative is an exercise in futility where auditors and investigators report to, and are under the supervision of, the very officials whose programs they are supposedly auditing and investigating.

From that same committee report:

In most of the agencies covered by this legislation, this cardinal principle is being violated. In many cases, the audit and investigative units report to the Assistant Secretary for Administration, the person whose broad policy responsibilities are often likely to be questioned and investigated. In general, the lack of independence of many audit and investigative operations in the executive branch is striking.

In that same Governmental Affairs Committee report of 1978, the committee wrote:

The committee wants Inspector and Auditors General of high ability, stature and an unusual degree of independence—outsiders, at least to the extent that they will have no vested interest in the programs and policies whose economy, efficiency and effectiveness they are evaluating.

Finally, from the same report, the Governmental Affairs Committee wrote, in 1978:

Above all, the Inspector and Auditors General created in this legislation would have the requisite independence to do an effective job.

How does this nominee measure up to the standard of independence and objectivity?

First, he describes himself as an ideological zealot, and it was clear from the testimony that this self-analysis was not limited to the zealous pursuit of waste and fraud.

On page 52 of the RECORD Senator EAGLETON asked the following about a column that the nominee wrote:

Senator EAGLETON. Isn't the tone of that column from which I quote, "zealous, sweetheart disposition; overly favorable terms to zealots, stocked key government offices, et cetera," isn't the tone of that column a little bit like the tone of this Reagan victory newsletter from Capital Legal Foundation?

Mr. RICHARDS. I don't think so, Senator. I am a zealot.

Senator EAGLETON. You are?

Mr. RICHARDS. Yes, I am. I pursued the things I was doing with a great deal of zeal.

Senator EAGLETON. Would you consider yourself to be an ideological zealot?

Mr. RICHARDS. In certain matters, yes.

Senator EAGLETON. Would you consider yourself to be an ideologue?

Mr. RICHARDS. Sometimes on certain matters, yes.

On page 57 of that same transcript after Mr. Richards said that he a zealot against fraud, waste and abuse, I asked him:

Senator LEVIN. You are also a zealot on lots of things; lots of ideological issues, even a zealot of fraud, waste and abuse.

And I asked him:

You are a zealot, aren't you, policy-wise?

Mr. RICHARDS. I guess it depends on your point of view, but I am a zealot, and I admit to it. I pursue my philosophies with a great deal of zeal, Senator.

As an Inspector General, as you know, the Inspector General is not generally involved in making policy. That belongs to the Secretary and his line of assistant secretaries.

Senator LEVIN. The question is whether or not you would be able to keep your zealous—in your words—ideological beliefs away from that office any more than the people that you accused the Carter administration of appointing were able to keep away from their office.

Mr. RICHARDS. I would probably succumb to those same human failings, Senator.

Webster's Thesaurus' definition of "zealot" is basically the same as that of other dictionaries, and give the definition of fanatic as the principal meaning of the word "zealot."

For this nominee for Inspector General, whose independence and objectivity is the most critical hallmark, to describe himself as an ideological zealot it seems to me in and of itself reflects an insensitivity to the needs of this job and shows a lack of qualification for this particular job.

Mr. President, his objectivity, his appearance of objectivity, has been influenced by the doctrinaire ideological zealousness that he has shown.

The Senator from Alaska a moment ago said that he does not see any problem in the definition that the nominee has given in terms of groups that he calls environmental extremists, that his definition of environmental extremists in those groups sounds pretty good.

It is the application of that definition that I challenge. It is the conclusion that this nominee reaches, the group such as the Sierra Club, the National Wildlife Federation are environmental extremist groups.

That is what Mr. Richards says about the National Wildlife Federation and the Sierra Club as follows in the transcript. We asked:

Do you consider those two organizations environmental extremist organizations?

And he said:

I think they take some extreme positions on environmental matters.

Senator LEVIN. You described them as environmental extremist organizations. Do you stick by that description?

Mr. RICHARDS. Yes.

First of all, the National Wildlife Federation is known to all of us, and I do not think that federation would be described by any Member in this Chamber as being an environmental extremist organization.

The fact that he, from his ideology, reaches the conclusion that they are says something about the objectivity of this particular nominee.

As a matter of interest, Mr. President, the National Wildlife Federation associate members, according to their own poll, voted 2 to 1 for President Reagan over President Carter in the 1980 election, hardly an indication of an environmentally extreme organization as described by this nominee.

Third, Mr. President, there is other evidence that the nominee does not measure up to the standard of independence we should require of Inspectors General.

He first applied to be Inspector General of the Department of the Interior. However, that was stopped by the White House. The White House rejected this proposal—and these are Mr. Richard's words on page 56 of this transcript:

. . . Because they felt that the relationship between Jim Watt and I was too close and I could not maintain the independent relationship required of an Inspector General.

Then Senator EAGLETON asked him the following question:

Is it not true that Secretary Watt has been named by the President to be the Cabinet coordinator for energy policy matters?

Mr. Richards said yes, he had heard that.

In other words, Mr. President, he was disqualified by the White House for not having the appearance of independence which would be required of the Inspector General of the Department of the Interior because of his close personal

relationship with Mr. Watt, and yet here it is that he is being nominated to be Inspector General of the Department of Energy, and the same Secretary Watt has been named by the President to be Cabinet coordinator of energy policy matters.

The White House logic was good in the first instance in saying that they would not nominate Mr. Richards for inspector General of the Department of the interior because of his close relationship with Secretary Watt. That logic should carry forward and disqualify Mr. Richards for the same inspector generalship in the Department of Energy when Secretary Watt has been named Cabinet coordinator for energy policy matters.

Finally, Mr. President, Mr. Richard's view of the Inspector General's job does not give us much assurance that he understands the independent nature of the job.

On pages 60, 61, and 62 of this transcript over and over again Mr. Richard said that he hoped to be part of a management team in the Department of Energy, a management team.

I would suggest that the Inspector General is supposed to be independent of the management, not antagonistic toward the management of the Department of Energy, but independent of that management.

Mr. President, doctrinaire zealots, partisan ideologues and management team members are not the stuff that Inspectors General should be made of. This is not a personal matter. It has nothing to do with the character or integrity of the nominee. I have no doubt of either. I think he is well qualified for a policy position in this administration.

It has to do with what we believe the Inspector General should do. So while it is not personal, and while it has nothing to do with character and integrity, it has everything to do with independence and the appearance of objectivity that Inspectors General should have.

I thank the Chair and I thank my friend from Missouri for yielding.

Mr. EAGLETON. I yield 5 minutes to the distinguished Senator from Florida (Mr. CHILES).

Mr. CHILES. I thank the distinguished Senator from Missouri.

I rise to oppose the nomination of James Richards. In doing so, I want to remind my colleagues that Inspectors General were intended to be different from executive branch policy positions which require advice and consent from the Senate.

The Congress established different standards for Inspectors General when it passed the Inspectors Generals Act in 1978.

They were to be individuals of demonstrated ability in the areas of audit and investigations—we wanted professionals.

They were to be individuals chosen "* * * without regard to political affiliation * * *." And most importantly they were to be individuals capable of exercising independent judgment.

This quality of "Independent judgment" is crucial if the balance struck in the act between the head of departments and the Congress is to be maintained.

While the act states that an Inspector General shall be under the general supervision of an agency head, it explicitly notes that an agency head shall not prevent or prohibit the Inspector General from initiating, carrying out, or completing any audit or investigation. Moreover, the Inspectors General are to report to the Congress every 6 months in carrying out their responsibilities.

Recall the reasons behind why we created Inspectors General. We wanted to put a thorn in the side of agencies. We wanted an irritant in the agency which would point out fraud and waste.

We all know how difficult it is for a Cabinet Secretary to tell on himself. That is a natural human problem. We wanted the Inspectors General to be there unconstrained and free to point out the problems.

The administration itself has pointed to the importance of this independent character for IG's by declaring the President's intent to name people "meaner than a junkyard dog" to these positions.

I know a little something about junkyard dogs. What makes them mean is that they are always hungry. And they fight. I agree that is kind of what we should have as Inspectors General.

But I do not believe Mr. Richards' temperament can be described as hungry or combative. This nominee could be better characterized as a poodle than a junkyard dog. That is not what the Congress intended for this job.

Mr. President, I feel strongly that the Inspectors General, creatures created by the Congress, are important actors in the fight against fraud and waste.

I personally conducted the confirmation hearings on all the Inspectors General nominated after the 1978 act was passed. Some were better than others. But all of them, including those that have been selected by this administration to date, met a basic standard of independent character.

I believe Mr. Richards' selection is a departure from this standard. He might be a fine candidate for this administration in some other capacity. But not as an Inspector General.

During confirmation hearings Mr. Richards stated how the White House believed his potential nomination as Inspector General for Interior was "out of the question." As Mr. Richards put it:

> Because they felt that the relationship between Jim Watt and I was too close and I could not maintain the independent relationship required of an Inspector General.

Changing the position from Interior to Energy does not, in my mind, change the essence of this judgment. Given Mr. Watt's role in energy policy as Chairman of the President's Cabinet Council on Natural Resources and Environment, Mr. Richards' background, and the lack of any real expression by Mr. Richards on the independent character of the Inspector General's Office is just not there, and I will vote against Mr. Richards for this particular post.

(Mr. SYMMS assumed the chair.)

Mr. EAGLETON. Mr. President, today the Senate considers the nomination of James Richards to be Inspector General of the Department of Energy. This is the first time that the Senate has debated an inspector general nomination, and it will be the first time that such a nomination comes to a rollcall vote.

But if we are breaking new ground in debating this nomination, it is because President Reagan has broken new ground by nominating Mr. Richards.

In enacting the Inspector General legislation, Congress stated its clear intention that the IG's must be men and women of ability and professional accomplishment. But Congress also intended that the IG's bring other qualities to their jobs; that they be nonpartisan, impartial, objective, nonideological. One concept runs through the statute and the legislative history: Independence—the independence needed to objectively audit and investigate departmental programs and the performance of departmental officials running those programs.

Against this backdrop, President Reagan has appointed an ideologue, a self-acknowledged "ideological zealot," a man with deeply held, doctrinaire views—on the whole range of energy and environmental issues. Unsurprisingly, Mr. Richards' passionately held views in the energy and environment area mirror the views held and policies pursued by key Reagan administration officials. And if Mr. Richards' doctrinaire views and dedication to the policy goals of the Reagan administration were not disturbing enough for an IG, Mr. Richards' longstanding friendship and working relationship with Secretary Watt compounds the danger of this nomination and erases any hope that he can perform with the independence that Congress expected of the IG's.

As the chief Senate sponsor of the 1978 Inspector General Act, I strongly oppose this nomination. It sets a terrible precedent and threatens to do lasting damage to the effectiveness and credibility of the Inspector General Offices.

A brief review of the history and purpose of the Inspector General Act helps make clear just how inappropriate this nomination is. Congress adopted the Inspector General Act because the executive branch's approach to audit and investigation activities was not working to combat fraud, waste, and mismanagement. In passing the Inspector General legislation, Congress opted for strong medicine, a substantial departure from "business as usual." The act centralized audit and investigative responsibilities in a single high-level official reporting only to the head of the department and to Congress. By doing so, the act eliminated the common practice followed by the agencies of having auditors and investigators reporting to the officials who ran the programs supposedly being audited and investigated.

But Congress also made it clear that the IG's were to have unique independence even from the head of the department. Section 3 of the act provided that the agency head could not—

> prevent or prohibit the inspector general from initiating, carrying out or completing

any audit or investigation, or from issuing any subpoena during the course of any audit or investigation.

Section 5 insured that the reports required of the IG's—both the routine semiannual reports summarizing the office's activities and the reports on "particularly serious or flagrant problems, abuses or deficiencies" would go to the agency head, then to Congress, but that the agency head must send the report along to Congress without change, although the agency head could add such comments deemed appropriate.

The legislation also establishes that the IG's occupy a unique position in the executive branch, even vis-a-vis the President. The legislation takes the unusual step of stating that while an Inspector General—

may be removed from office by the President, the President shall communicate the reasons for such removal to both Houses of Congress. (Section 3(d).)

Congress included these provisions so that the inspectors general would have unique independence. The Senate committee report on the legislation makes these significant observations:

The inspector general's authority to initiate whatever audits and investigations he deems necessary or appropriate cannot be compromised. If the head of the establishment asks the inspector general not to undertake a certain audit or investigation, or to discontinue a certain audit or investigation, the inspector general would have the authority to refuse the request and to carry out his work. Obviously, if an inspector general believed that an agency head was inundating him with requests in certain agencies to divert him from looking at others, this would be the kind of concern that should be shared with Congress. (Page 9.)

* * * * *

Even if the requirement [for the President to communicate his reasons for removal to Congress] places some constraints on his removal power, the Committee believes that the requirement is justified and permissible. [Supreme Court cases] have made it clear that limitations on the removal power are permissible with respect to those offices whose duties require a degree of independence from the executive. The Committee intends for the inspector general to have that measure of independence. (Page 26.)

The provisions already discussed illustrate the institutional relationships and independence that Congress envisioned for the IG. The legislation also includes provisions dealing directly with the personal qualifications of the IG's.

IG's are to be appointed "without regard to political affiliation and solely on the basis of integrity and demonstrated ability in accounting, auditing, financial analysis, law, management analysis, public administration, or investigations".

Unlike most other Presidential appointees, they were prohibited from engaging in partisan political activities.

The overall intent of the legislation is clear beyond dispute. As the committee report indicates, Congress

want[ed] inspectors general of high ability, stature and an unusual degree of independence—outsiders, at least to the extent that they will have no vested interest in the programs and policies whose economy, efficiency and effectiveness they are evaluating (Page 9).

The evident congressional concern about the kind of people who would become IG's is understandable. Congress was making the IG's the cutting edge in the effort to combat fraud, waste, and mismanagement in the Federal Government given their extraordinary independence and power. Congress recognized that, given relatively limited resources and a broad array of programs to oversee, the IG's would inevitably have enormous discretion in setting their priorities and using their powers. Those powers should be exercised by people whose independence and objectivity was beyond question, people who had no personal or ideological axe to grind.

This review of the IG statute and the legislative history should remind the Senate of the full scope of its responsibility today. The IG's occupy a unique place in the executive branch: They are not policymaking officials, in a very real sense, they are Congress men and women as well as the President's. What may be completely adequate for a policymaking official may not suffice for an IG. Moreover, the President is not entitled to the same wide latitude which the Senate grants him in nominations to policymaking posts. No one can quarrel with the idea that the President is entitled to policymakers who reflect his ideological orientation. But the Inspectors General are not policymakers, and these important positions are not appropriate for "ideological zealots."

Which brings us to Mr. Richards.

For the 3 years prior to his nomination, Mr. Richards has been vice president and legal director of two legal foundations: Capitol Legal Foundation and the National Legal Center for the Public Interest (NLCPI). Capitol and NLCPI are a part of a recently established network of affiliated legal foundations. James Watt, the current Interior Secretary, is the best-known alumnus of this network of legal foundations. Mountain States Legal Foundation, which Watt directed, is the best known link in the chain.

According to a June 2, 1980, press release:

NLCPI and its affiliated foundations seek a balanced perspective in the tradition of American free enterprise principles on broad public-interest issues in the courts and regulatory agencies. The Centers undertake legal actions dedicated to the preservation of sound economic growth, equal opportunity, private property rights, and provide responsible and balanced spokesmanship based on traditional American values.

The legal battles fought by the centers included trying to stop efforts of environmental groups to impose environmental impact statements for the United States exports to foreign nations; affirming the use of Puget Sound for unloading Alaskan oil tankers; easing restrictions on nuclear plants and affirming the constitutionality of the Price-Anderson Act, which limits liability for nuclear accidents. There is no question that the foundations have uniformly advocated the probusiness, prodevelopment, antienvironment, antiregulation side of legal disputes. This is not surprising, given the purposes for which the foundations were created. A 1975 NLCPI statement notes that:

Extremists in the environmental movement must be effectively opposed in the courts. Government bureaucrats who persist in their bias against the private sector must be taught the rule of law in the courts if private institutions are to survive.

The positions advocated by the foundations are also not surprising given who funds them. A. O. Sulzberger of the New York Times observed in 1979 that Dow Chemical Company was NLCPI's largest contributor ($25,000) and that 60 percent of the NLCPI budget comes from 330 large and small companies, including the three automakers, such oil companies as Texaco, Exxon, Gulf, and Mobil and a spread of other companies in fields as varied as steel and potatoes.

Capitol Legal Foundation has apparently not had as diversified a funding base. According to a Washington Star report, Capitol received 44 percent of its 1980 funds, or $135,000 from the Scaife Family Charitable Trust, (this trust is the principal stockholder of Gulf Oil), and 13.5 percent or $40,000 from Fluor Corp., a diversified energy holding company, whose vice president has been chairman of the board of Capitol.

A series of statements by representatives of the foundation provide some insight into the ideological zeal of the organizations and their principal players (including Mr. Richards).

Let me read an illustration from the Capitol Legal Foundation's November 12, 1980, newsletter entitled, "Reagan Victory Effect on Public Interest Law Groups." Capitol, of course, is the foundation that Mr. Richards was the vice president and legal director for 2½ years:

Reagan's victory, reflecting in part a substantial shift in public opinion toward the center or right of our political spectrum, will substantially increase attacks by movement of the left public interest law groups on American political, social and economic institutions. This is because:

1. These groups originated in opposition to Republicans in 1970 and flourished better under Republicans than Democrats.

2. Individuals who joined the Carter Administration will return to their public interest folds as the new administration takes office.

3. The Republican victory in the Senate has or will release from Senate staff positions many highly-trained dedicated, even zealous members of movement of the left, who will return to the groups that bred them, and/or housed them.

4. Funding for movement of the left's groups decreased under the Democratic administration, but will increase with the new administration as individual and foundation supporters prepare to oppose the new administration's policies.

5. Energies of many of these groups naturally increase when they are in opposition, rooted as some of them are in self-hatred and/or contempt of the system that created them. The effectiveness of the movement of the left groups is likely to increase because of the influx of experienced Senate and administration's staff.

An administration in power is always vulnerable to attack from outside, through the courts, the media and passive cooperation between second and third-rank members of

the fifth estate, i.e., the bureaucracy. Accordingly, we anticipate that centrists and right-of-center public interest groups will have to play a much more active role in the next four years in order for them to represent their constituency adequately.

Let me read from Capitol Legal Foundation's year end report, January 14, 1981. After reviewing their litigation (at least some of which seems to be quite useful), the report goes on in a section entitled, Nader Network Report:

We completed our report on Nader's network at the end of the year. Several publishing groups and columnists are interested in it. After it has been reviewed by outside counsel, we will endeavor to see that it is disseminated as widely as possible. We believe it will change somewhat the public's perception of Mr. Nader and his myrmidons.

There is evidence that the foundation is quite preoccupied with Mr. Nader. In another letter, the foundation's president writes:

I am pleased to report that the Nader study will be completed in draft form by the first week in October. Portions of the report have already proved useful. For example, the President of Standard Oil will debate Nader on the Donahue show. They were delighted with the complete dossier we supplied them on his organization's finances and compliance with the law. At least two publishing houses have shown some interest in publishing it and I expect it will create more than a little stir when it is published.

These are the organizations where Mr. Richards worked for the past 3 years, and it is fair to attribute to him the views and attitudes that these statements reflect. Mr. Richards was not one lawyer working in a 200-man law firm or a large corporation where he can convincingly disassociate himself from statements made by the top people. Both Capitol Legal Foundation and NLCPI were very small organizations. Capitol, in 1980, grew from one lawyer—that was Mr. Richards—to three full-time lawyers. NLCPI also had a very small staff, numbering eight—four professional and four support, as of 1979.

Moreover, Mr. Richards is no recent law graduate who gravitated to the only job he could find. He was an accomplished lawyer with experience in both Government and private practice who chose to go to work for two new right-wing legal foundations at salaries of roughly $30,000 a year, when he undoubtedly could have earned a great deal more money, because he believed fervently in their causes. Deep convictions are to be admired—I hold some myself—but it cannot be gainsaid that Richards is an ideologue who strongly espouses the same kind of views that we have heard so far.

But we do not have to derive Mr. Richards' views from those of the groups with which he was affiliated. We have his own words in testimony before the Governmental Affairs Committee; in a column entitled. "Legal Jargon" that he contributed regularly to Oil and Gas Reporter, a trade publication for the oil and gas industry; and in other written work.

For example, in a January 1981, column Mr. Richards describes litigation which delayed the completion of a refinery near Portsmouth, Va. He writes:

The end result is that the first oil refinery on the East Coast in almost a quarter of a century is still far from being completed * * * If this pattern continues and a few environmental zealots are allowed to continually obstruct any real progress, we are in for more long gasoline lines and more energy shortages.

Then he goes on:

One last problem bears mention. The current administration (the Carter administration) stocked key government offices with members of these environmental extremist organizations. Thus, the Department of Justice * * * which is staffed by lawyers from the Sierra Club, the Natural Resources Defense Council, the National Wildlife Federation, and similar groups. As a result, in the past four years, we have seen some "sweetheart" settlements of law suits brought by former associates of these Justice lawyers against government agencies * * * Hopefully, with a change of administration, it may not be necessary for this foundation to intervene in order to assure that issues are fairly litigated, but it appears that new life may be breathed into the litigation strategy when these government lawyers go back to their former positions in the environmental community.

I think it is appropriate to note the resemblance in theme and tone between Mr. Richards' column and the Capitol Legal Foundation's victory letter.

In 1977, working as a consultant to the NLCPI, Mr. Richards wrote a memorandum on the subject of "Legal Priorities Affecting Development of Energy Resources in the Rocky Mountain West." This memo helped lay the groundwork for the creation of Mountain States Legal Foundation, headed by Mr. Watt. The memo, and I ask unanimous consent to place it in the RECORD, includes these comments:

Reviewing Hill against TVA, the snail darter case, before it reached the Supreme Court, Mr. Richards commented:

If both the Court's opinion and the proposed regulations are allowed to stand * * * this will mean that the now infamous furbish lousewort (a snapdragon) may kill the Dickey-Lincoln project in Maine. Honorable mention should go to Clokey's thistle in Nevada (a tumbleweed) and unnamed chickweed in Colorado. One only needs to take a look at the current endangered species list, and imagine trying to cope with the Utah Prairie Dog or the Salt Marsh Harvest Mouse.

* * * * *

Other Congressional enactments and their regulatory implementation tend to strangle operators like the independent oil and gas producers.

* * * * *

Much of the low-sulphur coal in the West lies beneath Indian Reservations or ceded lands. Many coal developers have learned that dealing with Indian tribes makes for a very uncertain world. * * *

It is particularly frustrating to be told about the evils of stripmining. If the cover on the land is sparse, it cannot be revegetated. If the cover on the land is adequate, it will be destroyed. In the final analysis, stripmining may be acceptable to the Indian tribes if the price is right, whereas it will never be acceptable to environmental extremists.

There being no objection, the memo was ordered to be printed in the RECORD, as follows:

LEGAL PRIORITIES AFFECTING DEVELOPMENT OF ENERGY RESOURCES IN THE ROCKY MOUNTAIN WEST

INTRODUCTION

The National Legal Center for the Public Interest has commissioned this study to determine, as nearly as possible, the legal priorities affecting the development of energy resources in the Rocky Mountain West. Considerable attention was given to meetings and discussions with industry executives, Federal and State Government officials, attorneys prominent in the energy law field and public interest groups. Based on suggestions and leads gathered in the discussions and independent research, certain general problems and some rather significant legal issues have surfaced.

GENERAL OBSERVATIONS

If we should have learned any lesson from the oil embargo of 1973–74 and the natural gas shortage this past winter, it is that our traditional sources of energy are finite and rapidly dwindling. These crises have tended to focus national attention on energy and, as Emerson once observed: "Bad times have a scientific value. They are occasions a good learner would not miss." Yet to listen to some of the current rhetoric, one doubts that we have learned very much. There still seems to be a rather widely held view that energy fuel shortages are being engineered by a conspiracy among the major oil companies. Some of these people tell us that we have to break up the major oil companies and replace them with a Government owned energy development agency.

Others contend that we must fight a holding action, utilizing conservation methods and fossil fuels while we accelerate efforts toward the development of solar and fusion energy. A vocal few oppose all traditional means of energy development and promote zero growth/population as the answer. The direct personal use of energy to electrify and heat homes or for gasoline for the private automobile, constitutes only about one-third of national energy use. The other two-thirds is less visible and underestimated and misunderstood by the majority of our population. It is little wonder then that we have no national consensus of what our energy policy should be. Given this atmosphere, it is not surprising that our policy (if it is a policy) is to allow the Court to fashion ad hoc solutions on an uncoordinated and seemingly conflicting case-by-case basis.

ATTITUDES AND PROBLEMS

One of the most frequent opinions voiced by those surveyed was that even environmentally sound energy resource development is frustrated because of the myriad of Federal, State and local authorities and laws that must be dealt with. The provisions of the National Environmental Policy Act, 42 U.S.C. Section 4321 *et seq.*, and particularly Section 102(2)(C) thereof, was most frequently mentioned in this regard.

The required Environmental Impact Statement (EIS) often contains a wealth of irrelevant information, sometimes takes years to complete and is oftentimes the beginning of endless litigation. Government agencies think they now have the "hang of it" and tend to overkill the EIS process. On the positive side, many industry representatives have demonstrated a willingness to fully participate in the process, absorb the additional costs and delays, and use the final document as a planning tool. Some Federal Courts are beginning to hold that a relatively brief EIS will pass judicial muster. *See: Save Our Invaluable Land v. Needham,* — F.2d — (10th Cir. 1976) (57 page EIS held adequate); *Upper West Forks River Watershed Assoc. v. Corps of Engineers,* 414 F. Supp. 908 (N.D.W. Va. 1976) (15 page EIS held adequate); *Beaucatcher Mountain Defense Assoc. et al.*

*v. Coleman, et al.*, — F. Supp. — (W.D.N.C. 1976) (EIS briefly but adequately covered the alternatives.

Finally, if the Congress gets impatient with obstructive tactics, it has demonstrated an inclination to step in and exempt a project from the provisions of NEPA. *See:* P.L. 93–153, 87 Stat. 576 exempting the Trans-Alaska Oil Pipeline, and P.L. 94–207 (Feb. 4, 1976) exempting the control of starlings and blackbirds at Fort Campbell, Kentucky.

Given the seemingly self-cancelling aspect of many Congressional actions, some pundits are suggesting that "the Congress make love—not laws." The series of Court decisions involving the snail darter and the Tellico Project in Tennessee lends compelling evidence to this theory. When the third case in five years finally reached the Sixth Circuit Court of Appeals, the Court enjoined the Tennessee Valley Authority from all activities incident to the Tellico Project which might destroy or modify the critical habitat of the snail darter. *Hill v. TVA*, — F.2d — (6th Cir. Jan. 31, 1977). As a result, some ten to fifteen thousand three-inch fish have permanently halted a project that is 80 percent complete at a cost of almost 90 million dollars. The project was initially approved by the Congress in 1966 and construction commenced in 1967. One of the key aspects of the project was a dam which would augment flood control, provide recreation and hydro-electric power on the Little Tennessee River.

In 1971, the Environmental Defense Fund filed suit in U.S. District Court alleging that the EIS was not adequate. In *EDF v. TVA*, 339 F. Supp. 806 (E.D. Tenn. 1972), they obtained an injunction delaying the project for more than a year-and-one-half. This injunction was affirmed in *EDF v. TVA*, 468 F.2d 1164 (6th Cir. 1972). The EIS was then supplemented and the District Court found it to be adequate. 371 F. Supp. 1004, and the Sixth Circuit affirmed, 492 F.2d 466 (6th Cir. 1974). In the meantime, a University of Tennessee ichthyologist discovered the snail darter's presence in the river above the proposed dam. During this same time period, the Congress passed the Endangered Species Act, 16 U.S.C. Section 1531 *et seq*. They conveniently added a provision permitting the bringing of citizen suits. In early 1975, after NEPA had been complied with, the plaintiffs in the current suit petitioned the Interior Department to add the snail darter to the endangered species list. TVA protested this move but they were overruled by Interior and in late 1975 the snail darter was added to the list.

In early 1976, Hill and others then filed the present suit to enjoin the project on the grounds that it would destroy the critical habitat of the snail darter. The District Court refused to issue the injunction but the Sixth Circuit Court in *Hill v. TVA, supra*, reversed and issued the injunction. The Circuit Court went so far as to say that it would have issued the injunction even if the project had been 100 percent completed and the snail darter had been discovered the day before impoundment of water was to begin. Section 7 of the Act, which the Court held dictated the result, had virtually no legislative history. Ironically, the Congress continued to appropriate money for the project during all of the Court proceedings.

The Court also refused to find an exemption for the ongoing project. The U.S. Fish and Wildlife Service has now proposed regulations to implement Section 7 and these proposed regulations do not provide any exemption for an ongoing project. 42 Fed. R. 4868. (Jan. 26, 1977). If both the Court's opinion and the proposed regulations are allowed to stand, anyone finding an endangered species can stop a project at any stage. The Fish and Wildlife Service has also announced its intention to add approximately 1700 plants to the endangered species list. This will mean that the infamous Furbish lousewort (a snapdragon) may kill the Dickey-Lincoln Project in Maine. Honorable mention should go to Clokey's thistle in Nevada (a tumbleweed) and an unnamed chickweed in Colorado. One only needs to take a look at the current endangered species list, 41 Fed. R. 47180–98 (Oct. 27, 1976), and imagine trying to cope with the Utah Prairie Dog or the Salt Marsh Harvest Mouse.

Other Congressional enactments and their regulatory implementations tend to strangle operators like the independent oil and gas producers. Their rather simple operations are getting terribly complicated. They are regulated primarily by two arms of the Interior Department. The Bureau of Land Management (BLM) has responsibility for management of the surface and reclamation on Federal leases while the U.S. Geological Survey (GS) has responsibility for approval of drilling operations and compliance. New notices to lessees (NTL) by GS have dramatically increased the paperwork and reporting by lessees. For example, NTL–4 requires royalty to be paid to the Government for any vented gas on a Federal lease. One lessee had to take the following steps to remit a check for 65 cents on one of his leases:

1. Determine exact volume of gas vented;
2. Prepared statement of volume;
3. Enter volume on two monthly reports;
4. Prepare invoice for accounting purposes;
5. Allocate proportionate share of the 65 cents among his partners on the lease;
6. Mail all items;
7. GS acknowledge checks and send statement of account.

This simple process took approximately 90 days. Another lessee wanted to drill on his lease during the winter months. However, he was informed that he could not do so until archeological clearance was granted. BLM notified him that an archeological survey would not be acceptable while snow was on the ground. This meant he could not drill until summer. Because the price of interstate gas is rigidly controlled, these producers are unable to recover the extra costs incurred by delays and the hiring of more employees to handle the paperwork. Many of these regulatory burdens come at a time when operators are being urged to produce more from their leases and being threatened with cancellation if they do not. At the same time Interior Department has doubled lease rental fees as of Feb. 1, 1977.

Most observers are forecasting that the Congress will pass a strip-mine bill this year and the President has indicated that he will sign it. Issues such as restoration to original contour, disposal of waste material and surface owner consent are among the most troublesome from a development point of view. How these provisions are finally hammered out will have a great effect on the development of low sulphur coal in the West. Ironically, there is still abundant coal in the East which can be mined by traditional underground methods. However, because of its higher sulphur content, it is difficult to burn under current air quality standards. Utilities have been ordered by the Federal Energy Administration to switch from oil or gas to coal. EPA air quality restrictions and the direction to install expensive scrubbers are delaying the conversion.

The recent announcement by the new Secretary of Interior that all new Federal leases must have his personal approval has left Western coal development in a confused state. Some states have enacted new severance taxes which raise the cost of doing business. Montana's 30 percent severance tax is exhorbitant but coal continues to be mined there. These increased costs are passed along to the consumer and, if a highly restrictive strip-mine bill is passed, costs will escalate even further.

Proposed oil shale development is now in limbo. The development plans on tracts Ca and Cb in Colorado and Ua and Ub in Utah were recently granted a suspension by the former Secretary of Interior. Environmental organizations have challenged the suspension in U.S. District Court in Colorado. Developers privately concede that if the suspensions are lifted or found illegal, they will not make any more bonus payments and probably will turn their leases back to the Government. In any event, any meaningful development will require variances from air and water quality standards. A recent announcement that the new Administration will ask Congress for a publicly funded oil shale project may prove to be a mixed blessing. Meanwhile, the Interior Department is working on an EIS for an *in situ* sale on public lands. So far, the *in situ* technology seems to be the most promising.

Some of the significant legal issues were readily apparent while other complaints related mainly to conflicting and burdensome controls which are difficult to reach with traditional legal process. The issues discussed below are listed according to general categories which are determinative or closely related to energy resource development. In the judgment of the author, the resolution of these issues will have national significance.

WATER

Many traditional mining methods for the extraction of energy fuels and the related preparation or refining methods require substantial amounts of water. This is particularly true with respect to oil shale and coal. Water is a scarce and hotly contested commodity in the Rocky Mountain West. The recent drought in that part of the country has highlighted this factor.

Some energy developers have purchased considerable surface and storage water rights from traditional agricultural users. The conversion of these rights to industrial uses is causing thorny legal problems under the water appropriation doctrines of the Western States. Agricultural uses provide a substantial recharge of the ground water table while industrial uses, being more consumptive, do not. Adjudications for the conversion of these rights are in various stages. Generally, junior appropriators have vested rights in the return flow to the extent their rights may be adversely affected by a change in use. *See: Farmers Highline Canal v. Golden*, 129 Colo. 575, 272 P. 2d 629 (1954); *East Bench Irr. Co. v. State*, 5 Utah 2d 235, 300 P. 2d 603 (1956); *Spencer v. Bliss*, 60 N.M. 16, 287, P. 2d 221 (1955); *Quigley v. McIntosh*, 110 Mont. 495, 103 P. 2d 1067 (1940). However, waste water (that water that does not seep into the ground from irrigation and runs off in a waste ditch) is not subject to appropriation and one who has come to expect it acquires no rights to it. *Boulder v. Boulder and Left Hand Ditch Co.* et al., —— Colo. —— (1976) and *Application of Boyer*, 73 Idaho 152 248 P. 2d 540 (1952).

It has been reported that one major oil company has already adjudicated and converted its water rights in the Water Court in Western Colorado. Environmental organizations have made attempts to intervene in such proceedings and have tried to enlist the aid of local water users, city and county planners, hunting and fishing groups, or any others who may assist in blocking any energy development. These adjudications are much more complex than the simple explanations outlined herein. Nevertheless, these proceedings are critical to energy resource development and such decisions will be critical.

The application of Section 404 of the Federal Water Pollution Control Act amendments of 1972 (33 U.S.C. Section 1374) is raising great fears in the West. That Section grants authority to the U.S. Army Corps of Engineers to regulate the disposal of dredged

or fill materials in all the waters of the United States. The Corps was at first reluctant to extend its regulatory jurisdiction but was instructed by the Court to do so in *NRDC v. Calloway*, 392 F. Supp. 685 (D.C.D.C. 1975). The Government did not appeal this decision and it is now thought that a Federal net has been cast over every pond and puddle in the country.

As early as 1865 the Supreme Court equated navigation with commerce in *Gilman v. Philadelphia*, 70 U.S. 713 (1866). This view was expanded upon in *U.S. v. Appalachian Power Co.*, 311 U.S. 377 (1941), where the Court said that the power to protect navigability extends to any activity that has an effect on navigability. Environmentalists are pressing the Corps of Engineers to apply their permit systems to swamps and marshes located on private and public lands in the West in connection with various wetlands programs. If this is done, litigation is bound to follow.

Another round of controversial water decisions will be forthcoming as a result of the decision of the Supreme Court in *U.S. v. Akin*, 424 U.S. 800 (1976), holding that Indian reserved water rights may be adjudicated in State courts. In *Winters v. U.S.*, 207 U.S. 564 (1908), the Supreme Court decided that the United States impliedly reserved water for the Indians when the Indian reservations were created. The Federal Government, through the Secretary of Interior, owns these rights as trustee for its Indian wards, but until *Arizona v. California*, 373 U.S. 546 (1963), it was unclear as to what standard would be used to measure these rights. In that case the Court held:

"We have concluded, as did the Master, that the only feasible and fair way by which reserved water for the reservations can be measured is irrigible acreage." Id. at 600.

The Court later decided that other Federal reserved rights could be adjudicated in States like Colorado in *U.S. v. District Court for Eagle County*, 401 U.S. 520 (1971) and *U.S. v. District Court for Water Division No. 5*, 401 U.S. 527 (1971). Many Indian Tribes are now planning industrial, recreation or other economic developments and are contending that "irrigible acreage" is broad enough to include water for such activities. Many Western States want a strict interpretation of this phrase because otherwise their adjudicated priorities would be adversely affected. Yet to be decided is whether an energy developer with a lease for Indian mineral resources can rely on the Indian reserved water right.

As if to further complicate matters, the Supreme Court in *Cappaert v. U.S.* — *U.S.* — (1976), decided that the Federal creation of Devil's Hole as a detached portion of Death Valley National Monument in 1952, impliedly reserved enough unappropriated ground water to maintain the pool sustaining the desert pupfish. The Cappaerts were enjoined from pumping ground water for agricultural development on their ranch in nearby Nevada. Even more significantly, the Court held that the United States could establish a valid reserved water right without complying with State water laws. Indians will surely attempt to equate their reserved rights with those of the pupfish.

Since most streams in the West are already overappropriated, much litigation is anticipated. Many cases involved Indian Reservations, since much of the mineable coal lies beneath such lands.

In an attempt to block energy development, environmentalists have contended that water from Federal projects cannot be used for industrial purposes. Water from these projects is oftentimes necessary for any energy extraction in water-scarce areas of the West and normally a surplus supply is available. The test case for this theory was *EDF v. Morton*, 420 F. Supp. 1037 (D. Mont. 1976), which was decided late last year. The Court ruled on summary judgment that the Flood Control Act (33 U.S.C. 701–1 *et seq.*), the Reclamation Project Act (43 U.S.C. 485h(c)) and later Congressional language were broad enough to include the use of water for industrial purposes from such projects.

The case involved water option contracts from the Boysen and Yellowtail Reservoirs in Montana and was of great concern to Kerr McGee Corp. and American Metals Climax, Inc., who intervened. The Court rejected as premature the contention that each water option contract required a separate EIS, citing *Kleppe v. Sierra Club*, 96 S. Ct. 2718 (1976).

However, it has been reported that agreements have been signed which would prevent industrial use of water on the Savory-Pot Hook and Dolores Projects in Colorado unless expressly approved by local water users, the Governor and the Commissioner of the Bureau of Reclamation. These agreements are considered dangerous precedent, for they could be the basis for considerable leverage as to what kind of energy development might be permitted.

If the water projects suspended by the Administration are funded by the Congress, some interesting legal action might result if impoundment of the funds is attempted.

OIL AND GAS/OIL SHALE

One of the most frequent protests by independent oil and gas producers was the doubling of the rental rate on non-competitive oil and gas leases from $.50 to $1.00 per acre. This increase was first proposed by the Interior Department on Mar. 18, 1976, to be effective on July 1, 1976. The effective date was later determined to be Feb. 1, 1977. (42 F. Reg. 1032 (Jan. 5, 1977)). The Department cited the Mineral Leasing Act of 1920 (30 U.S.C. 181 et seq.) and Title V of the Independent Offices Act (31 U.S.C. 4836).

In 1960, the Congress amended the Mineral Leasing Act increasing the rental on non-competitive oil and gas leases from $.25 to $.50 per acre. The amendment was approved on Sept. 2, 1960, and those who had filed applications for such leases prior to that date but had not yet been granted leases filed suit to void such increases as to their applications. The Court in *Miller v. Udall*, 115 U.S. App. D.C., 317 F.2d 573 (1963), held that the increases applied to only those whose leases had been granted before Sept. 2, 1960, were exempt. The current increase imposed by Interior appears to be patterned after the 1960 amendment, except it is by regulation rather than by Congressional Act. The Interior Board of Land Appeals (who decided finally for the Secretary) recently held in *Raymond N. Joeckel*, 29 IBLA 170 (March 14, 1977), that the increase now in question has the same validity as a Congressional Act.

The Board cited *Hannifin* v. *Morton*, 444 F.2d 200 (10th Cir. 1971), where a rental fee for sulphur prospecting permits imposed by Departmental regulation was upheld. Mr. Joeckel made his offer in November of 1976 and in response to a notice of rental due, dated Dec. 17, 1976, he tendered the indicated rental computed at $.50 per acre. The Department then published the final regulations on Jan. 5, 1977. On Jan. 18, 1977, the Department notified Joeckel that he would have to tender $1.00 per acre rental fee. Joeckel refused to do this and did not have a lease on the effective date, Feb. 19, 1977. The Courts have held that the filing of an offer, although a prerequisite to the issuance of a lease, does not give an applicant a valid existing right to a lease. *Miller* v. *Udall*, *supra*, and *Hannifin* v. *Morton*, *supra*.

It would seem that innocent offerors who had their applications pending and had tendered the rental fee should not be penalized simply because the Department had not acted upon their applications before the effective date of the increase in rental fees. In an analogous situation, the rejection of competitive bids on the Outer Continental Shelf are reviewable under 5 U.S.C. 701 *et seq.* and are not committed by law to agency discretion. *Kerr McGee v. Morton*, 527 F.2d 838 (D.C. Cir. 1975). If an applicant could produce evidence that everything was in order but that the Department issued other leases applied for later than his, he might be able to show that the failure to act was arbitrary and capricious. Even broad discretion has its limits. *See* e.g. *James A. Krumhausl*, 19 IBLA 56 (1975) and *G. W. Anderson*, 21 IBLA 328 (1975).

A significant decision involving oil shale placer mining claims has recently been issued in the U.S. District Court in Colorado. In *Shell Oil Co. and D. A. Shale, Inc. v. Kleppe*, Civil Action No. 74–F–739, Jan. 17, 1977, Judge Finesilver ruled that Interior had erred by invalidating six oil shale placer mining claims filed before 1920. The effect of the decision potentially extends to about 50,000 old placer mining claims covering at least 500,000 acres of Federal land in Colorado, Utah and Wyoming according to the opinion.

Under the mining laws, a locator who discovers a valuable mineral deposit is entitled to work his claim and proceed to a patent. In order to do so, he must meet the "prudent man" test, i.e. ". . . where minerals have been found and the evidence is of such character that a person or ordinary prudence would be justified in the further expenditure of his labor and means, with a reasonable prospect of success, in developing a valuable mine . . ." *Castle* v. *Womble*, 19 L.D. 455, 457, (1894). This test has been approved several times by the U.S. Supreme Court. The test was later refined to include the "marketability test", i.e., that the mineral can be removed and extracted at a profit. *United States v. Coleman*, 390 U.S. 599, 602–603 (1968). But the Interior Department had ruled in *Freeman v. Summers*, 52 L.D. 201 (1927) that the test for oil shale was essentially whether it constituted a valuable resource for a *future* profitable market. Oil shale had been withdrawn from location by the Mineral Leasing Act of 1920 (30 U.S.C. Section 181 *et seq.*) but literally thousands of claims located prior to Feb. 25, 1920, had been validated and patented by the Interior Department under the Freeman test until 1964, when Interior began contesting the claims. It was as a result of such a contest that the Interior Board of Land Appeals finally ruled in *United States v. Frank W. Winegar*, et al., 16 IBLA 112, 81 I.D. 370, (1974), that the special oil shale test in *Freeman* would be overruled.

It was this decision (Winegar) that Judge Finesilver reversed in *Shell Oil Company and D. A. Shale, Inc. v. Kleppe, supra*. Judge Finesilver revalidated the six claims involved here on several grounds:

a. Congress specifically explored the special test for oil shale after *Freeman* v. *Summers*, *supra*, had been decided and declined to change the test and thus approved or ratified such a test.

b. The Interior Dept. was estopped from overruling *Freeman* on the traditional doctrine of "equitable estoppel".

c. The Interior Dept. did not establish *a prima facie* showing of the invalidity of the claims. The Government will undoubtedly appeal this case to the Tenth Circuit Court of Appeals. The ruling has national significance in the energy and mining field.

AIR QUALITY

Environmental organizations have been using the Clean Air Act of 1970 (42 U.S.C. Section 1857, *et seq.*) to block development of energy resources. The initial attempt by the Environmental Protection Agency (EPA) to implement the "significant deterioration" provisions of the Act was immediately challenged in *Sierra Club* v. *Ruckelshaus*, 344 F. Supp. 253 (D.C.D.C. 1972), *aff'd. per curiam*

*in an unreported opinion* 41 U.S.L.W. 2255 (D.C. Cir. 1973), *aff'd. by an equally divided Court, sub nom. Fri.* v. *Sierra Club*, 412 U.S. 541 (1973). The narrow and confusing District Court opinion is still being debated and interpreted. The Court spoke of the issue as being "non-degradation" but ordered EPA to issue regulations to prevent "significant deterioration" of air quality. Obviously these two terms are not synonymous. EPA issued the final regulations (40 CFR Section 52, 1974) which were immediately challenged by the Sierra Club and affected industries in several Circuit Courts of Appeal. After these new challenges were consolidated in the D.C. Circuit Court that Court upheld the regulations in *Sierra Club* v. *EPA*, 540 F.2d 1114 (D.C. Cir. 1976), U.S. App. pending.

However, that Court contributed to the confusion by refusing to overrule the earlier decision of *Sierra Club* v. *Ruckelshaus, supra.* Environmentalists are insisting that Western states, where industrial development is at present basically confined to the metropolitan areas, classify virtually all areas as Class I—the most restrictive designation. The Act provides that each State may enact air quality standards that are more restrictive than the national standard which is initially Class II under the EPA regulations. If they are successful in accomplishing this goal in States like Colorado, Montana, or Wyoming, most future development of energy resources would require variances from State authorities. It is of little consolation that most litigation would be in State rather than Federal Courts. Congress is currently considering proposed amendments to the Act with the focus on automobile emissions.

Another difficult set of issues is posed as a result of the Supreme Court's decision in *Union Electric* v. *EPA*, 96 S. Ct. 2518 (1976), holding that economic or technological infeasibility may not be considered by EPA in evaluating a state requirement that primary ambient air quality standards be met in the mandatory three years. The Court did indicate that there will be opportunities to consider such factors in hearings on the State Implementation Plans, EPA's drafting of compliance orders or State applications for variances. It is anticipated that considerable litigation will ensue regarding many of these actions.

GEOTHERMAL RESOURCES

One of the important interpretations of the Geothermal Steam Act of 1970 (30 U.S.C. Section 1001 *et seq.*) was recently handed down by the Ninth Circuit Court of Appeals in *U.S.* v. *Union Oil Co. of California, et al.*, — F. 2d. — No. 74–1574, Jan. 31, 1977. Under that Act the Congress left open the question of whether mineral reservations in patents previously issued pursuant to the Stock-Raising Homestead Act of 1916 (43 U.S.C. Section 291 *et seq.*) reserved to the United States the geothermal resources under such lands. The District Court granted the defendants' motion to dismiss, 369 F. Supp. 1289 (N.D. Cal. 1973), but the Ninth Circuit reversed, holding as a matter of law that the mineral reservations in such patents included geothermal resources.

When the Congress passed the Act in 1970 it realized the geothermal steam was an environmentally clean and promising method of producing electricity. It was also aware that much of the resource was beneath the surface of lands that had been patented to private parties with a reservation of coal and other minerals to the United States. Since opinion was divided as to whether geothermal resources are minerals, the Congress simply provided that they shall be considered minerals in the future but whether they were minerals under earlier acts such as the Stock-Raising Homestead Act of 1916 was for the Courts to decide.

The Court candidly admitted that there was nothing in the language or legislative history of that earlier Act to indicate that the Congress in 1916 had ever heard of geothermal resources. In fact, the Court candidly observed:

"Congress was not aware of geothermal power when it enacted the Stock-Raising Homestead Act in 1916; it had no specific intention either to remove geothermal resources or pass title to them." *Id.* at 3.

As recently as 1965, the Interior Department had taken the position that geothermal resources were not minerals because they were basically steam or water. Nevertheless, the Court found that such resources are minerals and were intended to be reserved to the United States.

The Court reasoned that the Stock-Raising Homestead Act was designed to provide patents for large tracks of semi-arid land for agricultural and livestock purposes; that mineral fuels were intended to be reserved; and that geothermal steam did not contribute in any way to the agricultural use. Carried to its logical extreme, this might mean that water is a locatable mineral!

This decision, unless reversed by the Supreme Court, will subject any further development of geothermal resources beneath lands originally patented by the Government to extensive Government regulation. This particular litigation arose in areas known as the geysers in Northern California, but will have an effect on geothermal resources beneath lands in Nevada, Oregon, Idaho, Utah and other Western States.

The question of liability for damages to the surface was left open by the Court on remand. Thus, Union Oil will be liable for damages to the owner of the surface and must comply with Government regulations in exploration and production and will have to pay a royalty to the Government.

COAL

Much of the low sulphur coal in the West lies beneath Indian Reservations or ceded lands. Many coal developers have learned that dealing with Indian tribes makes for a very uncertain world.

In *Crow Tribe v. Kleppe*, CV–76–10, filed Feb. 3, 1976, in U.S. District Court in Billings, Montana, the Crow Tribe is challenging coal prospecting permits and surface mining leases previously approved by the Bureau of Indian Affairs (BIA) and the Secretary of Interior. The Tribe alleges that:

1. The Secretary violated his own regulations in approving the leases;

2. There was no compliance with NEPA;

3. The Secretary violated his trust responsibility toward the Tribe in allowing strip mining which would disturb the surface of much of the Reservation and change the Tribe's culture.

Ironically, most of the development was sought by the Tribe in the late 1960's in order to increase the income yield on reservation lands. Much Indian land and ceded land in Montana is leased to non-Indian agricultural and livestock interest, which provides a much lower income yield than would coal and mineral development. Some of the prospecting permits were issued before the passage of NEPA and some leases were approved at a modest royalty rate before the oil embargo of 1973–74. During and after the oil embargo, interest in and the price of Western coal increased due to it's ready accessability and low sulphur content.

In *Cady v. Morton*, 527 F.2d 786 (9th Cir. 1975), the Friends of the Earth and some owners of ceded lands sued the Crow Tribe and the Secretary to invalidate surface mining leases granted to Westmoreland on the grounds that NEPA had not been complied with. The Tribe and the United States contended that the plaintiffs lacked standing to challenge NEPA because of the unique status of Indians. In its decision, the Ninth Circuit held that there was standing and NEPA did apply. Actually, the Crows had already renegotiated their leases with Westmoreland to reflect a much higher post-oil embargo price and wanted to go through with the deal. A new EIS has now been completed on the Westmoreland leases and presumably surface will now proceed. However, the Tribal Federal Jurisdiction Act (28 U.S.C. Section 1362) allows the Tribe to file suit in U.S. District Court in its own right when the Federal Government refuses to do so.

Thus the Tribe is now suing the Secretary to void the other low royalty leases in *Crow Tribe v. Kleppe, supra*, whereas it had taken the opposite position in *Cady v. Morton, supra.* The real difference between the two situations, one suspects, is that the Westmoreland leases reflect post-oil embargo coal prices whereas the other leases now being challenged do not. The coal developers, who were encouraged by the Tribe and the BIA to submit high bonus bids for the right to prospect, are caught in a none too subtle squeeze. The Tribe has suggested that they might be interested in renegotiating some of the challenged leases at much higher prices and with more control over production. They have not suggested anything about returning any of the bonus bids.

It now seems pretty well settled that NEPA does apply to significant developments on Indians lands. At the urging of the Pueblo Indians of Tesuque in New Mexico, the Secretary took the position that NEPA did not apply because of the unique status of Indians. In *Davis v. Morton*, 469 F.2d 593 (10th Cir. 1972), the Court swept aside this argument and applied NEPA.

The Crows and other Tribes have also been urging the Secretary to approve Indian ordinances permitting the imposition of their own severance taxes on coal and other mineral development conducted on Tribal lands. Considering that the Secretary of Montana already has a 30 percent severance tax which it imposes upon companies working on Indian Reservations there, another tax by the Tribes in addition could drive the price of Montana coal right into the clouds. Such ordinances, if approved by the Secretary, would undoubtedly be challenged in Court. Recently, a Tribe in Montana filed and then withdrew a suit to force this issue. Most assuredly they will be back for another try if the Secretary refuses to approve the proposed ordinance.

It is particularly frustrating to be told about the evils of strip-mining. If the cover on the land is sparce, it cannot be revegetated. If the cover on the land is adequate, it will be destroyed. In the final analysis, strip mining may be acceptable to the Indian Tribes if the price is right whereas it will never be acceptable to environmental extremists.

Mr. EAGLETON. I could go on, but the point should be clear. Mr. Richards has strongly held views on virtually every issue in the energy and environment area. He has studied, litigated, opined at great length. Like them or dislike them. vou know where he stands—on everything. For most positions, that is a real asset. For the Energy Inspector General, it is not.

Given his passionately held views, I see no possibility that Mr. Richards can approach this job with the objectivity Congress envisioned. But for those not yet convinced, there is the additional problem of the nominee's long-standing friendship and association with Secretary Watt. Testifying before the Governmental Affairs Committee. Mr. Richards acknowledged that Secretary Watt wanted him to be Inspector General at Interior, and that he wanted the job. He and Mr. Watt have been friends for years, having worked together as Senate staffers, at Interior. and in the network of legal foundations which included

Capital and Mountain States. However, according to Mr. Richards, the White House said it was "out of the question * * * because they felt that the relationship between us was too close and I could not maintain the independent relationship required of an Inspector General."

I think that the White House was completely right in its concern. And I appreciate Mr. Richards' willingness to advise the committee of how the selection process proceeded. But obviously, the independence problem is not solved by placing Mr. Richards at Energy. There is a significant jurisdictional overlap between the Departments of Interior and Energy, and Mr. Watt plays a leadership role in the whole energy and natural resources area.

The White House went halfway to a good solution; they should have gone all the way.

These concerns about an ideological inspector general, passionately committed to pursuing policy objectives, without the independence and impartiality which Congress envisioned—are these just academic issues, of interest only to the National Academy for Public Administration or Common Cause? In fact I believe that these concerns are very practical and serious.

Testifying before the Governmental Affairs Committee, in response to my questions, Mr. Richards stated that he believes that the energy-producing companies have been "unduly burdened," even "harassed" by the Federal Government (p. 53) and that this overregulation and harassment was certainly a contributing reason for our energy shortage. This is certainly a defensible position, although it is one that I personally reject. Most students of our energy policy over the past 20 years have concluded that the Congress and the White House have been unwisely deferential to the wishes of the oil companies, sometimes, as in 1957 when we placed import quotas to limit cheap foreign oil so as to hold up the price of domestic oil, the results have been tragic. But I recognize that this is arguable. But should the Inspector General have passionate, doctrinaire views on these issues?

As Inspector General, Mr. Richards would have responsibility for auditing and investigating the performance of the energy companies on multimillion-dollar contracts awarded by DOE. Would he do a hard-nosed job of detecting possible cases of fraud, waste, and mismanagement, or would he regard auditing and investigating these contracts as another example of the Government harassing energy producers?

Congress envisioned that the Inspector General would be the focal point for receiving "whistleblower" complaints about fraud, waste, and mismanagement in the Department. Would any midlevel Energy Department employee feel comfortable going to Mr. Richards with evidence of wrongdoing by a high Department official, given his allegiance to the goals of the Reagan administration and his close relationship to Mr. Watt? Would you, Mr. President?

Mr. Richards is a devoted adversary of environmental extremist groups. Could he be responsive to their complaints about fraud, waste, or misconduct at the DOE that they may discover during their service on advisory boards to the Department?

Another deadly serious practical problem arises from another Mr. Richards' columns. As Inspector General, Mr. Richards would have access to all the papers, documents, records, et cetera of DOE, regardless of sensitivity or confidentiality. He would also have subpena power to seek all material needed from third parties, like DOE's contractors, to perform the audit and investigative functions of his office. These are substantial parts of the Inspector General's power, and of course his exercise of discretion.

How would Mr. Richards handle them? He has written a column disturbingly on point, dated April 1980.

In this column, Mr. Richards expressed concerns about two cases involving different aspects of disclosure and protection of business information. In discussing the first case, Mr. Richards said that the Department of Enegry had been overly restrictive in refusing to grant companies access under the Freedom of Information Act to memoranda from a DOE regional counsel and DOE auditors.

One of the reasons cited by the Department for failing to disclose the material was that it related to an active investigative file. The second case concerned the Department of Energy's exercise of subpena power, which was contested by private oil companies but later upheld by U.S. Court of Appeals for the District of Columbia Circuit. With regard to that case, Mr. Richards took the position that DOE's exercise of subpena authority was beyond the construction of statutes and failed to protect the confidentiality of sensitive business information.

In other words, despite the fact that DOE has frequently resembled a sieve in the past, with internal memoranda finding their way to the American Petroleum Institute with monotonous regularity, Mr. Richards favors more disclosure of internal DOE memoranda. Despite the fact that DOE has been generally ineffective in monitoring contractors' performance, Mr. Richards advocates a more restrained use of subpena power by DOE. In his mind, it is just another part of the harassment that the Government continually inflicts on the beleaguered energy producers. Is this an attitude we feel comfortable with in the Inspector General at the Department of Energy?

Since we can assume that Mr. Richards, if confirmed, will not engage in audit or investigative work which might constitute "harassment" in the eyes of the energy producers or the Reagan administration, what will he focus his efforts on at DOE? One possibility is that he might channel the limited resources of his office toward ferreting out fraud, waste, and mismanagement in programs which a person of his philosophical bent dislikes. Through DOE, the Federal Government has made some efforts—not enough—in the area of energy conservation. DOE has responsibility for the Federal Government's underfunded efforts in the developing solar energy and other renewable energy sources. DOE has responsibility for administering the Government's efforts to provide low-income energy assistance and for the weatherization program.

Obviously, these programs are not flawless. A diligent, impartial Inspector General might well uncover problems of fraud, waste, and mismanagement. But these are nickel and dime programs compared to the big research contracts at DOE, particularly in the nuclear area. Given Mr. Richards "ideological zealotry," can Congress—and the public—possibly be confident that Mr. Richards will set priorities and allocate resources strictly on the basis of maximizing the effort against fraud, waste, and mismanagement? Or would Congress and the public fear—with good reason—that Mr. Richards was going easy on matters involving big bucks and big companies, and coming down hard on penny ante programs which he ideologically disliked?

These concerns are not academic or theoretical, Mr. President. They are as real as the front-page story in Friday's Washington Post about the Reagan administration's proposed new round of budget cuts. As my colleagues know, those proposals include an accelerated plan for eliminating the Department of Energy—as well as the Department of Education.

I should digress to say that I have been very critical of DOE in the past, and I am not at all wedded to its current structure. In 1980, I was successful in the Senate in cutting 1,000 slots at DOE, based on the argument that a reduction in DOE's regulatory activities should result in a reduction of the bodies needed in the Department.

But the Post story goes on to say:

> Shutdown of the Energy and Education departments would be largely symbolic in budget-cutting terms, fulfilling Reagan's promise to wipe them out. Their functions would be scattered among other agencies. But real cuts appear to be planned within programs under the two departments.
>
> The proposed cuts in the Energy Department's budget hit virtually everything but nuclear programs, reflecting Secretary James B. Edwards' strong support for these.
>
> Department officials said privately they expect a 45 percent reduction for solar energy, 34 percent for coal and other fossil fuel programs and 63 percent for conservation.
>
> But budget instructions from OMB also direct energy officials as a possible alternate to "prepare a shutdown case" for conservation, fossil and solar programs that would eliminate them in 1983.

Mr. President, as Inspector General, Mr. Richards' statutory responsibility would be to supervise audit and investigative efforts at DOE, impartially, in all the programs established by Congress. But the Reagan administration—this year and next year—will be making the arguments for deep cuts—even shut-

down—in conservation, solar, and other fossil fuel programs. Mr. Richards is a committed supporter of Mr. Reagan's and a philosophical believer in letting the oil and gas companies produce us out of our fix. He does not really believe that the Government has a significant role to play in conservation or solar. The possibility exists—make that the probability—that Mr. Richards would work to further the goals of the Reagan administration by helping to discredit those programs which the administration wants to gut.

Mr. President, the Inspector General's reports can have the effect of discrediting programs or undermining their support in Congress. My colleagues may remember in early 1978 when the first Inspector General Tom Morris of the Department of Health, Education, and Welfare released his stunning report estimating that between $6.3 and $7.4 billion was misspent annually at the Department as a result of fraud, waste, and mismanagement. My colleague (Mr. HARRY F. BYRD, JR.), came to the floor with that report in hand arguing that the Senate should cut HEW's budget at least that much, and others agreed. There is no doubt that the revelation did much to undermine support for some of HEW's programs, both among Congress and the public.

By enacting the Inspector General Act, Congress has made the judgment that we want to know the bad news. That is how this form of Government operates. We believe that "business as usual" has failed and that we must focus and accelerate our efforts to deal with fraud and waste in Government programs. The adverse publicity takes a toll, but in the long run, we believe that the congressional, press and public attention fastened on the Inspector General's work will result in stepped-up efforts by the executive branch to prevent and detect fraud and waste—with eventual gratifying results.

But the Inspector General's resources can be channeled selectively, and the powers of the Office can be abused. That is my real fear about Mr. Richards. I see him as a true believer, deeply committed to his doctrinaire views on energy and environment, passionately attached to the goals of President Reagan and Secretary Watt. Depth of ideological conviction is an admirable trait; I have some deep ideological convictions myself, as do other Members of this body. But it is not a proper calling card for an Inspector General.

Mr. President, the Reagan administration has certain clearcut goals in the energy and environment area. An administration in power should have policy goals, and as politicians, we Democrats can grudgingly admire the harmony with which the Reagan administration policymakers go forward in pursuit of these goals. But the Inspector General is not a foot soldier in the Reagan administration army.

Quite the contrary. In fact, not only is he not a foot soldier for the administration in power; if he does the job Congress envisioned, he may prove to be a pain in the neck for the administration. He may find that programs or policies that the administration likes are in chaos, while those the administration dislikes are serving useful purposes and running well. He may have to tell the Secretary and the Congress that there has been illegal or improper conduct by a high-ranking departmental official. He may have to find that some of the policymakers, in their ideological zeal, are overstepping themselves. He will be hard-pressed to play that role if he is an "ideological zealot" himself.

The Inspector General is not supposed to be a part of the DOE management team, deciding along with Edwards, Stockman, Watt, et cetera, how best to swing the wrecking ball. He has his own responsibilities. They may be less glamorous; they may not appeal to a true believer like Mr. Richards, who wants to be a frontline player in the Reagan revolution. But if that is the case, Mr. Richards should wait for another job. He does not want to be Inspector General as Congress envisioned the position when it established it in 1978.

President Reagan may have his reasons for departing from the high standards which both he and President Carter have followed in making Inspector General nominations. But the Senate has no reason to acquiesce in his decision. We passed the Inspector General legislation; we have told the public that the Inspector General program represents our most significant effort to combat fraud, waste, and mismanagement. We should defend the integrity of the program, and reject this nomination.

Mr. President, I reserve the remainder of my time.

Mr. McCLURE. Mr. President, I yield myself such time as I may consume.

Mr. WALLOP. Mr. President, I support the nomination of Mr. Richards for DOE Inspector General. He is obviously a competent person, and his professional background makes him well qualified for the job.

I have also concluded that this particular nominee has another attribute that is worthy of special mention during this debate. Mr. Richards is exceptionally articulate. He has publicly expressed his personal views on a number of fundamental issues in the areas of energy, environmental protection, and the operation of our Government.

As a direct result of some articles he has written and public statements he has made, Mr. Richards' nomination is now faced with some opposition. To those who oppose him, or are undecided, I pose the following question: To qualify as an Inspector General, must a person have refrained, during his entire professional career, from openly and articulately expressing his personal views on the public issues of the day? We all have strong views on various issues. Undoubtedly, every single Inspector General in the U.S. Government has very strong views on certain subjects. So the issue comes down to the choice of what to do with one's personal views. Are they expressed publicly, or are they locked up or at least limited to strictly private conversations?

Mr. Richards chose to write articles in the American Oil and Gas Reporter. He also chose to provide very direct and straightforward answers to the questions posed to him by members of the Governmental Affairs Committee. In making those choices, Mr. Richards displayed an ample supply of initiative and self-confidence, qualities that are vitally important for an Inspector General.

Mr. President, in conclusion, we can reasonably presume that Mr. Richards will carry out his duties as Inspector General with the same degree of vigor he has displayed in advocating his personal views on various issues. If he does, then he will do his job very well.

Mr. McCLURE. Mr. President, I appreciate the concerns that have been stated by those who have spoken in opposition to the nomination, and I do not intend to belabor that subject.

However, I cannot help noting, in passing, in fairness to the nominee as well as to the organizations he represented, as well as some of the organizations that have been named by those who have argued here against the nomination as having a difference of opinion with Mr. Richards on policy matters, that apparently at one point it was thought that if Mr. Richards were in opposition to several different groups, in each instance he was then an extremist in opposition. I assume, then, that the corollary is that those groups are extremists on the opposite side, which may make the point that Mr. Richards was trying to make, that it is a difference of opinion; and if the difference of opinion is held consistently by people on opposite sides, then people on opposite sides may be described by some as extremists or zealots on an ideologic basis.

Let us not forget to look at not just the record of a specific hearing or just at a single facet of Mr. Richards' career, but to look at the totality of his background. Certainly, the Inspector General's Office is to be an independent Office, to be exercised with diligence and I hope with some obstinacy at times. We look back at a man's record to determine whether or not he will be diligent. Will he, as a matter of fact, stick to a task that he has undertaken and pursue it to the end? Will he be deterred by pressures which may be brought upon him in opposition to what he is saying?

Let us look back at his record for a moment.

After passing the Colorado bar examination, he was appointed assistant attorney general for the State and represented the State highway department and the State patrol.

In late 1962, he was asked by U.S. Senator Peter Dominick to join his new Senate staff as legislative assistant. I believe that was the year that Senator Dominick was elected and came to the Senate. He accepted this appointment in January 1963 and later became executive assistant to the Senator, assisting the Senator in his duties with the Senate Banking and Currency, Labor and Public Welfare and Interior Committees. He also handled various administrative and

political duties as an executive assistant to the Senator.

In 1966, he returned to Colorado to open a law practice. For the next 3 years he was both a sole practitioner and a partner in a small firm.

He decided to accept an appointment as an assistant U.S. attorney in Denver in February 1969. During his 2-year tenure in that capacity, he tried a variety of civil and criminal cases, including a grand jury investigation and litigation involving acts of sabotage in the Denver area. In late 1970, he left Denver to become chief of the organized crime strike force in Buffalo, N.Y. While in Buffalo, he handled investigations and trials of organized crime figures and convicted two legislators of bribery and conspiracy in connection with a proposed $50 million domed sports stadium. In March 1972, he became an area coordinator of the organized crime section in Washington, D.C., and handled several major investigations and trials throughout the country.

That does not sound to me like the record of a man who is so bound by ideological philosophy that he cannot carry out the responsibilities of an office to which he is appointed. It is a record to which no one has pointed with anything less than extreme satisfaction and with the most laudatory comments about the manner in which he conducted those responsibilities.

To continue, in 1974 Mr. Richards was appointed by then Interior Secretary Morton to be Director of the Department's Office of Hearings and Appeals. This Office handled all of the quasijudicial functions for Interior including public lands and energy resource matters.

With the change of administrations in early 1977, Mr. Richards joined the National Legal Center for the Public Interest as a consultant and authored research on various public interest issues.

The debate has centered around Mr. Richards' employment by public interest law firms, described as an interlocking web of such organizations. I point out that an interlocking web of similar organizations has provided a great number of officials for the past administration. I do not recall that at any point it was seriously argued here that members of such public interest law firms should not become members of that administration.

I believe that in one instance, it seemed a little strange that an attorney representing such a public interest law firm, handling litigation against the Government, would then join the Government and be the Government's attorney defending against the lawsuit he had brought on the other side, when he was outside. As a matter of fact, after some such discussion, there was a recusal in which that attorney then did withdraw from consideration of the case which he had been prosecuting on the other side, only after there were threats of disbarment if he continued.

So, as a matter of fact, if we look back just a short 4 years, we will find a great deal more of substance to complain about that can be brought to bear upon this particular appointment.

As a matter of fact, I believe it would be unfortunate if we became so concerned about the policy decisions and policy positions of individuals that we would undertake to cast some aspersions upon the character of Mr. Richards; because I believe the record is complete, the record is without any refutation at all, that his past performances in his various positions have been ones that reflected only with favor upon the issue of his integrity and his diligence in carrying out the tasks assigned to him.

I know there has been a great deal of interest expressed at various times about those who support public interest law firms or public interest groups. Various efforts have been made by certain public figures and public bodies to get at the contributors' lists of Common Cause or to get at the lists of the Natural Resources Defense Council or to get at the lists of the Sierra Club or to get at the lists of others who, by their own definition, are public interest groups.

My point is not to suggest that Ralph Nader at times does not reflect public interest, but to indicate that if somebody has had an affiliation with some group and has been an employee of such group, and if that disqualifies him from public service, we would have disqualified much of the last administration from such public service.

As I recall, the point was made several times that there was an apparent conflict of interest, but that never deterred President Carter, and I suggest that in this instance perhaps what we are seeing is a replay rather than any serious attempt to malign Mr. Richards' character.

I hope that the Senate will indeed confirm Mr. Richards in this job, and I am sure there will be a continuing look at his performance in his duties as Inspector General. If, as a matter of fact, any such conflict should arise, I am sure there will be those who will very quickly point it out and raise that issue with respect to his continued qualification to serve in that job.

Until such time as it occurs, that his actions will indeed reveal such conflict, I do not believe that the record that has been developed thus far indicates that it is likely to happen.

As a matter of fact, all of the record up to this point indicates quite the contrary, that he is qualified to hold this job.

Moreover, I suspect that there are those of us on both sides of the aisle who last year and this year will be looking at the Department of Energy and its various contracting and administrative authorities and wondering whether or not there is any kind of a conflict of interest between the issues of public policy and the administration of that Department.

If a man with the experience and background of Mr. Richards is not capable of dealing with that problem then I suggest we are going to have a very difficult time finding someone who is.

I do not know about organized crime in Buffalo, N.Y. I suspect it is more extensive than it is in my home State of Idaho. I trust that it is because we have not had a great deal of difficulty with that. Although as a former prosecutor, I know and I know that the Senator from Missouri with his background in law enforcement knows, the difficulty in dealing with the investigations into the area of organized crime and that the task forces under the direction of the U.S. Attorney's Office and the Department of Justice must indeed be very diligent and very capable if they are to carry out their responsibilities.

Mr. Richards would not have been selected for such a role had he not demonstrated competence in his previous experience in the U.S. Attorney's Office as well as the attorney general's office in the State of Colorado.

Mr. President, I reserve the remainder of my time.

Mr. EAGLETON. Mr. President, I ask unanimous consent that a series of letters from various organizations including the National Wildlife Federation, et cetera, be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

NATIONAL WILDLIFE FEDERATION,
*Washington, D.C., September 18, 1981.*

DEAR SENATOR: Mr. James Richards has been nominated to become Inspector General of the Department of Energy. Mr. Richards' prior employment demonstrates a strong background in law and the investigation of fraud and abuse while an employee of the Department of Justice, and the competence to manage an office the size and complexity of the Inspector General's.

The Congress has in the past indicated that candidates for the post of Inspector General were to possess unique qualifications. The Senate Report accompanying the Inspector General Act of 1978 provides an important review of the purposes for an independent office within the agencies and Departments, and the abuses which led to their creation. That Report states that such appointments shall be made "without regard to political affiliation and solely on the basis of integrity and demonstrated ability in accounting, auditing, financial analysis, law, management analysis, public administration or investigations." On these grounds, Mr. Richards is a qualified candidate.

However, the Senate went beyond a test of competence in its explanation of the qualifications for the post of Inspector General. The Senate Report states that one of the purposes of establishing Inspectors General was to overcome the reluctance of agency administrators to report waste, mismanagement, or wrongdoing. It notes two reasons why this occurred. First, such revelations often "reflect on him personally." Secondly, "even if he is not personally implicated, revelations of wrongdoing or waste may reflect adversely on his programs and undercut public and congressional support for them." The Report goes on to state, "For that reason, the audit and investigative functions should be assigned to an individual whose independence is clear. . . ."

The Senate Report elaborates upon this point when it states, "The Committee wants Inspectors and Auditors General of high ability, stature, and an unusual degree of independence—outsiders, at least to the extent that they will have no vested interest in the programs and policies whose economy, efficiency, and effectiveness they are evaluating."

By his own words, Mr. Richards disqualifies himself from consideration for the post of Inspector General. He testified before the Senate Committee on Government Affairs that he is an "ideologue" and an "ideological zealot" who feels that in the post of Inspec-

tor General he will be part of the "management team" at DOE.

It is difficult to accept that Mr. Richards could carry out his duties in an unbiased manner. He has worked in the past for organizations which were supported by the financial contributions of large energy-related corporations. He was not a mere staff member of these organizations, but at different times, General Counsel, Legal Director, and most recently Vice President. He acknowledges taking part in fund-raising activities for these organizations, and that his motivation for working in these positions was to further the goals of these idealogue groups.

Mr. Richards noted that he has had a long-standing personal friendship with the Chairman of the President's Cabinet Council on Natural Resources and Environment which establishes the Administration's energy policy. In fact, he was recommended for the job as Inspector General by the person in charge of defining the Administration's energy policy.

Finally, given the close connection Mr. Richards has had in the past to large energy-related businesses, it is disturbing to realize that he will be responsible for auditing and conducting investigative activities respecting the multi-million dollar contracts which such firms have with the Department of Energy. In questioning before the Senate Committee on Government Affairs, Mr. Richards rejected the notion that he should withdraw himself from matters before his office regarding firms which had contributed to his former organizations. While Mr. Richards may feel that he can maintain objectivity in dealings with his former financial supporters, we can find no compelling reason for the public to extend that trust to him when large amounts of the taxpayers' dollars are at stake.

These aspects of Mr. Richards' background make him an unsuitable candidate for the sensitive position of Inpector General of the Department of Energy. They clearly run counter to the qualifications set forth by the Senate Committee on Government Affairs, when it passed the Inspector General Act after a long period of careful investigation and deliberations over waste, fraud, and mismanagement in federal agencies. It is evident that Mr. Richards is an individual with close personal and ideological relations with the Administration and its policies, which Mr. Richards would be asked to objectively audit and investigate should he be confirmed by the Senate.

We urge you to reject the nomination of Mr. James Richards for this position, and request the Administration propose a candidate with the strong professional credentials of Mr. Richards, and the clear independence to carry out the duties of this position effectively.

Sincerely,

CHRIS PALMER,
*Director, Energy and Environment, National Audubon Society.*
DR. JAY D. HAIR,
*Executive Vice President, National Wildlife Federation.*
BROOKS YEAGER,
*Washington Representative, Sierra Club.*

---

PUBLIC CITIZEN,
*September 15, 1981.*

DEAR SENATOR: Later this week the Senate will consider the nomination of James Richards for the position of Inspector General for the Department of Energy (DOE). We believe that neither the federal government nor the public interest will be well served by the confirmation of Mr. Richards to this post and we urge you to oppose his nomination.

The Inspector General Act passed by the Congress in 1978 established a series of posts within the federal government from which the battle against waste, fraud, mismanagement and other abuses of government could be waged. In order to pursue this aim most effectively, the Inspectors General were given unique independence from the leaders, policymakers, auditors and investigators of the agencies subject to each Inspector General's jurisdiction.

To ensure the highest degree of professionalism among the Inspectors General, Congress was quite specific about appointments to the position. The Act specifies that Inspectors General shall be nominated "without regard to political affiliation and solely on the basis of integrity and demonstrated ability in accounting, auditing, and financial analysis, law, management analysis, public administration, or investigation."[1]

The nomination of Mr. Richards does not comport with the spirit and the specifications of the Inspector General Act.

From July 1977 to May of this year, Mr. Richards held a number of increasingly important positions within the Capital Legal Foundation and its parent organization, the National Legal Center for the Public Interest, so-called "public interest" groups funded by wealthy conservatives and large corporations. Secretary of the Interior James Watt, instrumental in securing Mr. Richards' nomination, according to congressional testimony, is an alumnus of this conglomerate of advocacy organizations.

During his tenure with these groups—a chronology of Mr. Richards' rise in their ranks is attached—the nominee acted as a determined adversary of what he has described as "extremist groups", environmental and otherwise. In columns he wrote for an energy trade periodical, The American Oil & Gas Reporter, Mr. Richards advocated greatly increased development of energy resources, urged that oil companies be given greater access to DOE internal documents, suggested that DOE authority to obtain information from energy firms be restricted, and railed constantly against judicial enforcement of procedures governing energy and environmental matters.[2]

In testimony before Senate panels considering his nomination, Mr. Richards repeatedly referred to himself as a "zealot" and "idealogue," and blamed harassment of the oil and nuclear industries by government regulation and the press for aggravating America's energy crisis.[3]

While Mr. Richards' credentials might be suitable for other types of public service, his highly political and ideological attitudes toward key energy issues render him unsuitable for a position which requires independent, objective and impartial assessments of activities and programs operated by political appointees and implemented in many cases by members of the energy industry.

Indeed, the nomination of James Richards guarantees the development of conflict of interest between the duties he would assume as Inspector General of DOE and his previous activities on behalf of the Capital Legal Foundation and the National Legal Center for the Public Interest, since a number of energy firms which were major contributors to these organizations do business with or are regulated by the Department of Energy.

Under sharp questioning during his confirmation hearings, Mr. Richards reluctantly divulged the names of some major contributors to the organizations with which he was recently associated (these groups have consistently refused to make public their sources of support). They are: Fluor, Southern California Gas Co., Peters Fuel Corp., as well as AT&T and Chase Manhattan Bank. When asked whether as Inspector General he would disqualify himself from matters before DOE in which some of these contributors were involved, Richards said he "wouldn't feel any compunction to remove" himself from such proceedings.[4]

The DOE acutely requires an independent, politically neutral Inspector General.

With allegations of massive noncompliance by energy companies with DOE regulations, abuse of contracting practices the budget for which runs to the billions of dollars at DOE, and constant criticism of waste and inefficiency in its programs, the Department of Energy urgently requires an Inspector General with no prejudicial or preconceived attitudes toward any of the parties frequently involved in DOE matters: citizen watchdog groups, energy firms, environmental organizations, the press. The DOE Inspector General must be prepared and willing to search for and criticize improper departmental activities or misconduct or abuse by political appointees. Mr. Richards' background raises serious doubts about whether he would be able to carry out these responsibilities.

The last Inspector General of the Energy Department, Kenneth Mansfield, was a scrupulously impartial career civil servant who was nominated to be the first Inspector General for the Bureau of Foreign Assistance of the State Department by President John F. Kennedy in 1962.

A major blow to the independent and nonpartisan nature of the office of Inspector General was struck by President Reagan shortly after his inauguration when he requested the resignations of Mr. Mansfield and every other Inspector General in the federal government. Confirmation of Mr. Richards will complete the process of converting the office of Inspector General to a political appointment. The result can only be a reduction in the efficiency of our government, and a loss of confidence in it on the part of all citizens. We urge you to oppose this nomination.

Thank you for your consideration.

Sincerely yours,

HARVEY ROSENFIELD,
*Staff Attorney.*

CHRONOLOGY OF JAMES RICHARDS' EMPLOYMENT BY CONSERVATIVE "PUBLIC INTEREST" FOUNDATIONS

(From Senate confirmation hearings)

Early 1977—part-time consultant, National Legal Center for the Public Interest (NLCPI)

July 1977—full-time consultant

Early 1978—Capital Legal Foundation formed; appointed Vice President and Legal Director

September 1980—Appointed General Counsel and Vice President, NLCPI

May 1981—Resigned affiliation with NLCPI

June 1981—Became consultant to DOE Secretary Edwards in anticipation of confirmation as Inspector General

Mr. EAGLETON. Mr. President, I yield myself the remainder of my time.

The PRESIDING OFFICER. The Senator has no time remaining.

Mr. EAGLETON. I had 5 minutes. The Senator from Idaho yielded me 5 minutes; I used 2 minutes and 40 seconds of the 5 minutes. I therefore have 2 minutes and 20 seconds remaining.

He yielded me 5 minutes.

Mr. McCLURE. Mr. President, if there be any doubt concerning that, I yield the

---

[1] Inspector General Act of 1978, PL 95-452, 92 Stat. 1101, sec. 3(a).

[2] *See* The American Oil and Gas Reporter, January, March & April, 1981 April 1980.

[3] Senate confirmation hearings, transcript p. 52-54.

[4] *Id.*, p. 34-35.

Senator 3 minutes, not in addition to 2 minutes.

Mr. EAGLETON. Not in addition. Three minutes in lieu of the 2 minutes and 40 seconds. I thank the Senator.

The PRESIDING OFFICER. The Senator from Missouri is recognized.

Mr. EAGLETON. Mr. President, the Senator from Idaho is a very skilled and able debater and he is that, but I think he misses the point of this debate.

In fact, if one is a skilled debater and the facts are not on one's side, it is a good thing to miss the point of the debate.

Mr. President, Mr. Richards is not only a clone but the clone of James Watt. When his name was submitted to the White House to join Watt as the Inspector General at Interior, even the White House personnel office, which has a pretty strong stomach, said no, they will not fly. One guy like Watt in Interior is enough, and, as the country knows, more than enough. So we will shunt Richards over to Energy and hide him away over there. Of course, Watt is now running Energy as well.

Mr. President, James Richards could probably pass the Senate as the nominee for Secretary of Energy. The fact that James Edwards holds that office proves one does not have to be qualified for anything to be Secretary of Energy. But James Richards is not nominated for Secretary of Energy. He is nominated to be the impartial policeman for the Department of Energy, to look under rocks, to see what is buried in the closet, to see if there are any skeletons hanging around, to oversee the large contracts handed out by the Department of Energy.

I submit a man with his ideological bias, a man who says "I am an ideological zealot"—those are his words—cannot be confirmed by this body to be the impartial, investigative, auditing, operating Inspector General of the Department of Energy. That is what it boils down to.

Stripped of all the rhetoric, stripped of all the language, that is the issue before this body and that is the issue upon which we will have to and must cast our vote.

Mr. McCLURE. Mr. President, I yield to the Senator from Tennessee, the majority leader, such time as he may consume.

Mr. BAKER. Mr. President, I thank my friend from Idaho.

Mr. President, I join my distinguished colleague, the chairman of the Committee on Energy and Natural Resources, in supporting the nomination of James R. Richards.

As we consider this nomination, we should keep in mind two very significant points. First, not one member of the Committee on Energy and Natural Resources voted against Mr. Richards when the committee reported his nomination. Second, Mr. Richards is well qualified to be the Inspector General of the Department of Energy. He is well qualified not only in the general sense, but also in terms of his professional experience and the application of that experience to the responsibilities that he would have as Inspector General.

Mr. Richards is an attorney with substantial experience as both a Federal prosecutor and administrator. From 1969 to 1974 he was employed in the Department of Justice as an assistant U.S. attorney, as chief of an organized crime strike force, and as an area coordinator for the organized crime section here in Washington, D.C. He has also served as the Director of the Office of Hearings and Appeals in the Department of the Interior, and as a legislative aid to former Senator Peter Dominick of Colorado.

Mr. Richards' background enables him to more than handle the primary duties of the Inspector General. The Inspector General supervises and coordinates audit and investigative activities, and he also recommends policies and procedures for promoting economy and efficiency in the Department. The Inspector General is also charged with preventing and detecting fraud and abuse in the Department's programs and with the identification and prosecution of any persons participating in fraud and abuse.

In light of such duties, Mr. Richards becomes an ideal candidate. He has the technical training as an attorney and Federal prosecutor, and he has the administrative experience as the Director of the Interior Department's Office of Hearings and Appeals.

Mr. President, I recommend Senate approval of Mr. Richards' nomination.

Mr. THURMOND. Mr. President, today I am pleased to rise in support of the nomination of Mr. James R. Richards to be Inspector General of the Department of Energy.

Mr. Richards, a native of Colorado, has held many positions which make him well-qualified for the position of Inspector General. As an assistant U.S. attorney in Denver, and later as chief of the organized crime strike force in Buffalo, N.Y., his duties included handling grand jury investigations and trials involving Federal fraud statutes and corruption.

Mr. President, James Richards has had experience in the executive branch during his tenure at the Department of Interior as the Director of the Office of Hearings and Appeals. He also has experience in the legislative branch, where he served as legislative assistant and as executive assistant to the late Senator Peter Dominick.

Mr. President, I believe the record established by Mr. Richards demonstrates that he is able, competent, and well-qualified for the position of Inspector General of the Department of Energy, and I am pleased to support his nomination.

● Mr. METZENBAUM. Mr. President, I want to begin by commending Senators EAGLETON, LEVIN, CHILES, and PRYOR for their outstanding work in bringing to the attention of the Senate the very serious issues surrounding the nomination of James Richards to be Inspector General of the Department of Energy. I consider this nomination highly inappropriate and I join my colleagues in calling upon the Senate to reject it.

Mr. President, if there is one single agency of this Government that most needs a "junkyard dog" in the role of Inspector General, it has to be the Department of Energy.

The GAO has issued dozens of reports criticizing DOE's management and procurement practices. Time and again, the GAO has pointed to noncompetitive procurement, large costs overruns in DOE-operated facilities and major irregularities in the use of outside contractors. Those irregularities, as Senator PRYOR ably pointed out in hearings held during the last session of Congress, included the use of contractors and consultants to perform work that should have been carried out by civil servants at the Department.

In 1980, 75 percent of DOE's budget—a total of $9 billion—went to outside contractors.

"The Department's reliance on contractors is so extreme," a recent report by the staff of the Government Affairs Committee concluded, "* * * that it is hard to understand, what, if anything, is left for officials to do. Reliance on contractors is not limited to a portion of the Department's activities, or to discrete components of DOE. It permeates virtually all of the Department's basic activities—regulation, spending, and internal management—at virtually all levels of the organization chart."

That staff report goes on to point out a number of other problems—problems that constitute an open invitation to waste, fraud, and abuse on a massive scale.

DOE regulations, for example, state that consultants may only be hired temporarily and only when a shortage of personnel exists. But, in fact, consultants have become permanent fixtures at the DOE.

What do these consultants do? The report says that senior DOE officials were unaware that many of them were, in fact, illegally performing essential Government functions, and where literally hundreds of other consultants were concerned, the Department was unable to produce the work product for which taxpayer dollars had been expended.

And finally, Mr. President, the report points out that DOE relies heavily on contractors who also work for major oil companies—and even for the OPEC cartel. Once again, the potential for abuse is truly extraordinary.

It should be clear, then, that the position of Inspector General at DOE is very important.

DOE must have an Inspector General who can and will aggressively investigate waste, fraud, and abuse in every sector of the Department. The Inspector General must not come to the job with preconceived notions about which projects and technologies are good and which are bad. There can be no sacred cows in a Department in which waste has permeated every corner.

The question before us is whether or not James Richards is the appropriate person to fill that position.

I believe that the answer to that question is a clear and unequivocal "no."

I have no intention of questioning Mr. Richard's sincerity when he says that, if

confirmed, he will do his best to carry out his full responsibilities under the law. But the fact is, Mr. President, that Mr. Richards brings with him a set of past associations that raise the most serious doubts about his suitability for this sensitive position.

The Inspector General of DOE must be beyond reproach.

To be effective, he or she must be without potential conflicts of interest.

But, unfortunately, Mr. Richards does not meet those minimal criteria—and I believe that his confirmation would damage in the eyes of the people of this country the credibility of this administration's determination to eliminate waste and fraud in the Federal bureaucracy.

Let us look at Mr. Richards' background. For the past 3 years, Mr. Richards has been associated with an organization called the National Legal Center in the Public Interest. He served first as vice president of its Washington subsidary, the Capital Legal Foundation, and later as general counsel for NLCPI as a whole.

NLCPI and Capital are public interest law firms in the same sense that the Rocky Mountain Legal Foundation, formerly headed by Interior Secretary James Watt, is a public interest law firm. In fact, Mountain States is a subsidiary of NLCPI, just like Capital—and its activities can be described as "in the interest" only if one assumes that the activities of the large corporations which provide all of its funding are also in the public interest.

What organizations have provided funds for NLCPI and Capital? I had a difficult time getting the answer to that question from Mr. Richards.

When I first asked who the contributors were, he said that to disclose that information would be illegal. He erroneously cited a provision in the United States Code prohibiting employees or certain Government officials from divulging this information. After I repeated the question, Mr. Richards stated he did not know who any of the contributors were. Finally, after I read a portion of Capital's 1980 annual report thanking the Fluor Corp. for its "generous contribution," Mr. Richards said he might know, but he was not going to tell me because his former employers had not authorized him to do so.

Did Mr. Richards have something to hide? Well, it turns out that in 1980, Capital Legal Foundation received $115,000—almost half of its budget—from the Scaife Foundation Charitable Trust. According to an article appearing in the July 12, 1981, edition of the Washington Post, the trust is controlled by Richard Mellon Scaife, one of the wealthiest men in America. The article states that Mr. Scaife is the second largest individual shareholder in Gulf Oil Co., and that the Scaife Foundation Trust is composed almost entirely of Gulf Oil Co. stock. In fact, according to the 1980 Corporate Data Exchange Stock Ownership Directory, the Scaife Foundation alone owns more than 1.6 million shares of Gulf.

What is the problem with all of this? At the same time that the Capital Legal Foundation was receiving these hefty contributions from the Scaife Foundation, Capital also was fighting the Office of Special Counsel at the Department of Energy, where Gulf had been charged with more than $500 million in pricing overcharge violations. In 1979, when the Office of Special Counsel began lodging the overcharge allegations, the oil companies attempted to present a united front against settling any of the cases. Yet, when the Office of Special Counsel finally obtained a $25 million settlement with Getty Oil, Capital Legal Foundation and Mr. Richards jumped in to fight the settlement, and to this day Capital has continued its attacks upon this Offi e.

Mr. Richards claims that these corporate contributions would not influence his judgment or his activities as Inspector General. But according to DOE procurement records, Gulf has at least six contracts with the Department, totaling more than $25 million. Could Mr. Richards credibly investigate allegations of waste, fraud, and abuse in these contracts in light of his association with Capital Legal Foundation?

But it is not just Gulf. Capital's second largest contributor has been Fluor Corp., a multinational energy company with sales of more than $4 billion last year. Fluor is involved in every aspect of petroleum exploration and development, and also owns one of the largest nuclear construction firms in the world. Its chairman, Robert J. Fluor, is the founder and the chairman of the board of NLCPI. Fluor's executive vice president, Leslie Burgess, is chairman of the board of Capital. Could Mr. Richards credibly pursue any allegations of waste, fraud, and abuse with regard to Fluor's contracts with DOE? There are six of them for a total of $67 million.

And how about nuclear programs?

Because of the large spending increases requested by the Reagan administration, nuclear programs now make up a large portion of DOE's budget. Mr. Richards, who described himself to the Government Affairs Committee as an "ideological zealot," has very strong feelings about nuclear power. In 1979, Mr. Richards, on behalf of Capital Legal Foundation, sued the Nuclear Regulatory Commission in an attempt to overturn the Carter administration's decision to place a moratorium on nuclear fuel reprocessing. Joining Mr. Richards' suit was almost every major nuclear fuel company in the United States.

Closing the nuclear fuel cycle by reprocessing spent fuel rods is a paramount priority for supporters of breeder technology. In light of his strong advocacy of fuel reprocessing, could Mr. Richards credibly serve as a watchdog with regard to the Clinch River Breeder Reactor? What kinds of questions would a self-described "ideological zealot" ask about the 450 percent in cost overruns that a House Energy and Commerce Subcommittee has identified at Clinch River?

There are more examples of Mr. Richards lack of independence and impartiality.

Mr. Richards has testified that groups such as the National Wildlife Federation and the Sierra Club are "environmental extremists." Would he be sensitive to any allegations of waste or fraud these groups might make regarding DOE programs?

Mr. President, I could go on and on with examples of why Mr. Richards simply is the wrong person for this important position at the Department of Energy. Had the administration nominated him to be an Assistant Secretary, I would not have opposed the nomination. He has a long background in energy, and while I might disagree with him philosophically, I would not have objected to placing him in a policymaking position.

The Inspector General, however, is not a policymaker. His office is supposed to be nonpartisan, charged with assuring that the taxpayer gets a maximum return on each and every dollar expended by the DOE.

That job. Mr. President, is not one for a partisan.

It is not one for a person with conflicts of interest, current or potential.

And it is not, Mr. President, an appropriate position for James Richards.

I urge the Senate to reject this ill-considered nomination.●

Mr. SASSER. Mr. President, I join my colleagues on the Governmental Affairs Committee in objecting to the nomination of James Richards for the post of Inspector General at the Department of Energy.

The post of Inspector General is a very sensitive one. An Inspector General is the main investigator of waste, fraud, and misrepresentation within an agency's operations, and, in the case of the Department of Energy, the Inspector General backs up the Federal Energy Regulatory Commission in monitoring and prosecuting violations of price regulations, and in checking on the adequacy of Federal fine collection. It is because of the nature of the post that I must oppose Mr. Richards' nomination.

I am concerned about the objectivity with which Mr. Richards would execute his duties as a monitor of oil and energy company relations with the Government and with the public as a whole.

Mr. Richards former choice of employment, as legal director with the Capital Legal Foundation (CLF), does not show him to be a man whose qualifications are appropriate for the position of Inspector General. CLF receives funds from a number of energy interests, including Gulf Oil. Gulf Oil is now being investigated for gross price violations of $1.1 billion, of which more than half stems from overcharging the consumer. Would Mr. Richards show due diligence in investigating these interests?

The point is that Mr. Richards' background recommends him for a policy position, but not for a position of public trust in matters that may involve the investigation of those energy interests he once used to serve.

Congress envisioned that the Inspector General would be the focal point of receiving "whistleblower" complaints from employees aware of cases of fraud, waste, and mismanagement. Would a whistleblower who discovered some mis-

conduct of misrepresentation be given an objective hearing by Mr. Richards? I am skeptical that he would, considering Mr. Richards' own testimony at the Governmental Affairs Committee.

By his own words, Mr. Richards disqualified himself from consideration for the post of Inspector General at the Governmental Affairs Committee hearing on his nomination. He testified that he is an "ideologue" and an "ideological zealot" who feels that, in the post of Inspector General, he would be part of the "management team" at DOE.

This view of his role as Inspector General flies in the face of why the job was created in the first place. The Senate report describing the rationale for creating the post of Inspector General states that this post was aimed to overcome the reluctance of agency administrators to report mismanagement that might reflect on either themselves or their agency's programs. The report goes on to state that, "for that reason, the audit and investigative functions should be assigned to an individual whose independence is clear * * *"

Mr. Richards wants to be part of the management team, not an independent auditor and objective prosecutor of mismanagement.

And that brings me to the next problem. Although Mr. Richards is a capable lawyer, he does not have a background as an auditor, nor is he a career civil servant. In the past, virtually all Inspectors General have been distinguished auditors. They have largely been auditors working within the civil service.

As a result, I am not confident that Mr. Richards will carry out the duties of Inspector General with the objectivity and neutrality required of the post.

There is still a place for a strong Inspector General. Of all the oil company overcharges alleged to have occurred while oil prices were controlled, $8.6 billion has yet to be settled on. That involves a substantial interest for the U.S. Treasury and the American consumer. Let us not turn away from this history, just because the administration is sympathetic enough with big oil to appoint a man who worked for those interests which the Inspector General must police.

It is always unfortunate when the Senate finds a nominee exceptionally inappropriate for the post to which he is nominated. I am afraid that this is such a case. I urge the President to look again for a man whose qualifications can win overwhelming support in the U.S. Senate.

Senators EAGLETON, PRYOR, and LEVIN each deserve the gratitude of the Senate for bringing the case of Mr. Richards more fully to the Senate's attention. I hope that their concerns are shared by my colleagues. The Inspector General must protect the public treasury. The Inspector General is the final overseer of energy price regulation violations and consultant abuse. I believe we could do better for the integrity of this post than to confirm Mr. Richards today.

Mr. MOYNIHAN. Mr. President, I oppose the nomination of James R. Richards to be Inspector General of the Department of Energy. I am not questioning Mr. Richards integrity or legal qualifications. He is obviously an experienced lawyer. However, I believe that Mr. Richards' comments of July 29, when he appeared before the Governmental Affairs Committee, raise serious questions as to whether he possesses the necessary temperament and detachment to carry out the duties of Inspector General of the Department of Energy (DOE).

As envisioned by Congress when we established the post in 1978, the Inspector General must conduct and supervise audits and investigations relating to DOE programs, provide leadership and coordination for activities designed to promote economy and efficiency within the Department, and prevent and detect fraud and abuse.

It is not a policymaking position. Yet Mr. Richards, in his testimony, indicated his desire to be part of a "management team" at the Department of Energy. The Inspector General is expected to be fiercely independent, yet in his remarks before the Governmental Affairs Committee Mr. Richards agreed that, in certain matters, he is an "ideological zealot" who believes that oil and gas companies have been "unfairly burdened, even harassed by Government regulations." These beliefs might be acceptable were the Inspector General a policymaking position. Indeed they seem to reflect this administration's energy policies, policies with which I do not always agree. But the Inspector General does not make policy. The position calls not for an ideologue but rather for a nonpolitical person who will faithfully discharge the duties as set forth in the Inspector General Act of 1978.

I am also concerned that Mr. Richards has indicated his unwillingness to disqualify himself from cases involving firms or individuals who had contributed to the law firm with which he was formally associated. Again, I have no quarrel with his associations. Mr. Richards has a right to work for whomever he pleases. But when he refuses to disqualify himself from cases involving former clients, his judgment must be seriously questioned.

I will be voting against the nomination of James R. Richards as Inspector General of the Department of Energy because I agree with those who believe that he is not the right man for the job.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, if the Senator will permit me, I inquire about the order for the length and duration of the rollcall votes about to occur.

The PRESIDING OFFICER. The first two votes are 15 minutes and the remaining vote on this nomination is 10 minutes.

Mr. BAKER. Mr. President, I must have misspoke myself when I made that request or it got garbled in the transmission. What I intended to say and what I now put, and I am sure that the distinguished minority leader will not object to this, I ask unanimous consent that the first vote be 15 minutes and each succeeding vote 10 minutes in length as those votes are back-to-back.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I observe the minority leader is in the Chamber.

I asked the Senate to agree that the first vote would be 15 minutes and the subsequent votes back to back would be 10 minutes each, explaining that while that was not the way that the order now appears, that is the way I intended to put it, and it may have been garbled in the transmission. I hope the Senator has no objection.

Mr. ROBERT C. BYRD. I do not have any objection.

NOMINATION OF JAMES R. RICHARDS TO BE INSPECTOR GENERAL

Several Senators addressed the Chair.

Mr. McCLURE. Mr. President, I yield 1 minute to the Senator from New Mexico (Mr. DOMENICI).

The VICE PRESIDENT. The Senator from New Mexico is recognized.

Mr. DOMENICI. Mr. President, on July 21 the Committee on Energy and Natural Resources, by a vote of 17 to 0, reported the nomination of James R. Richards to be Inspector General, Department of Energy. Mr. Richards' nomination hearing was held on July 9. He has fully complied with the committee's rules requiring submittal of a financial disclosure report and a detailed information statement. I am prepared to recommend Mr. Richards' confirmation.

Mr. Richards is well qualified to be DOE Inspector General. He is an attorney with considerable professional experience as both a Federal prosecutor and administrator.

The duties of the Inspector General are set forth in detail in the Department of Energy Organization Act. During his nomination hearing, Mr. Richards described those responsibilities as follows:

The duties and responsibilities of the Inspector General of the Department are quite specific and somewhat unique. Not only does he supervise and coordinate audit and investigative activities, but he also recommends policies and procedures for promoting economy and efficiency in the Department. The Inspector General is charged with preventing and detecting fraud and abuse in the Department's programs and in the identification and prosecution of any persons participating in fraud and abuse. He reports a summary of his activities annually to the Congress, the Secretary of Energy and the Federal Energy Regulatory Commission.

The Inspector General also immediately reports particularly serious or flagrant problems, abuses or deficiencies relating to the programs and operations of the Department, to the Secretary, the Federal Energy Regulatory Commission, as appropriate, and within 30 days thereafter, to the Congress.

Mr. Richards also told the Committee:

Obviously, the Inspector General is not an active participant in the policy making team at the Department. His role is to serve as the internal agency watchdog, making sure that policies are carried out efficiently and economically and that they are free from fraud, abuse and waste. If confirmed, I intend to vigorously pursue my duties and responsibilities in that role.

Mr. President, I am pleased to recommend Senate approval of the Presidential nomination of James R. Richards for the position of Inspector General, Department of Energy.

## ROLLCALL VOTES ON NOMINATIONS

NOMINATION OF SANDRA DAY O'CONNOR TO BE AN ASSOCIATE JUSTICE OF THE SUPREME COURT OF THE UNITED STATES

The VICE PRESIDENT. All time has expired. The question is, Will the Senate advise and consent to the nomination of Sandra Day O'Connor to be an Associate Justice of the Supreme Court of the United States?

The yeas and nays have been ordered, and the clerk will call the roll.

Mr. CRANSTON. I announce that the Senator from Montana (Mr. BAUCUS), is necessarily absent.

I further announce that, if present and voting, the Senator from Montana (Mr. BAUCUS), would vote "yea."

The VICE PRESIDENT. Are there any other Senators wishing to vote?

The Chair would remind the galleries that there will be no expressions of approval or disapproval.

The result was announced—yeas 99, nays 0, as follows:

[Rollcall Vote No. 274 Ex.]

YEAS—99

| | | |
|---|---|---|
| Abdnor | Glenn | Moynihan |
| Andrews | Goldwater | Murkowski |
| Armstrong | Gorton | Nickles |
| Baker | Grassley | Nunn |

NOT VOTING—1

Baucus

So the nomination was confirmed.

The VICE PRESIDENT. The majority leader is recognized.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to this nomination.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. BAKER. Mr. President, could I inquire, are rollcall votes ordered on the next two nominations to be considered at this time?

The VICE PRESIDENT. They have been ordered.

Mr. BAKER. If I may have just a moment, could I inquire of the managers of the remaining nominations if they wish to have their rollcalls at this time?

Mr. President, I yield to the Senator from Kentucky.

The VICE PRESIDENT. Will the Senate be in order? The Senator is recognized.

Mr. FORD. Mr. President, let me say to the majority leader there is no desire on the part of the minority, so far as I know, to have a rollcall vote on the FTC nominee.

Mr. BAKER. I thank the distinguished Senator.

Mr. President, could I inquire of the distinguished Senator from Wisconsin if there is any desire for a rollcall vote on the FTC nominee on this side? Will the Senator from Wisconsin (Mr. KASTEN) indicate whether he wants to have a rollcall vote?

Mr. KASTEN. A number of Senators have indicated they would prefer a rollcall vote.

Mr. BAKER. Mr. President, I ask unanimous consent that the next two succeeding rollcall votes be back-to-back and be for not more than 10 minutes each.

The VICE PRESIDENT. Without objection, it is so ordered.

NOMINATION OF JAMES C. MILLER III TO BE A FEDERAL TRADE COMMISSIONER

The question is, Will the Senate advise and consent to the nomination of James C. Miller III, of the District of Columbia, to be a Federal Trade Commissioner? On this question the yeas and nays have been ordered and the clerk will call the roll.

(Mr. DANFORTH assumed the Chair.)

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Montana (Mr. BAUCUS), is necessarily absent.

I further announce that, if present and voting, the Senator from Montana (Mr. BAUCUS), would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 97, nays 2, as follows:

[Rollcall Vote No. 275 Ex.]

YEAS—97

| | | |
|---|---|---|
| Abdnor | Garn | Mitchell |
| Andrews | Glenn | Moynihan |
| Armstrong | Goldwater | Murkowski |
| Baker | Gorton | Nickles |
| Bentsen | Grassley | Nunn |
| Biden | Hart | Packwood |
| Boren | Hatch | Pell |
| Boschwitz | Hatfield | Percy |
| Bradley | Hawkins | Pressler |
| Bumpers | Havakawa | Pryor |
| Burdick | Heflin | Quayle |
| Byrd, Harry F., Jr. | Heinz | Randolph |
| | Helms | Riegle |
| Byrd, Robert C. | Hollings | Roth |
| Cannon | Huddleston | Rudman |

| Metzenbaum | Proxmire |

NOT VOTING—1

Baucus

So the nomination was confirmed.

Mr. STEVENS. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of the nomination.

The VICE PRESIDENT. Without objection, it is so ordered.

NOMINATION OF JAMES R. RICHARDS TO BE INSPECTOR GENERAL OF THE DEPARTMENT OF ENERGY

Mr. STEVENS. Mr. President, this will be the last rollcall vote tonight.

The VICE PRESIDENT. The question is, Will the Senate advise and consent to the nomination of James R. Richards, of Virginia, to be Inspector General of the Department of Energy? On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Montana (Mr. BAUCUS) is necessarily absent.

I further announce that, if present and voting, the Senator from Montana (Mr. BAUCUS) would vote "nay."

The PRESIDING OFFICER (Mr. DANFORTH). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 71, nays 28, as follows:

[Rollcall Vote No. 276 Ex.]

YEAS—71

| | | |
|---|---|---|
| Abdnor | Glenn | McClure |
| Andrews | Goldwater | Melcher |
| Armstrong | Gorton | Murkowski |
| Baker | Grassley | Nickles |
| Bentsen | Hatch | Packwood |
| Boren | Hatfield | Pell |
| Boschwitz | Hawkins | Percy |
| Burdick | Hayakawa | Pressler |
| Byrd, Harry F., Jr. | Heflin | Quayle |

NOT VOTING—1

Baucus

So the nomination was confirmed.

Mr. STEVENS. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of the nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I ask unanimous consent that it be in order to move to reconsider all these nominations en bloc that have been confirmed.

The PRESIDING OFFICER. Without objection, it so ordered.

Mr. STEVENS. Mr. President, I move to reconsider the votes by which the nominations were confirmed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## LEGISLATIVE SESSION

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate resume the consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ORDER FOR PRINTING OF S. 884

Mr. STEVENS. Mr. President, I ask unanimous consent that S. 884, the Agricultural and Food Act of 1981, be printed as passed by the Senate on September 18, legislative day September 9, 1981.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ORDERS FOR TUESDAY

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate convene tomorrow at the hour of 11 a.m.; that following the recognition of the two leaders under the standing order, there be a 5-minute special order entered in favor of the Senator from Wyoming (Mr. WALLOP); and that thereafter there be a period for the transaction of routine morning business not to extend beyond the hour of 11:30 a.m. with Senators permitted to speak therein.

I further ask unanimous consent that on tomorrow, the majority leader be authorized to proceed to the consideration of any and all of the following four bills, although not necessarily in the sequence stated: Calendar Order No. 233, S. 1365, the Bankruptcy Act: Calendar Order No. 237, S. 1475, the International Energy Agency bill; Calendar Order No. 85, S. 306, the hydroelectric bill; and Calendar Order No. 117, S. 1135, the Defense Production Act.

I further ask unanimous consent that when the Senate completes its business tomorrow, it stand in recess until the hour of 10 a.m. on Wednesday.

The PRESIDING OFFICER. Without objection, it is so ordered.

## COMMENDATION TO WALTER J. STEWART FOR SERVICE IN THE U.S. SENATE

Mr. ROBERT C. BYRD. Mr. President, I send a resolution to the desk and ask that it be stated by the clerk.

The PRESIDING OFFICER. The clerk will state the resolution.

The assistant legislative clerk read as follows:

A resolution (S. Res. 214) commending Walter J. Stewart for his long, faithful and exemplary service to the United States Senate.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of the resolution.

The PRESIDING OFFICER. Is there objection to the request of the Senator from West Virginia?

There being no objection, the Senate proceeded to consider the resolution.

Mr. ROBERT C. BYRD. Mr. President, as most of my colleagues are aware, our former secretary for the minority, Walter "Joe" Stewart recently left the Senate to accept a position in private industry. While I will miss Joe, who has been professionally associated with me by working on my personal staff—or working with me in a leadership position, for the past 10 years, I know that we all wish him well in his new endeavor.

Joe Stewart started and, for that matter, has spent his entire governmental career in the Senate. He came to Washington in 1951 as a page under the sponsorship of Senator Spessard Holland of Florida. He graduated from the Capitol Page School in 1953 as president of his class.

In 1954, Joe was appointed to head the staff of the Democratic cloakroom. Several years later, he attained a further promotion as administrative assistant to the secretary for the majority, with duties which included supervising the secretary's staff connected wtih the Senate floor and being on the floor when the Senate was in session to advise Members on pending legislation, as well as performing administrative duties within the secretary's office.

Following graduation from law school and shortly after becoming a member of the District of Columbia bar, Joe was appointed to the professional staff of the Senate Committee on Appropriations. He remained in that position until 1971 when he became my legislative assistant. He served me ably in that position for 6 years.

In 1977, when I was elected majority leader, I named Joe Stewart as assistant to the majority leader for the floor operations. In 1979, it was my pleasure later to nominate him as secretary for the majority of the Senate. He was elected to that position and served in that capacity until January 1981, at which time he was elected secretary for the minority. In June of 1981, he completed a total of 30 years with the U.S. Senate.

As secretary for the majority and later as secretary for the minority, Joe's duties included acting as executive secretary for the Democratic Steering Committee which make Democratic committee appointments and acting in a similar capacity for the Democratic Caucus of all Senators. Earlier this year during the transition from the majorityship to the minority, Joe played a key role in the realinement of our committee positions.

In addition to his regular duties, Joe Stewart has accompanied me and other Members of the Senate on several senatorial and Presidential delegations which have traveled to China, Russia, the Middle East, Europe, and to Panama prior to the passage of the Panama Canal Treaty.

Mr. President, Joe Stewart has always performed his duties here in the Senate with dedication, efficiency, and loyalty, and we shall miss him and his able assistant, Ms. Jeanne Drysdale-Lowe, who will also be leaving the Senate to work with Joe in his new position.

Joe's departure is a real loss for the Senate, but we wish him the very best in his new undertaking.

Mr. STEVENS. Mr. President, I join my good friend, the minority leader, in paying tribute to the services of Joe Stewart. He has been a good friend to all of us, those of us on this side of the aisle, as well as those on the Democratic side of the aisle. He has been a man who is easy to work with, and has always shown consideration for the problems that exist here in the Senate in trying to work our will on pending matters.

I know we all join in wishing him well and hoping he will have a successful career as he vovages on to other things.

Mr. President, I ask unanimous consent that the record of the tributes concerning the service of Walter J. Stewart may be printed as a bound volume and as a Senate document. I further ask that the RECORD remain open for a period of 10 days in order that additional statements may be included in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished Senator from Alaska, the majority whip and the acting majority leader, for his kind comments, and I know Mr. Stewart will likewise appreciate them deeply.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 214) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 214

Whereas Walter J. Stewart has faithfully served the Senate as an officer of the Senate, the Senate wishes to express its appreciation for his dedicated service as an officer of the Senate; and,

Whereas the said Walter J. Stewart at all times has discharged the important duties and responsibilities of his office with great efficiency, and diligence; and,

Whereas prior to his service as Secretary for the Minority and as Secretary for the Majority he served the Senate in other important capacities for a period of thirty years; and,

Whereas his loyalty, his exceptional service and continuing dedication have earned for him esteem and affection; so therefore, be it

*Resolved*, That Walter J. Stewart is hereby commended for his lengthy, faithful and outstanding service to the Senate.

SEC. 2. The Secretary of the Senate is directed to transmit a copy of the Resolution to Walter J. Stewart.

Mr. ROBERT C. BYRD. Mr. President. I move to reconsider the vote by which the resolution was agreed to.

Mr. STEVENS. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## RULES COMMITTEE APPROVES AIR TRAVEL DISCOUNT PLAN

Mr. PERCY. Mr. President, I would like to congratulate my valued friend and colleague, Senator MATHIAS, chairman of the Rules and Administration Committee, for his efforts in approving and im-

plementing a plan that will significantly reduce Senate travel expenses.

On July 8, 1981, he officially notified the Senate that we had been included in the General Services Administration's air travel contract discount program. This executive agency program, which has been in effect since July 1, 1980, has already saved taxpayers between $17 to $19 million. It is impossible to determine cost savings to the Senate, but I believe that it will be a significant cost-containing measure. For my personal staff alone, I have been told that savings could total more than $4,000.

I urge the former chairman of the Rules Committee, Senator PELL, in an October 1, 1980, letter, cosigned by the highly respected former Governmental Affairs Chairman Ribicoff, to consider including the Senate in this cost-saving program and a study was then initiated. Under the new contract awarded for the 12-month period beginning this July, 19 airlines have been awarded routes covering 160 direct routes. It is anticipated that the executive branch will save $35 million in travel costs for the new contract. The airlines include some of the newest, such as Midway Airlines, some of the oldest, such as Western Airlines, and Air Illinois, a growing commuter based in southern Illinois.

I have been assured that the non-Government travelers are not cross-subsidizing these Government travelers. The contracting airlines view these lower fares as profitable because of the assurance of a guaranteed revenue from receiving all of the Federal Government's air travel patronage over the routes they were awarded.

In addition, these contract fares would not have been possible without airline deregulation, which I vigorously supported. The airlines are now able to bid for volume business, without interference from the Civil Aeronautics Board.

I am pleased that the interagency travel management improvement project has now reported its ambitious program that could save the Federal Government over $200 million annually. The program emphasizes streamlined procedures, tightened pretravel clearances, and the use of contract fares. This policy has my full support and should be applauded by all who want reduced waste in Government.

I would like to commend those responsible for this landmark cost-saving program, including from the General Services Administration: Gerald P. Carmen, Administrator; Allan W. Beres, Commissioner for Transport and Public Utilities Services; Sean Allan, Director, Transportation and Travel Management Division; Ivan Michael Schaeffer, Assistant Commissioner for Transportation and Travel Management; and Albert Vicchiolla, Assistant General Counsel. From the Rules and Administration Committee, I would like to commend John B. Childers, Deputy Staff Director, who ably served me for many years as my own administrative assistant, and Dennis Dohery.

Senators wishing to participate should contact the Rules Committee.

## THE 1981 FARM BILL

Mr. BUMPERS. Mr. President, I wish to take a few minutes to discuss S. 884, the 1981 farm bill which the Senate passed on Friday, September 18, 1981. This bill will be our basic agricultural legislation for the next 4 years and is extremely important to all Americans, both farmers and consumers.

The farmers of this country, while comprising only about 3 percent of the population, are world leaders in the production of food. Through their efforts not only are the citizens of this country fed, but so are the people of many other countries of the world. Farm productivity in this country has increased by almost 70 percent since 1950, even though agricultural inputs have gone up by only 2 percent. Obviously, our farmers are some of the most productive persons in this country and contribute a great deal to our quality of life.

Even though our farmers have been so productive they are being devastated by soaring costs and extraordinarily low prices. Their very survival is at stake. Given these bleak conditions, Mr. President, the farmers of this country were looking to the Congress to develop strong, effective farm legislation. I am afraid, however, that after they review the provisions of S. 884 as passed by the Senate, they will be sorely disappointed. The bill falls far short of providing adequate price protection for our farmers and I hope the bill can be strengthened when it is considered by the House of Representatives.

Mr. President, our farmers are currently experiencing one of the worst price declines in memory, while at the same time being hit with higher costs, particularly soaring interest rates. I know that many in this body believe that once interest rates come down and inflation subsides, that many of the problems our farmers are experiencing will go away. This might be correct, Mr. President, and I intend to do all I can to get interest rates down. However, I think this body could have written a farm bill which would have also improved the income picture for the farmers of this Nation.

Their problem is vividly demonstrated in a recent study conducted by Data Resources, Inc. The study found that net farm income in 1980 was $20 billion, a decline of 39 percent from 1979 and down 27 percent from 1978. Further, when that figure is adjusted for inflation, net farm income was below $10 billion, the lowest level since 1934. The report concluded:

> The outlook for farm income profitability has gone beyond dismal and would have to be termed catastrophic.

This is a fair statement of the situation our farmers are in today, and I am afraid that S. 884 will do very little to improve their economic plight.

In conclusion, Mr. President, I am opposed to S. 884 in its present form. The bill, as originally reported by the Senate Agriculture Committee, was a fair compromise. However, once the bill reached the floor of the Senate, amendments were added which further eroded the minimal price protection in the bill and I think it is too weak to support.

## MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

## EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

## PRESIDENTIAL APPROVAL

A message from the President of the United States reported that on September 17, 1981, he had approved and signed the following joint resolution:

S.J. Res. 62. Joint resolution to authorize and request the President to designate the week of September 20 through 26, 1981, as "National Cystic Fibrosis Week."

## EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC–1957. A communication from the Secretary of the Treasury transmitting, pursuant to law, a report on the violation of law involving the expenditure of funds in excess of appropriated amounts by the U.S. Customs Service, to the Committee on Appropriations.

EC–1958. A communication from the Secretary of Agriculture transmitting, pursuant to law, a report on the impact of remote land claims; to the Committee on Banking, Housing, and Urban Affairs.

## REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. THURMOND, from the Committee on the Judiciary, without amendment:

S. Res. 213. Resolution authorizing supplemental expenditures by the Committee on the Judiciary for inquiries and investigations; referred to the Committee on Rules and Administration.

## INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. EAST:

S. 1647. A bill to insure equal protection of the laws as guaranteed by the fourteenth amendment to the Constitution of the United States and to deny the jurisdiction of the inferior Federal courts to order the assignment or transportation of students, and for

other purposes; to the Committee on the Judiciary.

By Mr. HATFIELD:

S. 1648. A bill entitled the "Military Spouse Retirement Equity Act"; to the Committee on Armed Services.

By Mr. HATCH:

S.J. Res. 110. Joint resolution to amend the Constitution to establish legislative authority in Congress and the States with respect to abortion; to the Committee on the Judiciary.

## STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTION

By Mr. HATFIELD:

S. 1648. A bill entitled the "Military Spouse Retirement Equity Act"; to the Committee on Armed Services.

MILITARY SPOUSE RETIREMENT EQUITY ACT

● Mr. HATFIELD. Mr. President, a recent Supreme Court decision has made congressional action in the area of pension rights for former spouses of military employees even more imperative.

On June 26, in McCarty against McCarty, the U.S. Supreme Court, in overturning the California Court of Appeals, ruled that Federal law precludes a State court from dividing military retired pay. This ruling has thrown traditional State domestic relations law into chaos, and has effectively deprived States of a tool to provide economic protection to divorced spouses of military personnel.

While the Supreme Court recognized that the plight of an ex-spouse of a retired service member is often a serious one, it concluded that Congress, not the courts, should decide whether more protection should be afforded to military former spouses.

The Supreme Court decision has made legislative action on this issue critical. In some cases, court-ordered payments that are presently being made may be cut off, leaving these divorced military spouses in financial distress.

The plight of the so-called displaced homemaker is becoming well recognized in a society where nearly one of every two marriages ends in divorce. These divorced or widowed women who have devoted many years to maintaining the home and family often suffer serious consequences when they attempt to gain outside employment, or receive their rightful pension or retirement benefits.

Contrary to the popular myth of the merry divorcee, only a few are wealthy. Alimony is received by just 4 percent of divorced women. Furthermore, statistics indicate that while 89 percent of single-parent families are headed by mothers, three-quarters of these women received no child support from fathers. For even this minority of women, alimony and child support are no substitute for a vested pension interest. Both cease with the death of the employed or retired spouse.

Congress began to address this issue by amending the Social Security Act in 1977, providing pension benefits to divorced wives married 10 years or more. However, even these basic protections are not afforded a significant number of women married to civil service or military employees or employees enrolled in many private pension plans. For military and civil service employees, their spouses do not automatically receive social security. Thus, they discover once they are divorced, the wives lose all claim to retirement pay and survivor's benefits, as well as any right to health insurance benefits.

Obviously, this causes tremendous hardships, particularly for older women who have made significant contributions to the family, working inside the home. Many of these women find that the retiree walks away from the divorce with a full retirement plan and health insurance, while the spouse walks away with nothing. If the employee in the military or civil service remarries, the new spouse automatically becomes eligible for medical and survivor benefits, even if she has put no time into the spouse's military/civil service career.

If indeed we are to strengthen incentives for participation in the military, we cannot continue such economic disincentives for the wife of the military employee.

Mr. President, the Military Spouse Retirement Equity Income Act, which I reintroduce today, redresses these inequities in current law. This legislation is already a part of the Economic Equity Act, a bill which my colleagues Senator DURENBERGER and Senator PACKWOOD, as well as 20 other Members of the Senate, introduced on April 8. I introduce this provision as a separate bill to accommodate hearings which are scheduled in the Armed Services Committee.

The Military Retirement Equity Income Act was developed by my able colleague in the House, Congresswoman PAT SCHROEDER. It was through her leadership that a similar provision affecting former spouses of Foreign Service Officers was enacted in 1978.

The legislation would do the following:

Entitle women who were married to civil service or military employees for at least 10 years the right to a pro rata share of the benefits earned during marriage. This provision is subject to court review and modification, depending on the divorce settlement. However, the legislation demands that courts must view pensions as a valid property right. Many have not done so in the past. As a result, many of these women find that the retiree walks away from the divorce with a full retirement plan and health insurance, while the spouse walks away with nothing. Furthermore, even in cases where the courts have awarded partial retirement benefits, no court has considered the survivor's benefit as property to which the former spouse is entitled.

Mandate survivor's benefit unless the spouse and former spouse choose to waive receipt of such. Currently, an employee may opt out of survivor's benefits already agreed to, without notification of the spouse or former spouse. This legislation would require that employee and spouse or former spouse, if any, agree in writing to forgo the survivor's benefit plan.

These proposals will not cost the taxpayer additional funds. Rather, they will allow a fair redistribution of retirement and survivor's benefits between the partners in marriage.

It is ironic that these outdated laws have been hardest on the woman who devotes herself entirely to the role of mother and homemaker. It is unconscionable that they should be "rewarded" in this manner. Certainly, it is time we viewed marriage as an economic partnership.

Morale, motivation, and reenlistment of our Armed Forces depend on more than take-home pay. Long-range benefits which insure the future financial security of both partners in a military marriage will improve morale and increase reenlistment.

The current situation devalues the contribution of military spouses, especially the role of most military women as wife and homemaker, and tells her that all the years of moving, volunteer work, child raising, and emotional support for her husband and family do not merit any recompense. The McCarty decision reinforces this devaluation.

I believe the following articles illustrate well the critical problems facing a small segment of America's fastest growing poverty—the older woman, and I ask unanimous consent that certain articles, along with a section-by-section analysis of the bill be printed in the RECORD.

There being no objection, the analysis and articles were ordered to be printed in the RECORD, as follows:

MILITARY SPOUSE RETIREMENT EQUITY ACT—SECTION-BY-SECTION ANALYSIS

Section 1. Short Title, Military Spouse Retirement Equity Act.

Section 2. Former Spouse Share or Retire or Retainer Pay.—

Pro rata Share. Unless modified by a spousal agreement or court order, a former spouse of a military member, married 10 years or more, is entitled to a pro rata share of the retirement annuity. The amount would depend upon the number of years of marriage that overlap with the creditable years of service toward retirement.

Formula:

Number of years of marriage during creditable service divided by number of years of annuity equals former spouse retirement employment times .50 times total retirement annuity.

For example: If a couple is married for 10 years of 30 years of creditable service, the former spouse would be entitled to 10/30 × 50% or one-sixth of the retirement annuity.

If the couple was married for 30 years, the entire period of creditable service, the former spouse would be entitled to 30/30 × 50% or a maximum of one-half the retirement annuity.

Remarriage Before Age 60. A former spouse shall not be qualified for an annuity if the former spouse remarries before becoming 60 years of age.

Savings Clause.—The 10 year marriage requirement in the bill should not be construed to restrict the right of a state court to divide the retirement annuity or include it as marital property for those married less than 10 years.

Commencement and Termination of Former Spouse Annuity.—The former spouse

annuity commences on the day the member retires or the day the divorce becomes final, whichever is later.

The former spouse annuity terminates the day when the former spouse dies or remarries before becoming 60 years of age.

Section 3. Former Spouse Share of Survivor Annuity.—

Joint Employee-Spouse Elections.—The spouse or former spouse, if any, must sign a notarized waiver agreeing to the retiree's election to opt out of the survivor's benefits or to take a reduced survivor's benefit.

Recalculation of the Retirement Annuity.—If the former spouse predeceases the retiree or remarries before attaining age 60 or a spouse does not qualify as a former spouse upon dissolution of the marriage (having been married less than 10 years), the reduced annuity shall be restored and shall be paid as if it had not been reduced.

Section 4. Survivors Benefits in Case of Divorces before Effective Date.—

Election of Survivors Benefits for Former Spouse.—A member of the uniformed services who on the effective date of this Act has a former spouse shall receive retired pay at a reduced rate and provide a survivor annuity for the former spouse if the member elects by means of a spousal agreement or a court so orders.

If the member has been married for more than one year, an election of a survivor annuity for a former spouse may be made only with the written concurrence of the spouse.

Survivors Benefits When Member Dies before Effective Date.—If a member who died before the effective date of this Act was entitled to retired pay, had the retired pay reduced to pay for a survivors benefit, and died without a beneficiary to the survivors benefits, the former spouse would be entitled to the survivors annuity.

Section 5. Effective Date.—

Effective Date.—This Act becomes effective 120 days after enactment.

Entitlement to a Pro rata Share of Retired Pay.—The provisions in Section 2 shall apply to those who divorce or retire after the effective date of the Act.

Entitlement to Survivors Benefits.—Except to the extent provided in Section 4, a former spouse is entitled to receive survivors benefits if divorced after the effective date of this Act.

---

[From the Wall Street Journal, Aug. 21, 1981]

BILLS COMING DUE: MILITARY EX-WIVES PRESENT THEIRS

(By Suzanne Garment)

"This has been a crusade more than three years in the making," announced the congressional aide, one staffer who had not deserted Washington for the month of August. On the contrary, she was hard at work and happy to talk about the push her office is going to make in the coming session of Congress on the issue of better retirement and survivors' benefits for military ex-wives. Military wives' and ex-wives' organizations report that they too, are getting ready for action in the fall. Thus do the building blocks of most of the year's national agenda get hauled into place while the headline makers are out of town.

In the past few years a cluster of women's groups has rallied around the idea that women married to servicemen for many years and then divorced should not lose all their rights to their ex-husbands' retirement benefits. The groups have a champion in House Democrat Patricia Schroeder of Colorado, who has introduced a bill greatly extending the divorcees' pension rights. They have friends like Rep. Kent Hance (D., Texas), who is sponsoring a more limited bill to make it possible for the ex-spouses to collect on any military retirement benefits that a divorce court has awarded them. At least some of this legislation looks like it will make progress this year.

The idea of collective entitlement to retirement benefits has been establishing footholds in federal law for well over a decade. In 1965, ex-spouses were given a right to Social Security retirement and survivors' payments based on the benefits due to their former mates. In 1978 a new law made it possible for a court to hand over a portion of civil service retirement benefits to an ex-spouse as part of a divorce. In 1980 Congress said that foreign service ex-wives are entitled to similar treatment for both retirement and survivors' benefits unless a court orders otherwise in a particular case.

Current law does not allow military retirement pay to become subject to court division in a divorce settlement. Therefore, say the military ex-wives, the law needs changing. Some of the ex-wives' arguments call attention to the specially needy situation of the military divorce. She spends her career years trudging after her husband from one post to another, and thus can not build up vested economic benefits of her own. Then comes the divorce—and she finds herself cut off from the retirement benefits that often constitute a military family's biggest piece of property.

But the divorced wives do not rest their case on need alone. They also want this money as a matter of right. It was they, after all, who maintained the homes and community institutions that freed their husbands for work. They did so at the explicit behest of military authorities. And now they not only get no thanks for their service but have to bear a bitter insult: "The new wife," as one organizer put it, "who hasn't contributed anything to the military, gets all the benefits."

It is impossible not to sympathize with the women making these arguments. Some of them have indeed gotten one of life's raw deals. Furthermore, there does not seem to be any compelling reason in principle why the military retirement benefits shouldn't be as much up for grabs in a divorce as other similar pieces of property are.

It is just as easy, it must be said, to see why you would not want to make extensive presumptions of entitlement into our permanent public policy on the subject. There are ex-wives, especially older ones, who in spite of the Social Security payments are unable to maintain even a modest living: they need a public policy based on some compassion. But no one really knows how many of them there are, or what proportion they form of the divorced, or what effect a new divvying-up of the retirement benefits would have on the military's recruitment and retention problems. And the way some of the-wives talk about wanting to cut their divorced husbands' new families out of the benefits picture smacks less of need or justice than it does of vindictiveness.

But perhaps most interesting of all is that there seems something inexorable about the force still driving such social issues to the top of the legislative heap. First you get the general erosion of traditional values on which military marriages used to rest. Divorce rates soar, individual fulfillment acquires a higher moral standing than communal obligations, sacred bonds become secular contracts. Next the victims of such changes respond by adopting the now-conventional language of the new order. They too, they say, are to be understood as having performed services in the world of work. They too have rights publicly enforceable by the government.

Then finally the apparatus of modern American issue politics moves in to make the new argument into law: pressure groups, politicians delighted to be pressed, journalists hungry for fodder, interviews with Phil Donahue. The opposition may be left with large powers to obstruct, but finds itself without publicly persuasive arguments. Sooner or later, it folds.

The pattern seems to persist despite the disarray of the general liberal ideology that gave rise to it. And it persists in contrast to the social conservatism that has so far had a hard time establishing itself on the Reagan administration's agenda. It is going to take the next couple of congressional sessions to let us know which set of arguments and presumptions will wield political power, which is the piece of nostalgia and which the wave of the future.

[From the Chicago Tribune, Aug. 16, 1981]

FORMER MILITARY WIVES FIGHT FOR THEIR BENEFITS

(By Janet Cawley)

During the 28 years of her marriage to a Naval officer, Pat Ficci moved more than a dozen times while raising two children and trying to hold together some semblance of family life.

Mrs. Ficci, 49, of Waukegan, is divorced now and the whole world of military benefits that sustained her has vanished.

"I lost all my Navy identification," she said, "all my medical benefits, all my PX privileges, and all my commissary privileges." She said she lost 40 pounds in three months and her blood pressure climbed to stroke level.

All she has managed to retain—after a lawsuit—is half of her husband's retirement pension and she is angry.

"I was with my husband overseas," she said. "I went with him; I kept his children, I raised them, with hopes in time for retirement benefits for both of us. I was with him to protect the flag and all that sentimental jazz, and now I feel like the United States has turned around and cut my throat."

Mrs. Ficci is not alone. There are so many former wives of servicemen left without benefits that they have formed their own organization to lobby Congress for changes in the laws on the benefits.

Ex-Partners of Servicemen (Women) for Equality, known by the acronym expose, was founded 14 months ago and already claims 2,000 members, only two of whom are men (both happily married and simply supporters of the cause, explains cofounder Nancy Abell).

According to a survey compiled by expose, the average age of members is 54; of years married, 26; of moves during the marriage, 13; and of years in the military, 20.

About 73 percent said their husbands had remarried, raising one issue that troubles the women the most: On remarriage, all military benefits are immediately reassigned to the second wife.

Their reasoning is that they traveled the world with their husbands, continually uprooting themselves so they couldn't pursue careers that would allow them to build their own pensions. They counted on financial and medical security from their husbands' military retirement plans. Instead, they are divorced and have discovered that all benefits and pensions belong only to their former husbands.

"Really," said Mrs. Abell, a 47-year-old mother of three from Falls Church, Va., whose divorce from a retired Air Force colonel should be final next month "these women are in desperate straits. They don't deserve to be treated this way.

"If we don't start getting these women some protection with legislation, they're all potential welfare cases."

Expose said its files are bulging with case histories of women "reduced to a nobody after giving years to her husband, children . . . and to serving her country." In all, they said, there may be as many as 500,000 ex-military wives in the country.

But, not everyone thinks the laws should be changed to help these women.

John Sheffey, executive vice president of the National Association for Uniform Services, which claims 26,000 members and former members of all the armed services, said his group is actively lobbying against proposed legislation.

"Basically, the Expose people are a narrow group of truly deserving, mistreated older women," Sheffey said. "But, the proposals before Congress would apply across the board to all (military) divorces and that would create terrible inequities for those divorced early in life. Our position is not that divorecd spouses should not be taken care of, but that the obligation belongs to the husband, not the military.

"These women say they helped earn their husband's pay, but that's nonsense. Both married and unmarried members of the military earn the same pay so I don't see how they can argue the wife earned it.

"The basic idea of having the government assume the obligation for the divorced spouse is just bad policy. It would be unique to the whole economy. General Motors doesn't do it. IBM doesn't do it."

But Mrs. Abell—who said her husband has been "quite fair" in support payments—said: "If we're not entitled, if we haven't earned those benefits, how can they justify giving them to the second wife? We feel we've earned them, not the second wife.

"We have women with cancer and heart problems and kidney ailments who now have no medical coverage and no way to obtain it. It's heartbreaking the way these women are treated.

"We treat our refugees better than we do these women."

---

[From the New York Times, Aug. 7, 1981]

DIVORCE AND MILITARY PENSIONS

WASHINGTON, August 6.—In 1945, Elizabeth D. Crandall married a lieutenant in the United States Navy. Twenty-four years and some 17 cross-country moves later, her husband left her. Today, seven years after a no-fault divorce, her former husband, now retired, is refusing to pay the alimony stipulated in the divorce settlement, his wife says. She says his stand is based on the recent Supreme Court ruling that military pension benefits may not become a part of a property settlement in a divorce.

Other women are in similar circumstances. In May 1980 an organization made up of the former wives of retired military personnel, ExPartners of Servicemen for Equality (Expose), was formed to lobby Congress on the members' behalf. They felt, even at that time, that they were treated unfairly regarding the pension, medical care and commissary benefits available to their former husbands.

Expose says it has 2,000 members nationwide and is growing. The organization identified its typical member as 54 year old, female and divorced after 26 years of marriage. (The two male members are sympathetic to the organization's cause.) Most of the divorces occurred immediately before the husband's retirement, according to the organization, which said that 73 percent of the men had remarried.

DEVASTATING RESULTS

Mrs. Crandall said the effects of the pension loss to her had been devastating. "My prospects for permanent, gainful employment at age 59 are not positive," she said. "Because of the frequent moves, there was never an opportunity for me to develop a career or accrue any personal savings or pension benefits of my own. I have honorably and devotedly served my country by promoting, supporting, and encouraging my husband's career as a Naval officer. For these many years, I receive no recognition, benefits or compensations. I now face loss of my home and economic disaster."

The president of Expose, Nancy L. Abell, a 47-year-old mother of three who is separated from her husband, a retired Air Force colonel, said: "There's been a gross miscarriage of justice here. I want to see it corrected. We have women who have been threatened with physical harm by their husbands if they make waves about getting legal retribution."

The organization's vice president, Winnie Cowan, whose former husband is a retired brigadier general, said: "I gave 30 years to the military. We feel betrayed, shortchanged, to have the Supreme Court tell us we're not worth a penny."

ANOTHER GROUP'S VIEWS

A different view was given by John Sheffey, executive vice president of the National Association for Uniform Services, a 26,000-member group of veterans. "The concept that the wife earns part of the pay of the husband is anathema to us," Mr. Sheffey said. "He has a tremendous obligation to the wife, but it is a personal one. It's just not supported by the facts. Married and unmarried military personnel earn the same pay."

Mr. Shelley said there had been cases in which wives planning to divorce their husbands had "shopped around" and moved to states with divorce laws favorable to women while their husbands were assigned overseas. "You've got a man in Korea with a wife in the states deserting him," he asserted.

The Expose officials feel, however, that they and other long-time wives of military men were working for their country, too. "We feel we've contributed to the military and our country," Mrs. Abell said. "The men couldn't have gone off if we had not been home to take care of the children. I don't see the Department of Defense offering 24-hour-a-day child care. We also acted as ambassadors overseas."

Mrs. Cowan recalled, "When the husbands went to air training, the wives were lectured by flight surgeons. "Don't disturb them the night before. Don't bother them. Always keep their morale up." And that's where we feel we contributed.'

The Supreme Court, in its 6-to-3 ruling on June 26, found that a division of military retirement pay had the "potential to interfere with the Congressional goals of having the military retirement system serve as an inducement for enlistment; and as an encouragement to orderly promotion and a youthful military." Rather, said Associate Justice Barry A. Blackmum, the retirement pay should "be the personal entitlement of the retiree."

"AN ECONOMIC PARTNERSHIP"

The Court also said that it was up to Congress to provide more protection for former spouses of military personnel, if it wanted. A House bill, sponsored chiefly by Representative Patricia Schroeder, Democrat of Colorado, would allow former spouses who had been married to military personnel for at least 10 years to receive prorated retirement pay based on length of marriage.

Senators Mark C. Hatfield, Republican of Oregon, David F. Durenberger, Republican of Minnesota, and Bob Packwood, Republican of Oregon, are co-sponsoring what they call "the Economic Equity Act of 1981," which incorporates Representative Schroeder's proposal, saying that "it is time we viewed marriage as an economic partnership."

And Senator Dennis DeConcini, Democrat of Arizona, is sponsoring a bill that simply would return the legal situation to the way it was before the Supreme Court ruling. That would leave jurisdiction in family and property matters to the state courts.

Under all of these proposals, a spouse would pay a former mate what the court settlements called for. However, Representative Kent Hance, Democrat of Texas, has introduced a bill under which money paid a former spouse from a military pension would go directly to the spouse from the pay source.

[From Newsweek, Sept. 14, 1981]

A HOUSEWIFE'S LOT

(By Jane Bryant Quinn)

When husbands and wives approach divorce, the thing they argue most about is property. And the most troublesome property before the courts is pensions.

Is a divorced wife entitled to a piece of the pension that her husband accumulated during the marriage, or is she not?

Most state courts say that she is, and state law supposedly rules. But in the only pension cases to reach the U.S. Supreme Court—one on railroad retirement, one on military pensions—the Court overrode traditional state supremacy in family law. It held that Federal law took precedence, and the main body of Federal law reserves pensions solely for the worker who earned them.

Cut Out: These two decisions cut only military and railroad wives out of their husbands' pensions. States continue to divide other, private-company pensions as they see fit, and that's where most of the money is. But for housewives demanding economic recognition, these rulings are a bad precedent. If the Supreme Court ever extends them to private pensions, marriage—for women—will become an even riskier choice of career.

The importance of pensions to housewives cannot be overestimated. Divorce, in most states, is easy to get, even if one partner opposes the split. Alimony, when awarded at all, may last only a few years, until the housewife learns to support herself. All she can expect to take away from her failed marriage is a share of the property accumulated while she and her husband were together.

In the recent past, there was no legal concept of mutual accumulation, except in the eight community-property states. But most states have evolved an economic-partnership theory of marriage, under which a wife who cooks, cleans and raises the children is "earning" a share in the marital assets as a matter of right. And what the law creates in the way of property rights, no man shall put asunder.

When a marriage crumbles, all the marital property is put into a kitty and divided up. A few states, like California, split the assets 50–50. Others split them according to such guidelines as how long the marriage lasted and how much each partner contributed, with housework counted as a contribution.

To a wife who works outside the home, and who has established a pension of her own, a share in her husband's pension may not matter very much. But a housewife is more vulnerable. In many marriages, the husband's pension is the major asset. If it

is taken out of the marital kitty, there isn't much property left to divide.

In the view of most state courts, dividing the pension amounts to simple economic justice. But the Supreme Court's decisions cast marital law back to the days when a husband's money was all his and a housewife's work wasn't worth a dime.

A deciding clause in the Railroad Retirement Act says that a third party cannot normally be assigned any right to the worker's pension. Most state courts say that that clause applies only to outside creditors who are suing for a judgment. But the Supreme Court held that it also cuts out any property rights claimed by a spouse. (All private pensions insured by the Employee Retirement Income Security Act are covered by that same, spouse-denying clause.)

In the military case, the court said that the wife is entitled to part of the pension only if Congress specifically grants it.

Special Cases: Howard Lipsey, chairman of the family-law section of the Association of Trial Lawyers, thinks that these two decisions will not spread to private pensions. "These are special cases," he argues. The military-pension decision, for example, was linked to Congress' right to regulate armies. But Doris Freed, who heads the research committee of the American Bar Association's family-lay section, disagrees, calling the decisions "a clear and present danger" to the equitable property division established by state law.

Bills introduced in Congress would guarantee wives the pension rights called into question by the Supreme Court. (Congress permits civil-service and foreign-service pensions to be divided in divorce.) But Rep. Pat Schroeder says the bills face tough going, "partly because some opponents have been through bitter divorces and can't look at the issue objectively."

If Congress and the courts deny a wife her stake in what was expected to be the couple's pension, the message is clear: a housewife is not worthy of her hire. Given the high divorce rate, her only security may lie in quitting full-time housework and finding another occupation.

---

MILITARY WIVES SET TO DO BATTLE OVER TORPEDOED PENSIONS

(By Jane Bryant Quinn)

NEW YORK.—The U.S. Supreme Court scorned military wives last June in a decision that wiped out all their pension rights after divorce. This week, those wives will carry their grievances to a Senate Armed Services subcommittee, in what is shaping up as the hottest marital battle in town.

The military wives are carrying the ball, but their success or failure could affect the pension rights of every housewife.

Badly but, the issue is this: Is a housewife a full, economic partner in her marriage? Or is she a charity case whose support in old age depends solely on keeping her husband's goodwill?

If she's a full economic partner, she should be entitled—as a matter of right—to share in the property accumulated during the marriage. At divorce, her share should be hers to keep.

Most state court now accept the economic partnership view of marriage and include pension assets as part of the property.

Housewives are not generally treated as 50–50 partners. Except for California and a few other states, most courts award wives something less than half. For example, if a marriage lasted 20 years and her property rights are determined to be, say, 40 percent, she gets 40 percent of the value of the pension accumulated during the years of the marriage (or its equivalent in other property).

The Supreme Court, however, rejected pension division in the only two cases to come before it so far (one on military pensions, one on railroad retirement). It said these particular pensions belong solely to the worker, as a personal entitlement.

The husband, in short, is working for his own retirement security and the housewife is working for the husband. If the marriage fails, her retirement is her own problem, not his.

That Supreme Court decision created two categories of housewives: one with some measure of old-age protection in divorce and one without. At present, military and railroad-retirement wives are the ones without.

Military wives are trying to persuade Congress to pass a pension-protection law that would undo the Supreme Court decision. Three main proposals are under consideration.

If any of them is passed, it will be an important measure of congressional intent on the property rights of women. It will stand as a precedent in future cases.

If they fail, the Supreme Court might read it to mean that Congress does not want wives to have property rights to their husbands' pensions. That could result in taking hard-won rights away from other women, too.

Women who have careers and pensions of their own may not much worry about the status of their husbands' pensions. But for older housewives, pension rights can make the difference between getting by and getting welfare. Military wives find it particularly hard to earn their own pensions because they must move around too much to stick with any one job.

The simplest pension-rights bill comes from Sen. Dennis DeConcini (D-Ariz.), who wants to return the issue to state jurisdiction. His view is that a military wife, like other wives, should be entitled to whatever property, including pensions, is awarded her under state divorce law.

A bill from Rep. Kent Hance (D-Tex.) carries that principle one step further by dealing with the problem of collecting state-ordered pension distributions as well as alimony and child support awarded against retirement pay. "We need a law providing for a workable payment system for the court orders many of us already have," Vivian Filemyr, national president of Action for Former Military Wives, told my associate, Virginia Wilson.

If a military man moves and quits paying his ex-wife and children, the Defense Department refuses to tell the ex-wife where he is. The Hance bill would guarantee her court-ordered payments by sending her checks directly.

A more sweeping bill from Rep. Patricia Schroedor (D-Colo.) would guarantee military wives married 10 years or more a pro rata share in their husbands' pensions, along with other rights. Such a law would actually put military wives in a more favorable position than other wives.

So far, the military-pension debate has been capturing the attention of only the men and women directly affected. Male-dominated military organizations uniformly oppose the proposals now in Congress. The Defense Department has yet to be heard from, but the outcome of this narrow battle could affect marital rights everywhere.●

---

By Mr. HATCH:

S.J. Res. 110. Joint resolution to amend the Constitution to establish legislative authority in Congress and the States with respect to abortion; to the Committee on the Judiciary.

HUMAN LIFE FEDERALISM AMENDMENT

● Mr. HATCH. Mr. President, I am proposing an amendment to the Constitution today—the human life federalism amendment—that would overturn the infamous decision of the U.S. Supreme Court in *Roe* v. *Wade* 410 U.S. 113 (1973). This amendment would restore to the representative branches of Government the authority to legislate with respect to the practice of abortion.

ROE AGAINST WADE

In Roe against Wade, the Court found that the due process clause of the 14th amendment contained a guarantee of a "right to privacy" that was broad enough to encompass a woman's decision "whether or not to terminate pregnancy." Id. at 153. Because the right to personal privacy was a "fundamental right," it could be limited only by some "compelling State interest." Id. at 153. While such an interest could not be based upon the inclusion of unborn human life in the term "person" in the 14th amendment—with respect to which there may be no deprivation of life without due process of law—the Court nevertheless found some measure of State interest in protecting maternal health and in preserving the "potential life" of the fetus. Id. at 148.

In seeking to give expression to these interests, as well as protecting the newly discovered right to terminate one's pregnancy, the Court summarized its holding in the following manner:

(a) For the stage prior to approximately the end of the first trimester of pregnancy, the abortion decision and its effectuation must be left to the medical judgment of the pregnant woman's attending physician.

(b) For the stage subsequent to approximately the end of the first trimester, the State, in promoting its interest in the health of the mother, may, if it chooses, regulate the abortion procedure in ways that are reasonably related to maternal health.

(c) For the stage subsequent to viability, the State in promoting its interest in the potentiality of human life may, if it chooses, regulate and even proscribe, abortion except where it is necessary, in appropriate medical judgment, for the preservation of the life or health of the mother. 410 U.S. at 164–165.

The scope of the abortion right set forth by the Court in Roe against Wade on January 22, 1973, was broader than that existing at the time in every one of the 50 States in the Union.

Prior to Roe against Wade, 31 States had statutes on their books that totally protected life from conception. Of the 19 that permitted abortion under certain circumstances, all 19 permitted abortions where necessary to save the life of the mother, 6 permitted abortions in cases of rape, 5 in cases of incest, and 4 in cases where there was likelihood that a child would be born with a substantial deformity. In only four States was abortion on demand permitted and, in each of these, there were temporal limits to such a right. The most liberal provision existed in the State of Massachusetts which permitted abortions without restrictions until the sixth month of pregnancy.

Whatever one's perceptions about

abortion, it is difficult to argue with the proposition that Roe against Wade has created a regime of abortion on demand, a national policy of abortion without restrictions of any significant kind. It is this status quo that would be overturned by the proposed human life federalism amendment.

During the first trimester of the pregnancy, the plenary right to abortion is express. During that period, there is absolutely no governmental authority to intervene in the woman's decision to abort. During the second trimester, a Government interest in abortion does arise—the interest in protecting and preserving maternal health. This interest may be expressed through governmental requirements that such abortions be performed within hospitals, clinics, or other facilities licensed to perform abortions.

There remains an absence of governmental authority, however, to do anything more than insure the safeness of the procedures of abortion. There are no protections whatsoever for the unborn fetus during this stage of the pregnancy.

During the final trimester of abortion—or approximately at that point at which the fetus reaches "viability"—a potential interest arises in protecting the fetus. The Government, finally, was in a position to protect the life of the fetus.

The Court, however, limited even this authority with an exception—and it was an exception that consumed the rule. During even the third trimester of the pregnancy, the right to abortion existed where necessary to protect the life or health of the mother. The critical element here was the health of the mother.

According to the Court in the companion case of *Doe* v. *Bolton* 410 U.S. 179 (1973), whether or not the health of the mother necessitated an abortion was a medical judgment to be made "in the light of all factors—physical, emotional, psychological, and the woman's age—relevant to her well-being." Id. at 192.

In other words, to quote Prof. John Noonan of the University of California Law School, the absolute right to abortion was curbed during the final trimester only by "the necessity of a physician's finding that she needed an abortion." Noonan, "A Private Choice" (New York: MacMillan, 1979), 12. It would be a rare physician who would be incapable of defending an abortion decision on the grounds that, in his best medical judgment, the "well-being" of the mother demanded it.

The abortion right then is a virtually unrestricted right under Roe and Doe. Any significant restrictions on this right are illusory. To quote Professor Noonan again:

> For the nine months of life within the womb the child was at the gravida's (pregnant woman's) disposal—with two restrictions: She must find a licensed clinic after month three; and after her child was viable, she must find an abortionist who believed she needed an abortion. *Id.* at 12.

No substantial barriers of any kind exist today in the United States for a woman to obtain an abortion for any reason during any stage of her pregnancy.

JURISPRUDENCE OF ROE

Apart from the national policy of abortion that it spawned, the Roe decision has been criticized broadly as an exercise in jurisprudence by observers of varying political persuasions and varying perspectives on abortion. In dissent in the Roe and Doe cases, Justice White observed:

> I find nothing in the language or history of the Constitution to support the Court's judgment. The Court simply fashions and announces a new constitutional right for pregnant mothers and, with scarcely any reason or authority for its action, invests that right with sufficient substance to override most existing State abortion statutes. 410 U.S. at 221.

Justice Rehnquist added in an accompanying dissent:

> The decision here to break the term of pregnancy into three distinct terms and to outline the permissible restrictions the State may impose in each one, for example, partakes more of judicial legislation than it does of a determination of the intent of the drafters of the Fourteenth Amendment. . . . To reach its result the Court necessarily has had to find within the scope of the Fourteenth Amendment a right that was apparently completely unknown to the drafters of the Amendment. 410 U.S. at 174.

Prof. Archibald Cox, the former Solicitor General of the United States, remarked of the Roe decision:

> The failure to confront the issue in principled terms leaves the opinion to read like a set of hospital rules and regulations. . . . Neither historian, nor layman, nor lawyer will be persuaded that all the prescriptions of Justice Blackmun are part of the Constitution. Cox, *The Role of the Supreme Court in American Government* (New York: Oxford University Press, 1976), 113–114.

Prof. John Hart Ely of the Harvard Law School, while taking care to divorce himself from critics of the substantive policy expressed in Roe, concluded:

> It is, nevertheless, a very bad decision . . . It is bad because it is bad constitutional law, or rather because it is not constitutional law and gives almost no sense of an obligation to try to be. Ely, *The Wages of Crying Wolf: A Comment on Roe* v. *Wade* 82, Yale Law Journal 920, 947 (1973).

Alexander Bickel, professor at the Yale Law School, described the decision as akin to a "model statute" and expressed bewilderment at how such a responsibility had come to be vested in the Court:

> One is left to ask why. The Court never said. It refused the discipline to which its function is properly subject . . . *Roe* is derived not from Herbert Spencer's Social Statics, but from fashionable notions of progress . . . this will not do. Bickel, *The Morality of Consent* (New Haven: Yale University Press, 1975), 28.

Prof. Charles Rice of the Notre Dame Law School described the decision as "the most outrageous decision ever handed down by the Court in its entire history"; Prof. Richard Epstein of the University of Chicago Law School referred to Roe as "comprehensive legislation," without "principled grounds"; Prof. Robert Byrn of the Fordham Law School attacked the decision as resting upon "multiple and profound misapprehension of law and history"; Dean Harry Wellington of the Yale Law School viewed Roe as "Pickwickian" and "without mandate"; and Prof. Joseph Witherspoon of the University of Texas Law School described the decision as "unquestionably the most erroneous decision in the history of constitutional adjudication by the Supreme Court." Professor Noonan concluded his analysis of the abortion cases by stating:

> The liberty established has no foundation in the Constitution of the United States. It was established by an act of raw judicial power. Its establishment was illegitimate and unprincipled, the imposition of the personal beliefs of seven justices on the men and women of fifty States. The continuation of the liberty is a continuing affront to constitutional government in this country. Noonan at 189.

OVERTURNING SUPREME COURT

Justice White in his Roe dissent aptly characterized the majority decision when he observed:

> The upshot is that the people and the legislatures of the fifty States are constitutionally disentitled to weigh the relative importance of the continued existence and development of the fetus on the one hand against the spectrum of possible impacts on the mother on the other hand.

It is this result that the proposed human life Federalism amendment is intended to overcome. The proposed amendment would restore to the States—as well as invest in Congress—the authority to legislate with respect to abortion. While I would personally favor an amendment that would impose a duty upon the States to prohibit virtually all abortions, I must stress that this is not the objective of the present amendment. It is not necessary that there be this duty in order to overcome the Roe and Doe decisions. It is necessary only that the representative branches of the Government no longer be totally limited in their ability to act in restricting or regulating or prohibiting abortion because of some presumed constitutional right to abortion.

There is no such constitutional right to abortion, in my view. It has never existed and there is nothing in the proposed measure that would concede that such a right has ever existed. I recognize, however, that, under our structure of Government, it is the duty of the Court to "say what the law is," *Marbury* v. *Madison* 1 Cranch 137 (1803). For better or worse, the Court has spoken on the issue of abortion in Roe and Doe; it has articulated a constitutional right to abortion emanating from the 14th amendment. There is no alternative now that a constitutional amendment to overcome this result—except to wait for the slim possibility that the Court may some day admit its error and overturn on its own the abortion cases.

There is certainly ample precedent for such a response to a Supreme Court decision. The 11th amendment to the Constitution, prohibiting the Federal judicial power to be exercised in suits by citizens of a State against another State, came in direct response to an action of the Supreme Court in accepting jurisdiction over such a case. *Chisholm* v. *Georgia*, 2 U.S. 419 (1793).

The 14th amendment, in circumstances not dissimilar from the present case, was proposed to the Constitution following the infamous decision of the Supreme Court in the *Dred Scott* case finding that black individuals were nonpersons under the Constitution. 60 U.S. 393 (1857).

The 16th amendment, permitting the imposition of a Federal income tax, was

later enacted in response to a Supreme Court decision finding an unapportioned—by State—tax to be in violation of article I of the Constitution. *Pollock* v. *Farmer's Loan and Trust Co.*, 157 U.S. 429 (1895); 158 U.S. 601 (1895).

Finally, the 26th amendment, according 18-year-olds the right to vote in Federal and State elections, was proposed following the Court's decision that the Congress lacked authority to impose such an obligation statutorily upon the States. *Oregon* v. *Mitchell*, 400 U.S. 112 (1970).

In addition, serious efforts at constitutional amendment were made in response to Court decisions on the subjects of child labor laws, *Hammer* v. *Dagenhart*, 247 U.S. 251 (1918), later overruled in *United States* v. *Darby*, 312 U.S. 100 (1941); and State legislative apportionment requirements, *Baker* v. *Carr*, 369 U.S. 186 (1962).

PROGENY OF ROE

It is not simply the abortion right that was created in Roe and Doe that is the object of my proposed amendment. However indefensible these decisions as matters of policy and jurisprudence, they have been distorted further by a series of subsequent decisions clarifying the scope of this right. Each of them have come in response to post-Roe efforts by the States to accord some measure of protection to unborn human life, or to establish some procedure to insure that the abortion decision was a deliberate, carefully considered one. In virtually every instance, the Supreme Court has struck down these exercises.

In *Planned Parenthood* v. *Danforth* 428 U.S. 52 (1976), the Supreme Court held that spousal consent statutes, which required the consent to an abortion by the father of a fetus, were unconstitutional. See also *Coe* v. *Gerstein* 376 F. Supp. 695 (S.D. Fla. 1974), affirmed 428 U.S. 901 (1976). The Court in Danforth also held that so-called informed consent statutes, which required a physician to obtain the written consent of a woman after apprising her of the dangers of abortion and possible alternatives, were constitutional only if the requirements were closely related to maternal health and not unnecessarily burdensome upon the abortion right. See also *Freiman* v. *Ashcroft* 584 F. 2d 247, affirmed 99 S. Ct. 1416 (1979).

In *Belotti* v. *Baird* 443 U.S. 622 (1979), the Court held that, while parental consent statutes requiring minors to obtain the consent of their parents prior to having an abortion were not unconstitutional per se, the State must also provide alternative procedures for obtaining an abortion in the event that parental consent is not forthcoming or if the minor does not want to request such consent.

See also *Planned Parenthood* v. *Danforth* 428 U.S. 52 (1976). In *H.L.* v. *Matheson* Docket No. 79-5903 (1981), however, the Court upheld a Utah State statute prohibiting physicians, under narrowly defined circumstances, from performing an abortion on unemancipated minors without parental notification. The statute was drawn extremely narrowly to require such notification "if possible" and to apply if the minor is living with and dependent upon her parents and has made no showing or claim of unusual maturity.

In *Colautti* v. *Franklin*, 439 U.S. 379 (1979), the Court ruled that fetal protection statutes were generally unconstitutional by reason of being vague and overly broad. Such statutes, in one manner or another, impose an obligation upon a performing doctor to make reasonable efforts to save the life of an aborted fetus. In Colautti, the Court found that such statutes were permissible only with respect to viable fetuses—who by definition were least in need of such protection—and that they must contain precise standards for determining such viability. See also *Planned Parenthood* v. *Danforth*, 428 U.S. 52 (1976).

Thus, even at the latest stages of pregnancy, the Court refused to find a significant interest in the life of the fetus that could be balanced against the apparently unrestricted right of the woman to terminate her pregnancy at will. It is the progeny of Roe and Doe, as much as Roe and Doe themselves, toward which my proposed amendment is directed. It is these cases which make clear the lengths to which some on the Court are prepared to go in defense of the abortion right.

FEDERALISM AMENDMENT

The proposed amendment would read in its entirety:

> The right to abortion is not secured by this Constitution. The Congress and the several States shall have the concurrent power to restrict and prohibit abortions: *Provided*, That a law of a State more restrictive than a law of Congress shall govern.

It is language that I hope will be scrutinized by my colleagues, by the public, and by participants in the hearing process that will begin next month in the Subcommittee on the Constitution.

In removing the abortion controversy from the Federal judicial branch, the proposed amendment would place the debate within those institutions of Government far better equipped to deal with the issue. By its very nature, the judiciary is the wrong forum to resolve the enormously difficult problem of abortion. Because they cannot control the specific types of cases that come before them, and because they are limited in their ability to fashion compromise solutions to difficult issue, the courts are entirely the wrong place within which to argue about abortion.

The "all or nothing" legalization of abortion-on-demand of Roe and Doe has done nothing but exacerbate the tensions already created by the abortion controversy. Unlike most legislative solutions in which some element of deference is paid to major political or social or occupational groupings, the abortion decisions involved a small group of seven individuals who totally ignored the passionately held views of a large number of the American people. They did this not in response to the unequivocal demands of the operative document of our Nation, but in the course of a decision whose jurisprudence and whose textual and historical foundation in the Constitution is at least as suspect as the policies that it fostered.

Let me be clear about what I am saying. I personally believe that abortion is an "all or nothing" issue. I am irreconcilably opposed to abortion. I believe that abortion involves the taking of a human life. It is morally, ethically, and—I believe—constitutionally wrong. Should my amendment become part of the Constitution, I would be among those seeking the most restrictive State and Federal laws with respect to abortion. When a greater consensus exists in this country on the repugnance of abortion—which consensus I believe will be promoted by this amendment—I will be among those seeking a direct constitutional prohibition on abortion.

That consensus, unfortunately, does not exist yet today. The abortion issue, if it is to be elevated into an issue of constitutional proportions, should be elevated only through the normal consensus-building procedure of the article V amendment process rather than through the process of judicial reinterpretation.

For the present, I believe that it is important to reenfranchise all the people in fashioning a solution to the abortion controversy. That can only be done by placing this issue back within the representative branches of Government where it should have remained all along. I would expect that the result would be difficult legislative compromises, bitter sessions of negotiation and give-and-take, and solutions not entirely satisfactory to any single group or individual, including myself.

Although I would expect to continue personal efforts to secure a total abolition of abortion in this country, I know that I would be able to tolerate a regime that permitted some abortions much better if it were the result of the clear will of the citizenry speaking through their representatives than where it has been the result of a small elite imposing their own personal views through the pretext of constitutional interpretation.

LEGISLATIVE OPTIONS

Because the proposed amendment would only provide authority to the State legislatures and Congress to act on the issue of abortion—without dictating particular legislative outcomes or policies—I would hope that all of my colleagues who can distinguish between abortion and run-of-the-mill medical operations would consider supporting it. Nothing is mandated by this amendment. It does not get involved with any issues relating to "when human life begins." It does not read in "rape" or "incest" or "medical necessity" exceptions into the Constitution. It does not require any particular treatment of contraceptives—which would not be covered by the amendment—or abortifacients or IUD's. No questions of tort law or criminal law or insurance law are inadvertently raised.

All that the proposed amendment would do is to "deconstitutionalize" the issue of abortion. There would no longer be a constitutional right or guarantee of abortion. Congress and the States, it is true, could act under the proposed amendment to totally prohibit abortion.

They could prohibit abortions in all but narrowly limited or defined circumstances. I would personally support this. But, if they chose, they could undertake far less extensive reforms. They could, for example—

First. Choose only to limit the circumstances of late pregnancies alone;

Second. Choose only to impose obligations upon physicians to save the lives of fetuses capable of surviving an abortion;

Third. Place limitations upon the experimental and medical research use of fetuses;

Fourth. Require that women contemplating abortion be fully appraised of the risks of abortion and alternatives to abortion;

Fifth. Require some form of parental consent to abortions performed upon minors;

Sixth. Require some form of spousal consent to abortions performed upon a woman;

Seventh. Establish some minimum waiting period before an abortion could occur or require some form of professional consultation prior to an abortion;

Eighth. Establish rights of refusal to perform abortions in physicians or nurses, or in entire hospitals;

Ninth. Limit the commerce in abortifacient devices;

Tenth. Limit public advertising by abortion clinics and by abortion services.

The Congress and the States, if they chose, could further decide to do nothing about abortion. That, too, would be within their discretion under the proposed amendment.

MISCELLANEOUS ASPECTS

Let me briefly summarize some of the technical aspects of the proposed amendment that I have tried to consider carefully. I will, of course, look forward to hearing testimony on these and other aspects of the amendment during the upcoming Subcommittee on the Constitution hearings:

The "right to abortion" referred to in the first sentence is a right that apparently was derived in Roe from the due process clause of the 14th amendment. There is some suggestion even in Roe, though, that the right may be derived from the ninth amendment. Roe at 153. There is some confusion on this point. The purpose of the proposed amendment is to abrogate this "right" whatever its alleged constitutional basis.

There is some disagreement as far as whether or not each of the individual sentences of the amendment standing alone would effectively overturn Roe. I believe that they probably would, but have chosen to clarify this issue by proposing that each be placed into the Constitution. Together, it should be explicit that there is no constitutionally based right to abortion emanating from any provision of the Constitution that might potentially restrict the ability of Congress or the States to legislate with respect to the subject.

The right to legislate with respect to abortion would, of course, be restricted by other provisions of the Constitution not relating to a right to abortion. It would be a clear violation of the equal protection clause of the 14th amendment, for example, for a State to distinguish between women on the basis of race in permitting or restricting abortions.

The concept of "concurrent" power to legislate with respect to abortions is not dissimilar to the concept of "concurrent" power given Congress and the States to enforce the 18th amendment relating to the manufacture, sale, or transportation of intoxicating beverages. There would be separate and independent—not joint—power in Congress and the States to exercise their territorial limits. *National Prohibition Cases* 253 U.S. 350 (1920).

The question of whether a Federal law enacted under the proposed amendment would conflict with a State law is largely one of statutory construction that cannot be approached mechanically. Similarly, what is more or less "restrictive" in the way of placing limits upon abortion is a matter that cannot be summarized through formulas.

The basic premise of the amendment, however, is this. The Congress would be empowered to establish minimum national standards with respect to abortion, if it chose. Under the supremacy clause of the Constitution, a Federal enactment would take precedence over a State enactment in the case of irreconcilable conflict. See for example, *State* v. *Gauthier* 118 A. 380 (1922); *State* v. *Ligaarden* 230 N.W. 729 (1930); *State* v. *Lucia* 157 A. 61 (1931).

The latter clause of the second sentence, however, would alter this general rule of preemption to the extent that a State enactment was more restrictive of abortion than a congressional enactment.

In some respects, the differences between the more traditional constitutional amendments relating to abortion and the immediate amendment are not as great as appears at first glance. Even a proposed amendment that directly prohibited abortion would not be self-enforcing. It would require Federal and State enabling legislation. Given that the judiciary would—properly—be reluctant to force a coequal legislative branch of government to pass legislation, there would likely be a major element of discretion deposed in the legislative branches of Government under even a direct human life amendment.

Finally, I would note that, because it is a Constitution that we are amending, not a legal code, I have placed a priority on making clear the principle that is being pursued, not on insuring that each and every opportunity for possible circumvention is forestalled. I am not sure that this is possible. In this respect, I quote again from Professor Noonan:

> The Constitution is not addressed to persons of bad will, but to persons—judges, legislators, officeholders, citizens—who want to abide by its provisions. Therefore, it is neither necessary nor desirable to draft with an eye to silly, sophistical, or evasive interpretations. No language can be made foolproof. There is no language that cannot be distorted by evil men or inverted by clever men. It is not hard to show the vulnerability of any form of words to ingenious and insympathetic interpretation. As the Constitution is not addressed to the wicked or the foolish, so it is not addressed to the sophistical. The Constitution, and any amendment to it, speak to the understanding of those who with good will seek to comprehend the purposes of its framers. *Noonan* at 182.

CONCLUSION

Let me conclude by saying to those who would argue that this amendment represents a concession to, or a compromise with, a morally indefensible policy. I do not believe that this is true. Not only would the proposed amendment overturn Roe against Wade, but it would, arguably, go further by clarifying that Congress, as well as the States, possesses authority with respect to abortion. It would restore the status quo prior to the Roe decision—and then some.

While I would personally prefer that we go further, there can be absolutely no doubt in anyone's mind that there is not currently the kind of consensus for this action—either in the country or in Congress—that would permit this to be done. Nor is such a consensus imminent. The longer that abortion on demand continues, the more acceptable that it becomes, the more that it becomes institutionalized. I do not believe that we can permit this to happen.

Once, however, we can establish in the Constitution the principle that abortion is not an ordinary, routine medical operation, I believe that we can begin to reeducate all the American people to the cruel realities of abortion. Acceptance of this principle in the organic law of our land will better enable us to carry on education and information efforts.

The longer that the status quo—unrestricted abortion—continues to be the law of the land, the greater the number of citizens who will grow up in this country oblivious to any other reality, the greater the number of citizens who will forget that there was a time at which abortion was condemned unanimously by the States. Not during the Middle Ages, not during the era of the Founding Fathers, not during the industrial revolution, but during the entirety of our Nation's history through the 1950's and the 1960's and up until January 22, 1973.

The law is, in fact, a teacher. We must give it that opportunity before it is too late, before the lesson goes permanently unlearned.

I urge the support of my colleagues for the proposed amendment—not only those who share the full extent of my concern about abortion, but those as well who are uneasy at any aspect of the structure that has been erected by the Supreme Court, those who are hesitant at the process by which the abortion revolution has been wrought, and those who recognize the social divisions that have been caused this country by a Court that ignored the strengths of the democratic, representative processes of government in resolving differences among citizens.

I ask unanimous consent that the full text of the joint resolution appear at this point in the RECORD:

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 110

*Resolved by the Senate and House of Representatives of the United States in Congress assembled, (two-thirds of each*

*House concurring therein*), That the following article is proposed as an amendment to the Constitution of the United States which shall be valid to all intents and purposes as part of the Constitution when ratified by the legislatures of three-fourths of the several States within seven years from the date of its submission by the Congress:

"ARTICLE —

"A right to abortion is not secured by this Constitution. The Congress and the several States shall have the concurrent power to restrict and prohibit abortions: *Provided*, That a law of a State which is more restrictive than a law of Congress shall govern.".

## ADDITIONAL COSPONSORS

S. 517

At the request of Mr. BENTSEN, the Senator from New York (Mr. D'AMATO) and the Senator from Iowa (Mr. GRASSLEY) were added as cosponsors of S. 517, a bill to amend the Clean Air Act to provide for further assessment of the validity of the theory concerning depletion of ozone in the stratosphere by halocarbon compounds before proceeding with any further regulation of such compounds, to provide for periodic review of the status of the theory of ozone depletion, and for other purposes.

S. 895

At the request of Mr. MATHIAS, the Senator from Michigan (Mr. LEVIN) was added as a cosponsor of S. 895, a bill to amend the Voting Rights Act of 1965 to extend certain provisions for an additional 10 years, to extend certain other provisions for an additional 7 years, and for other purposes.

S. 953

At the request of Mr. HEFLIN, the Senator from Louisiana (Mr. JOHNSTON) and the Senator from Washington (Mr. JACKSON) were added as cosponsors of S. 953, a bill to create a program to combat violent crime in the United States, and for other purposes.

S. 954

At the request of Mr. HEFLIN, the Senator from Louisiana (Mr. JOHNSTON) was added as a cosponsor of S. 954, a bill to amend title 18 and the Omnibus Crime Control and Safe Streets Act of 1974 and for other purposes.

S. 1142

At the request of Mr. HEFLIN, the Senator from Montana (Mr. MELCHER) was added as a cosponsor of S. 1142, a bill to amend the National Traffic and Motor Vehicle Safety Act of 1966 to authorize the Secretary of Transportation to require tire dealers or distributors to provide first purchasers with a form to assist manufacturers in compiling tire defects if the Secretary determines such notice is necessary in the interest of motor vehicle safety.

S. 1158

At the request of Mr. HEFLIN, the Senator from Alabama (Mr. DENTON) was added as a cosponsor of S. 1158, a bill for the relief of Christina Boltz Sidders.

S. 1235

At the request of Mr. D'AMATO, the Senator from Arizona (Mr. DECONCINI) was added as a cosponsor of S. 1235, a bill to exempt certain matters relating to the Central Intelligence Agency from the disclosure requirements of title 5, United States Code.

S. 1323

At the request of Mr. TSONGAS, the Senator from Maine (Mr. MITCHELL), the Senator from Connecticut (Mr. DODD), the Senator from Michigan (Mr. LEVIN), and the Senator from Montana (Mr. BAUCUS) were added as cosponsors of S. 1323, a bill to amend the Internal Revenue Code of 1954 with respect to the residential energy and investment tax energy credits, and for other purposes.

S. 1378

At the request of Mr. JEPSEN, the Senator from Utah (Mr. HATCH) was added as a cosponsor of S. 1378, a bill to strengthen the American family and to promote the virtues of family life through education, tax assistance, and related measures.

S. 1532

At the request of Mr. HEFLIN, the Senator from Arkansas (Mr. BUMPERS), and the Senator from Ohio (Mr. METZENBAUM) were added as cosponsors of S. 1532, a bill to amend the Federal Rules of Criminal Procedure and the Federal Rules of Civil Procedure with respect to examination of prospective jurors.

S. 1589

At the request of Mr. HEFLIN, the Senator from North Dakota (Mr. ANDREWS) was added as a cosponsor of S. 1589, a bill to improve the security of the electric power generation and transmission system in the United States.

SENATE JOINT RESOLUTION 97

At the request of Mr. MITCHELL, the Senator from South Dakota (Mr. PRESSLER), and the Senator from Oregon (Mr. PACKWOOD) were added as cosponsors of Senate Joint Resolution 97, a joint resolution to designate the second full week in October as "National Legal Secretaries' Court Observance Week."

SENATE JOINT RESOLUTION 105

At the request of Mr. LAXALT, the Senator from Wisconsin (Mr. KASTEN), the Senator from Maryland (Mr. MATHIAS), the Senator from Alabama (Mr. DENTON), the Senator from California (Mr. CRANSTON), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Texas (Mr. BENTSEN), and the Senator from Kansas (Mr. DOLE) were added as cosponsors of Senate Joint Resolution 105, a joint resolution to designate October 1981 as "National PTA Membership Month."

SENATE CONCURRENT RESOLUTION 32

At the request of Mr. MATHIAS, the Senator from Texas (Mr. BENTSEN) was added as a cosponsor of Senate Concurrent Resolution 32, a concurrent resolution authorizing a bust or statue of Dr. Martin Luther King, Jr., to be placed in the Capitol.

SENATE RESOLUTION 77

At the request of Mr. HEFLIN, the Senator from Alabama (Mr. DENTON) was added as a cosponsor of Senate Resolution 77, a resolution relating to the granting of exit visas for Irina and Boris Ghinis and their children, Julia and Allis Ghinis, for departure from the Soviet Union.

SENATE RESOLUTION 199

At the request of Mr. NUNN, the Senator from South Carolina (Mr. HOLLINGS), the Senator from Oregon (Mr. HATFIELD), the Senator from California (Mr. HAYAKAWA), the Senator from Texas (Mr. TOWER), the Senator from Florida (Mr. CHILES), the Senator from Oklahoma (Mr. BOREN), the Senator from Minnesota (Mr. DURENBERGER), the Senator from Pennsylvania (Mr. SPECTER), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Arizona (Mr. GOLDWATER), the Senator from North Carolina (Mr. HELMS), the Senator from Tennessee (Mr. SASSER), the Senator from Connecticut (Mr. WEICKER), the Senator from Washington (Mr. JACKSON), the Senator from New York (Mr. D'AMATO), the Senator from Michigan (Mr. LEVIN), the Senator from Mississippi (Mr. COCHRAN), the Senator from Nebraska (Mr. ZORINSKY), the Senator from Rhode Island (Mr. PELL), the Senator from West Virginia (Mr. RANDOLPH), the Senator from Hawaii (Mr. INOUYE), the Senator from South Dakota (Mr. ABDNOR), the Senator from Wisconsin (Mr. KASTEN), the Senator from Alaska (Mr. MURKOWSKI), and the Senator from Illinois (Mr. PERCY) were added as cosponsors of Senate Resolution 199, a resolution to authorize "National Productivity Improvement Week."

SENATE RESOLUTION 211

At the request of Mr. BENTSEN, the Senator from West Virginia (Mr. ROBERT C. BYRD) was added as a cosponsor of Senate Resolution 211, a resolution calling on the Governors of the Federal Reserve System to encourage banks to make loans available for productive uses while eliminating loans for speculative and unproductive uses.

## SENATE RESOLUTION 213—RESOLUTION AUTHORIZING SUPPLEMENTAL EXPENDITURES BY THE COMMITTEE ON THE JUDICIARY

Mr. T. [illegible] for himself and Mr. BIDEN) sub[illegible] the following resolution; which was referred to the Committee on the Judiciary:

S. RES. 213

*Resolved*, That section 2 of the Senate Resolution 53, Ninety-seventh Congress, agreed to March 31 (legislative day, February 16), 1981, is amended by striking out the amounts "$4,272,722" and "$172,490" and inserting in lieu thereof "$4,425,590" and "$179,990", respectively.

## NOTICE OF HEARINGS

SUBCOMMITTEE ON ENERGY REGULATION

Mr. HUMPHREY. Mr. President, I would like to announce for the information of the Senate and the public that the oversight hearings previously scheduled before the Subcommittee on Energy Regulation for Monday, November 2 and Tuesday, November 3 to consider the implementation of title I of the Natural Gas Policy Act of 1978 have been canceled.

## AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON LABOR AND HUMAN RESOURCES

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on Labor and Human Resources be permitted to meet during the session of the Senate tomorrow, September 22, at 2 p.m., to hold nomination hearings on the following nominees: Gary Jones, to be Deputy Under Secretary for Planning and Budget in the Department of Education; Jean Tufts to be Assistant Secretary for Special Education and Rehabilitative Services, Department of Education; and Edward Curran, to be Director of the National Institute of Education.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. STEVENS. Mr. President, I ask unanimous consent that the Governmental Affairs Committee be permitted to meet twice on Tuesday, September 22 during the session of the Senate, at 10 a.m. to discuss S. 1417, the Presidential Protection Commission Act, and again at 2 p.m. to discuss the nominations of Bruce Chapman for Director of the Bureau of the Census and Charles Girard to be Associate Director for Resource Management and Administration at the Federal Emergency Management Agency.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Tuesday, September 22, at 3 p.m., to hold a hearing on the nomination of John Gunther Dean to be Ambassador to Thailand and M. Virginia Schafer to be Ambassador to Papua, New Guinea.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Tuesday, September 22, to hold a business meeting to vote on nominations and to mark up the Sinai Agreement, Senate Joint Resolution 100.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Thursday, September 24, at 2 p.m. to hold hearings on 10 tax treaties.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON ENERGY RESEARCH AND DEVELOPMENT

Mr. STEVENS. Mr. President, I ask unanimous consent that the Subcommittee on Energy Research and Development of the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Monday, September 21, to hold a hearing to consider the Department of Energy's photovoltaic program.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I ask unanimous consent that the Subcommittee on Energy Research and Development of the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Friday, September 25, at 10 a.m., to hold a hearing to consider the viability of the domestic mining and milling industry.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Tuesday, September 22, at 9:30 a.m. to hold a business meeting on pending calendar business.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Wednesday, September 23, to hold a business meeting on pending calendar business.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Thursday, September 24, to hold a hearing to consider the nomination of Henry E. Thomas IV, of Virginia, to be an Assistant Secretary of Energy for International Affairs.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON INTERGOVERNMENTAL RELATIONS

Mr. STEVENS. Mr. President, I ask unanimous consent that the Subcommittee on Intergovernmental Relations of the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Wednesday, September 23, at 9:30 a.m., to hold an oversight hearing on standard language to be included in all future block-grant legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON INVESTIGATIONS AND GENERAL OVERSIGHT

Mr. STEVENS. Mr. President, I ask unanimous consent that the Subcommittee on Investigations and General Oversight of the Committee on Labor and Human Resources be authorized to meet during the session of the Senate on Wednesday, September 23, to hold a hearing pertaining to oversight of occupational safety and health, at 10 in the morning.

The PRESIDING OFFICER. Without objection, it is so ordered.

---

## ADDITIONAL STATEMENTS

### THE FARM BILL

● Mr. D'AMATO. Mr. President, I must say that I have serious reservations about the farm bill as passed by the Senate, S. 884. In particular, the dairy price support program adopted by the Senate last week is inadequate to meet the basic needs of the dairy farmer and his family. The pain inflicted upon the dairy farmer is even more cutting when he sees the benefits bestowed upon the peanut grower, the tobacco harvester, and the sugar cropper.

I have been a consistent supporter of the President's program for economic recovery. In so doing, however, I have maintained that the budget reductions and tax cuts must be fair and equitably shared. I have great difficulty in finding the equity and fairness in this farm bill. It is just not there.

The dairy title of this farm bill may very well be a disaster for this Nation's dairy farmers. S. 884 sets a 70-percent parity dairy price support effective October 1, 1981, with no semiannual adjustment. The $13.10 per hundredweight support price will carry over for another year until October 1, 1982, because 70 percent of parity on October 1, 1981, will probably be no more than $13.10. As a result of these provisions, the dairy farmer will have to absorb on his own the burden of inflation and devastating interest rates.

The small, family owned and run dairy farm may soon become an endangered species. New York is one of this Nation's leading dairy States. The dairy farmer is one of this country's hardest workers. He rises before the sun to milk his cows each morning. As my colleagues are aware, this is not an easy task. I for one still adhere to the Jeffersonian ideal that the farmer has a special and chosen way of life.

Where would this Nation be without the agricultural abundance he provides? In what position would our country be put it we had to import our food stuff? Is it fair to say that our national security would be threatened? Should a policy that we have adopted toward the dairy farmers be continued for many years to come, and should it be applied to the other sectors of the agricultural community, our productivity will be threatened and with it our security.

Mr. President, I must also add that I am even more concerned with this Senate action because the dairy industry was the first to come forward last March to do its part for the success of the President's economic program. I voted to support the President at that time and the dairy farmer went without the increase in the support level he had expected on April 1, 1981. At that time I commended the dairy industry for taking the first step on the long and difficult road of fiscal restraint.

However, now the dairy farmer is still being sent down that road, and it is a lonely road in the agricultural community. It is a road paved with inflation and high interest rates, and we are not giving proper direction to the dairy farmer to help him along his travels. At the same time the Senate has seen fit to sugar-coat subsidies for other crops. I believe what is fair for one crop is fair for all, and if the dairy farmer is to sacrifice for the goal of a balanced Federal budget, then so too should the peanut and sugar producers.

Dropping the support level to 70 percent of parity is a serious blow to dairy farmers and will create problems for consumers and farmers alike. I remain committed to a reasonable and fair dairy price support level to insure stable prices and supplies for one of this Nation's most nutritious and healthful products.●

## SCIENCE AND ENGINEERING MANPOWER

● Mr. TSONGAS. Mr. President, we face a critical shortage of science and engineering manpower in the next decade. With the increased emphasis on defense, the shortage of civilian R. & D. manpower will be even more acute. Yet our ability to produce such trained manpower appears to be decreasing. U.S. graduate enrollments in engineering, physics, and chemistry have declined by anywhere from 20 to 40 percent from levels a decade ago—and nearly a third of those enrolled are now foreign students. International comparisons are also telling. Between 1963 and 1977, Japan awarded approximately as many degrees to engineers as did the United States, even though Japan's population is only about half the size of our own.

In the Soviet Union, an estimated 5 million of this year's graduates from secondary schools will have studied 2 years of calculus, compared to only 105,000 U.S. high school graduates who will have taken only 1 year of calculus. The disparity is just as marked in the rest of the mathematics and science curricula. To remain competitive in the international marketplace and maintain our national security, we must be able to draw on a large pool of trained scientific manpower.

A recent study by the American Association of Engineering Societies entitled "Data Related to the Crisis in Engineering Education," clearly identifies the need for additional support for science education. I would hope that when the Senate considers the National Science Foundation budget in the future, that these important points will be included in the debate.

I ask that the executive summary and three tables from the AAES study be printed in the RECORD.

The material follows:

SUMMARY

There is a serious problem in engineering education and research which relates directly to the present position of the United States in the world industrial market. The critical shortage of qualified faculty, the lack of resources necessary to prepare future faculty, and the absence of modern equipment and facilities, if not corrected rapidly, will result in further erosion of the United States position among the industrial powers of the world. A favorable resolution of this problem would strengthen the world position of the United States.

The shortage of qualified faculty for engineering colleges is extremely serious. Faculty salaries have not been responsive to the normal rules of supply and demand, and in many instances the industrial salaries for bachelor graduates are significantly higher than those paid experienced faculty. Thus, the recruitment and retention of faculty is extremely difficult. Indications are that this situation will get worse.

Although engineering colleges have increased their production of baccalaureate degrees by almost 54 percent in the past five years, the production of doctorate degrees has decreased by 13 percent over the same time period. However, the number of engineering degrees produced in the United States is a smaller percentage of the total degrees than for West Germany, Japan, and several other major nations.

Because of the importance of engineering in our technological society, engineering enrollment is at an all-time high. It is anticipated that engineering enrollments will continue to grow as the United States endeavors to strengthen its position in the industrial world. As a consequence, Engineering Colleges are becoming saturated with students while lacking the resources to handle them, causing a real crisis.

Engineering laboratories have deteriorated due to minimal maintenance and replacement budgets, and continuous use by greatly increasing numbers of students. In many cases, engineering laboratory facilities are one or more generations out of date, which affects the quality of engineering education. Immediate capital assistance is essential for the modernization and expansion of these facilities.

Current needs for engineering faculty members outstrip the total new Ph. D. production, yet only thirty-seven percent of the engineering Ph. D.'s are currently engineering faculty members and new Ph. D.'s are highly sought after by industry and government. More engineering doctorates are needed by both industry and university to meet national needs for productivity and innovation in the United States. It is essential that prompt actions be taken to resolve the crisis in engineering education.

U.S. ENGINEERING DEGREES, 1950–80

| Year ending | Bachelor's degrees | | Master's degrees | | Doctoral degrees | |
|---|---|---|---|---|---|---|
| | Foreign nationals | Total | Foreign nationals | Total | Foreign nationals | Total |
| 1950 | (1) | 48,160 | (1) | 4,865 | (1) | 492 |
| 1951 | (1) | 37,887 | (1) | 5,134 | (1) | 586 |
| 1952 | (1) | 27,155 | (1) | 4,132 | (1) | 586 |
| 1953 | (1) | 24,265 | (1) | 3,636 | (1) | 592 |
| 1954 | (1) | 22,236 | (1) | 4,078 | (1) | 590 |
| 1955 | (1) | 22,589 | (1) | 4,379 | (1) | 599 |
| 1956 | (1) | 26,306 | (1) | 4,589 | (1) | 610 |
| 1957 | (1) | 31,221 | (1) | 5,093 | (1) | 596 |
| 1958 | (1) | 35,332 | (1) | 5,669 | (1) | 647 |

## THE FAMILY PROTECTION ACT (S. 1378)

● Mr. HATCH. Mr. President, I desire to state my support for S. 1378, the Family Protection Act, introduced by my friend and colleague, the distinguished Senator from Iowa, Senator ROGER JEPSEN. In introducing the Family Protection Act Senator JEPSEN has exercised outstanding leadership in bringing the attention of Congress to focus on what is our greatest source of national strength, the family.

I am in complete agreement with the stated purposes of the Family Protection Act which are:

To preserve the integrity of the American family, to foster and protect the viability of American family life by emphasizing family responsibilities in education, tax assistance, religion, and other areas related to the family, and to promote the virtues of the family.

Too frequently in the past when we have developed public policy we have failed to take into account that when we are dealing with individuals, we are also dealing with families. At times we have adopted policies which, in their attempts to help individuals, have been destructive of families. It is, therefore, very appropriate to begin to reverse our thinking, and once again to bring families to the forefront of our national awareness, and to the attention of Congress as we examine human service issues.

The Family Protection Act looks at a very broad range of issues. Quite correctly it emphasizes that family related concerns span a wide field of congressional activity. Congress is organized into committees that deal with substantive issues. Many of these issues can impact upon a single family. While it is appropriate for the Family Protection Act to address a wide range of issues, I believe we will enact portions of the act as we consider legislation in a wide range of committee jurisdictions.

Mr. President, I hope we will follow the leadership of our distinguished colleague from Iowa in considering families and in strengthening families, as we debate and work on legislative concerns. We need to ask:

First, will this legislation strengthen the role of parents as they work to fulfill their responsibility as the primary source of guidance and support in raising their children.

Second, will this have a positive impact on couples and help to strengthen their marriage.

Third, does this approach recognize and strengthen the role that family members can bring in solving problems or finding solutions to social needs.

I believe the Family Protection Act addresses social concerns with exactly this kind of approach. Rather than trying to put big government between couples, between parents and children, or setting big government up as the director of social welfare, the Family Protection Act seeks to put the family in its rightful place as the center of concern.

I am pleased to join with Senator JEPSEN in offering my enthusiastic support for S. 1378. I hope we are moving into an era that will see families protected from unnecessary Government intrusion, and hurtful Government policy. I trust we are moving into an era which will see families, and family life, promoted and strengthened; because it is my firm conviction that if families are fully functioning and healthy most of the rest of society's problems will be easier to handle—in fact many will disappear.●

## HOUSING COOPERATIVES

● Mr. DODD. Mr. President, I would like to bring to the attention of my colleagues an excellent article from the July 1981 issue of the Journal of Housing by Scott B. Franklin, a student at the University of Connecticut School of Law. This analysis considers the substantial potential for utilizing the limited equity cooperative concept as a viable means of providing homeownership opportunities for lower income families.

At a time when 90 percent of the population cannot afford to purchase a new home and the assisted housing budget for lower and moderate income families is absorbing the single largest budget reduction, I believe we must explore and encourage innovative techniques to provide housing and encourage ownership.

In addition to outlining the benefits of cooperative housing and the limited equity approach, Mr. Franklin presents two case studies in which nonprofit organizations in Connecticut have successfully tapped a variety of public and private resources to better the housing conditions in their respective areas. I applaud the efforts of the Legal Services Foundation of Middletown and El Hogar Del Futuro in Hartford which sponsors the Bethel Street Cooperative Association, Inc. Their progress can serve as positive examples to other organizations throughout the Nation.

In both case studies, it is important to note that various forms of Federal assistance were required in order to leverage private and other commitments in order to bring the ownership opportunities within the means of lower-income families. On April 30, I introduced S. 1069, a bill to encourage the development of modest, multifamily rental housing through the use of second mortgage loans. When this legislation is considered by the Committee on Banking, Housing, and Urban Affairs in the near future, I intend to amend this proposal to allow these loans to be utilized in connection with the rehabilitation or development of lower income, limited equity cooperatives.

I believe the addition of this concept is consistent with my initial intent in advancing this proposal and will improve the range of options available for addressing local housing needs.

Mr. President, I ask that the text of Mr. Franklin's very insightful article be printed in the RECORD.

The article follows:

HOUSING COOPERATIVES: A VIABLE MEANS OF HOME OWNERSHIP FOR LOW-INCOME FAMILIES

(By Scott B. Franklin)

The National Housing Act of 1949 announced a goal of "a decent home and suitable living environment for every American family." More than a quarter of a century later, however, this country is experiencing a nationwide crisis in the low-income housing market. In cities all over the country, the rental housing supply for low-income families is falling into disrepair and ruin as landlords abandon their unprofitable, fully depreciated buildings (or convert them into "profitable" condominiums) rather than bring them up to code standards. Single-family dwellings will not supply the solution to the problem. Skyrocketing costs of single-family dwellings have made home ownership prohibitive to most low-income families. Cooperative conversions coupled with various forms of public subsidies, state aid, and private nonprofit sponsorship, however, comprise an alternate approach to providing housing for low-income families.

THE COOPERATIVE CONCEPT

In a housing cooperative, a corporation owns the housing development in which the resident/members live. Different from condominium ownership where individuals own their units in fee simple, members of cooperatives own the entire project. Each resident owns a share in a nonprofit corporation, and holds an exclusive right to occupy his or her particular unit. In addition, each resident has an equal vote in electing the board of directors that manages the "co-op" and makes all policy decisions.

The interests and rights, as well as the duties and liabilities, of each occupant in the cooperative corporation are defined in the articles of incorporation, the corporate bylaws, and the proprietary lease. Under the proprietary lease, which is normally long-term, the member pays a monthly fee that is his or her pro rata share of the corporation's total financing, operating, and ownership costs. Most co-op charges also include monthly payments to emergency funds that may be needed for future major repairs, or to ease the financial burden on the remaining members if an individual member defaults on his or her monthly payment.

Most housing co-ops follow the Rochdale principles, a co-operative formula developed in England in 1944:

1. Democratic control by residents. Each member family has one vote regardless of investment or number of shares held.

2. Open membership. Cooperatives have open membership without discrimination.

3. Limited return on membership investment. The cooperative's purpose is to provide suitable housing at as reasonable a cost as possible. Co-ops do not exist to make a profit. Because in co-ops people are the concern, return on capital is limited intentionally.

4. Education. It is the responsibility of members to understand the essentials of co-operation and to insist upon their use. Soundly managed co-ops provide for either staff or volunteers to tell members, employees, and the general public about the principles, problems, and goals of consumer co-operation. This includes informing people about local co-op policies and services, and about the regional, national, and international groups to which the co-op belongs. It

also includes consumer education and information.

5. Expansion of services. By establishing cooperative procedures and working together, people are able to provide services for themselves that otherwise would be impossible.

6. Cooperation among cooperatives. Cooperative associations are strengthened by sharing of experience, and by mutual support of each other.

Cooperative housing got its official start in the United States in 1909 when the Amalgamated Clothing Workers Union in New York City followed the model of German and Scandinavian workers and concluded that they too could become their own landlords. This first effort was followed by approximately a dozen new cooperatives in the 1920s. Since then, New York City has continued to be the leader in cooperative conversions. The central reason for this is that New York law views co-op membership shares as stock and not real property, so that co-ops in New York are not subject to the 2 percent conveyance tax that attaches to sales of all other dwellings. (The conveyance tax does attach to condominiums, which further explains why co-ops have been more popular in New York than condominiums.) A further reason is that co-ops are not subject to the consumer protection restrictions of the Uniform Condominium Act. This fact makes co-ops more appealing than condominiums.

A 1974 law, however, restricts warehousing and evictions and raises the percentage of tenants that must agree to purchase their apartments before the plan is declared effective. This legislation has limited co-op conversion.

By 1975, according to the Department of Housing and Urban Development, 150,000 New Yorkers lived in moderate-income co-ops, 45,000 of them in the "Co-op City" project in the Bronx. Today, throughout the country, there are more than 300,000 units of low- and moderate-income cooperative housing.

BENEFITS OF CO-OPS

Co-ops require the correct combination of sponsorship, subsidy programs, and state and private aid to become operational. Once they are operating, they require wise and careful management, a high level of democracy and member participation, accountability of leaders, and adequate financial reserves.

If organized and managed successfully, a co-op will provide many benefits to its members, including:

Protection against rising costs. Since co-op projects are operated on a nonprofit basis, the owners pay monthly only their share of the actual operating costs. Thus, increases in monthly payments are limited to actual increases in operating costs.

Home ownership. Since prices of single-family dwellings are not within the reach of low-income families, co-ops provide an opportunity for home ownership at an affordable price.

Tax advantages. Under Section 216 of the Internal Revenue Code, a co-op owner, similar to the owner of a conventional home, may deduct interest and taxes paid (pro rata) on his or her unit.

Community of interest. Many commentors feel that the most important aspect of the cooperative concept is the high level of democracy and community spirit that develops; members take pride in their property, and join together to make needed repairs and protect their buildings.

Absence of landlord profit. The owners are their own landlords and operate on a nonprofit basis.

Reduced maintenance expenses. Cooperative employees handle all maintenance except for redecorating. These expenses normally are paid for on a pro-rata basis rather than by each individual shareholder. Experience shows that owners maintain their units better than tenants, their maintenance expenses usually are less in a cooperative.

Reduction in move-outs. Owned units tend to turn over less than rental units; this can lead to greater stabilization of neighborhoods.

No fear of being forced out. Unlike renters, whom landlords can force out when their leases expire, co-op members are guaranteed their units as long as they pay their monthly expenses and abide by the bylaws.

Equity accrual. The amount of equity accrual that will be permitted depends on the provisions of the bylaws. Normally, if a co-op is operated successfully, and the bylaws permit accumulation of equity, equity should accrue upon resale.

Right to approve incoming members. This helps to protect the interests of the remaining tenants, and stems from the need for selecting as incoming members those who are willing to participate in the operation of the cooperative.

Along with the advantages of co-ops, however, there are notable disadvantages:

Defaults. Because of the corporate structure of the cooperative, all members are liable under the underlying mortgage. Thus, if one member defaults on his or her monthly payments, the remaining members must pay the delinquent share, or run the risk of the lender foreclosing on the entire cooperative. This remains the most serious disadvantage of the cooperative concept.

Effects of mismanagement. A co-op must be managed properly and effectively to work well. This means, as mentioned, that the members chosen for a cooperative must be screened well so that only those who are willing to put in the time and effort to make the corporation work will be chosen to live there. A further task of management, in addition to screening, is to make sure that members chosen thoroughly understand the cooperative concept and their own individual responsibilities. If the screening process is not effective, and if the members do not understand their responsibilities, the cooperative project will have a lesser chance of succeeding.

Difficulty of financing. A further disadvantage is the difficulty of financing the purchase. Most savings and loan institutions do not accept stock in a cooperative corporation as collateral for a loan.

Restricted sovereignty. A final disadvantage is that the cooperator does not enjoy the same degree of sovereignty that a fee simple owner enjoys.

"CONDOMANIA"

Throughout the 1970s and into the 1980s, as rental housing has become less profitable for landlords, this country has been experiencing "condomania." According to a HUD study, by April 1975, there were already 1.25 million condominium units in the country, compared with 439,000 co-op units. One reason for the current increase in condominiums, instead of cooperatives, is that banks and mortgage loan companies are more willing to loan to condominium projects. Because of the nature of the condominium structure, each tenant has a fee simple interest in his or her unit. The unit owner can negotiate his or her financing arrangements independently, using the fee as security for the mortgage. Thus, the condominium is a way of avoiding the financial interdependence of the cooperative. In addition to his or her unit, the condominium purchaser acquires a proportionate individual interest in the common parts of the land and building, with no right of partition.

Generally, the price of a condominium is out of the reach of most lower-income families. Thus, wide-spread condominium conversion, by taking affordable rental units off the market, has decreased the housing stock available for those families.

Although condominiums and cooperatives are similar in many respects, there are several reasons why co-ops are a more affordable and better means of providing home ownership for low-income families. The initial financing of only the equity portion of a blanket mortgage can reduce substantially the mortgage price below that which an individual must pay on a condominium. For example, if a unit is worth $30,000 and the cooperative mortgage covers 40 percent of the total sales price, then the unit could be offered for a sales price of $36,000. Even though the monthly unit charge would include a payment toward an underlying mortgage, such a payment would be only a pro rata share. Also, it is much easier to finance a $36,000 loan than a $60,000 mortgage. More important, lenders may be more willing to extend the cooperative loan in this instance since it is for a lower amount, and generally at a higher rate of interest.

In a co-op, members pay only their pro-rata share of the actual costs based on nonprofit operation of the entire corporation. In a condominium, each owner is responsible for his or her own repairs, often at higher retail costs. Because there is an existing blanket mortgage that remains intact as cooperative membership changes, financing and transferring of mortgage obligations are less complicated and more easily accomplished in the co-op form.

Because there is only a single mortgage, prospectus, and title policy involved, the resident saves the additional fees normally charged by real estate brokers, title companies, mortgage firms, and attorneys with each settlement. Under a single mortgage, interest rates can remain fixed for all owners, whether new or old. Unlike condominium owners, new co-op owners do not have to pay prevailing interest rates. Under the cooperative form, it is much easier for the single mortgagor (of the underlying blanket mortgage) to raise money than under the condominium form where there are numerous outstanding mortgages. Many owners feel less encumbered owning a co-op than they would with an outstanding mortgage over their heads.

An underlying reason why co-ops are potentially less expensive than condominiums involves the concept of limited, or structured, equity. The National Association of Housing Cooperatives points out three basic approaches to this concept:

1. In the first approach, the value of the membership share does not increase over time. An incoming member purchases a small membership share, usually less than $500. This amount has no real relation to the "value" of the homes the cooperative owns. Upon making payment, the member is granted right of occupancy and a vote in the cooperative corporation. When a member moves out, the membership share or loan is refunded (less any amounts due for charges). An important advantage of this method is that the cost of becoming a member remains the same over the years, so that membership stays within the reach of most people. For this reason, co-ops in this category often have long waiting lists.

2. The second type is a limited value increase membership plan. Under this method, the member's initial payment, which can be as low as several hundred dollars, grows over time according to a formula. Organizers of these cooperatives feel that the potential of future gain must be included as a part of their marketing program in order to attract people who are familiar with the concept of rising home investment values.

3. The third type allows the resale value of the membership share to be determined by market conditions, that is, how much prospective residents will pay for the privilege

of becoming a member of that particular community.

The "equity" question has plagued cooperative organizers for many years and remains an area of considerable discussion. The question is relatively simple: Does a co-op allow the resale of memberships on the open market, allow the resale value to rise at the controlled rate, or effectively "freeze" the resale value of a membership? In determining how this will be structured, it is important to determine the goals of the co-op. If the primary goal is to provide good housing that will always be available to low-, moderate-, and middle-income families, some way of limiting return is a must. Even in controlled rising value co-ops, members have found that after a few years, low- to middle-income families can no longer afford the cost of housing. A limit on equity is the sacrifice that must be made in order to provide affordable home ownership for low-income families.

FINANCING THE COOPERATIVE

The National Consumer Cooperative Bank Act was signed into law by President Carter on August 20, 1978. While many consumer cooperatives expected great things from it, others realized its limited potential effect.

The stated purpose of the act is to make available "necessary financial and technical assistance to cooperative self-help endeavors as a means of strengthening the economy." Under the act, the bank is mandated to make at least 35 percent of its loans outstanding at the end of each fiscal year to cooperatives with low-income members or cooperatives serving low-income people. The act also sets up the Office of Self-Help Development and Technical Assistance, which administers a $75-million self-help development fund over three years. The fund can be used to advance capital to co-ops that are just starting up and to help low-income co-ops meet their interest payments on loans from the new bank.

Those who do not expect much from the act point to the fact that the bank loans money at the market interest rate, with no adequate interest reductions program for low-income families.

In any event, Reagan economics may make these arguments moot. As part of its economic plan, the Administration recently called for the termination of the co-op bank. Thus, cooperative sponsors most likely will have to search for other means of financing in the near future.

Several savings banks, including Citicorp of New York, have begun making loans to cooperatives. Bank loans to cooperatives can be profitable, since they may be at higher interest rates, with shorter terms and lower amounts. While historically banks have been unwilling to make loans to housing cooperatives because of lack of security for the loan, they have overcome the problem by requiring as security a pledge of the corporation stock and an assignment of the lease. The risk factor, however, enters in here. A mortgagee, particularly a second mortgage, may find himself or herself lined up behind other creditors if the co-op fails to meet its expenses and foreclosure proceedings commence. Conventional banks, however, still are unwilling to make high risk loans to co-ops, and thus do not provide an adequate source of funds for low-income borrowers.

Privately donated money frequently is available to produce or support housing cooperatives. Recently, private organizations have begun forming mutual housing associations for the purpose of revitalizing or stabilizing neighborhoods.

In the past, co-ops have been able to obtain funding through federal and state grant and subsidy programs. The federal money generally comes directly through the Department of Housing and Urban Development while much of the state money comes indirectly from HUD through community development block grants.

There are four main HUD programs that may be used to provide cooperative housing for low-income families. Basically, these programs include mortgage insurance, mortgage assistance, and/or low-interest rehabilitation loans. Section 213, which provides federal mortgage insurance to finance co-op housing projects, insures mortgages (up to 95 percent of cost) made by private lending institutions on cooperative housing projects of five or more dwelling units to be occupied by members of nonprofit cooperative ownership housing corporations. These loans, according to the HUD publication, Departmental Programs, "finance new construction, rehabilitation, acquisition, improvement, or repair of a project already owned, and resale of individual memberships; construction of projects composed of individual family dwellings to be bought by individual members with separate insured mortgages; and construction or rehabilitation of projects that the owners intend to sell to nonprofit cooperatives."

Section 221(d)(3), the below-market interest rate program, provides mortgage insurance to finance cooperative housing for low- and moderate-income households. It helps finance construction or substantial rehabilitation of multifamily cooperative housing for low-income families. This program insures 100 percent of project mortgages at their FHA ceiling interest rate for nonprofit and cooperative mortgagors. Projects may consist of detached, semi-detached, row, walk up, or elevator structures. Units may qualify for Section 8 assistance if occupied by eligible low-income families.

Section 235, mortgage insurance and subsidies for low- and moderate-income home buyers, enables eligible families to purchase new homes that meet HUD standards. (Section 235 recently was revised to incorporate the old Section 236 into its provisions. Old Section 236, which terminated in 1973, provided mortgage assistance by subsidizing rental interest payments on low-income co-op housing.) HUD insures mortgages and makes monthly payments to lenders to reduce interest to as low as 4 percent. The home owner must contribute 20 percent of adjusted income to monthly mortgage payments and must make a down payment of 3 percent of the cost of acquisition. Mortgage limits are $32,000 ($38,000 in high cost areas). The income limit for initial eligibility is 95 percent of the area median income for a family of four, and the sale price may not exceed 125 percent of the mortgage limit. While this assistance generally is limited to new or substantially rehabilitated units, existing dwellings are eligible within specified limits, or in certain excepted cases.

Section 312 loans finance, via direct federal loans, the rehabilitation of residential, mixed use, and nonresidential properties. By financing rehabilitation to bring properties up to applicable code, project, or plan standards, the loan prevents unnecessary demolition of basically sound structures. Loans may not exceed $27,000 per dwelling unit. Applicants must show evidence of capacity to repay the loan and be unable to secure necessary financing from other sources on comparable terms and conditions. Priority is given to low- and moderate-income applicants and cities have review authority over the Section 312 loans.

While these programs still appear on the books, HUD spokespersons indicate that the future is not promising. Many programs, while technically remaining active, may not receive additional funding, thus reducing their potential benefit. It is likely that the Reagan budget-cutting process will further limit these programs.

Nevertheless, HUD programs, even if readily available, are not enough—by themselves—to bring the cost of co-ops within the reach of low-income families. It is only when combined with other available mechanisms that they become affordable.

REDUCING CO-OP COSTS

Several other strategies can help bring down the cost of co-ops. Homesteading programs, which involve the transfer of abandoned homes by local governments to homesteaders who agree to rehabilitate them and occupy them for a minimum of three consecutive years, allow the acquisition of potential co-op buildings at a negligible price. This reduces by a significant amount the initial cost of a cooperative.

A large percentage of future federal housing money presumably will come to the state in the form of community development block grants. The CDBG program is a flexible purpose program with a goal of providing housing for low-income persons. It can be used to finance soft costs, such as planning and architectural fees, financial strategies, technical assistance maintenance skills, downpayment assistance, and legal costs involved in setting up a particular low-income co-op project.

Potential cooperative members can save money in the rehabilitation of a building by doing some of the work themselves (sweat equity), thus reducing outside labor costs. Government subsidized employees can be used by co-ops to perform most of the rehabilitation work (except work that must be performed by subcontractors) and further reduce co-op costs. Many cities give tax breaks to upstart community housing groups. These tax breaks, which often take the form of delayed assessment, such as tax deferrals, can help keep monthly payments low.

The Section 8 existing programs, commonly called "finders-keepers," are available for low-income co-op owners because of the technical classification of co-op ownership as a leasehold interest. Section 8 is of obvious benefit to the low-income co-op member who canot afford the monthly payments. For various reasons, Section 8 is permitted only on a limited equity co-op.

Several methods can be used by cities to finance or guarantee financing for rehabilitation, and inner-city building of co-ops. These methods, which include direct financing through the sale of bonds, the establishment of joint mortgage pools and revolving loan funds, tax increment financing techniques, mortgage guarantees, and seed loans and grants, are likely to become increasingly important in the future as the availability of HUD program money decreases.

Thus, HUD subsidies, piggybacked with other costreducing mechanisms under a realistic plan sponsored by a nonprofit group, can provide affordable home ownership for low-income people. In the Hartford, Connecticut, area, two groups in particular have been able to put together innovative and interesting packages of this type.

CASE STUDIES

The Legal Services Foundation of Middletown, Connecticut, has developed a way of providing cooperative home ownership for low-income families with no down payment necessary and with units marketed at $220 per month plus utilities. The cooperative project comprises 19 scattered-site units, mostly (but not exclusively) in the north end of town.

The program, called Equity in Housing, is subsidized through a combination of programs, including $375,000 in CDBG funds—

used to subsidize purchase and rehabilitation of the units—and Section 8 existing program funds to subsidize the rents of the individual tenant owners. In addition, the project received a 9 percent Connecticut Housing Finance Authority mortgage and planning aid from the city of Middletown. Equity in Housing has been able to successfully keep prices down by placing a ceiling on equity accumulation. Owner/tenants can recoup only that amount of appreciation on their monthly payments that goes directly to amortize the mortgage—but only up to a limit of $2,000 over the term of the ownership. This limitation keeps units out of the speculative market.

Equity in Housing also has been able to keep maintenance costs to a minimum. The bylaws provide that all maintenance costs not the direct fault of the individual tenant/owners are to be shared pro-rata by all the cooperative members. Thus, the repair expenses come out of the contingency funds and no one tenant shoulders the entire cost. Most of the maintenance and management is performed on a nonprofit basis. The repairman, superintendent, and bookkeeper all are members of the co-op community and work for nominal monthly salaries.

Finally, the project is kept together by its nonprofit sponsor, the Legal Services Foundation, which performs an inordinate number of tasks for a negligible amount of money. Equity in Housing has become a model program. At the present time, the Legal Services Foundation is looking for other buildings in the area to purchase and integrate into its cooperative community. It should be noted, however, that the Legal Services Foundation is another program in the path of the Reagan budget cutting axe.

The Hartford, Connecticut, Bethel Street Cooperative Association, Inc., a pilot program sponsored by El Hogar del Futuro, a local Hispanic nonprofit corporation, has used an innovative combination of subsidies to provide low-cost, limited equity cooperative housing for low-income families. Different from the Equity in Housing program, the Bethel Street Corporation bought an abandoned six-family building from the city for one dollar under the city's homesteading program. It then applied to HUD and received, under Section 312, a $118,000, 20-year, 3 percent rehabilitation loan to renovate the building. The loan paid for building materials and subcontracted work. A significant amount of the manual labor was performed by the co-op members themselves in the form of sweat equity, and federal CETA money was provided to pay carpenters and remaining laborers.

In addition, the project received CDBG money to pay for architectural, planning, and legal fees, and received a 10-year tax deferral from the city of Hartford.

The result was a functioning low-cost cooperative project with four- and five-room apartments priced at $185 and $195 respectively. Those figures include maintenance and debt service, but not heating costs.

RECOMMENDATIONS

The case studies indicate that, despite HUD's uneasiness about low-income cooperative housing projects and the general public's lack of understanding of the cooperative concept, co-ops may indeed provide a viable means of home ownership for low-income families.

Cooperatives do not work without the diligent efforts of both sponsoring agencies and co-op members themselves. They can, however, provide affordable home ownership, and external benefits such as neighborhood revitalization and stabilization. As mentioned, there are indications that the Reagan Administration will support housing cooperatives as a general concept, despite its call for the end of the co-op bank system.

It has become evident, however, that with double digit inflation and the nature of the speculative market, co-ops for low-income families are not possible without some form of subsidy. Of the various forms of subsidies available, HUD should not be relied on directly to satisfy the needs of aspiring co-op developers or members. One central reason is because of the current funding freeze on major HUD subsidy programs, such as Section 312 and Section 235. The future of these programs is not promising.

Indirect HUD money, however, in the form of CDBG funds, along with private aid, appear to be the way of the future. Among the programs, that are particularly promising are city down payment assistance, CHFA-type low-interest mortgages, tax deferrals, and soft cost grants.

It is best to use existing structures for cooperative projects. Buildings acquired for a nominal cost through homesteading programs help keep down initial purchase and start-up expenses, both of which are crucial during the early life of a housing cooperative. Furthermore, homesteading programs can help revitalize neighborhoods by increasing the housing stock and creating a sense of community.

Sweat equity also should be used to keep down rehabilitation costs and provide a means of future equity, albeit limited, for the low-income member.

Nonprofit sponsorship and good management are musts in any low-income co-op housing project. Sponsors are needed to organize and coordinate the co-op funding package and to oversee the daily operation. Good management is crucial. A co-op cannot function successfully unless the members chosen fully understand both the co-op concept and their role in the particular project. It is the manager's role to screen prospective members carefully, make sure members perform their delegated tasks, and to develop the sense of community and democracy necessary to keep the project functioning successfully. A high level of member participation and a full understanding of membership responsibilities are especially important in a co-op project where all are liable under the mortgage in the event of default and possible foreclosure.

A further necessary ingredient of a successful low-income housing project is the use of the limited equity concept. If a goal of cooperative housing is to provide continued low-price housing, then gain on re-sale is contradictory to that goal. Low-income housing co-ops should not be in the speculative market. The limited equity concept helps keep future costs from snowballing out of the affordable range of most low-income families.

Finally, co-ops must have adequate reserve funds to meet future emergency repairs that may become necessary, particularly in older buildings. These funds, a form of forced savings, can be invested at a high rate of interest to provide additional capital for the corporation. In conjunction with this, maintenance costs can be kept to a minimum if necessary repairs are performed by co-op members themselves.

Cooperative housing projects generally have not been understood by the public and traditionally have been treated as "orphan children" by HUD. It is time to adopt this misunderstood orphan and recognize the cooperative concept as a viable means of providing home ownership for low-income people.●

## ADVISORY COUNCIL'S REPORT

● Mr. KENNEDY. Mr. President 17 years ago, Lyndon Johnson announced his war on poverty. Congress passed the Economic Opportunity Act in an attempt to lift the burdens of poverty borne by millions of Americans and to help these Americans help themselves. Three years later, we created a 15-member National Advisory Council on Economic Opportunity to advise the Director of the Community Services Administration on policy, to review the effectiveness of the programs created under the Economic Opportunity Act, and to report annually to the President and Congress on the Nation's progress in eliminating poverty. Provisions in the Budget Reconciliation Act, passed early last month, repealed the Economic Opportunity Act and abolished the Community Services Administration and the Advisory Council.

In its 13th and final report issued today, the Advisory Council takes exception with the budget proposals and economic program of the Reagan administration. The Council's report echoes the concerns that I and many others have raised over the last few months. Already the initial euphoria with the Reagan administration's budget and tax victories has begun to fade. The economy continues to be stagnant and devastatingly high interest rates persist. The Council's conclusions are sobering.

The effect of the administration's cutbacks, some already adopted and others merely proposed, will be to severely deepen the crisis of poverty in the future and to drive whole segments of our society toward hopelessness and despair. The Council's report cogently undercuts the basic assumptions underlying the President's budget proposals—what the Council refers to as "persistent myths about poverty."

The first myth is that the Reagan programs do not unfairly burden the poor in this country. In fact, the council notes that the Reagan cutbacks in AFDC would reduce the incomes of families headed by women. Moreover, the program cutbacks will eliminate one and three-quarters million jobs currently occupied by those at or near the poverty level. The Council's report leaves no doubt that the groups being asked to bear the greatest burden for the Reagan budget cuts are the most vulnerable segments of our society—the poor, the elderly, the young, minorities and women.

The second myth is that the current system has not and will not succeed in alleviating the burdens of poverty. However, testimony given to the Council over the past several years contradicts this conclusion. According to this testimony, the Federal programs do work; they do help people get out of poverty; the delivery systems are providing the necessary basic human and social services. Programs such as Head Start, legal services, Foster Grandparents, VISTA, Job Corps, community action agencies and

community economic development corporations have successfully delivered services to the people who need help. By 1980, the number of poor had been reduced by 11 million and 11 million more had been kept above the poverty line.

The third myth is that State and local governments through block grants are better able to administer the human and social service programs. In fact, this new system has a track record of being more bureaucratic, less accountable, and more subject to political pressures. It is likely to be less responsive to the need of disadvantaged groups. Even more important is the realization that issues of poverty and deprivation are national issues, which require national policy and programs and are a part of our national purpose. In the words of the Council:

The issue is not federal versus state responsibility; rather, it is the dimuntion or avoidance of any national standards of responsibility and accountability.

The final and most seductive myth is the claim by the administration that the poor will be benefitted by an overall growth in the economy. The Council concludes that this is simply not true. According to the Council, the "new" poor are increasingly a population of those whom the private economy has passed by.

Even in good times, these people—the aged, the disabled, the disadvantaged youth, women heading families with small children—are rarely hired by the private sector. Because few of these people can be absorbed into the private economy without special assistance and support, the "massive suffering" these program cutbacks will bring "cannot be balanced by any credible long-range benefits from the administration's program—even under the most optimistic economic assumptions."

There is a price to be paid for the administration's so-called "economic renewal." That price will be an increase in crime, in the use of drugs, in alcoholism and physical and mental illness, in destabilizing the family and in weakening respect for the law.

Like the Council, I hope that—

After reading this report, Americans will come to the conclusion that as a nation we cannot afford to renege on a commitment that is both symbolic and real. To do so would put an inordinate burden on the more than 25 million poor Americans who are already suffering from inflation, unemployment and inadequate social support services. The dire consequences of our nation's inability to put forth and sustain policies and programs are, for the poor, unthinkable and for our policy makers, unknowable.

I believe that the research and conclusions embodied in this report will be especially instructive in the months ahead as we consider further administration proposals for budget cuts.

The first chapter, "Women in Poverty," discusses the growing "femination of poverty" and the causes of this new trend. The Council's report places the blame squarely on both a dual welfare system and a dual labor market. Together, they ignore the growing number of women who are now in charge of households and are the sole supporters of their children. The Council concludes that our social welfare and labor policies must be changed to end this continuing pauperization of women.●

## APPOINTMENT BY THE PRESIDING OFFICER

The PRESIDING OFFICER (Mr. DANFORTH). The Chair, on behalf of the minority leader, and in accordance with the provisions of Public Law 96–114, announces the following appointment to the Congressional Award Board, vice the Honorable John D. Rockefeller IV, resigned: Hon. John Y. Brown, Governor of Kentucky.

## RECESS UNTIL 11 A.M. TOMORROW

Mr. STEVENS. Mr. President, if there be no further business to come before the Senate, I move that the Senate stand in recess in accordance with the previous order until 11 a.m. tomorrow.

The motion was agreed to; and at 7:04 p.m. the Senate recessed until Tuesday, September 22, 1981, at 11 a.m.

## NOMINATIONS

Executive nominations received by the Senate September 21, 1981:

DEPARTMENT OF STATE

Thomas R. Pickering, of New Jersey, a Foreign Service officer of the class of Career Minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Federal Republic of Nigeria.

BOARD FOR INTERNATIONAL BROADCASTING

Mark Goode, of California, to be a Member of the Board for International Broadcasting for a term expiring April 28, 1983, vice Rita E. Hauser, resigned.

OVERSEAS PRIVATE INVESTMENT CORPORATION

Carlos Salman, of Florida, to be a Member of the Board of Directors of the Overseas Private Investment Corporation for a term expiring December 17, 1982, vice James M. Friedman, term expired.

DEPARTMENT OF JUSTICE

Beverly E. Ledbetter, of Rhode Island, to be an Assistant Attorney General, vice a new position created by Public Law 95–598, approved November 6, 1978.

FOREIGN CLAIMS SETTLEMENT COMMISSION OF THE UNITED STATES

Joseph Wentling Brown, of Nevada, to be a Member of the Foreign Claims Settlement Commission of the United States for the term expiring September 30, 1983, vice Francis Leon Jung, term expired.

DEPARTMENT OF LABOR

Malcolm R. Lovell, Jr., of the District of Columbia, to be Under Secretary of Labor, vice John N. Gentry.

John F. Cogan, of California, to be an Assistant Secretary of Labor, vice Arnold H. Packer.

Lenora Cole-Alexander, of the District of Columbia, to be Director of the Women's Bureau, Department of Labor, vice Alexis M. Herman.

PUBLIC HEALTH SERVICE

C. Everett Koop, of Pennsylvania, to be Medical Director in the Regular Corps of the Public Health Service, subject to qualifications therefor as provided by law and regulations, and to be Surgeon General of the Public Health Service, for a term of 4 years, vice Julius Benjamin Richmond, term expired.

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

Rosemary M. Collyer, of Colorado, to be a Member of the Federal Mine Safety and Health Review Commission for the term of 6 years expiring August 30, 1983, vice Jerome R. Waldie.

EXPORT-IMPORT BANK OF THE UNITED STATES

James Ernest Yonge, of Florida, to be a Member of the Board of Directors of the Export-Import Bank of the United States, vice Thibaut de Saint Phalle, resigned.

NATIONAL CREDIT UNION ADMINISTRATION

Edgar F. Callahan, of Illinois, to be a Member of the National Credit Union Administration Board for the term expiring August 2, 1987, vice Harold Alonza Black, term expired.

DEPARTMENT OF STATE

The following-named persons in the Department of Agriculture for appointment as Foreign Service officers as indicated, in accordance with section 2105 of Public Law 96–465, approved October 17, 1980:

For appointment as Foreign Service officers of class 1, Consular Officers, and Secretaries in the Diplomatic Service of the United States of America:

Richard L. Barnes, of Virginia.
Alexander Bernitz, of New York.
John M. Beshoar, of Maryland.
James W. Brock, of California.
G. Stanley Brown, of Virginia.
Harry C. Bryan, of Texas.
Anthony N. Cruit, of Maryland.
William L. Davis, Jr., of Arkansas.
Harlan J. Dirks, of South Dakota.
Roger S. Euler, of Virginia.
Paul J. Ferree, of Illinois.
Robert S. FitzSimmonds II, of Maryland.
James K. Freckmann, of Wisconsin.
Guy L. Haviland, Jr., of Virginia.
James R. Hickman, of Texas.
Lloyd I. Holmes, of Virginia.
Kenneth E. Howland, of Maryland.
Norman R. Kallemeyn, of Maryland.
Verle E. Lanier, of Maryland.
James F. Lankford, of Florida.
Gordon H. Lloyd, of Maryland.
Roger S. Lowen, of New York.
Fred A. Mangum, of North Carolina.
Robert M. McConnell, of Virginia.
John C. McDonald, of Virginia.
Leon G. Mears, of Virginia.
Lyle Moe, of Virginia.
Charles J. O'Mara, of Maryland.
Frank A. Padovano, of Virginia.
James V. Parker, of North Carolina.
Norman J. Pettipaw, of Maryland.
Wilferd L. Phillipsen, of Florida.
George J. Pope, of Virginia.
John E. Riesz, of Florida.
James E. Ross, of Florida.
James P. Rudbeck, of Virginia.
Omero Sabatini, of Virginia.
Harold T. Sanden, of Virginia.
William L. Scholz, of Virginia.
Gerald W. Shelden, of Michigan.
Robert J. Svec, of Virginia.
W. Garth Thorburn, of Florida.
Nicholas M. Thuroczy, of California.
Fred W. Traeger, of Wyoming.
Bryant H. Wadsworth, of Virginia.
Cline J. Warren, of Maryland.
Richard S. Welton, of Maryland.

For appointment as Foreign Service officers of class 2, Consular Officers, and Secretaries

in the Diplomatic Service of the United States of America:

W. Lynn Abbott, of New York.
C. Milton Anderson, of Maryland.
Robert R. Anlauf, of Texas.
Edwin A. Bauer, of Virginia.
James M. Benson, of Virginia.
Richard J. Blabey, of Virginia.
Max F. Bowser, of Virginia.
Evans Browne, of Colorado.
Charles M. Clendenen, of Virginia.
John H. Davenport, of Virginia.
Abner E. Deatherage, of Virginia.
John S. DeCourcy, of Virginia.
Pitamber Devgon, of Virginia.
Paul A. Drazek, of Maryland.
Jon E. Falck, of Virginia.
Oldrich Fejfar, of Virginia.
Lawrence R. Fouchs, of Virginia.
Forrest K. Geerken, Jr., of Virginia.
Alvin E. Gilbert, of Maine.
John A. Glew, of Virginia.
Lawrence E. Hall, of the District of Columbia.
Robert E. Haresnape, of Virginia.
Alan K. Hemphill, of Virginia.
Phillip Craig Holloway, of Oklahoma.
John T. Hopkins, of Virginia.
Theodore Horoschak, of Virginia.
William P. Huth, of Virginia.
Mollie J. Iler, of Virginia.
James Y. Iso, of California.
John D. Jacobs, of Tennessee.
Robert W. Johnson, of Virginia.
Franklin D. Lee, of Louisiana.
Richard T. McDonnell, of Virginia.
Kenneth L. Murray, of Virginia.
Gordon S. Nicks, of Virginia.
Harold L. Norton, of Florida.
Thomas B. O'Connell, of Virginia.
Carlos J. Ortega, of Virginia.
Larry L. Panasuk, of Virginia.
Alfred R. Persi, of Virginia.
Frank J. Piason, of New Jersey.
Shackford Pitcher, of Virginia.
Roger F. Puterbaugh, of Maryland.
Harold Rabinowitz, of Pennsylvania.
Abdullah Ahmad Saleh, of Connecticut.
Lyle James Sebranek, of Virginia.
Mattie R. Sharpless, of the District of Columbia.
Walter A. Stern, of California.
James B. Swain, of Maryland.
Robert Charles Tetro, of Virginia.
Dale K. Vining, of Arizona.
Frank L. Waddle, of Maryland.
Homer F. Walters, of Florida.
Steve Washenko, of Virginia.
John A. Williams, of Maryland.
Dalton L. Wilson, of Virginia.
Steven D. Yoder, of Virginia.

For appointment as Foreign Service officers of class 3, Consular Officers, and Secretaries in the Diplomatic Service of the United States of America:

Robert D. Bagley, of Washington.
James R. Brow, of Maryland.
Joseph R. Butler, of Texas.
W. John Child, of Maryland.
Daniel B. Conable, of New York.
Frank A. Coolidge, of Virginia.
Andrew A. Duymovic, of Maryland.
Leonidas P. Bill Emerson, Jr., of Maryland.
N. E. Francis, Jr., of Pennsylvania.
Christopher E. Goldthwait, of New York.
Dale L. Good, of Virginia.
Clyde E. Gumbmann, of Virginia.
Thomas A. Hamby, of Tennessee.
George E. Heslop, Jr., of Kansas.
Michael L. Humphrey, of Virginia.
Marvin Lehrer, of New Hampshire.
Philip Albert Letarte, of New Hampshire.
Margaret Mason, of Illinois.
John E. Patrick, of Vermont.
John J. Reddington, of Virginia.
David W. Riggs, of Maryland.
David I. Rosenbloom, of New Jersey.
Herbert Finley Rudd II, of Oregon.
Hilton P. Settle, of Maryland.
Joseph Frank Somers, of Massachusetts.

For appointment as Foreign Service officers of class 4, Consular Officers, and Secretaries in the Diplomatic Service of the United States of America:

Suzanne Hale of Virginia.
Paul R. Hoffman, of Maryland.
Richard K. Petges, of Illinois.
John H. Wilson, of Virginia.

For appointment as Foreign Service officers of class 5, Consural Officers, and Secretaries in the Diplomatic Service of the United States of America:

Daniel K. Berman, of the District of Columbia.
Larry M. Senger, of Washington.
Natalie A. Solar, of Colorado.

IN THE NAVY

The following-named officers of the U.S. Navy for permanent promotion to the grade of lieutenant commander in the line and various staff corps, as indicated, pursuant to title 10, United States Code, sections 5780, 5782, and 5791, or section 611(a) of the Defense Officer Personnel Management Act (Public Law 96-513) and title 10, United States Code, section 624 as added by the same act, as applicable subject to qualifications therefor as provided by law:

## CONFIRMATIONS

Executive nominations confirmed by the Senate September 21, 1981:

DEPARTMENT OF ENERGY

James R. Richards, of Virginia, to be Inspector General of the Department of Energy, vice John Kenneth Mansfield.

FEDERAL TRADE COMMISSION

James C. Miller III, of the District of Columbia, to be a Federal Trade Commissioner for the term of 7 years from September 26, 1981, vice Paul Rand Dixon, term expiring.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

SUPREME COURT OF THE UNITED STATES

Sandra Day O'Connor, of Arizona, to be an Associate Justice of the Supreme Court of the United States, vice Potter Stewart, retired.

# HOUSE OF REPRESENTATIVES—*Monday, September 21, 1981*

The House met at 12 o'clock noon and was called to order by the Speaker pro tempore (Mr. WRIGHT).

## DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, D.C.,
*September 16, 1981.*

I hereby designate the Honorable JIM WRIGHT to act as Speaker pro tempore on September 21, 1981.

THOMAS P. O'NEILL, JR.,
*Speaker of the House of Representatives.*

## PRAYER

The Reverend Edward G. Latch, D.D., former Chaplain, U.S House of Representatives, offered the following prayer:

*Let the word of God dwell in you richly with all wisdom.*—Colossians 3:16.

Eternal God, our Father, in whose presence our anxious minds become quiet and our worried souls find peace, we wait upon Thee in this moment of prayer seeking a renewal of our strength, a restoration of our patience and a reawakening of our faith. Through this period of trial and trouble we need the guidance of Thy Spirit and the power of Thy presence. Give them to us as we pray and to all who work under the dome of this Capitol that together we may continue to lead our Nation in the paths of peace with liberty and justice for all. Amen.

## THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

## TOO LITTLE CHICKEN

(Mr. GONZALEZ asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GONZALEZ. Mr. Speaker, President Reagan the other day denounced those who do not believe in voodoo economics as "Chicken Littles." What he does not realize is that most of us are afraid that the program is going to provide us with too little chicken and we prefer beans—frijoles if you please.

The President might have a hard time imagining what is happening to the Nation's poor, the unemployed, and the businesses that are falling like flies to the pressure of supersonic interest rates.

To a man who wears thousand-dollar boots, there is just no way to express the pain of a system that provides penalties for working poor people—penalties that will make it better for them to stop working than to continue the struggle. After all, to him the only question is what to put on those $800 plates his rich friends have laid on the White House. To the poor, the question is whether there will even be beans for the plate, much less chicken.

## PRESIDENT'S ECONOMIC PLAN FAILING

(Mr. DOWNEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DOWNEY. Mr. Speaker, I know the President's plan does not begin until October, and I do not feel like "Chicken Little" or economic Cassandra when I say this plan has already begun to fail.

Still ringing in my ear are the words of Regan, Stockman, and Weidenbaum extolling the expectational value of the Reagan plan. Just by cutting the budget and taxes and showing the Government's dedication to fighting inflation will begin the process of eliminating it. Add to that the wholesale weakening of regulation, well underway, tight money supported enthusiastically by this administration and at work for the last 8 months, and presto you have runaway interest rates.

Mr. Speaker, given this type of track record I am not sure which to worry about first: The open window of vulnerability or the rising tides that will swamp all boats.

We are about to see 400,000 families lose their basic welfare benefit. We are about to see another 300,000 families have their benefits cut. Where will their chicken come from?

We are about to see $600 million cut from the medicaid program. That is a lot of chicken out of the tiny pots of the poorest people in this country.

And we are about to see 875,000 people lose all their food stamp benefits. No chicken for them.

Chicken Littles? Voodoo generally requires killing the chicken. Voodoo economics is the magic that makes the chicken disappear.

## KO-OP 65, INC.—A GREAT PROGRAM

(Mr. HILER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HILER. Mr. Speaker, during a recent trip to my congressional district, I came in contact with a new organization that is striving to establish a food bank for older citizens, to help maintain their health and standard of living with dignity.

What is unique about this program, Mr. Speaker, is that it receives not 1 penny in Government subsidies—100 percent of the income it derives is provided in benefits to deserving older Hoosiers—that is much better than any Federal program I know of.

The organization is KO-OP 65, Inc., and already has enlisted 160 volunteers to operate the program. They have signed up 80 members, age 59 and above, who will be receiving surplus food donated by wholesalers, retailers and private growers.

An anonymous donor has provided a building rent free. In a recent "run for hunger," several sponsors provided shirts and paid for all expenses, allowing all the income from this event to be used for helping senior citizens. Numerous businesses also have donated their time and resources to help insure the success of this effort.

Mr. Speaker, for too long, this Congress has been devising taxpayer-subsidized assistance programs that fall way short of their well-intended goals while all along failing to recognize the great potential and effectiveness of volunteer efforts like KO-OP 65. I ask my colleagues to join with me in congratulating and encouraging organizations like KO-OP 65. They are far more effective in eradicating hunger and preserving the dignity of our senior citizens than any program we can create.

## APPOINTMENT AS MEMBER OF SELECT COMMITTEE ON AGING

The SPEAKER pro tempore. Pursuant to clauses 6 (e) and (g) of rule X, and without objection, the Chair appoints the gentleman from Iowa (Mr. EVANS) to the Select Committee on Aging, to fill the existing vacancy thereon.

There was no objection.

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

## COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER pro tempore laid before the House the following communication from the Clerk of the House of Representatives.

WASHINGTON, D.C.,
*September 21, 1981.*

Hon. THOMAS P. O'NEILL, Jr.,
*The Speaker, House of Representatives, Washington, D.C.*

DEAR MR. SPEAKER: Pursuant to the permission granted in the Rules of the House of Representatives, I have the honor to transmit a sealed envelope from The White House, received in the Clerk's Office at 2:25 p.m. on Friday, September 18, 1981 and said to contain a message from the President wherein he transmits the Second Annual Report of the Federal Labor Relations Authority for the Fiscal Year ended September 30, 1980.

With kind regards, I am,
Sincerely,

EDMUND L. HENSHAW, Jr.,
*Clerk, House of Representatives.*

□ 1210

## SECOND ANNUAL REPORT OF FEDERAL LABOR RELATIONS AUTHORITY FOR FISCAL YEAR ENDED SEPTEMBER 30, 1980—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Post Office and Civil Service:

*To the Congress of the United States:*

In accordance with the Civil Service Reform Act of 1978 (P.L. 95-454, Sec. 701) (5 U.S.C. 7104(e)), I hereby transmit the Second Annual Report of the Federal Labor Relations Authority for the Fiscal Year ended September 30, 1980.

RONALD REAGAN.

THE WHITE HOUSE, *September 18, 1981.*

## LELAND BOWMAN LOCK

Mr. BREAUX. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 4284) to name the lock authorized as a replacement for Vermilion Lock, La., "Leland Bowman Lock."

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

The Clerk read the bill, as follows:

H.R. 4284

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the lock authorized by section 114 of Public Law 94-587 as a replacement for Vermilion Lock, Louisiana, shall hereafter be known as Leland Bowman Lock. Any law, regulation, map, document, or record of the United States which refers to such lock shall hereafter be held and considered to refer to such lock as Leland Bowman Lock.

The SPEAKER pro tempore. The gentleman from Louisiana (Mr. BREAUX) is recognized for 1 hour.

Mr. BREAUX. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I address you and the Members of the House today to request support for and passage of H.R. 4284. The purpose of this legislation is to name a water control structure in my district, the "Vermilion Lock," in honor of the late Capt. Leland Bowman. Captain Bowman who passed away on May 21, was a constituent of mine, I am proud to say. It is Captain Bowman who was the single person responsible for securing the authorization and funding for the modernization of the Vermilion Lock.

Groundbreaking for the Vermilion Lock is scheduled for September 27. It is unfortunate that Captain Bowman will not be able to participate in these ceremonies for this important waterways structure on the Intracoastal Canal in south Louisiana. Certainly, all those who attend that day and the many who are unable but who knew Captain Bowman will recall fondly his great personal contributions and work on behalf of the Nation's waterways and especially on behalf of the modernization of the Vermilion Lock.

The critical role he played in urging and obtaining modernization of the Vermilion Lock is justification enough, I feel, to name the Vermilion Lock in his honor. Many others feel the same way, I must note to you. The Vermilion Parish Police Jury adopted on June 15 a resolution to have the Lock renamed Leland Bowman Lock. Vermilion Parish is the area where the lock is located. The police jury's action represents strong local support as the jury is the official lock project sponsor.

Others who have contacted me urging renaming of the lock in honor of Captain Bowman include the Water Resources Congress whose board on June 22 unanimously adopted a motion to do so and who requested the introduction of legislation to accomplish this goal. The Louisiana Intracoastal Seaway Association voted unanimously on June 5 to request the necessary action be taken to name the lock after Captain Bowman. The American Waterways Operators on June 4 directed its staff to seek introduction of appropriate legislation to rename the structure after Captain Bowman. Also, the Gulf Intracoastal Canal Association has announced its support for renaming the lock on his behalf.

Captain Bowman gave many years of service on behalf of the Nation's waterways. He served as licensed boat captain, port captain and engineer, towing contractor, and president of two shipyards in south Louisiana. His career spanned 50 years. During that time he served his industry, his State, and his Nation as president of the Louisiana Intracoastal Seaway Association and was a charter member. He was vice chairman and charter member of the Louisana Coastal Commission, member of the National Waterways Conference's Board of Directors and Advisory Board, and vice president of region 3 of the American Waterways Operators, to name a few.

On July 14, 1972, the Jennings, Louisiana Association of Commerce, where he lived, named Captain Bowman "Mr. Waterways," for untiring efforts in behalf of Jennings and the entire southwest Louisiana waterway system. In 1974, the Louisiana Intracoastal Seaway Association awarded him in recognition of his many years of dedicated service to LISA and his untiring efforts in behalf of the development of south Louisiana water resources. He was proclaimed "Maritime Man of the Year, 1977-78," by the Propellor Club of Port of Sabine, Port of Beaumont, Port of Lake Arthur, Port of Lake Charles, and Port of Orange.

Though Captain Bowman was an instrumental figure in many waterways projects, such as the Gulf Intracoastal Waterway, the Mermentau basin project in Louisiana, the Teche-Vermilion diversion project in Louisiana, and the erection of high-level waterways bridges in Louisiana, he must be forever remembered for his untiring and unending work to modernize the Vermilion Lock. This structure will significantly aid in the reduction of navigation costs, improve salt water intrusion control, and facilitate the discharge of floodwaters. It is only proper, and certainly due, that the Vermilion Lock be renamed the "Leland Bowman Lock" as a fitting and lasting tribute to the person who saw the need for and gave so much to make its construction possible.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

## GENERAL LEAVE

Mr. BREAUX. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

## ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Today is the day for the call of the Suspension Calendar.

Pursuant to the provisions of clause 5, rule I, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4, rule XV.

Such rollcall votes, if postponed, will be taken on Tuesday, September 22, 1981.

## SENSE OF CONGRESS OPPOSING SOVIET TREATMENT OF YURIY SHUKHEVYCH

Mr. ZABLOCKI. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 111) expressing the sense of the Congress that the Government of the Soviet Union should cease its imprisonment of Yuriy Shukhevych and permit him and his family to emigrate from the Soviet Union.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 111

Whereas Yuriy Shukhevych is currently serving his 28th year of imprisonment, having been free from Soviet jails for an aggregate of only 4 years since 1948, the date of his original arrest by the Government of the Soviet Union;

Whereas the sole basis for the imprisonment of Yuriy Shukhevych is his refusal to denounce the ideals of Ukrainian nationalism and the activities of his late father Roman Shukhevych, a Ukrainian freedom fighter;

Whereas such imprisonment violates the commitments to freedom of thought, conscience, expression, religion, and emigration made by the Soviet Union through its adoption of, or participation as a signatory to, the Universal Declaration of Human Rights, the International Covenant on Civil and Political Rights, the Final Act of the Conference on Security and Cooperation in Europe, and the Constitution of the Union of Soviet Socialist Republics;

Whereas Yuriy Shukhevych suffers from various severe medical ailments, including chronic ulcer, heart, vision, and dental problems, but has not received necessary medical attention while in prison; and

Whereas Yuriy Shukhevych has renounced his Soviet citizenship and has joined the Ukrainian Public Group To Promote the Implementation of the Helsinki Accords: Now, therefore, be it

*Resolved by the House of Representatives (the Senate concurring),* That it is the sense of the Congress that—

(1) the Government of the Soviet Union should comply with its commitments under the Universal Declaration of Human Rights, the International Covenant on Civil and Political Rights, the Final Act of the Conference on Security and Cooperation in Europe, and the Constitution of the Union of Soviet Socialist Republics, by providing proper medical care to Yuriy Shukhevych, by releasing Yuriy Shukhevych from prison, and by permitting Yuriy Shukhevych and his family to emigrate from the Soviet Union to a country of their choice;

(2) the President of the United States should express to the Government of the Soviet Union the strong and continuing opposition of the United States to the imprisonment and maltreatment of Yurity Shukhevych; and

(3) the President of the United States should reiterate to the Government of the Soviet Union that the United States, in evaluating its relations with other nations, will consider the extent to which such other nations honor their commitments under international law, particularly any such commitments concerning human rights.

SEC. 2. The Clerk of the House of Representatives shall transmit copies of this resolution to the Ambassador of the Soviet Union to the United States and to the Chairman of the Presidium of the Supreme Soviet.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Wisconsin (Mr. ZABLOCKI) will be recognized for 20 minutes, and the gentleman from Iowa (Mr. LEACH) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Wisconsin (Mr. ZABLOCKI).

Mr. ZABLOCKI. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, before proceeding with House Concurrent Resolution 111, I would like to announce a small change in the program for tomorrow. For the information of the Members it is our intention to bring up one bill under suspension tomorrow, Tuesday, September 22. That bill is House Joint Resolution 220, providing for honorary citizenship for Raoul Wallenberg.

Mr. Speaker, I rise in support of House Concurrent Resolution 111, expressing the sense of the Congress that the Government of the Soviet Union should cease its imprisonment of Yuriy Shukhevych and permit him and his family to emigrate from the Soviet Union.

Yuriy Shukhevych, the son of a Ukrainian freedom fighter, has been jailed 29 of the past 33 years in the Soviet Union. The so-called crime is merely Shukhevych's refusal to denounce the ideals of Ukrainian nationalism and the deeds of his father, who struggled for freedom.

Shukhevych has not received essential medical treatment while in prison, although he suffers a series of ailments.

The resolution calls for the President to voice U.S. opposition to the imprisonment of Yuriy Shukhevych, to remind the Soviets of their violations of international commitments such as the Helsinki Final Act, the Universal Declaration of Human Rights, and the International Covenant on Civil and Political Rights, as well as the Soviet Constitution; and to urge that Shukhevych and his family be permitted to emigrate and find a new homeland.

Mr. Speaker, I urge the adoption of House Concurrent Resolution 111.

Mr. LEACH of Iowa. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as the ranking minority member of the Subcommittee on Human Rights and International Organizations and as a cosponsor of House Concurrent Resolution 111, I am pleased to speak in favor of this resolution. It was first introduced by our colleague on this side of the aisle, Mr. PRITCHARD, and has subsequently been endorsed by a bipartisan group of over 60 Members. The resolution was reported favorably from the subcommittee and later from the full Foreign Affairs Committee.

Yuriy Shukhevych, the son of a Ukrainian freedom fighter who resisted the Russians following the defeat of the Germans in World War II, was first arrested in 1948 at the young age of 14. The cause of his imprisonment appeared to be his refusal to yield to Soviet demands that he renounce his father and Ukrainian nationalism. After a 10-year term, he was released to identify his father's body but rearrested before the day was out. A finding by the Soviet Supreme Court that the form of the tribunal under which he was originally sentenced was illegal, as were the decisions of the tribunal, was not enough to prevent his rearrest. After serving his second 10-year sentence, Mr. Shukhevych was released for 3½ years until he was rearrested in 1972 on grounds that his memoirs constituted "anti-Soviet agitation and propaganda." His third sentence, which is is serving today, includes 5 years in prison, 5 in a harsh labor camp, and 5 in exile. The circumstances of his continued imprisonment have led to severe medical problems.

It is impossible not to admire a man like Yuriy Shukhevych who has had the courage to renounce his Soviet citizenship and, while still in prison, to join the Helsinki monitoring group in Kiev.

Mr. Speaker, this case, like so many others, is a cardinal example of the failure of the Soviet Union to live up to its commitments, not only under certain provisions of its own Constitution, but under such international agreements as the Universal Declaration of Human Rights, the Helsinki accords, and the International Covenant on Civil and Political Rights. House Concurrent Resolution 111 expresses the sense of the Congress that the Soviet authorities should provide proper medical treatment to Yuriy Shukhevych, release him from prison, and permit him and his family to emigrate from the Soviet Union.

It also calls on the President to express the opposition of the United States to Mr. Shukhevych's continued imprisonment and maltreatment. In

views received from the administration, we were told that—

Resolution 111 is consistent with and supportive of our policy of considering the extent to which other nations honor their commitments under international law, particularly concerning human rights, in evaluating our relations with those nations.

Mr. Speaker, the plight of Yuriy Shukhevych is on the conscience of this Nation, and his courage in the face of Soviet repression is an inspiration. I urge my colleagues to support House Concurrent Resolution 111 on behalf of Yuriy Shukhevych and all those like him who languish in Soviet prisons and labor camps. Thank you.

Mr. Speaker, I have no other speakers on this side of the aisle, and would yield back the balance of my time.

Mr. ZABLOCKI. Mr. Speaker, I yield such time as he may consume to the gentleman from Washington (Mr. BONKER), chairman of the Subcommittee on International Organizations.

Mr. BONKER. Mr. Speaker, the Foreign Affairs Subcommittee on Human Rights and International Organizations long concerned about human rights abuses all over the world continues to take up resolutions pertaining to various dissidents, whose human rights have been violated. We are about to report out to the House floor three such resolutions.

Yuriy Shukhevych is currently serving his 28th year of imprisonment. He has been freed from Soviet jails for a total of 4 years since 1948, having been imprisoned for refusing to denounce the ideals of Ukrainian nationalism and the activities of his late father, who was a Ukrainian freedom fighter.

Mr. Speaker, this resolution was passed favorably by the subcommittee and by the full House committee and has the support and cooperation of the ranking minority member of the subcommittee and the chairman of the full committee. I am pleased to recommend its adoption by the House today.

● Mr. CORRADA. Mr. Speaker, I rise in strong support of House Concurrent Resolution 111, a resolution expressing the sense of the Congress regarding the treatment by the Soviet Union of Yuriy Shukhevych.

As signatories to the Universal Declaration of Human Rights, the International Covenant on Civil and Political Rights, and the Final Act of the Conference on Security and Cooperation in Europe, the Soviet Union has acknowledged the right of its citizens to emigrate.

Yuriy Shukhevych is currently serving his 28th year of imprisonment for refusing to denounce the ideals of Ukrainian nationalism and the activities of his late father, Roman Shukhevych, a Ukrainian freedom fighter. The Soviet Union should cease this imprisonment and allow him and his family to emigrate to the country of their choice.

Yuriy Shukhevych cannot speak for himself; we, in this Congress must continue to speak for him and others like him.●

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Wisconsin (Mr. ZABLOCKI) that the House suspend the rules and agree to the concurrent resolution (H. Con. Res. 111).

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

## GENERAL LEAVE

Mr. BONKER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the concurrent resolution just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

## REGARDING THE SAFETY AND FREEDOM OF SOVIET CITIZEN YURI BADZYO

Mr. BONKER. Mr. Speaker, I move that the House suspend the rules and agree to the resolution (H. Res. 193) concerning the safety and freedom of Soviet citizen Yuri Badzyo.

The Clerk read the resolution as follows:

H. RES. 193

Whereas Yuri Badzyo is currently serving a seven-year prison sentence in the notorious Mordovian labor camps, to be followed by five years in internal exile, for ideas contained in an unpublished manuscript that is, in fact, missing;

Whereas Yuri Badzyo desired greater political, cultural, and artistic freedom for the Ukrainian people;

Whereas, because of these beliefs, Yuri Badzyo was expelled from the Soviet Communist Party and was refused work in his profession, philology; and

Whereas the Soviet Constitution itself guarantees rights for nationalities as well as individual rights: Now, therefore, be it

*Resolved*, That the House of Representatives—

(1) expresses its concern for the well-being, safety, and freedom of the Ukrainian patriot Yuri Badzyo;

(2) asks the President to express to the Soviet Government the interest of the United States in this prisoner of conscience and in the fate of his wife Svitlana Kyrychenko, who has also been dismissed from her profession for her impassioned support of her husband's ideas and work, as well as in the welfare of their two children Bohdana and Serhiy Badzyo; and

(3) requests that the President remind the Soviet Union of its obligations to honor human rights under the terms of the Helsinki Accord.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Washington (Mr. BONKER) will be recognized for 20 minutes, and the gentleman from Iowa (Mr. LEACH) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Washington (Mr. BONKER).

Mr. BONKER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this is the second of three resolutions that are being reported to the floor today. This resolution concerns Yuri Badzyo who is a Ukrainian citizen. He is serving a 7-year prison sentence in a Soviet labor camp for ideas contained in an unpublished manuscript. The prison sentence is to be followed by 5 years of internal exile. This particular resolution expresses the concern of the House for the well being, the safety, and the freedom of this Ukrainian patriot, and asks the President to express to the Soviet Government our continuing interest in his case.

□ 1220

Mr. LEACH of Iowa. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would like to add my support to that of the gentleman from Washington for House Resolution 193, a resolution concerning the safety and freedom of Yuri Badzyo.

Yuri Badzyo, a philologist by profession, is currently spending 7 years in a prison camp as a result of a scholarly study he did entitled, "The Right to Live." The manuscript is now missing. Yuri Badzyo has been a longtime critic of the "russification" policy toward the Ukraine. His defense of others who had joined him in resisting that policy, led to his dismissal from his research work at the Institute of Literature in Kiev and his expulsion in 1968 from the Communist Party. His wife, Svitlana Kyrychenko, was also dismissed from her position at the Institute of Philosophy for her actions on behalf of Ukrainian dissidents.

In December 1979, Badzyo was sentenced to 7 years of corrective labor to be followed by 5 years in exile for anti-Soviet agitation and propaganda. However, even from the labor camp, Badzyo continued to resist the oppressive policies of the Soviet Union. Last year, Yuri Badzyo was one of three prisoners who smuggled a message out of their camp, announcing that they were refusing to work during the Olympics to protest the Soviet invasion of Afghanistan. They maintain—correctly—that there is an "unbreakable tie between the external political aggressive actions of the Soviet Government and the internal policy of repression against dissidents."

The resolution before us today expresses the concern of the House for the well-being, safety, and freedom of the Ukrainian patriot and asks the

President to inform the Soviet authorities of U.S. interest in the case of Badzyo, his wife and their two children. As in other cases, the Soviets must be reminded of their obligations under the Helsinki accords and called to account for their neglect of human rights within their own jurisdiction.

Mr. Speaker, I urge the adoption of this resolution, not only on behalf of Yuri Badzyo and his family but on behalf of those of his colleagues who have resisted great pressure to maintain their Ukrainian heritage and identity.

Mr. BONKER. Mr. Speaker, I yield such time as he may consume to the distinguished chairman of the full committee, the gentleman from Wisconsin (Mr. ZABLOCKI).

Mr. ZABLOCKI. Mr. Speaker, I rise in support of House Resolution 193, concerning the safety and freedom of Soviet citizen Yuri Badzyo.

House Resolution 193 was approved by the Committee on Foreign Affairs last week, along with two other resolutions regarding Soviet dissidents, which we are considering here today. I would like to take this opportunity to thank the Honorable DON BONKER, chairman of the Subcommittee on Human Rights and International Organizations for his efforts on behalf of these measures now before the House, and for his continuing work toward improving the human rights situation around the globe.

At present, Yuri Badzyo is imprisoned in a Soviet labor camp serving a 7-year sentence after which he will be subjected to 5 years of internal exile. Badzyo was accused for ideas presented in an unpublished manuscript. His wife, for supporting her husband, was dismissed from her employment. Here again is another example of a Soviet prisoner of conscience, and his family, denied basic rights and freedom because of personal beliefs.

House Resolution 193 expresses the concern of Congress for the freedom of Yuri Badzyo; asks the President to transmit that concern to the Soviets, urge they comply with the Helsinki accords, and assure the safety and rights of Yuri Badzyo, his wife, and two children.

Mr. Speaker, I urge passage of House Resolution 193.

● Mr. DIXON. Mr. Speaker, I greatly appreciate this opportunity to speak on behalf of my resolution, House Resolution 193, concerning the safety and freedom of Yuri Badzyo, a Ukrainian prisoner of conscience.

Yuri Badzyo, a 45-year-old philologist, is currently serving a 7-year term in a Soviet prison camp as a consequence of his scholarly study entitled "The Right to Live." This 1,400-page manuscript, which has disappeared under mysterious circumstances, is critical of the course and consequences of the Soviet nationalities policy in the Ukraine.

In 1965 Soviet authorities began to crack down against those who opposed the official policy of "russification," and spoke out for greater national, cultural, and artistic freedom in the Ukraine.

When Badzyo protested the Government arrests, searches, and interrogations, he was subsequently dismissed from research work at the Institute of Literature in Kiev and expelled from the Communist Party.

Unable to locate a job in his profession, Badzyo worked as a bread loader in Kiev for the 8 years prior to his arrest in April 1979.

It is understood that on December 21, 1979, Yuri Badzyo was sentenced to 7 years corrective labor followed by 5 years in internal exile.

Badzyo is being held at the notorious Mordovian corrective labor colony, well known for its conditions of chronic hunger, inadequate medical care, and hard labor. His wife, Zvitlana Kyrytschenko, has been active on behalf of her husband, and after a recent visit reported of his health. She indicated that he is losing his eyesight and could scarcely see with one eye.

This resolution will express concern for the well-being of Yuri Badzyo, and ask the President to express to the Soviet Government the interest of our country on his behalf, and for his wife, as well.

I am honored to have the cosponsorship of several Members of Congress, including the Honorable HENRY WAXMAN, BOBBI FIEDLER, MERVYN DYMALLY, JERRY LEWIS, ANTHONY BEILENSON, AUGUSTUS HAWKINS, CARLOS MOORHEAD, and our esteemed colleague CLAUDE PEPPER.

I would also like to express my appreciation to the Los Angeles Journalists Group of Amnesty International, and particularly Ms. Ruth Hirschman, chair of the Prisoner of Conscience Committee. This group has done so much to bring attention to Mr. Badzyo.

Passage of this measure is an important reminder that we will not forget those who personify the continuing struggle for human rights.

I am most appreciative of today's consideration of House Resolution 193, and hope that it will receive the approval of this body.●

● Mr. CORRADA. Mr. Speaker, I rise in strong support of House Resolution 193, a resolution expressing the concern of the House with respect to the safety and freedom of Yuri Badzyo, a citizen of the Soviet Union.

Again we must remind the Soviet Union of its commitments under the Helsinki accords. Mr. Badzyo is a Ukrainian patriot currently serving a 7-year prison sentence in a labor camp because of his writings in an unpublished document. We are also concerned about the fate of his wife, Svitlana Kyrychenko, and the welfare of their two children.

I urge my colleagues to support this resolution on behalf of Yuri Badzyo and his family.●

Mr. BONKER. Mr. Speaker, I have no further requests for time.

Mr. LEACH of Iowa. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Washington (Mr. BONKER) that the House suspend the rules and agree to the resolution, House Resolution 193.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the resolution was agreed to.

A motion to reconsider was laid on the table.

## GENERAL LEAVE

Mr. BONKER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the resolution just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

## SENSE OF CONGRESS OPPOSING SOVIET IMPRISONMENT OF ANATOLY SHCHARANSKY

Mr. BONKER. Mr. Speaker, I move to suspend the rules and agree to the resolution (H. Res. 152) to urge the President to continue to express the opposition of the United States to the imprisonment of Anatoly Shcharansky by the Soviet Union.

The Clerk read as follows:

H. RES. 152

Whereas the Helsinki Accord of the Conference on Security and Cooperation in Europe commits its signatories to respect human rights and fundamental freedoms;

Whereas the Soviet Union is a signatory to the accord;

Whereas Anatoly Shcharansky has been imprisoned in the Soviet Union in violation of the accord;

Whereas as a result of actions of Soviet authorities, Mr. Shcharansky's health has deteriorated to a point where his life is threatened; and

Whereas humanitarian interests and the provisions of the Helsinki Accord require that Soviet authorities end the incarceration and inhumane treatment of Anatoly Shcharansky: Now, therefore, be it

*Resolved*, That it is the sense of the House of Representatives that the President, at every suitable opportunity and in the strongest terms, should express to the Union of Soviet Socialist Republics the opposition of the United States to the imprisonment of Anatoly Shcharansky, and should urge that Mr. Shcharansky be given proper medical treatment and be permitted to emigrate to Israel.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Washington (Mr. BONKER) will be recognized for 20 minutes, and the gentleman from Iowa (Mr. LEACH) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Washington (Mr. BONKER).

Mr. BONKER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this resolution was referred to the Committee on Foreign Affairs and to the Subcommittee on Human Rights and International Organizations.

Mr. Speaker, this is not the first resolution to come before this Chamber and to be passed out by the full committee regarding Anatoly Shcharansky. This distinguished prisoner of conscience has been in prison in the Soviet Union in violation of the Helsinki Accords and the Conference on Security and Cooperation in Europe. While in prison his health continues to deteriorate.

We have recently received a letter from our colleague, the gentleman from Massachusetts (Mr. BARNEY FRANK) concerning Mr. Shcharansky's medical condition, stating that it continues to worsen, and there seems to be no effort within the Soviet Union to provide proper medical treatment to Mr. Shcharansky.

So this resolution, Mr. Speaker, is in order, and it is timely. It expresses the sense of the House that the President should be urged to continue to express U.S. opposition to the imprisonment of Mr. Shcharansky by the Soviet Union.

Mr. Speaker, I urge adoption of the resolution by the House.

Mr. LEACH of Iowa. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of House Resolution 152, a resolution urging the President to continue to express U.S. opposition to the Soviet imprisonment of Anatoly Shcharansky.

The case of Anatoly Shcharansky, a courageous young Soviet Jew, is well-known in this country. Many of us have met with Avital Shcharansky, his wife, and know of the despair she must face as she presses tirelessly for her husband's release.

As in so many other cases, the Soviet Government has once again reneged on its human rights commitments under international agreements such as the Helsinki accords. Anatoly Shcharansky, a computer programer for the Moscow Research Institute for Oil and Gas, was an active and dynamic leader in the movement to monitor Soviet compliance with the Helsinki Act. In 1977, he was arrested and charged with working for the American CIA, and was finally convicted of the charges in July 1978. Efforts by the American Government during that period to prevent his sentencing by denying any validity to the CIA charges placed against Shcharansky, failed dismally. Today, he is serving a 13-year prison sentence and suffering dangerous health problems.

House Resolution 152 calls on the President—at every suitable opportunity and in the strongest terms—to express to the Soviet authorities U.S. opposition to the imprisonment of Mr. Shcharansky and to urge that he be given proper medical treatment and permitted to leave for Israel.

Earlier this year, President Reagan met with Mrs. Shcharansky at the White House and assured her he would do all he could to help her husband. Since then, the administration has sent Congress written assurances that it has communicated U.S. concern to the Soviets "via diplomatic channels" and that it will continue those efforts. Thus, House Resolution 152 is fully consistent with this administration's policy with respect to American policy in general and Shcharansky's case in particular.

Mr. Speaker, it is difficult not to feel a deep sense of frustration over the injustice Mr. Shcharansky and his family suffer and the limits to which this Congress can go to secure his release. Hopefully, the passage of House Resolution 152 will strengthen the hands of our diplomatic officials in exercising the maximum leverage possible on Soviet authorities on his behalf. I encourage my colleagues to support the resolution.

Mr. Speaker, I have no other requests for time, and I yield back the balance of my time.

Mr. BONKER. Mr. Speaker, I yield such time as he may consume to the distinguished chairman of the full committee, the gentleman from Wisconsin (Mr. ZABLOCKI).

Mr. ZABLOCKI. Mr. Speaker, I rise in support of House Resolution 152, to urge the President to continue to express the opposition of the United States to the imprisonment on Anatoly Shcharansky by the Soviet Union.

Today we consider, once again, the case of Anatoly Shcharansky, an incarcerated Soviet prisoner of conscience. It is most distressing that Mr. Shcharansky's situation has not only not improved, but has in fact deteriorated to the point where he hovers precariously close to death.

I strenuously urge the Soviet Union to act with compassion and provide Anatoly Shcharansky with the vital medical measures he requires, and to permit his safe passage to a new home in Israel. Such a deed is not a matter of compassion alone. It is, as well, a matter of Soviet adherence to international obligations which they agreed to uphold. Shcharansky's incarceration contravenes the Helsinki accords, an instrument which underscores respect for basic human rights and individual freedom. House Resolution 152 calls on the President to relay the message of this resolution to the Soviets at every possible opportunity.

Mr. Speaker, I urge the adoption of House Resolution 152.

Mr. BONKER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, in the time that remains I would like to make a concluding statement regarding the three resolutions, two of which have just passed the House.

This final resolution is fairly typical of the others that have received our action, and it concludes by saying:

*Resolved*, That it is the sense of the House of Representatives that the President, at every suitable opportunity and in the strongest terms, should express to the Union of Soviet Socialist Republics the opposition of the United States to the imprisonment of Anatoly Shcharansky, and should urge that Mr. Shcharansky be given proper medical treatment and be permitted to emigrate to Israel.

In each of these resolutions, Mr. Speaker, we instruct the President through his emissaries to make our concerns known to Soviet authorities.

This week the Secretary of State will be meeting with the Foreign Minister of the Soviet Union. I would hope that the Secretary of State will take these concerns and others expressed by the Congress regarding various dissidents and the treatment afforded them within the Soviet Union and express in the strongest terms our continuing concern about their health and well-being and in some cases their opportunity to emigrate from that country. It seems timely that the resolutions before us instruct the President—and, in this case, through his Secretary of State—to make these expressions known to the Soviet authorities. We need to express in the strongest terms our continuing concerns about dissidents within the Soviet Union.

● Mr. WAXMAN. Mr. Speaker, today the House of Representatives again demands that the Soviet Union end its unjust and inhumane imprisonment of Anatoly Shcharansky. Our expression of concern could not be more urgent or timely. It has been 4 months since Tolya's family has heard from him by letter—leading to fears that Shcharansky's health, which was already reported to be rapidly deteriorating in the absence of an adequate diet and proper medical attention, may be in the most serious jeopardy. In addition, the family's visits to his prison camp have been canceled—another in a long string of indignities and insults to Shcharansky's brother, Leonid, and his mother, Ida Milgrom. The Soviet authorities seem to delight in pouring salt into the raw wounds of repression they have inflicted on Anatoly and thousands of other Soviet Jews.

The world is all too familiar with Anatoly Shcharansky's plight, and I daresay that even he would be stunned by the worldwide support for his freedom. He has become a figure that is larger than life, a metaphor for the struggle for freedom.

Our demand that Anatoly be freed is especially timely. Later this week, Secretary of State Haig will meet with Soviet Foreign Minister Gromyko in the most high level exchange with a Soviet official of this administration. I deeply hope that Secretary Haig will fully adhere to President Reagan's commitment that the issue of human rights will always be on the bargaining table when we sit down with the Soviets—and I trust our side, in these discussions, will not hesitate to directly raise this compelling matter.

We are also acting on this resolution just a few days before the beginning of the Jewish New Year, Rosh Hashanah, and the Days of Awe that follow. For Jews throughout the world, these are days of celebration, renewal, introspection, rededication, and the reaffirmation of faith—elements that are especially meaningful for all involved in the fight for freedom for Soviet Jewry. It is entirely appropriate, therefore, on the eve of these holy days, that the House has chosen to reiterate its commitment to freedom for Anatoly Shcharansky.

Mr. Speaker, I urge the overwhelming adoption of this resolution.●

● Mr. DERWINSKI. Mr. Speaker, I am pleased to join with my colleagues in offering my support for House Resolution 152, which urges the President to express our continued opposition to the illegal and immoral imprisonment of Anatoly Shcharansky, and requests that Soviet authorities allow him to be given proper medical treatment and be permitted to emigrate to Israel.

Since his arrest, Anatoly Shcharansky has become so ill that his life is now in danger. Soviet authorities have not provided him with adequate medical care, and as a result his condition is extremely perilous.

We cannot forget these dissidents who are continuing to be victimized within the Soviet borders by repressive internal policies of that nation's leaders. The continued incarceration of Anatoly Shcharansky, Viktor Brailovsky, Vladmir Kislik, and many others like them that remain separated from their families, are examples of continuing repression by Soviet authorities of political prisoners whose sole crime is a desire to enjoy their religious freedoms, political beliefs, and their basic human rights.

It is my hope that this resolution will show the Soviet Union that the United States is deeply concerned over the fate of Anatoly Shcharansky and other Soviet citizens who remain separated from their families by political boundaries. I urge adoption of House Resolution 152.●

● Mr. CORRADA. Mr. Speaker, it is with a sense of deep sadness but with renewed vigor that we again consider a measure urging the release of Anatoly Shcharansky.

For many years, the Soviet Union has refused to allow the emigration of Mr. Shcharansky to Israel for the very simple reason that he is a very courageous, intelligent, and frank spokesman for Soviet Jews. His fortitude is remarkable but now his health is imperiled to the point that his life is at stake. For humanitarian reasons the Soviet authorities should immediately release Mr. Shcharansky and allow him to emigrate to Israel to join his wife Avital.

I was fortunate to meet Shcharansky's mother during a recent official trip to the Soviet Union with other members from the Education and Labor Committee. I have been a strong supporter of the efforts to obtain the release of Anatoly Shcharansky and I urge all my colleagues to join in expressing our deep outrage and concern over his treatment by casting their votes in favor of House Resolution 152.●

● Mr. BINGHAM. Mr. Speaker, I rise in strong support of this resolution which protests the Soviet Government's treatment of Anatoly Shcharansky. Shcharansky has now been in prison for over 4 years for the "crime" of seeking to live in the State of Israel. He has been separated from his wife, Avital, his mother, and other members of his family. The latest reports on Shcharansky are especially alarming. He is gravely ill and, in fact, may be near death. How long can this unfair confinement continue?

I wish that there was some way of making the Soviet Government understand that the concern of this Congress over Shcharansky is no fleeting interest. We shall not forget Shcharansky. We shall continue to speak out until this good and innocent man is free. Anyone who thinks that in time we shall forget Shcharansky and leave him to his fate should recall the case of Alfred Dreyfus. Like Shcharansky, Dreyfus was imprisoned after a kangaroo legal proceeding. Like Shcharansky, Dreyfus protested his innocence. Agitation for Dreyfus' release did not end despite the fact that Dreyfus was chained to his cell on Devil's Island. The thunder of protest against Dreyfus' unfair imprisonment continued to roar until the day the innocent Frenchman was finally exonerated. A turning point in that case came when the great French writer Emile Zola pointed to the Government of France and said "I accuse." Today Members of Congress join as one to say that we accuse the Soviet Government of knowingly keeping an innocent man in prison. We urge the Soviet Government to immediately effect the release of Shcharansky and his reunification with his wife in Israel. The release of Shcharansky would benefit not only the Shcharansky family but also the cause of peaceful relations between our two countries.●

● Mrs. HECKLER. Mr. Speaker, the ordeal of Anatoly Shcharansky is one that carries great import for all of us who are appalled by the Soviet Government's systematic policy of repression against its own Jewish community. Because Anatoly Shcharansky is one of the most visible of the Soviet Jewish refuseniks, his imprisonment and criminal mistreatment represent not only a profound human tragedy, but a blatant flouting by the Soviet Union of international opinion and concern.

Anatoly Shcharansky is indeed a symbol, a man who has, through his suffering and his courage, come to exemplify the steadfast determination of Soviet Jewry in the face of the most malignant strains of anti-Semitism. His ability to endure the mistreatment that the Soviet authorities have devised for him is a tribute not only to his personal bravery, but also to the deep desire for freedom that sustains the entire refusenik community.

Now, Mr. Speaker, observers have noted reports that Anatoly Shcharansky is gravely ill, and that even in this extreme condition he is being denied proper medical care by his jailers. Such gross insensitivity by the Soviet authorities is shocking, but not surprising.

The Soviets' record, or lack thereof, in the area of human rights is sadly familiar to all of us here. It would, perhaps, be easy for the United States to resign itself to the Soviet Government's imposing refusal to face up to its own constitutional obligations, and its responsibilities under international agreements.

But we cannot, Mr. Speaker. We cannot stop calling the Soviets to face their responsibilities—we cannot stop reminding them of the conscience of their own nation, which they strive not to hear.

The case of Anatoly Shcharansky goes far beyond Soviet domestic policies, or international political wrangling. It strikes at the most basic requirement of all who share the human condition—respect for human life and liberty, and the obligation to preserve and protect innocent life.

Simple justice dictates clearly the actions we are required to take. We must continue to press for what is humane and just—for the quick medical treatment of Anatoly Shcharansky in his illness, and for his subsequent release and free emigration to Israel.

We must do so not only because Anatoly Shcharansky is a symbol of a movement whose values we share, but

more importantly because he is a member of the human family, whose triumph and sufferings we also share.

Mr. Speaker, the release of Anatoly Shcharansky would be an important humanitarian statement by the Soviet authorities. To the extent that it is in our power to bring such a move about—and today's resolution was only one of the steps we can, and should, take—I urge all of my colleagues in this House to join in a redoubled effort to win justice for Anatoly Shcharansky.●

● Mr. HOLLENBECK. Mr. Speaker, I welcome this opportunity to rise and join with my colleagues in voting for House Resolution 152, a resolution opposing the continued imprisonment of Anatoly Shcharansky. It was 4 years ago, March 15, that Mr. Shcharansky was arrested. As we all know, Anatoly received a severely inflated 13-year prison term in July 1977, the result of trumped-up espionage charges. This 13-year sentence was imposed by the Soviet authorities despite Presidential intervention attesting that Shcharansky was not in any way associated with the Central Intelligence Agency.

Now over 4 years later, I am sad to state that the situation has worsened. Mr. Shcharansky not only remains imprisoned but his health has continued to deteriorate. Latest available information indicates that he is seriously ill, that he is not receiving necessary medical treatment in the Perm labor camp where he is serving his sentence.

The Soviets handling of this case has been recognized worldwide as a blatant example of injustice and a violation of human rights. To imagine that such an unjust series of events, in direct violation of the Helsinki accords, can actually occur in modern times is indeed a depressing thought. As civilized people with an inherent respect for human rights, we must not relent in our efforts to secure the release of Anatoly Shcharansky. We must continue to persevere as we hope and pray that Anatoly is able to persevere.

I am proud to join my colleagues in condemning the Soviet Union for their shameful injustices in the case of Anatoly Shcharansky. I can only hope that civilized people worldwide will not relax their efforts to achieve Mr. Shcharansky's expeditious release.●

● Mr. FRANK. Mr. Speaker, I join my colleagues in support of House Resolution 152, a resolution urging the President to continue to express the opposition of the United States to the imprisonment of Anatoly Shcharansky by the Soviet Union. This expression of support for Soviet prisoner of conscience Anatoly Shcharansky is both timely and important.

As a symbol of all individuals serving sentences in Soviet prisons and labor camps because of their beliefs, Anatoly Shcharansky represents Soviet Jews who desire to emigrate. His incarceration is the result of an unjust trial that was condemned around the world. His real "crime" was that he was the leader in the movement of Jews who wished to leave.

Shcharansky's health is of immediate concern to many Members of Congress and is, in part, the reason this resolution is so timely. But there is no time when the Shcharansky case is not relevant to relations between the United States and the Soviet Union. As long as he and others like him are incarcerated, and as long as Soviet citizens are denied their constitutionally guaranteed right to emigrate the United States has an obligation to indicate our strong objections.

I recently circulated a letter to our colleagues asking them to join me in urging Secretary of State Haig to raise the issue of the Shcharansky case with Soviet Foreign Minister Andrei Gromyko when they meet in New York later this week.

I attach a copy of the letter which is being sent today to Secretary of State Haig.

HOUSE OF REPRESENTATIVES,
*Washington, D.C., September 21, 1981.*

Secretary ALEXANDER HAIG,
*Department of State,*
*Washington, D.C.*

DEAR MR. SECRETARY: We are concerned about reports that Soviet prisoner of conscience Anatoly Shcharansky may be seriously ill in the Perm labor camp where he is currently serving the remainder of his term for allegedly contacting agents of the CIA. As you know, his show trial in July, 1978 provoked unprecedented international protests, particularly in the United States.

We believe that your upcoming meeting with Soviet Foreign Minister Andrei Gromyko is an excellent opportunity for you to express the United States' strong objections to his continued incarceration and to urge the Soviet Union to allow a team of qualified physicians to examine Shcharansky to determine his exact medical condition and to administer whatever medical treatment may be necessary.

We consider Shcharansky's condition to be a matter of serious U.S. concern. We trust that you will respond favorably to our request that you forcefully and effectively convey the objections of the United States to Andrei Gromyko at your meeting with him later this month.

Barney Frank, Les Aucoin, Mike Lowry, John J. LaFalce, Anthony Beilenson, Henry S. Reuss, Charles E. Schumer, Thomas M. Foglietta, Ray Kogovsek, William D. Ford, Norman E. D'Amours, Guy V. Molinari, Marjorie S. Holt, Martin Frost, Tom Harkin, Tom Lantos, Gerry E. Studds, Buddy Roemer, Bobbi Fiedler, Joseph P. Addabbo, William H. Gray, III, James L. Oberstar, Frank Horton, Joel Pritchard, George C. Wortley, Joseph G. Minish, Tony Coelho, Frederick W. Richmond, Harold E. Ford, James M. Jeffords, Bill McCollum, Bob Edgar, James M. Shannon, Sidney R. Yates, John J. Moakley, Stephen J. Solarz, Bernard J. Dwyer, Willis D. Gradison, Jr., Jonathan B. Bingham, Robert A. Roe, Toby Roth, John LeBoutillier, Bill Lowery, James H. Scheuer, Ken Kramer, Harold C. Hollenbeck, Don Ritter, William F. Goodling, James M. Collins, Parren J. Mitchell, William Lehman, Eugene V. Atkinson, David R. Bowen, Bob Shamansky, Edward P. Boland, Henry A. Waxman, Hamilton Fish, Jr., Don Edwards, Bill Brodhead, Millicent Fenwick, Dan Glickman, Benjamin A. Gilman, Walter E. Fauntroy, Don Bonker, and Toby Moffett.●

● Mr. McGRATH. Mr. Speaker, I rise in strong support of this resolution to express concern over the imprisonment of Anatoly Shcraransky. This resolution is particularly timely, since Shcharansky has not been heard from in several months, and there is increased concern for his safety.

In light of the intense international concern for Anatoly Shcharansky's welfare, I recently wrote to Secretary of State Haig to urge that he raise this issue in his forthcoming meeting with Soviet officials.

Mr. Speaker, many of us have taken the floor of this House to express our concern over the plight of different Soviet prisoners of conscience, and Anatoly Shcharansky is only the most notable. His case is a prime example of the Soviet Union's callous disregard for human rights, and particularly its disregard for the Helsinki accord to which it is a signatory.

My administrative assistant recently returned from the Soviet Union, where she had the opportunity to meet with many dissidents and their families. She has reported to me that it is only pressure from the international community, including the U.S. Congress, that keeps many of these people alive. It is clear that our efforts must continue unabated until the Soviet Government recognizes the basic rights of its own citizens.

I want to commend the sponsor of this resolution, Mr. RINALDO, and the Committee on Foreign Affairs for giving us this opportunity to go on record in support of human rights in the Soviet Union and to protest the Soviet Union's treatment of this truly great individual, Anatoly Shcharansky.●

● Mr. MOFFETT. Mr. Speaker, I wish to take this opportunity to express my support for House Resolution 152, regarding the imprisonment and inhumane treatment of Anatoly Shcharansky, a Soviet Jew who has sought to emigrate to Israel.

Since January of this year, Mr. Shcharansky has been held in solitary confinement at one of the Perm Labor Camps. His living conditions in the camp are deplorable. He is receiving half rations of food—about 1,000 calories per day—and is allowed only 30 minutes of exercise each day. As a result, his health is deteriorating—he is suffering from heart problems, memory loss and other difficulties. Furthermore, because his cell is poorly

lit, his attempts to pass the time by reading have impaired his vision.

Mr. Shcharansky's mistreatment by Soviet officials appears particularly barbaric in light of the circumstances surrounding his imprisonment. His widely publicized trial, which made a mockery of justice, demonstrated to the world the Soviet Union's disregard for even the most basic of human rights, as outlined in the Helsinki accords signed by the U.S.S.R. in 1975.

Soviet persecution of Shcharansky began in 1973, when he first applied for permission to emigrate to Israel. Following the refusal of his application, he continued to seek to emigrate, and worked on behalf of the human rights cause in the Soviet Union. He became a founding member of the Group to Monitor the Helsinki Agreement in the U.S.S.R., and often acted as a spokesman for Soviet "refuseniks." His courageous efforts on behalf of human rights ultimately led to his arrest in March 1977, on charges of spying for the United States. In spite of worldwide outrage over his trial, and President Carter's public assurances that he had never been affiliated with the CIA, Shcharansky was convicted. His current prison term extends through 1990.

I am pleased that the House of Representatives voted yesterday to pass House Resolution 152, which calls upon the President to pressure the U.S.S.R. for more humane treatment of Anatoly Shcharansky. The case of Mr. Shcharansky highlights the Soviet Government's hypocrisy in refusing to abide by the provisions of the Soviet-signed Helsinki accords. Perhaps this resolution will help to persuade the Soviets to abandon the deplorable treatment to which Anatoly Shcharansky is currently being subjected.●

● Mr. GILMAN. Mr. Speaker, I take this opportunity to join my colleages in full support of this resolution objecting to the further imprisonment of Anatoly Shcharansky. It was 2½ years ago last week that Anatoly Shcharansky was arrested by KGB agents on trumped-up charges of treason and working for the CIA. The Soviets defying world outrage, including a personal appeal by President Carter in June, 1977, committed Shcharansky to solitary confinement for 16 months. His trial in June 1978, took only 4 days. It was a mockery of justice, failing even to comply with Soviet law and resulting in a sentence of 13 years in prison and labor camps.

As if that gross violation of his rights, as guaranteed by the Helsinki accords, was not enough, Anatoly Shcharansky was even deprived of the right to receive visits from his elderly mother, Ida Milgrom. The Soviet prison authorities have recently resorted to a new tactic of cruelty to Mrs. Milgrom, reporting that her son's most recent letter—which he is permitted to send only once every 2 months—was lost in the mail.

Last year, shortly after I received a personal appeal from Mrs. Milgrom, I was privileged to lead the House in a special order to denounce Shcharansky's treatment, a denunciation that, I am pleased to remind the committee, was joined by many Members of the House, including most of those now present. The shocking news contained in Shcharansky's just-released letter, in which he reveals a serious loss of weight and periodic bouts of blindness, is extremely distressing to all who are concerned for the safety of this victimized man. His health problems have long been known, and the Soviet's refusal to acknowledge worldwide concern and remedy the situation is further proof of their failure to abide by human rights policies accepted around the globe.

The purpose of House Resolution 152 is to state the strong objection of the Congress and the American people to Shcharansky's imprisonment and the continued deprivation of his rights, which are in clear violation of the Helsinki accords. We deplore the inhumane conditions under which Shcharansky is being held, we object to his further incarceration and urge the President to reflect this deep concern. I hope that by continuing to illuminate his tragic plight, we may improve the chances for freedom of Anatoly Shcharansky, and of other Soviet dissidents, persecuted because they have had the courage to speak out against oppression.●

---

Mr. BONKER. I have no further requests for time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Washington (Mr. BONKER) that the House suspend the rules and agree to the resolution (H. Res. 152).

The question was taken; and—two-thirds having voted in favor thereof—the rules were suspended and the resolution was agreed to.

A motion to reconsider was laid on the table.

---

## MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed a bill and joint resolution of the following titles, in which the concurrence of the House is requested:

S. 884. An act to revise and extend programs to provide price support and production incentives for farmers to assure an abundance of food and fiber, and for other purposes; and

S.J. Res. 101. Joint resolution designating "National High School Activities Week."

□ 1230

## SENSE OF CONGRESS THAT THE NATIONAL RUGBY TEAM OF SOUTH AFRICA SHOULD NOT PLAY IN THE UNITED STATES

Mr. ZABLOCKI. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 183) expressing the sense of the Congress that the national rugby team of South Africa should not play in the United States.

The Clerk read as follows:

H. CON. RES. 183

Whereas the Government of the Republic of South Africa continues to enforce the morally reprehensible policy of apartheid, thereby oppressing the majority of the population in South Africa;

Whereas South Africa has been banned from Olympic competition for the past two decades because of the racial apartheid system practiced in the nation;

Whereas the United States Olympic Committee is opposed to the proposed United States tour of the Springbok National Rugby Team; and

Whereas there are clear indications that the tour in the United States of the Springbok National Rugby Team may trigger a boycott of the 1984 summer Olympics: Now, therefore, be it.

*Resolved by the House of Representatives (the Senate concurring)*, That it is the sense of the Congress that the Springbok National Rugby Team of South Africa should not play rugby in the United States.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Wisconsin (Mr. ZABLOCKI) will be recognized for 20 minutes, and the gentleman from Michigan (Mr. BROOMFIELD) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Wisconsin (Mr. ZABLOCKI).

Mr. ZABLOCKI. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, the text of House Concurrent Resolution 181 was considered by the Committee on Foreign Affairs on September 17, and reintroduced as House Concurrent Resolution 183 by the gentleman from Pennsylvania (Mr. GRAY) on that date.

During the committee's debate, it was agreed to accept a suggestion by the gentleman from Illinois (Mr. DERWINSKI) that the resolution should include language that the tour by the South African team may trigger a boycott of the 1984 summer Olympics scheduled to be held in Los Angeles. House Concurrent Resolution 183 includes such language.

Mr. Speaker, I rise in support of House Concurrent Resolution 183, expressing the sense of the Congress that the national rugby team of South Africa should not play in the United States.

Mr. Speaker, even though the South African team has begun its tour and played a game this past Saturday, I

urge the House of Representatives to go on record as opposing this tour. In urging the adoption of this resolution, I ask the Members to note that this team is the national rugby team of South Africa.

Further, Mr. Speaker, I ask all Members to note that since 1970, South Africa has been barred from Olympic competition because of its racial policies. The U.S. Olympic Committee has gone on record as opposing this tour.

Most important, Mr. Speaker, I believe U.S. relations with the other nations of Africa will suffer serious harm unless we show clearly and forcefully that the great majority of the American people are opposed to this tour. By adopting this resolution, the House of Representatives can convey to the world the sentiments of the people of this country.

Mr. Speaker, I urge the adoption of House Concurrent Resolution 183.

Mr. BROOMFIELD. Mr. Speaker, I yield myself such time as I may consume.

Mr. BROOMFIELD. Mr. Speaker, House Concurrent Resolution 183 is unnecessary since the first rugby game has already been played. It mixes international politics with private sporting ventures. Naturally, I do not support the Government of South Africa's apartheid policies. But we must distinguish between official governmental policy and private activities which are unrelated to discriminatory policies.

The invitation to the Springbok rugby team was offered through private sporting channels in the United States; namely, the U.S. Rugby Football Union. While I do not agree with South Africa's domestic policies, I believe that it is inappropriate for the U.S. Government to intercede in these private arrangements which have been made in conformity with U.S. law. If Congress feels free to stop a South African rugby team's participation in nonofficial sporting activity, where do we draw the line? Soviet hockey and track teams play in the United States. Surely the Soviet Union is a totalitarian government whose domestic and international policies target it for similar treatment. The People's Republic of China has played ping-pong matches throughout the United States. Should we forbid future Chinese matches because democracy and freedom are not present in the PRC? And we cannot forget the host of African countries where tribal rule discriminates against other tribes and where freedom and economic opportunity for minorities may be even more lacking than in South Africa.

At stake in this resolution is not whether we condone South Africa's racial polices, for no one here does. At stake is whether governments have the right to intervene in private sporting ventures because they disagree with some other government's official policies. Policies, I might add, which in this case, are outside the control of the rugby team. If we do intervene, then where do we draw the line? Will Congress then feel free to exclude participants from the 1984 Olympics in Los Angeles? What criteria will we use? Do they have to be from a democracy in order to participate? Do they have to be only non-Communist? Do they have to be free of racial or national discrimination? Or do they have to be free of only discrimination against blacks?

I wish to emphasize that none of us approves of apartheid. But expressing the sense of Congress that the South African national rugby team should not play in the United States only raises the nature of the game to a level of politics that it does not deserve. The danger in doing so, however, is that we jeopardize certain private contractual freedoms that are basic to our country.

The specter of an African boycott of the 1984 summer Olympic games has been raised over a sport that is not even a part of the Olympic games. We cannot control the policies of African countries in regard to the Olympics, nor should our own domestic policies be modified to suit the desires of foreign countries. Are we to be jerked as a puppet on a chain every time a foreign bloc insists that the United States take certain actions? What shall we say if the Arabs threaten a boycott of the Olympics unless we exclude the Israeli's? What is our response if the Communist Eastern Bloc threatens to withdraw unless we deny visas to West German athletes residing in West Berlin?

In short, let us leave sporting events to the athletes. I know it is hard to do in view of the increasing politicalization of sports in the last few decades, but sports will be better off if we can.

Mr. ZABLOCKI. Mr. Speaker, I yield 5 minutes to the gentleman from Pennsylvania (Mr. GRAY).

Mr. GRAY. Mr. Speaker, the resolution before us expresses the sense of the House that the Springbok National Rugby Team of South Africa should not play in the United States. An affirmative vote is essential as a declaration to the world that our Government does not endorse or sponsor this visit.

This declaration, Mr. Speaker, is necessary to address the threat that the Soviet Union might use the Springbok tour as a tool to boycott or seek removal of the 1984 Olympics from Los Angeles.

Lest anyone doubt that the threat to the Olympics is real, we should remember that this same Springbok team precipitated the boycott of the 1976 games in Montreal by playing in New Zealand prior to the Olympics. As a result of the team's visit to New Zealand, 31 nations refused to compete against New Zealand in the Olympics and pulled out of the games.

It is true that the Soviets, already threatening to seek removal of the 1984 games or to lead such a boycott, can hardly be taken seriously when they preach about human rights. Yet, Mr. Speaker, the threat to the 1984 games is real enough that the United Olympic Committee has worked actively to prevent the South Africans from playing here.

□ 1240

And as we vote on this resolution tomorrow, I recognize that we must address the question: Why must we mix politics and sports?

The fact, however, is that the South Africans have tied the two together almost beyond recognition.

The Springboks epitomize the white supremacist policies of South Africa. The team members are selected by an officially segregated rugby union; the team is designated by the South African Government as its national rugby team; it is a vital cog in a racist society in which sports, in spite of token steps toward integration, remain not only a reflection but an expression of apartheid.

I also recognize that questions will be raised as to whether the Congress, in commenting on the Springbok tour, would set a precedent in terms of future tours by sports teams and cultural groups from totalitarian countries.

The difference here, first, is that, in this case, the 1984 Olympics in Los Angeles are at stake. Second, South Africa is the target of a campaign of isolation endorsed almost universally by the United States and the world community—a campaign motivated by the fact that South Africa has the only official government policy of racism in the world. Third, as part of this campaign, South Africa has been banned from Olympic competition since 1964. And, finally, as a further manifestation of this campaign, no South African national team has visited the United States since 1978.

The South African regime would like nothing better than for the Springbok's tour to be a sporting event, no more or no less.

But given the risk to the 1984 Olympics, and given that people of conscience recognize the apartheid systems for all of its evil, this tour is a showcase for far more than rugby, as the recent score would demonstrate, 47 to 12. It would be like the Philadelphia Phillies, the world champion team of my hometown, trying to play the Chinese club baseball team. What athletic advantage is there to it? We are talking about showcasing not the type of segregated society which scarred a bygone American era.

Rather, we are talking about an official, legal, systematic racism which dominates every facet of South African life.

The majority of South Africans are denied the right to vote except in matters which have no impact on their relations with the white minority. The South Africans pass laws prohibiting travel by blacks, they prevent blacks from living in cities unless they hold jobs, and blacks who do not have a job cannot bring their families to live with them. The Government spends 11 times more for the education of the small minority than for its black majority. The labor unions cannot bargain collectively.

What is the issue? The issue is simply this: Is it in our national interest to have the Springboks here? The answer is clearly no. And the Assistant Secretary of State for Africa, Hon. Chester Crocker, before the subcommittee on Africa, testified last Wednesday that he felt that an expression in a resolution like this would "clarify that this Government is not endorsing the Springbok's tour."

Mr. BROOMFIELD. Mr. Speaker, I yield 3 minutes to the gentleman from Minnesota (Mr. ERDAHL), a member of our committee.

Mr. ERDAHL. Mr. Speaker, I rise in support of the sense of Congress Concurrent Resolution 183. I think we need to remember that is just what it is. We in the Congress do not issue visas, nor can we reclaim them. We each cannot pretend to be the Secretary of State. But I think we do have an opportunity and perhaps an obligation to reflect the consensus of the people of this country, and I think this is what we are doing in approving this resolution. As has already been expressed, I think most of us would find the discriminatory, the racist policies which are an integral part of the Government of South Africa to be abhorrent.

Our country has not issued the invitation that this team visit here. It was issued by a private organization, incidentally, as was reported in one of our sport pages, after this group received a $25,000 donation from a patron of rugby in South Africa.

I would venture that no Member of this body has probably ever sat through a whole rugby game or ever played in one. But, the sport is very important to the Government of South Africa.

The charge has been made that this resolution politicizes the issue. It is not maybe politics in this country, I can assure you, because I was recently in Johannesburg, it is a front page story there. It is a political issue to them. As the gentleman from Pennsylvania (Mr. GRAY) said, this is their national team playing what would amount to a pickup team in this country.

I trust this resolution will pass. I think it does tell the world and South Africa that this—a nonbinding sense of Congress resolution—would send a message to the South African Government and all the people of the world that a broad cross section of the people in this country do not condone the system of apartheid. Without interfering in the Springbok tour, because it is going on and probably will continue, this resolution would place the Congress on record as rejecting the South African Government's attempt to portray the rugby tour as an indication of rapprochement between South Africa and the United States.

It is in this spirit of clarifying a broad consensus of American public opinion and conveying that opinion to the world that I rise in support of the resolution of the gentleman from Pennsylvania.

Mr. ZABLOCKI. Mr. Speaker, I yield 5 minutes to the gentleman from Georgia (Mr. MCDONALD).

Mr. MCDONALD. Mr. Speaker, supporters of the campaign of protests against the South African Springbok rugby football team may think they are doing something constructive in support of human rights. The truth is that their concerns are being callously manipulated by the greatest suppressor of human rights in this century, the Soviet Union and the Soviet Communist Party.

The vehemence of the opposition to the U.S. tour of a racially integrated South African team suggests that once again there is a double standard being applied by the devotees of human rights. The campaign against South Africa stands in stark contrast to the welcoming of representatives of the Soviet and Red Chineses dictatorships to this country.

Despite the Soviet Union's cruel harassment of Jews, Christians, and political dissidents; despite Red China's ruthless crushing of all internal dissent and its hard-line support for the genocidal policies of the Khmer Rouge, representatives of these harsh dictatorships who include ping-pong and ice hockey teams and gymnasts appear before American crowds without nationwide protests and certainly without the involvement of the Congress.

The campaign against the South African rugby team is being carried out in coordination with terrorist groups that are surrogates for the Soviet Union in its efforts to gain control of southern Africa. The bloody-handed Soviet dictatorship has never supported true progress and the true human rights of political, economic, and personal freedom. When we see the Soviet Union's allies taking up a cause, we would do well to stop and consider carefully what they intend.

Let us look at some facts.

Before coming to our country, the Springboks played matches in New Zealand. Riots were staged by leftist New Zealand demonstrators. New Zealand Prime Minister R. D. Muldoon stated in an interview published by the London Sunday Telegraph on September 13, that the riots in his country were part of a campaign of "civil disorder that is being fomented by the left-wing elements all over the world." Asked where the protesters, including youth gangs, had got the money to stage the series of riots, Prime Minister Muldoon said, "Some of it has come from the Workers Communist League. We have no doubt that the WCL is funded by the Soviet Embassy." He also said, "We have authenticated instances of students being paid to demonstrate."

We may not know the origins of the funds that brought buses loaded with demonstrators from Chicago to the first Springbok match. We do know, however, that the U.S. "Stop the Apartheid Rugby Tour" (SART) campaign says openly that this effort has been undertaken "in cooperation with the African National Congress of South Africa, the Pan-Africanist Congress of Azania, and the South West Africa People's Organization."

All three of these organizations are revolutionary terrorist groups.

The African National Congress (ANC) and South West Africa People's Organization (SWAPO) are Soviet equipped, trained, and supported terrorist organizations.

The SWAPO has its bases in Angola where its cadres are provided with terrorist training from Soviet and Warsaw Pact officers. SWAPO's terrorism, which commenced in the mid-sixties, has included assassinations of opposition black leaders and planting mines on roadways that have killed many black Namibian civilians.

The African National Congress has been under the control of the South African Communist Party since 1947. The ANC terrorists and their South African Communist overlords suffered embarrassment in the 1960's when documents from their archives were made part of public trial record that showed they had developed foreign contacts to whom they looked for training in sabotage and terrorism, arms, political and tactical advice, and financial backing, with the Soviet Union, East Germany, Yugoslavia, Czechoslovakia, the People's Republic of China—before the Sino-Soviet split deepened—and Cuba, as well as with Soviet client states in Africa.

The much weaker Pan-Africanist Congress (PAC), split away from the ANC 20 years ago and formed its own terrorist cadre in 1963. Although for a number of years the PAC was alined with Red China, a number of South African militants—including the late

Steve Biko—have encouraged PAC to realine itself with ANC and accept Soviet backing.

Among the U.S. groups taking leadership roles in the SART campaign "in cooperation with" ANC, SWAPO, and PAC against the Springbok rugby tour are the most active support groups for revolutionary terrorism. The SART campaign endorsers include the following:

U.S. Peace Council—Which is a front organization of the Communist Party, U.S.A. serving as the American branch of the World Peace Council. The World Peace Council operates under the joint control of the International Department of the Central Committee of the Communist Party of the Soviet Union and the Soviet KGB. The WPC has two main functions: To influence public opinion and governmental policies in non-Communist countries along lines favorable to Soviet policy goals, and to provide logistical support to Soviet-supported terrorist groups.

The WPC has been campaigning in support of the ANC and SWAPO for many years, and both ANC and SWAPO leaders are members of the WPC presidium. The primary WPC tactic is to support and help coordinate economic warfare efforts against South Africa and Namibia.

American Committee on Africa—An influential U.S. support group for Soviet-backed revolutionary and terrorist groups in Africa which originated from meetings in London in 1951 between members of the Soviet-controlled ANC and a U.S. activist. ACOA has said that its initial organization was set up with the agreement of Walter Sislulu, then ANC's secretary-general who was a member of the South African Communist Party. ACOA now is beating its drum for the Marxist POLISARIO terrorists that are based in Algeria and attempting to overthrow the pro-Western government of Morocco.

Communist Workers Party—A violent group that fought New York City police during an attempt to crash into the Democratic National Convention in Madison Square Garden last summer and which was involved in an armed confrontation with neo-Nazi and Klan members in North Carolina.

Workers World Party—A violence-oriented Marxist-Leninist group with a long record for street fighting with police. The fraudulence of this group's claims of concern for human rights is seen in the fact that it looks for its international political leadership to regimes such as North Korea, Cuba, and the Soviet Union itself.

May 19th Communist Organization—A group formed by New York members of the terrorist Weather Underground Organization and its overt arm, the Prairie Fire Organizing Committee. It has two front groups also involved with the SART campaign—the John Brown Anti-Klan Committee and the "Material Aid Campaign for ZANU-PF"—the Zimbabwe African National Union/Patriotic Front Party.

Socialist Workers Party—A Trotskyite-Communist group closely alined with Cuba that is the U.S. section of the Fourth International. Recent trial testimony by radical SWP defectors has revealed that the SWP has provided funds for distribution to foreign terrorist groups by Fourth International leaders.

Washington Office on Africa—A lobbying group set up by the American Committee on Africa.

TransAfrica—The lobbying group headed by Randall Robinson which aims at organizing black Americans into activities that support the southern African Soviet-backed terrorists.

Mr. Speaker, those who support campaigns to isolate South Africa are not doing anything to support true progress and human rights. In fact, they are supporting, whether they know it or not, the foreign policy goals of the Soviet Union.

We are not going to be promoting peaceful change and true progress in a country like South Africa that has good relations and a friendly attitude toward America by taking aim at its rugby football players.

Therefore I strongly urge you to vote against any resolution that condemns the U.S. tour of the South African rugby football team.

□ 1250

Mr. BROOMFIELD. Mr. Speaker, I yield 3 minutes to the gentleman from Wisconsin (Mr. SENSENBRENNER).

Mr. SENSENBRENNER. Mr. Speaker, I rise in opposition to this resolution and, in doing so, I want to state that I oppose the doctrine of apartheid just as vigorously as the supporters of the resolution do.

South African domestic racial policies are a blight in this world and the sooner the South African Government can be persuaded to change those racial policies the better this world will be. But, at the same time, Congress should not be involved in the issue of whether the South African Springbok rugby team should appear in the United States. The invitation to the Springbok team was issued by a private nongovernmental organization. The U.S. Government is not involved in this invitation, nor is it involved in any way, shape, or form in sponsoring the tour of the Springboks.

The supporters of this resolution say that because the United States condemns the apartheid actions of the South African Government we should not have this national team here in the United States on a privately sponsored tour.

If we accept this hypothesis that a team sponsored by a foreign government, the policies of which we disagree with, should not come into the United States, then why should Congress not pass resolutions condemning the visits of Soviet and East German and Czechoslovakian and Chinese sporting teams that come here quite regularly?

No one in this Chamber approves of the domestic or international policies of those governments and yet we have not taken it upon ourselves to pass similar resolutions. It is hypocritical that we are silent on Communist oppressions during visits of their national teams, but we speak out very vigorously when a South African team comes to this country.

That is why this resolution should be defeated. We can continue to oppose apartheid the same as we have in the past. But I do not think that mixing in sports with congressional resolutions is a good idea.

Mr. RUDD. Mr. Speaker, will the gentleman yield?

Mr. SENSENBRENNER. I yield to the gentleman from Arizona.

Mr. RUDD. I thank the gentleman for yielding.

I want to commend the gentleman in pointing out the double standard being invoked by this resolution and just say that if this resolution is passed it will send a message to the world that this Congress has no respect for the sovereignty of another nation who has been friendly to this country.

Mr. GRAY. Mr. Speaker, will the gentleman yield?

Mr. SENSENBRENNER. I yield to the gentleman from Pennsylvania.

Mr. GRAY. I thank the gentleman for yielding.

I would like to point out that just a little over 1 year ago, on January 24, 1980, this distinguished body did pass such a resolution particularly aimed at the Soviets—it was 386 to 12—that we should boycott the 1980 Olympics. So there is a precedent that has been set and certainly I would support any resolution, one at a time, based on a judgment, but tomorrow in Baden Baden, West Germany, the International Olympic Committee will be discussing whether there will be a boycott here in America.

The SPEAKER pro tempore. The time of the gentleman from Wisconsin (Mr. SENSENBRENNER) has expired.

Mr. BROOMFIELD. Mr. Speaker, I yield 1 additional minute to the gentleman from Wisconsin.

Mr. SENSENBRENNER. Mr. Speaker, there is a very big difference between this resolution and the resolution relating to the Olympic boycott that was passed by the House last year.

That difference is this: The Olympic boycott resolution related to our national Olympic team not participating in the Moscow Summer Olympics.

That was something that did involve the U.S. Government because it was our national team.

Here we are talking about people coming to the United States, the home of the free; the place where we have welcomed people from all countries in the world in the past with our immigration policies, and there certainly is a vast difference in where our team goes and what happens when other teams come into the United States.

Mr. GRAY. Mr. Speaker, if the gentleman will yield further, I think the gentleman missed an earlier statement that I made. Our Olympic team is a national team, supported privately by the donations of millions of Americans, who go and represent us, but this team from South Africa is not such a team. It is supported by the Government, selected by a quasi-governmental body; and so, I do not think that that analogy holds water.

I think we are clearly talking about where we stand on our interests in 1984 in the Olympics and also where we stand on apartheid.

Mr. ZABLOCKI. Mr. Speaker, I yield 3 minutes to the gentleman from Maryland (Mr. MITCHELL).

Mr. MITCHELL of Maryland. Mr. Speaker, I rise in support of House Concurrent Resolution 183.

There is overwhelming evidence to point out that the Government of South Africa acted in collusion to murder Stephen Biko, who was a black freedom fighter in South Africa.

We saw recently where the Government of South Africa moved to wipe out the black squatters in Cape Town, forcibly removing them.

These were the women and children who merely wanted to be near their husbands so that they could have a family.

The gentleman from Pennsylvania (Mr. GRAY) has alluded to the indignity of the pass-identity cards.

Last year, Mr. Botha made a statement to South Africa saying that all South Africans have to learn to live together. He said we have got to start diminishing the barriers that separate us out on the lines of color.

□ 1300

Since that time the right wing has taken over and we do not see any diminishing of the apartheid system; rather, we see it becoming even more stringent and more vicious. Why?

I think that it is the posture of America right now which emboldens Mr. Botha to become more stringent. I think America's vote in the Security Council, where it failed to vote against South Africa's invasion of Angola, encourages apartheid,

I think that all the statements that are appearing in the press saying that the Reagan administration is clearly tilting toward South Africa encourages and emboldens apartheid.

I think Mr. Chester Crocker of our State Department has made conflicting statements. On the one hand he has said that America would seek a more balanced policy in South Africa.

On the other hand, before the committee on which the gentleman from Pennsylvania (Mr. GRAY) serves, last week he said that such a resolution, as is before us today, he felt would be an expression by the Congress that would help clarify that the Government is not endorsing the Springbok tour.

You know, my colleagues in this House, it is one thing for each of us to stand up as individuals and say we do not like apartheid; it is wrong; it rubs against the grain; and it is the kind of thing that all of us abhor. I commend you for standing and saying that; but I cannot commend you for merely standing and saying that when you have the opportunity to do something about it.

I would like to paraphrase the statement that we have heard so many times. "The only thing required for the triumph of evil is that good men do nothing."

Our statements here do not mean much, but when we have an opportunity to do something, merely to indicate that it is the sense of this House that we are against apartheid, then I think if we fail to do it, we are lesser as a human being and lesser as a legislative body.

Mr. BROOMFIELD. Mr. Speaker, I yield 3 minutes to the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Speaker, this resolution is bothersome to me and I suspect that it is bothersome to many other Members of Congress as well. I doubt there are any votes in this body in favor of apartheid and I suspect that none of us wants to be described as being other than strongly opposed to it. I know that is the case for me; but the resolution opposes apartheid in a "whereas" clause and the description of the resolution is that the Congress does not want the rugby team of South Africa to play in the United States. The resolve clause is quite clear. That is what it says, too.

I am not for a suppression of rights in South Africa nor the U.S.S.R. nor in the dozens of other countries where rights are suppressed, and we know those countries well; but I and this body have not been asked to vote against cultural exchanges or athletic exchanges with the U.S.S.R. or with these other countries.

I would vote for a resolution against apartheid any day and all day. It is an abhorrent policy; but I do not oppose cultural and athletic exchanges between the United States and other countries with whom we have normal relations. I frankly do not know where to start drawing the line in opposing these kinds of cultural and athletic relations.

As a matter of fact, we frequently get defections from some of these relations, and maybe that will occur in this instance.

Actually, I believe the best way to change the apartheid policy is through continuing pressure and persuasion from the United States. This resolution is a resolution of confrontation. It may not mean very much, but it is likely to be counter productive to the goal of all of us, the primary goal, which is effecting change in the apartheid policy of South Africa.

For that reason, Mr. Speaker, even though I oppose the policy of apartheid very strongly, I am going to have to vote against the resolution.

Mr. BROOMFIELD. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. STRATTON).

Mr. STRATTON. Mr. Speaker, I ask unanimous consent that at the conclusion of the 2 minutes which the gentleman from Michigan kindly yielded to me, the 3 minutes that the gentleman from Wisconsin has yielded me may thereupon emerge so that I have a total of 5 minutes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Does the gentleman from Wisconsin yield 3 minutes to the gentleman from New York?

Mr. ZABLOCKI. Mr. Speaker, I will yield to the gentleman after his 2 minutes that he has received from the gentleman from Michigan will expire. I will withhold until the gentleman needs additional time; so I will oppose the unanimous-consent request.

The SPEAKER pro tempore. Objection is heard. The gentleman from New York is recognized at this point for 2 minutes.

PARLIAMENTARY INQUIRY

Mr. STRATTON. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. STRATTON. Mr. Speaker, do I understand that the gentleman from Wisconsin is declining to yield me the 3 minutes as originally promised?

The SPEAKER pro tempore. The Chair will state that the gentleman from New York made a unanimous consent request, to which the gentleman from Wisconsin has objected.

Therefore, at this time, the gentleman from New York is recognized for 2 minutes.

Mr. STRATTON. Mr. Speaker, perhaps the parliamentary inquiry should be addressed, because I did not understand the gentleman from Wisconsin as to whether or not he indicated I was still on the list for 3 minutes or he had taken me off or was going to take me off if he did not like what I said in the first 2 minutes.

The SPEAKER pro tempore. The Chair will state that it is the under-

standing of the Chair of the parliamentary situation at this point that the gentleman from New York has been yielded 2 minutes out of the time allotted to the gentleman from Michigan (Mr. BROOMFIELD); that in addition to that, the gentleman from New York requested that he be recognized at this time for 3 additional minutes or for a consecutive period of 5 minutes and that the subsequent 3 minutes should come from that time allotted to the gentleman from Wisconsin (Mr. ZABLOCKI), to which unanimous consent request the gentleman from Wisconsin objected.

Mr. STRATTON. Mr. Speaker, a further parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. STRATTON. Mr. Speaker, the gentleman from Wisconsin had allocated me 3 minutes.

Mr. ZABLOCKI. Not as yet.

Mr. STRATTON. I wanted to make sure that I could talk for 2 minutes on the time of the gentleman from Michigan (Mr. BROOMFIELD) and not have to sit down and then get up a half an hour later and add the additional 3 minutes.

I was not clear whether the gentleman from Wisconsin indicated that if I behaved myself during the first 2 minutes he would be happy to give me the 3 minutes that the gentleman had previously promised me.

The SPEAKER pro tempore. Does the gentleman from New York yield to the gentleman from Wisconsin?

Mr. STRATTON. Under the parliamentary inquiry, I will yield to my good friend, the gentleman from Wisconsin, yes.

Mr. ZABLOCKI. Mr. Speaker, the gentleman from Wisconsin did not indicate any of the types of provisions or conditions that the gentleman from New York states. When the gentleman asked for time, he requested 3 minutes and in listing the time there were other Members here that wanted to speak. It was my understanding it would be a total of 3 minutes that the gentleman wanted. I have shortchanged other Members on our side who wanted 2 minutes to 1 minute.

Therefore, I will take that into consideration after the gentleman finishes his 2 minutes.

The SPEAKER pro tempore. The Chair would suggest that the gentleman from New York might desire not to have additional colloquies come from his time and might desire at this point to consume what remains of his 2 minutes.

Mr. STRATTON. Mr. Speaker, let me begin by saying, as other speakers have said, that I, too, abhor apartheid. I think my record on civil rights over 23 years in this House demonstrates that this statement is not being put on just for the sake of this particular resolution.

I just happen to feel that this resolution, as other speakers have also indicated, is not the best way to try to change the government policy of South Africa.

□ 1310

I have perhaps a unique opportunity for speaking on this question in this body today because the Springboks are scheduled to play in my city of Albany, N.Y., on tomorrow. The mayor of the city of Albany allowed them to play in the city's Bleeker Stadium although he had had opposition to that decision from virtually every religious leader and every leader in the black community. But Mayor Corning made his decision because, he said, the right to assemble is guaranteed by the Constitution. And when Mayor Bradley of Los Angeles brought to his attention the problem of the 1984 Olympics, the mayor of Albany said, "Which is more important, a Soviet threat or the Constitution of the United States that gives the people the right to assemble?"

And then, a few days later, the Governor of the State of New York, our former beloved colleague, Hugh Carey, decided that because of the various threats of violence being posed by some of these opposition groups that the gentleman from Georgia (Mr. MCDONALD) has mentioned, the Governor overruled the mayor and directed that the game should be canceled in Albany. This morning the ERU, the Eastern Rugby Union, went into Federal Court in Albany to get an injunction against Governor Carey's ban on the ground that the Governor's order was in violation of the first amendment to the Constitution. The hearing was held, and the judge is expected to rule this afternoon.

I trust that I may be able to complete my statement, with the help of whatever additional time the gentleman from Wisconsin has available to yield to me.

Mr. ZABLOCKI. Mr. Speaker, I yield 1 additional minute to the gentleman from New York (Mr. STRATTON) not because of what he said but in fairness to the other Members.

Mr. STRATTON. I thank the gentleman from Wisconsin.

I think the constitutional provision is the one that is really binding in this case, as the mayor of Albany has wisely and courageously demonstrated. We extend the provisions of our Constitution to aliens who happen to be in the country, as well as to our own citizens. And it would be a sad day for the Constitution if threats of violence or the cost of maintaining law and order were permitted to suspend the operation of the first amendment.

I believe as has already been mentioned that the effectiveness of utilizing sport as a means of establishing better relations with other countries has been clearly demonstrated. It was the ping pong game out at Cole Field House at the University of Maryland that give us the breakthrough to Communist China. We abhor much that the Communist Chinese stand for, but we were willing to play ping pong with them. And when they beat us, we decided perhaps we might do better to recognize them and find out how to play ping pong better. And that decision has been widely hailed as a great step forward.

Equally, we oppose most virulently the philosophy and the conduct of the Soviet Union. But that did not stop us from sending a swimming team over there just about 3 weeks ago; and the American swimmers beat the pants off of the Soviet Union.

Mr. Speaker, I think the Albany players will beat the pants off the Springboks when they play them tomorrow; and that I believe is the best way to show how our system is better than theirs.

I oppose the resolution of the gentleman from Pennsylvania (Mr. GRAY).

Mr. BROOMFIELD. Mr. Speaker, I yield 1 minute to the gentleman from Illinois (Mr. FINDLEY), a member of the Foreign Affairs Committee.

Mr. FINDLEY. Mr. Speaker, this is an issue that is caught up in emotion. I think a year from now we might look at the issue somewhat differently than we do today, and I would ask my colleagues to take the long view and recognize that there is some advantage to having a team like the one from South Africa come here, confront public opinion, recognize the protests that have been mounted, sense the feeling against apartheid that is so prevalent in this country. For us to reject the team is to deny its members the experience of that protest movement.

Now, I deplore apartheid as much as any Member of this body, I am sure. My record in support of civil rights measures, I believe, is as consistent as any Member of this body. I supported all of the civil rights legislation during the sixties, and I am proud of that record. And I hope the day will soon come when South Africa will abolish apartheid, but we have standards to recognize here, and one of the standards is the free exchange of ideas, the free movement of people across national borders. This includes sports groups. I therefore, oppose the resolution.

Mr. ZABLOCKI. Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. DYMALLY).

Mr. DYMALLY. I thank the chairman of the Foreign Affairs Committee.

Mr. Speaker, I wish to go on record expressing in the strongest terms my opposition to the South African rugby team's tour of the United States.

Whether we like it or not, politics, in this instance, cannot be separated from athletics. To countenance the appearance of a South African team in the United States would be one more symbolic expression of approval of South African apartheid.

We are aware of the strong demonstration protest in our Nation of this team's appearance. Out of respect for the sentiments of our own citizens who rightly oppose South African policies, and out of compassion for the victims of apartheid in South Africa, I urge this Congress to make known its opposition to the tour.

The Soviet Union, various European nations, and several Third World and nonalined countries are threatening to boycott the 1984 Olympics, to be held in Los Angeles, because of this tour. We should take heed, not because of any perceived threat, but because the position of these nations is entirely logical and justifiable.

Mr. McDONALD. Mr. Speaker, will the gentleman yield on that point?

Mr. DYMALLY. I yield to the gentleman from Georgia.

Mr. McDONALD. Does the gentleman not agree that perhaps the Olympics have already been highly politicized, when we have denied the Chinese Nationalist team from Taiwan the opportunity to represent their country?

Mr. DYMALLY. Well, I believe it was when the gentleman from Georgia participated in a resolution to boycott the Olympics last year.

Mr. McDONALD. As I recall, at that time, that was an entirely separate issue. However, the drive against the Nationalist Chinese certainly has thrown politics into the Olympics, and we have seen teams coming from the Eastern bloc that really have not been amateur teams at all, but really have been professional teams backed by the Soviet system.

Does the gentleman not agree that that is the case?

Mr. DYMALLY. Well, we would be fools not to conclude that politics is part of the Olympics. In fact, this body here, this august body, participated in that political endeavor when they passed a resolution by an overwhelming number of Members in support of boycotting the Olympics.

Mr. McDONALD. Mr. Speaker, will the gentleman yield once further?

Mr. DYMALLY. May I conclude, Mr. Speaker, in one-half minute?

Only last year, the United States boycotted the Olympics in the Soviet Union because of acts of oppression against Afghanistan. Let us not be fools and think no one will notice our inconsistency and hypocrisy. I would hope our country is secure enough, and big enough in heart and spirit, to stand up for what is morally correct and to take a position on this vitally important human rights issue.

Mr. BROOMFIELD. Mr. Speaker, I yield 1 minute to the gentleman from Missouri (Mr. COLEMAN).

Mr. COLEMAN. Mr. Speaker, I would like to inquire of the sponsor of the resolution, the gentleman from Pennsylvania. I see several references to the Olympic Committee and Olympic sports, and so forth. I wanted to clarify this.

It is my understanding that rugby itself is not an Olympic sport; is that correct?

Mr. GRAY. The gentleman is absolutely correct, but the head of the Olympic Committee, Bill Simon, U.S. Olympic Committee, has urgently pleaded that they not play here. Essentially what we do in this resolution, we do not violate their constitutional rights.

Mr. COLEMAN. A brief question. It is my understanding that at least one black player is on this team; is that correct? Is that your understanding?

Mr. GRAY. No. There is not one black player on the team. There is what is called one colored player. You see, in South Africa they have three categories: Afrikaaners, who are white; those people of mixed parentage—I guess I would fall into that category—who are mulattoes, and they are called colored; and then they have blacks, who represent the darker hues. The person on the team is a nonwhite who is colored.

Mr. COLEMAN. The other comment that I might have, and maybe the gentleman is aware that there have been four other South African rugby teams that have toured the United States in the last year, one of which was, I understand, all black. There was no mention or discussion of that, and I wonder if we are being totally fair in the analyzation of what your resolution does in reference to what we talked about here today.

Mr. GRAY. Those teams were not the national team. This is the national team sponsored by the Government.

(By unanimous consent, Mr. COLEMAN was allowed to proceed for 1 additional minute.)

Mr. GRAY. May I answer your question?

You mentioned the fact there were other South African rugby teams that visited the United States. Let me mention one of them played outside of my own home city of Philadelphia. None of those teams were the national rugby team of South Africa, put together by the National Federation.

Mr. COLEMAN. I see. I thank the gentleman. I think it does point up that there is a little bit more than meets the eye here.

I would join my colleagues who analyzed the resolution and say it is not a resolution against apartheid. That is not what we are saying. We are simply saying keep a rugby team out of the United States.

□ 1320

If the gentleman would like to offer a resolution against apartheid, I would imagine he would get unanimous support from this body.

Mr. GRAY. If the gentleman will yield further, let me just point out to the gentleman that by voting for this resolution he does have a chance to make his statement on apartheid. It is easy to say one is against apartheid, but duck the vote.

The second point I would like to make is that this matter is one that gets to the heart of our interest in sports.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. ZABLOCKI. Mr. Speaker, I have only one remaining speaker.

The SPEAKER pro tempore. The gentleman from Michigan (Mr. BROOMFIELD) has 1 minute remaining, and the gentleman from Wisconsin (Mr. ZABLOCKI) has 2 minutes remaining.

The gentleman from Wisconsin has declared that he has only one remaining speaker to close debate.

Mr. BROOMFIELD. Mr. Speaker, I desire to reserve that one until debate has concluded.

The SPEAKER pro tempore. The gentleman from Wisconsin has the right to close debate.

Mr. BROOMFIELD. Mr. Speaker, in view of that, I yield back the balance of my time.

Mr. ZABLOCKI. Mr. Speaker, I yield the remaining 2 minutes to the gentleman from Iowa (Mr. BEDELL).

Mr. BEDELL. Mr. Speaker, I rise in strong support of this resolution, and I want to commend the committee for bringing it forward.

My colleague from Maryland has just referred to the brutal eviction of Nyangan squatters.

I want to tell the Members that I was at the squatters' site watching as the white South African police first denied food to the squatters, then tore down and burned the wooden shelters donated only days before by church and concerned citizens groups. I wish all of the Members of Congress could have been there and seen that human tragedy. This is the third time I have been in there. In my opinion, the Government of South Africa is becoming more repressive all the time.

But, the issue is not a humanitarian issue. The issue is, what type of a government we are going to have and what we are going to stand for as a nation. I have to tell the Members that even the white leaders of South Africa told us that their system of government could not continue. In this case, I submit that we are getting on the wrong side again, as we have so frequently done in the past.

We are talking to ourselves here, but the fact is, we are dealing in percep-

tion. We are dealing in perception by the rest of the world. If we fail to pass this resolution, it is very clear to me that we are not opposing apartheid to the extent that we indeed could. We may think we are, but what matters is what the rest of the world thinks. I can tell the Members that the South African Government thinks we are tilting toward them in tacitly accepting their policy of apartheid.

I hope we will realize what will happen if we restrict ourselves to platitudes saying that we are opposed to apartheid, opposed to apartheid, but that this is not the way to show our opposition. What the world will say is that indeed if we do not oppose apartheid, if we do not pass this resolution, their impression will be that we do not oppose apartheid as strongly as we should.

Mr. GRAY. Mr. Speaker, will the gentleman yield?

Mr. BEDELL. I yield to the gentleman from Pennsylvania.

Mr. GRAY. Mr. Speaker, I want to commend the gentleman. He has hit the nail right on the head.

Second, what this resolution says is, they are not going to be expelled. It simply says that the Federal Government and this Congress does not support it.

● Mr. BINGHAM. Mr. Speaker, I rise in strong support of House Concurrent Resolution 183, which would express the sense of Congress that the rugby team of South Africa should not play rugby in the United States. As a Member of Congress who has traveled extensively throughout the African continent, I can testify to the overriding importance of opposition to South Africa and its system of apartheid in all the states of black Africa. Any action which appears to aline our country with South Africa is abhorred by the other African states who are determined to bring an end to this system of democracy for whites and colonialism for blacks. For many years the extensive involvement of U.S. corporations in the economy of South Africa has cast a cloud over our foreign policy in Africa, and now the Reagan administration's actions in the U.N. which seem to condone military action by South Africa against its neighboring states have made our problems even worse. If we add to these burdens a nonchalant attitude toward South African sports teams which want to compete in this country, despite the fact that they are banned from participating in the Olympics, we will be delivering our chances for a successful foreign policy in Africa, both south and north, a crushing blow. We will also be handing to the Soviet Union an excuse to argue that the Olympics, now scheduled to be held in Los Angeles in 1984, should be transferred to another location outside the United States. This would be a terrible price to pay for having a few rugby games with a team from a country that is an international pariah state.

I urge my colleagues to give the resolution before us today their strong support, so that this House can send a clear message to any group which might be considering an invitation to this team to compete.●

● Mr. DE LUGO. Mr. Speaker, I would like to take this opportunity to express my support for House Concurrent Resolution 183 which expresses the sense of the Congress that the Springbok National Rugby Team should not play rugby in the United States.

The game of rugby is an exacting sport which tests the physical and mental mettle of an athlete like no other sport. The members of the Springbok team have successfully met those tests to the point where they are probably one of the finest teams in the world today.

Unfortunately, however, these athletes come from the Republic of South Africa—a nation which has tested the physical and mental mettle of its majority black population for many years. Whether we like it or not, the team, which is totally white, has become a symbol of their nation's white, repressive regime.

To all freedom-loving people around the world, the Government of South Africa conjures up visions of repression, inequality and, worst of all, apartheid. Apartheid, as we all know by now, is the official policy of racial segregation endorsed by the Republic of South Africa with a view to promoting and maintaining white ascendancy.

As an elected official, I can assure you that the people of the Virgin Islands find the policies of South Africa repulsive. As a human being, I personally find apartheid reprehensible. It is a policy that has no place in a civilized society.

Passage of this resolution will send a signal to the administration, which has so far refused to condemn apartheid, that the Congress has a conscience on such matters and refuses to stand by complacently while the injustices continue in South Africa.

● Mr. DIXON. Mr. Speaker, I rise in strong support of House Concurrent Resolution 183, and commend the chairman of the Africa Subcommittee (Mr. WOLPE) and the chairman of the Black Caucus foreign policy brain trust (Mr. GRAY) for bringing this timely matter before the House.

As a black representative from Los Angeles, site of the 1984 Olympic games, I can personally attest to the uncertainty and apprehension the South African rugby team's tour has created within both the African and Olympic communities. Yesterday, the president of the Nigerian Sports Council went so far as to urge a "Third World Alternative Olympics" as a protest against the decision to allow the Springboks to play in the United States. While I am hopeful that cooler heads will prevail, we cannot ignore the legitimate concerns of the African nations, who quite rightly view the granting of entry visas as indication of American insensitivity to the evils of apartheid. And it is clear that unless we nip this misguided tour in the bud, we risk an African boycott of the 1984 games, as well as other forms of international condemnation. Already the Soviet Union, in retaliation for the U.S. boycott of the Moscow Olympics, has urged the transfer of the 1984 games, a prospect, however unlikely, which has caused the International Olympic Committee, the U.S. Olympic Committee, and the Los Angeles Olympic Organizing Committee to state their unequivocal opposition to the Springbok tour.

But we should not oppose this tour because of Soviet pressure, because of African pressure, or because of Olympic pressure. We should oppose it as Americans because we know it is wrong. It is wrong to allow this team, as an agent of a repugnant and repressive regime, to play here as guests of our country. This cannot be a "goodwill" tour, for there can be no good will between a nation such as ours, which values freedom and human dignity, and the racist Government of South Africa.

Mr. Speaker, all over this country, and particularly in those towns where the Springboks have been scheduled to play, Americans have rightly and righteously let them know that the representatives of any government which consigns the majority of its people to third-class citizenship because of the color of their skin, are not welcome in this country. Sports are a means of furthering human understanding, not impeding it; of uplifting the human spirit, not polluting it. To allow this tour to continue would be to make a mockery of everything that sports—and the Olympic movement—are all about.

In urging support for this resolution, I wish to enclose the text of a telegram I received from Mayor Tom Bradley of Los Angeles, indicating his concern and support for the Foreign Affairs' Committee action:

LOS ANGELES, CALIF.,
*September 17, 1981.*

Congressman JULIAN DIXON,
*U.S. Congress, Cannon House Office Building, Washington, D.C.*

I am delighted to know that the Subcommittee on Africa will introduce a resolution on the floor of Congress Thursday September 17 urging that the South African rugby team not play in the United States.

I am convinced beyond any doubt that the action proposed by the Subcommittee on Africa is clearly within the best interest of the United States. I take great pleasure in joining many other public elected officials

from across the country in supporting this action by the Subcommittee on Africa.

TOM BRADLEY, *Mayor.*●

● Mr. CONYERS. Mr. Speaker, I want to add my support to those who think it is not in the best interest of the United States to have the South African rugby team play in the United States. It should be appreciated that this is a national team of the country of South Africa, the nation that practices the concept of separate development for its people and relegates the majority of them to a life that is not fitting for animals. The team is a representation of the nation it comes from. Its very composition is an indication of the type of racialism that is practiced in South Africa. How can we close our eyes and say that this is just sports and has nothing to do with the political and economic systems of South Africa? This is begging the questions.

There are many reasons that are offered as justifications for allowing the rugby team to play in this country, and there are, I believe, many more rational ones for denying the team the right to play. The most overused justification for allowing them to play is that the games are pure sport and sports and politics should not mix. This is the position taken by the U.S. Department of State in issuing the members of the team permits to enter this country. What a change of mind. Did not this Nation during the 1980 Olympics, decide to not allow American athletes to participate because of the situation in Afghanistan. Surely you can appreciate that we were mixing politics and sports. The President of the United States supported this decision.

Did not this Government send the professional boxer, Muhammad Ali, to various African nations to get their support for the U.S. position on the boycott of the 1980 Olympics? Was this not the essence of mixing politics and sports? In boycotting the Olympics were we not placing limitations on the rights of America's young to participate in their selected sports? There are those who would admit that in the case of the Olympic boycott the enemy was clear, but in the instance of the rugby team the enemy is not so clear.

There are those who argue that the best way to assist in changing the situation in southern Africa is to bring South Africa into the Western fold and give it an opportunity to understand the wrong of its ways. The play of the rugby team in the United States is used as an indication of how this process can work. What is not understood is that the rulers of South Africa have always been in the mainstream of Western society and culture and have still not understood the wrongs of their ways. I do not expect them to start understanding now.

You will notice that I have not mentioned those in this country who would say that the team and the system of apartheid are representations of the best way for blacks and whites to develop, all things considered. I hope we can simply dismiss these people as racist and out of step with the civilized and developed human mind.

I think we can dismiss claims that sports and politics should not be mixed, that the play of the team will assist in changing the apartheid systems in South Africa and Namibia, and that the current system in South Africa, represented by the rugby team, is the best one for the conditions that exist in the region. As we know, there are very compelling reasons for not allowing this team to play in this country. Consider the following:

First, the team represents the most repressive regime in the world that denies political participation to the vast majority of its people.

Second, if the team is allowed to play in this country, the world will interpret the act as an endorsement of the apartheid system in South Africa.

Third, there is a real possibility that if the team plays in the United States, there will be violence and destruction of property.

Fourth, the play of the rugby team in the United States will be correctly understood as an indication of the shift in U.S. policy toward the apartheid practicing regime in South Africa. This act will be taken in the context of the administration's position on constructive engagement with South Africa and support for its raids into the sovereign nation of Angola.

Fifth, the Springboks were invited to play in the United States by the Eastern Rugby Union after the union accepted a $25,000 contribution from a well-known conduit of South African Government funds. Is there not politics in this arrangement?

Sixth, the heart of the issue is not free speech but racial discrimination. It is because of South Africa's legalized racism in sport and society that the team should be refused permission to play in the United States.

Seventh, the congressional delegation that just returned from South Africa did indicate that the system of apartheid is getting more repressive. We should do nothing to encourage this repression.

In light of these considerations, I would urge my colleagues in the House of Representatives to support this resolution which expresses the sense of the Congress that the national rugby team of South Africa should not play in the United States.

Much of the difficulty we now face could have been avoided if the Reagan administration had been farsighted enough to know that it should not have granted entry permits to the team. It is the obligation of the administration to take action to deny entry permits to persons that might pose danger to the national security of the United States. It is ironic that the administration did recently revoke the entry permits of several Cuban officials who were scheduled to participate with members of this body in a conference on Cuban/United States relations in the 1980's. We regularly deny permission to members of the Palestine Liberation Organization to enter the United States because of their politics. Why have we granted the members of this team permission to enter? What is the substantive difference?

We all are aware that United States/South African relations have reached a crucial point where every act is important. The play of the rugby team is important. Freedom-loving Americans will not sit by and allow people to play ball games while oppression and brutality are visited on the majority of people in South Africa. It is our responsibility to oppose any activity that will give any degree of acceptance to the system of apartheid.

I ask that you show to the world that you do not support the system of apartheid by voting "yea" on the resolution before you.●

● Mr. RANGEL. Mr. Speaker, I strongly oppose the current tour of the United States by the South African rugby team, Springboks, and I urge all Americans to boycott this tour. The South African Government continues its racist policy of apartheid and uses sophisticated methods of oppression, intimidation, and coercion to discriminate against black Africans. We as Americans must not sanction the participation of South Africa in international events.

The Springboks tour is essentially a public relations move financed by the South African Government and pro-apartheid South African businessmen to gain favorable public opinion in the United States. In the past, those South African businessmen have been involved in efforts to buy influence abroad for the South African Government. As Americans, we must stand up against the dehumanizing racist policy of apartheid and resist succumbing to this latest attempt by the South African Government to gain acceptance by the nations who find their policies alien to the concept of freedom, justice, and liberty.

By boycotting South Africa and its official representatives, including the Springboks rugby team, the United States can clearly demonstrate to South Africa and to the world our intolerance of apartheid. A firm American policy against apartheid will strengthen our position among African nations by showing our commitment to global human rights. We

should deny the South African Government the privilege of participating in sports events in the free world and tell their Springboks rugby team to stay home.

The South African regime continues its dissident crackdown, denying the majority of people their civil rights, displacing thousands, occupying Namibia illegally and conducting military operations against Angola. These events make it crystal clear that the South African Government has no intention of changing its apartheid policy and its aggressive actions. Through a total boycott of South Africa, we as Americans can take all peaceful measures to pressure the South African Government toward acceptance of racial equality. Only with this acceptance should we accept South Africa as a legitimate member of the international community. Until they alter their abhorrent racist policies, they should be ostracized by the world community of nations.●

● Mr. BEDELL. Mr. Speaker, I urge my colleagues to adopt House Concurrent Resolution 183, opposing the current visit by South Africa's Sprinkbok National Rugby Team, in the strongest possible terms.

Few actions by this body will so clearly indicate the humanitarian values and principles for which our Nation stands. The eyes of the world will be on us today as we decide whether to rebuff the South African regime or tacitly accept their racist policy of apartheid. The administration, I fear, has already begun tilting toward a policy of greater acceptance. We in the Congress must use this and every opportunity to make clear that a retreat from the condemnation of apartheid will not be tolerated.

I am confident that few Members would hesitate to support this resolution if they could have been with me and several colleagues last month at the Crossroads squatter camp near Cape Town. Prior to our visit, 400 black South Africans were huddled under plastic sheets to protect themselves from a rain storm. The morning before we arrived, in a predawn raid, the police tore down nearly 60 of these flimsy shelters, leaving the squatters exposed and banning our entrance into the area. I have been to South Africa three times, but such brutality and inhumanity continues to be shocking.

By these repressive actions, the South African Government hopes to gain several objectives. First and foremost, they believe such forced removals will denationalize the blacks, stripping them of any claim to political rights within South Africa. The heart of apartheid, after all, is dispossession and deliberate impoverishment. By removing blacks to so-called "tribal homelands," the white minority is convinced that they will not have to share political power within the 86 percent territory claimed for whites only. By preventing the basic economic security of food, housing, and jobs, they believe that blacks will be unable to organize for political power.

These hopes can never be permanent. Even as we visited, prominent white South Africans conceded to us that their system of government could not continue. I submit then that once again we are joining the wrong side morally and losing side politically. For diplomacy is often perception, and we are dealing here in perception by the rest of the world. If we fail to pass this resolution, few nations will listen to our platitudes of opposition to apartheid. The reality instead will be a loss of diplomatic standing for not having opposed apartheid as strongly as we should.●

● Mr. FIELDS. Mr. Speaker, I rise in opposition to House Concurrent Resolution 183, expressing the sense of Congress that the Springbok National Rugby Team of South Africa should not play in the United States.

I acknowledge that the policy of apartheid is reprehensible and that the United States should not condone the racial practices of the South African Government. However, I do not believe it is appropriate for the House of Representatives to express the sense of Congress prohibiting the South African rugby team from playing exhibition games in the United States.

Traditionally, international competition in sports has been a nonpolitical concern. Every nation, regardless of political ideology, has been allowed to compete in the United States. If the Congress sets this unwarranted precedent, in the form of a concurrent resolution, then, by application, we should prohibit the Soviet Union from participating in any future competitive sports activity. The Soviet Union has been relentless in its pursuit to spread world communism. The blatant oppression of Soviet Jews, the insurgency in Central America and the invasion and genocide in Afghanistan are clear examples of the Soviet Union's determination to subjugate the world.

While I support and firmly believe in the right to speak freely, I abhor the blackmail tactics some organizations are practicing. The threat of violence should not force cancellation of the rugby matches. These threats resurrect the basic insecurity and hostility that characterized the mass rioting of the 1960's.

The importance of free speech and the ability to demonstrate in a civil and legal manner cannot be overemphasized. Instead of prohibiting the South Africans from playing rugby in the United States, we should regard this visit as a prime opportunity to enlighten the South African rugby team, and the country it represents, of the value the United States places on a free and pluralistic society.●

● Mr. GOODLING. Mr. Speaker, I rise in support of the passage of House Concurrent Resolution 183. Whether we think it is the right resolution, whether it should have been brought up at this time, is not a question that we are faced with now. As I said in subcommittee and full committee, if it comes to the floor we want to make sure that it passes, for if it does not, we are going to make it very difficult, in my estimation, for the administration in working with some of the other countries to bring about a settlement in Namibia that is necessary and should have taken place a long time ago.

It seems to me that if we do not pass this resolution now that it has gotten to the floor, we are not helping the administration because they will need the help of South Africa to bring about this change in Namibia. If we do not pass the resolution, now that it is here before us, we are then sending a message to South Africa not to worry and not to support and not to become involved in bringing about a peaceful resolution to the Namibian question.●

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Wisconsin (Mr. ZABLOCKI) that the House suspend the rules and agree to the concurrent resolution (H. Con. Res. 183).

The question was taken.

Mr. ZABLOCKI. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed until tomorrow.

## GENERAL LEAVE

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the concurrent resolution just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

## VETERANS' COMPENSATION AMENDMENTS OF 1981

Mr. MONTGOMERY. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3995) to amend title 38, United States Code, to provide a cost-of-living increase in the rates of disability compensation for disabled veterans and in the rates of dependency

and indemnity compensation for survivors of disabled veterans, and for other purposes.

The Clerk read as follows:

H.R. 3995

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That (a) this Act may be cited as the "Veterans' Compensation Amendments of 1981".

(b) Whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of title 38, United States Code.

## TITLE I—VETERANS' DISABILITY COMPENSATION BENEFITS

### RATES OF DISABILITY COMPENSATION

SEC. 101. (a) Section 314 is amended—

(1) by striking out "$54" in subsection (a) and inserting in lieu thereof "$58";

(2) by striking out "$99" in subsection (b) and inserting in lieu thereof "$109";

(3) by striking out "$150" in subsection (c) and inserting in lieu thereof "$165";

(4) by striking out "$206" in subsection (d) and inserting in lieu thereof "$229";

(5) by striking out "$291" in subsection (e) and inserting in lieu thereof "$325";

(6) by striking out "$367" in subsection (f) and inserting in lieu thereof "$415";

(7) by striking out "$434" in subsection (g) and inserting in lieu thereof "$505";

(8) by striking out "$503" in subsection (h) and inserting in lieu thereof "$595";

(9) by striking out "$566" in subsection (i) and inserting in lieu thereof "$680";

(10) by striking out "$1,016" in subsection (j) and inserting in lieu thereof "$1,131";

(11) by striking out "$1,262" and "$1,768" in subsection (k) and inserting in lieu thereof "$1,405", and "$1,968", respectively;

(12) by striking out "$1,262" in subsection (l) and inserting in lieu thereof "$1,405";

(13) by striking out "$1,391" in subsection (m) and inserting in lieu thereof "$1,548";

(14) by striking out "$1,581" in subsection (n) and inserting in lieu thereof "$1,760";

(15) by striking out "$1,768" each place it appears in subsections (o) and (p) and inserting in lieu thereof "$1,968";

(16) by striking out "$759" and "$1,130" in subsection (r) and inserting in lieu thereof "$845" and "$1,258", respectively;

(17) by striking out "$1,137" in subsection (s) and inserting in lieu thereof "$1,265"; and

(18) by striking out "$219" in subsection (t) and inserting in lieu thereof "$244";

(b) The Administrator of Veterans' Affairs may adjust administratively, consistent with the increases authorized by this section, the rates of disability compensation payable to persons within the purview of section 10 of Public Law 85-857 who are not in receipt of compensation payable pursuant to chapter 11 of title 38, United States Code.

### RATES OF ADDITIONAL COMPENSATION FOR DEPENDENTS

SEC. 102. Section 315(1) is amended—

(1) by striking out "$62" in clause (A) and inserting in lieu thereof "$69";

(2) by striking out "$104" in clause (B) and inserting in lieu thereof "$116";

(3) by striking out "$138" in clause (C) and inserting in lieu thereof "$154";

(4) by striking out "$173" and "$34" in clause (D) and inserting in lieu thereof "$193" and "$38", respectively;

(5) by striking out "$42" in clause (E) and inserting in lieu thereof "$47";

(6) by striking out "$77" in clause (F) and inserting in lieu thereof "$86";

(7) by striking out "$111" and "$34" in clause (G) and inserting in lieu thereof "$124" and "$38", respectively;

(8) by striking out "$50" in clause (H) and inserting in lieu thereof "$56";

(9) by striking out "$112" in clause (I) and inserting in lieu thereof "$125"; and

(10) by striking out "$94" in clause (J) and inserting in lieu thereof "$105".

### CLOTHING ALLOWANCE FOR CERTAIN DISABLED VETERANS

SEC. 103. Section 362 is amended by striking out "$274" and inserting in lieu thereof "$305".

## TITLE II—SURVIVORS' DEPENDENCY AND INDEMNITY COMPENSATION BENEFITS

### RATES OF DEPENDENCY AND INDEMNITY COMPENSATION FOR SURVIVING SPOUSES

SEC. 201. (a) Subsection (a) of section 411 is amended to read as follows:

"(a) Dependency and indemnity compensation shall be paid to a surviving spouse, based on the pay grade of the person upon whose death entitlement is predicated, at monthly rates set forth in the following table:

| "Pay grade | Monthly rate |
|---|---|
| E-1 | $415 |
| E-2 | 429 |
| E-3 | 439 |
| E-4 | 466 |
| E-5 | 480 |
| E-6 | 491 |
| E-7 | 514 |
| E-8 | 542 |
| E-9 | [1] 568 |
| W-1 | 525 |
| W-2 | 546 |
| W-3 | 562 |
| W-4 | 595 |
| O-1 | 525 |
| O-2 | 542 |
| O-3 | 581 |
| O-4 | 613 |
| O-5 | 677 |
| O-6 | 761 |
| O-7 | 825 |
| O-8 | 904 |
| O-9 | 971 |
| O-10 | [2] 1,062 |

"[1] If the veteran served as sergeant major of the Army, senior enlisted advisor of the Navy, chief master sergeant of the Air Force, sergeant major of the Marine Corps, or master chief petty officer of the Coast Guard, at the applicable time designated by section 402 of this title, the surviving spouse's rate shall be $611.

"[2] If the veteran served as Chairman of the Joint Chiefs of Staff of the Army, Chief of Naval Operations, Chief of Staff of the Air Force, or Commandant of the Marine Corps, at the applicable time designated by section 402 of this title, the surviving spouse's rate shall be $1,139.".

(b) Subsection (b) of such section is amended by striking out "$43" and inserting in lieu thereof "$48".

(c) Subsection (c) of such section is amended by striking out "$112" and inserting in lieu thereof "$125".

(d) Subsection (d) of such section is amended by striking out "$56" and inserting in lieu thereof "$62".

### RATES OF DEPENDENCY AND INDEMNITY COMPENSATION FOR CHILDREN

SEC. 202. Section 413 is amended—

(1) by striking out "$189" in clause (1) and inserting in lieu thereof "$210";

(2) by striking out "$271" in clause (2) and inserting in lieu thereof "$302";

(3) by striking out "$350" in clause (3) and inserting in lieu thereof "$390"; and

(4) by striking out "$350" and "$71" in clause (4) and inserting in lieu thereof "$390" and "$79", respectively.

### RATES OF SUPPLEMENTAL DEPENDENCY AND INDEMNITY COMPENSATION FOR CHILDREN

SEC. 203. Section 414 is amended—

(1) by striking out "$112" in subsection (a) and inserting in lieu thereof "$125";

(2) by striking out "$189" in subsection (b) and inserting in lieu thereof "$210"; and

(3) by striking out "$96" in subsection (c) and inserting in lieu thereof "$107".

### MISCELLANEOUS DEPENDENCY AND INDEMNITY COMPENSATION AMENDMENTS

SEC. 204. (a) Section 413 is amended by inserting "(a)" before "Whenever", and by adding at the end thereof the following new subsection:

"(b) If dependency and indemnity compensation has been awarded under this section to a veteran's child or children and the entitlement of an additional child of that veteran to dependency and indemnity compensation under this section is later established effective retroactively, the amount payable retroactively to the additional child is the amount equal to the difference between the total of the increased award for the retroactive period and the prior total award for that period.".

(b) Section 414(c) is amended by adding at the end thereof the following new sentence: "However, if during the month in which such a child attains the age of 18 the child is also being considered to be a child below the age of 18 for purposes of additional dependency and indemnity compensation for a surviving spouse under section 411(b) of this title, the amount payable to the child for that month under this section shall be reduced by the amount payable to the surviving spouse for the same month under such section that is attributable to the child.".

## TITLE III—LIFE INSURANCE PROGRAM AMENDMENTS

### INCREASE IN MAXIMUM AMOUNTS OF LIFE INSURANCE

SEC. 301. (a) Section 767 is amended—

(1) in subsection (a)—

(A) by striking out "$20,000" and inserting in lieu thereof "$35,000"; and

(B) by inserting "$30,000, $25,000, $20,000" after "or (B) to be insured in the amount of";

(2) in subsection (c)—

(A) by inserting "$30,000, $25,000, $20,000" after "or to be insured in the amount of"; and

(B) by inserting "$35,000, $30,000, $25,000" after "or insured in the amount of"; and

(3) by adding at the end of such section the following new subsection:

"(d) Notwithstanding any other provision of this section, any member who on the effective date of this subsection is a member of the Retired Reserve of a uniformed service (or who upon application would be eligible for transfer to the Retired Reserve of a uniformed service) may obtain increased insurance coverage up to a maximum of $35,000 (in any amount divisible by $5,000) if—

"(1) the member—

"(A) is insured under this subchapter on the effective date of this subsection; or

"(B) within one year after the effective date of this subsection, reinstates insurance under this subchapter that had lapsed for nonpayment of premiums; and

"(2) the member submits a written application for the increased coverage to the office established pursuant to section 766(b)

of this title within one year after the effective date of this subsection.".

(b) Section 777(a) is amended—

(1) by striking out "or $20,000" in the first sentence and inserting in lieu thereof "$20,000, $25,000, $30,000, or $35,000";

(2) by striking out "$20,000" in the second sentence and inserting in lieu thereof "$35,000"; and

(3) by striking out "$20,000" both places it appears in the fourth sentence and inserting in lieu thereof "$35,000".

COLLECTION OF AMOUNTS FOR SERVICEMEN'S GROUP LIFE INSURANCE PROGRAM

SEC. 302. Section 769 is amended by adding at the end the following new subsection:

"(f) The Secretary of Defense shall prescribe regulations for the administration of the functions of the Secretaries of the military departments under this section. Such regulations shall prescribe such procedures as the Secretary of Defense, after consultation with the Administrator, may consider necessary to ensure that such functions are carried out in a timely and complete manner and in accordance with the provisions of this section, including specifically the provisions of subsection (a)(2) of this section relating to contributions from appropriations made for active duty pay.".

BENEFICIARY'S RIGHT TO ELECT ONE-SUM PAYMENT

SEC. 303. (a) The second sentence of section 717(c) is amended to read as follows: "However, the first beneficiary may elect to receive payment under any option which provides for payment over a longer period of time than the option elected by the insured, or if no option has been elected by the insured, may elect to receive payment in one sum or under any option which provides for payment over a period of thirty-six months or any longer period.".

(b) Section 752(a) is amended—

(1) by inserting "in one sum or" in the second sentence after "payment of the insurance"; and

(2) by adding at the end the following new sentence: "Notwithstanding any provision to the contrary in any insurance contract, the beneficiary may, in any case in which the insured has not exercised the right of election of the insured as provided in this subchapter, elect to receive payment of the insurance in one sum.".

(c) The Administrator of Veterans' Affairs shall notify each individual who on the date of the enactment of this Act is insured under a National Service Life Insurance policy or a United States Government Life Insurance policy of the amendments made by this section and shall provide each such individual with the forms necessary for election of a mode of payment of the insurance (or to change an existing election of mode of payment). Such notice and forms shall be sent by regular mail to the individual's last known address as contained in insurance records of the Veterans' Administration.

(d) The amendments made by subsections (a) and (b) shall apply only to insurance maturing after March 31, 1982.

## TITLE IV—MISCELLANEOUS PROVISIONS

VETERANS' ADMINISTRATION ORGANIZATION AND STAFFING LEVELS

SEC. 401. (a)(1) Section 203 is amended to read as follows:

"§ 203. Availability of appropriations and of funded personnel ceilings

"(a) Any funds appropriated to the Veterans' Administration may, to the extent provided in this title or an appropriations Act, remain available until expended.

"(b)(1) With respect to each law making appropriations for the Veterans' Administration, there shall be provided to the Veterans' Administration the funded personnel ceiling defined in paragraph (4) of this subsection and the funds appropriated therefor.

"(2) In order to carry out the provisions of paragraph (1) of this subsection, the Director of the Office of Management and Budget shall, with respect to each such law (A) provide to the Veterans' Administration for the fiscal year concerned such funded personnel ceiling and the funds necessary to achieve such ceiling, and (B) submit to the appropriate committees of the Congress and to the Comptroller General of the United States certification that the Director has so provided such ceiling. Not later than the thirtieth day after the enactment of such a law or, in the event of the enactment of such a law more than thirty days before the fiscal year for which such law makes such appropriations, not later than the tenth day of such fiscal year, the certification required in the first sentence of this paragraph shall be submitted, together with a report containing complete information on the personnel ceiling that the Director has provided to the Veterans' Administration for the employees described in paragraph (4) of this subsection.

"(3) Not later than the forty-fifth day after the enactment of each such law, the Comptroller General shall submit to the appropriate committees of the Congress a report stating the Comptroller General's opinion as to whether the Director of the Office of Management and Budget has complied with the requirements of such paragraph in providing to the Veterans' Administration such funded personnel ceiling.

"(4) For the purposes of this subsection, the term 'funded personnel ceiling' means, with respect to any fiscal year, the authorization by the Director of the Office of Management and Budget to employ not less than the number of employees for the employment of which appropriations have been made for such fiscal year.".

(2) The item relating to such section in the table of sections at the beginning of chapter 3 is amended to read as follows:

"203. Availability of appropriations and of funded personnel ceilings.".

(b) Section 210(b) is amended—

(1) by inserting "(1)" after "(b)"; and

(2) by adding at the end the following:

"(2)(A) Except as provided in subparagraph (B) of this paragraph, any exercise by the Administrator of the authority granted under the second sentence of paragraph (1) of this section shall only be effective if (i) a plan describing the proposed exercise of authority, including a justification therefor, is submitted to the Congress, and (ii) before the end of the sixty-day period beginning on the date of such submittal neither House of Congress adopts a resolution stating in substance that it disapproves the proposed exercise of authority.

"(B) This paragraph shall not apply (i) to administrative reorganizations within any bureau, agency, or office of the Veterans' Administration that existed on the date of the enactment of this paragraph, or (ii) to any exercise of authority that involves a reduction of less than 10 percent in any fiscal year in the number of full-time equivalent employees at any Veterans' Administration office or facility.

"(C) There shall be excluded from the computation of the sixty-day period referred to in subparagraph (A) of this paragraph any day on which either House of Congress is not in session because of an adjournment of more than three days to a day certain or an adjournment of the Congress sine die.".

(c) Section 5010(a) is amended by striking out paragraph (4).

BAR TO BENEFITS

SEC. 402. (a) Section 3103 is amended by adding at the end thereof the following new subsection.

"(f)(1) Subject to paragraph (2) of this subsection and notwithstanding section 977 of title 10 or any other provision of law, any person who becomes a member of a uniformed service on or after the date of the enactment of the Veterans' Compensation Amendments of 1981 and who fails to complete at least twenty-four months of such person's initial period of enlistment or other period of obligated service is not eligible for any right, privilege, or benefit under any law administered by the Veterans' Administration (other than loan guaranty benefits by virtue of eligibility under section 1818(a)(2) of this title).

"(2) Paragraph (1) of this subsection does not apply to any person—

"(A) who is discharged or released from active duty for the convenience of the Government under section 1171 of title 10 or for hardship under section 1173 of title 10;

"(B) who is discharged or released from active duty for a disability incurred in line of duty; or

"(C) who has a disability determined to be service connected to a compensable degree.".

(b)(1) Chapter 17 is amended by inserting after section 602 the following new section:

"§ 603. Limitations on eligibility

"Eligibility for care and services under this chapter is subject to the provisions of section 3103 of this title.".

(2) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 602 the following new item:

"603. Limitations on eligibility.".

(c)(1) Chapter 23 is amended by adding at the end the following new section:

"§ 909. Limitations on eligibility

"Eligibility for benefits under this chapter is subject to the provisions of section 3103 of this title.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end the following new item:

"909. Limitations on eligibility.".

(d)(1) Chapter 24 is amended by adding at the end the following new section:

"§ 1009. Limitations on eligibility

"Eligibility for benefits under this chapter is subject to the provisions of section 3103 of this title.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end the following new item:

"1009. Limitations on eligibility.".

(e) Section 1625 is amended by inserting "or under conditions which under section 3103 of this title bar the use of benefits" after "under dishonorable conditions".

(f) Section 1818 is amended by adding at the end the following new subsection:

"(c) In addition to the requirements of subsection (a)(1), the eligibility of a veteran who became a member of the uniformed services on or after the date of the enact-

ment of the Veterans' Compensation Amendments of 1981 and has been discharged or released from active duty is subject to the provisions of section 3103(f) of this title.".

PRESERVATION OF PENSION OF CERTAIN BLINDED VETERANS

SEC. 403. Section 3203(a)(1)(B) is amended by striking out the period at the end and inserting in lieu thereof the following: "unless the veteran is a blinded person and the case is being furnished in a Veterans' Administration blind rehabilitation center or clinic.".

EFFECTIVE DATES

SEC. 404. (a) Except as provided in subsection (b), the amendments made by this Act shall take effect on October 1, 1981.

(b)(1) Subsection (d) of section 767 of title 38, United States Code, as added by section 301(a)(3), shall take effect on October 1, 1981, or on the first day of the first month beginning more than sixty days after the date of the enactment of this Act, whichever is later.

The amendment made by section 402 shall take effect on the date of the enactment of this Act.

The SPEAKER pro tempore (Mr. MURTHA). Pursuant to the rule, a second is not required on this motion.

The gentleman from Mississippi (Mr. MONTGOMERY) will be recognized for 20 minutes, and the gentleman from Alabama (Mr. SMITH) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Mississippi (Mr. MONTGOMERY).

GENERAL LEAVE

Mr. MONTGOMERY. Mr. Speaker, I ask unanimous consent to revise and extend my own remarks, and that all Members may have 5 legislative days within which to revise and extend their remarks and to include extraneous matter on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Mississippi (Mr. MONTGOMERY).

Mr. MONTGOMERY. Mr. Speaker, my remarks will be very brief because I intend to yield to the distinguished chairman of our subcommittee on Compensation, Pension and Insurance, my good friend, SAM HALL, to explain the bill. At the outset, Mr. Speaker, I want to say how much I appreciate the work of the distinguished gentleman from Texas who has established himself as a most effective chairman. He is, by reputation, one of the outstanding lawyers in the House, and we all have benefited from his keen legal mind and total grasp of the issues involved in compensation, pension, and insurance programs. I also want to express my deep appreciation to the very able ranking minority member of the subcommittee, my good friend, CHALMERS WYLIE of Ohio. During the many years that I served as chairman of this particular subcommittee, I had the opportunity to work closely with the gentleman from Ohio and no one could ask for any more than the gentleman gave during the years we worked together.

As the Chair announced, the gentleman from Alabama (Mr. SMITH) will handle this part of the bill on the minority side. I had the privilege of serving as chairman of this subcommittee before being elevated to the full chairmanship, and the gentleman from Ohio was the ranking minority member. I enjoyed very much working with him.

Mr. Speaker, I appreciate the work of all members of the subcommittee on this bill. It is a comprehensive proposal and one that will benefit our Nation's service connected veterans and their eligible dependents.

I now yield such time as he may consume to the distinguished chairman of the subcommittee, Mr. SAM B. HALL, JR. of Texas.

Mr. SAM B. HALL, JR. Mr. Speaker, I appreciate your kind comments and I want to express my appreciation, Mr. Speaker, to the distinguished gentleman from Mississippi, SONNY MONTGOMERY, and to the able gentleman from Arkansas, JOHN PAUL HAMMERSCHMIDT, the ranking minority member of the full committee, and, of course, to my colleague, CHALMERS WYLIE of Ohio, and the entire subcommittee for their efforts to help get the reported bill to the floor.

Mr. Speaker, today we are considering a bill to provide a cost-of-living increase in benefits for veterans who were disabled as a result of their military service and for the widows and orphans of veterans who died of service-connected causes. The bill is designed to assist these individuals and to make sure that their level of benefits is not eroded by the ravages of inflation.

The bill will provide an average 11.3-percent increase effective October 1, 1981. According to the Congressional Budget Office, it would cost $893.5 million in fiscal year 1982 and would not exceed the targets currently contained in the first concurrent budget resolution. Mr. Speaker, the bill is not inflationary in that it simply provides a cost-of-living increase based on the anticipated rise in the Consumer Price Index between October 1, 1980, and September 30, 1981. The legislation is necessary since the service-connected program for veterans and widows is not indexed by law.

Service-connected compensation is payable to veterans who suffer from a disease or disability incurred during service.

The percentage of disability for a specific disability is assigned by the Veterans' Administration. That agency has established a "schedule for rating disabilities" which is the guideline for measuring the degree of disability. Compensation is paid for disabilities at ratings of 10 percent, 20 percent, and so forth, up to 100 percent. The rate of compensation payable for each percentage of disability is established by law. Additional compensation is payable for the loss of a limb, blindness, and other severe disabilities. An additional dependency allowance is payable to veterans with a rating of 30 percent or more for a spouse, minor children, or dependent parents.

Historically, the Congress has increased compensation rates whenever there has been an appreciable increase in the cost-of-living index, since the rates are not indexed to the Consumer Price Index by law. This is necessary to insure that inflation does not erode the purchasing power of those drawing compensation and DIC benefits.

There follows a breakdown of the percent of increase in compensation rates over those paid on July 1, 1933:

| | Percent of increase in compensation rates over those paid on July 1, 1933 | | | | | | | | | | | | | | | | | | | | Cumulative increase in— | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | 1934 | 1944 | 1945 | 1946 | 1949 | 1952 | 1954 | 1957 | 1962 | 1965 | 1969 | 1970 | 1972 | 1974 | 1975 | 1976 | 1977 | 1978 | 1979 | 1980 | Consumers Price Index since 1917 | Compensation since 1917 |

Widows and children of veterans who die of causes determined to be service connected are entitled to monthly payments of dependency and indemnity compensation.

The purpose of this benefit is to provide partial compensation to the designated survivors for the loss in financial support sustained as the result of the service-connected death. Income and need are not factors in determining a surviving spouse's or child's entitlement since the Nation assumes, in part, the legal and moral obligation of the veteran to support the spouse and children.

Payments of DIC for surviving spouses are determined on the basis of the veteran's service pay grade and range from $373 monthly for the surviving spouse of an E-1 to $954 monthly for the surviving spouse of an O-10. Surviving spouses are entitled to an additional $43 monthly for each child.

It is well established that the Congress has placed the very highest priority on the payment of compensation and dependency and indemnity compensation benefits to eligible veterans and survivors.

The following summarizes the legislative initiatives in this program during the past 7 years.

FISCAL YEAR 1982—H.R. 3995—$893.5 MILLION

The reported bill would provide an average 11.3 percent increase in compensation and DIC rates (other than the "K" award) effective October 1, 1981—the higher rates being authorized for the more seriously disabled veterans in an effort to rectify former rounding off inequities as well as meeting the basic purpose of compensating for loss of earning capacity. The rate changes which would be authorized are as follows:

| | Increase monthly rate— | |
|---|---|---|
| | From | To |
| Percentage of disability or subsection under which payment is authorized: | | |
| (a) 10 percent | $54 | $58 |
| (b) 20 percent | 99 | 109 |
| (c) 30 percent | 150 | 165 |
| (d) 40 percent | 206 | 229 |
| (e) 50 percent | 291 | 325 |
| (f) 60 percent | 367 | 415 |
| (g) 70 percent | 434 | 505 |
| (h) 80 percent | 503 | 595 |
| (i) 90 percent | 566 | 680 |
| (j) 100 percent | 1,016 | 1,131 |

The reported bill provides for an 11.3 percent cost-of-living increase in statutory awards (other than "K" award) dependency and indemnity compensation and contains further miscellaneous provisions relating to DIC, insurance and pension.

FISCAL YEAR 1981—PUBLIC LAW 96-385—$1,058.1 MILLION

The Act provided a 13 percent rate increase in compensation for those disabilities rated 10 to 40 percent. Cases rated 50 percent or more disabled were increased by 14.3 percent. Statutory awards relating to more serious disabilities (other than the "K" award) and DIC rates were increased by 14.3 percent. In addition, it (1) expanded the specially adapted housing benefit program by $5,000 to certain service-connected veterans; (2) increased the maximum VA loan guaranty from $25,000 to $27,500 for a conventional home or condominium and from $17,500 to $20,000 the guaranty for a mobile home, mobile home lot or both; (3) entitled veterans to refinance their VA home loans if mortgage funds become available at lower interest rates; (4) provided for headstones and markers for certain close relatives of veterans buried in State veterans' cemeteries and other miscellaneous provisions.

FISCAL YEAR 1980—PUBLIC LAW 96-128—$669.7 MILLION

The Act provided a 9.9 percent increase in the compensation and DIC rates effective October 1, 1979, except for the "K" award which became effective October 1, 1980. In addition, a new basic entitlement was established permitting payment of aid and attendance benefits to a new group of severely disabled veterans upon an affirmative showing of and demonstrated need for the regular aid and attendance of another person.

FISCAL YEAR 1979—PUBLIC LAW 95-479—$520.4 MILLION

The Act provided a 7.3 percent increase in the compensation and DIC rates effective October 1, 1978. In addition, the Act: (1) provided additional compensation to veterans who suffered the loss or loss of use of three extremities; (2) established a new statutory award of $175 monthly to certain veterans suffering from the service-connected loss or loss of use of an extremity ratable at not less than 40 percent and who subsequently suffered the non-service-connected loss or loss of use of the paired extremity at a level ratable at no less than 40 percent; (3) reduced from 50 percent to 30 percent the rate of disability required before additional compensation for dependents is payable to veterans; (4) provided dependency and indemnity compensation entitlement to survivors if the veteran immediately before death had suffered total service-connected disability for 10 or more years or continuously since discharge for not less than 5 years. Provided, for the first time, additional dependency and indemnity compensation to a surviving spouse who, because of disability, is permanently housebound; (5) provided for a second level of aid and attendance benefits for certain catastrophically disabled veterans needing a higher level of care; (6) clarified the intent of the Congress to assure exemption from taxation of compensation paid in lieu of military retired pay; (7) increased the service-connected death burial benefit from $800 to $1,100; and (8) increased the automobile assistance allowance payable on a one-time basis to certain severely disabled veterans from $3,300 to $3,800.

FISCAL YEAR 1978—PUBLIC LAW 95-117—$312.5 MILLION

The Act provided a 6.6 percent increase in compensation and DIC rates to service-connected disabled veterans and eligible dependents. In addition, it provided entitlement to a grant, not to exceed $25,000, as assistance in purchasing specially adapted housing for certain veterans who, because of the service-connected loss or loss of use of one lower extremity and one upper extremity which affects the function of balance or propulsion, are precluded from locomotion without aid of braces, crutches, canes or a wheelchair.

FISCAL YEAR 1977—PUBLIC LAW 94-433—$388 MILLION

The Act provided for an 8 percent increase in the rates of compensation and DIC. In addition, the Act provided that the VA would pay increased compensation to the disabled veteran rated 50 percent to 100 percent who has a spouse who is a patient in a nursing home or who is so helpless as to need regular aid and attendance. It also provided for an increase in mortgage protection life insurance available for certain severely disabled veterans from $30,000 to $40,000. The measure also authorized the VA to pay the cost of transporting the remains of deceased, service-disabled veterans to a national cemetery for burial and extended eligibility for VA assistance in the purchase of automobiles and necessary special adaptive equipment to certain disabled veterans who served from September 16, 1940. The benefit had been limited to those with service in World War II or thereafter.

FISCAL YEAR 1976—PUBLIC LAW 94-71—$490 MILLION

Increased by 10 percent the rates of compensation payable to service-connected disabled veterans rated 10 to 50 percent. Cases rated 60 percent or more disabled were increased by 12 percent. Statutory awards, relating to more serious disabilities, were increased by 12 percent.

Mr. Speaker, I wish to point out, however, that over the years, the effects of periodic cost-of-living increases have served to distort the compensation rate structure. As you know, totally disabled veterans have always received our sympathetic consideration. This is shown by their current

$1,016 monthly rate. A 90-percent disability, however, at $566 is about half of that amount.

On the other hand, rounding off to the next higher dollar has increased rates for the least disabled veterans (those at the 10- to 30-percent levels) beyond what has been justified by their disabilities or the Consumer Price Index. The committee feels we should utilize the funds earmarked by the budget resolution to adjust the scale so that veterans with greater disability receive a greater proportionate share of the increase. This is consistent with what we have done in past years.

Therefore, Mr. Speaker, the bill provides an average 11.3-percent cost-of-living increase in service-connected compensation benefits—with the more seriously disabled (50 to 90 percent) receiving a larger proportionate share of the increase. Dependency and indemnity compensation would be increased across-the-board by 11.3 percent.

The bill additionally does two things asked for by the administration. It would provide a more equitable system for computation of DIC when an overpayment is created by the retroactive addition of another child. It would also eliminate duplication of DIC the month in which a child in a widow's custody becomes 18 if such child becomes eligible to DIC benefits in his own right by his pursuit of higher education. These two minor provisions were passed by the House last year but were deleted by the Senate. No costs are involved here.

The bill further incorporates the provisions of three GI insurance proposals. First, it increases servicemen's group life insurance and veterans' group life insurance from $20,000 to $35,000. This is strongly supported by the Defense Department and the administration. It represents the approximate increase in the Consumer Price Index since the ceiling was last increased.

Second, it would require the Secretary of Defense to issue regulations to insure timely collection of servicemen's group life insurance premiums for eligible ready reservists. The General Accounting Office identified this as a significant problem and this provision will insure a more timely payment and collection procedure.

Third, a provision would permit GI insurance to be paid in a lump sum in those cases where the insured fails to denote how he wants his insurance to be paid. It would not cancel any designation made by the veteran. This provision will be a great help to many widows who would otherwise have to receive the benefits over a period of several years at low interest rates.

Of great importance is the provision which would make certain that any plan by the Office of Management and Budget to consolidate regional office functions could not be done without seeking the approval of the Congress. As you will recall, earlier this year the President had recommended that most of the adjudicative and loan guaranty functions being conducted in the 58 regional offices be consolidated into one centralized location. This would have involved a transfer of some 12,000 personnel and would also have meant a drastic reduction in current personnel, beginning with some 1,673 during the next fiscal year.

This provision, therefore, would simply require this administration or any future administration, to submit any consolidation plan to the Congress for approval prior to implementing such plan. The committee feels this is a proper oversight function of the Congress. In addition, this section would make certain that funds appropriated by the Appropriations Committees and personnel ceilings established by such committees for all VA budget accounts would be allocated by the Office of Management and Budget. You will recall this has been accomplished for medical care, medical and prosthetic research and medical administration for the Department of Medicine and Surgery. It has worked well and this provision is designed to make certain that it would be applicable to all other VA accounts.

In expanding the requirements of Public Law 96-151 which assures the availability of appropriations and funded personnel ceilings, we are not changing the nature of the requirements established under Public Law 96-151, but merely their reach. Indeed, H.R. 3995 tracks verbatim the language in Public Law 96-151 mandating the availability of funds appropriated by Congress for staffing levels specified by Congress. Accordingly, Mr. Speaker, today's action is intended to have no effect on litigation pending under Public Law 96-151 with respect to medical care staffing except to the degree that by expanding the reach of the statute, it makes judicial enforcement an interpretation of the statute more important.

Additionally, the bill would clarify the intent of the Congress regarding the bar to payment of benefits when a member of the All-Volunteer Force does not complete at least 24 months of his obligated period of service. This is designed to clean up a provision of law that was enacted last year when the Congress adopted the Defense authorization bill. Since then, many inequities surfaced that were called to our attention by several Members of the Congress, and I think that the language proposed in section 402 of the bill will certainly eliminate such inequities and will give the Veterans' Administration guidelines on how this provision of law is to be implemented.

Finally, the bill would prevent a small number of blinded veterans from losing their pension benefits while undergoing mobility training at VA blind rehabilitation centers. This inequity was called to our attention earlier this year by the Blinded Veterans Association. The enactment of this provision is certainly well justified and would not involve any significant increase in expenditures.

Again, Mr. Speaker, I would like to point out that this bill will have no inflationary impact and is well within the budget authority and outlays as contained in the first congressional budget resolution.

Mr. Speaker, this bill is vital to our service-connected veterans, and I urge that it be adopted.

My good friend, JIM SANTINI, the gentleman from Nevada, had hoped to be here today to speak on behalf of the bill. He is also interested in the Senate compensation bill which has a provision that would name the Reno VA hospital as the Ioannis A. Lougaris VA Medical Center.

I have assured Mr. SANTINI that in working with the Senate on the differences between our bills, we hope to be able to accept the Senate proposal on the Reno hospital as well as the naming of another hospital we are interested in.

□ 1330

Mr. SMITH of Alabama. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I join the distinguished and respected chairman of the Veterans' Affairs Committee, SONNY MONTGOMERY, in support of H.R. 3995, providing a cost-of-living increase in compensation for disabled veterans and their survivors. Words of praise are due for the manner in which this bill was developed by the Subcommittee on Compensation, Pension and Insurance under the leadership of its chairman, SAM HALL of Texas, and its ranking minority member, CHALMERS WYLIE of Ohio. Their intelligent work has produced a measure that provides a sorely needed benefit to a most deserving and priority group of American citizens and, at the same time one which remains within the budget authority of the first congressional budget resolution.

The bill before us provides an average 11.3-percent increase in the compensation and DIC rates effective October 1, 1981. Higher rates are authorized for many of the most seriously disabled veterans as a corrective to distortions that have developed in the compensation rate structure as the result of periodic cost-of-living increases authorized over the years.

Survivors of veterans who have died from service-connected causes and receive dependency and indemnity com-

pensation benefits are also provided an 11.3-percent increase by this measure.

A $15,000 increase in the ceiling for servicemen's group life insurance and veterans group life insurance is authorized in H.R. 3995. This brings it up from $20,000 to $35,000 in accordance with recommendations by both the Department of Defense and the Veterans' Administration.

Another section of the bill permits the proceeds of a GI insurance policy to be paid in a lump sum in those cases where the insured veteran has failed to specify the manner in which he wants the insurance paid to his beneficiary.

Mr. Speaker, earlier this year OMB recommended that the adjudicative and loan guaranty functions of the 58 VA regional offices across the country be consolidated into three central locations. This idea was not well thought out. It would have meant the initial transfer of some 12,000 VA employees and severe cutbacks in personnel, not to speak of the very costly administrative nightmare such a drastic reorganization would have brought about. Members of the House received volumes of adverse mail on this issue and the Congress caused the withdrawal of the proposal. A requirement in this bill that the administration seek prior congressional reaction before any such move is ordered in the future is, in my opinion, an appropriate exercise of Congress oversight responsibilities.

These, with other provisions I will not detail here, make this an essential and meritorious piece of legislation. Primarily, it provides benefits to the most highly deserving segment of this Nation's population—those who incurred disabilities while in military service. I know I speak for the ranking members of our Subcommittee on Compensation, Pension and Insurance, the Hon. JOHN PAUL HAMMERSCHMIDT of Arkansas and the Hon. CHALMERS WYLIE of Ohio, when I urge all Members of the House to support H.R. 3995.

□ 1340

Mr. Speaker, I have no requests for time on this side, and I yield back the remainder of my time.

Mr. MONTGOMERY. Mr. Speaker, let me thank the gentleman from Alabama (Mr. SMITH) for his strong statement. He serves on this subcommittee. I would also like to thank him for filling in for the gentleman from Arkansas (Mr. HAMMERSCHMIDT).

At this time, Mr. Speaker, I would yield such time as he may consume to the gentleman from Texas (Mr. LEATH) who is chairman of the Subcommittee on Housing and Memorial Affairs.

Mr. LEATH of Texas. Mr. Speaker, I rise in support of the legislation before us, H.R. 3995, the Veterans' Compensation Amendments Act. Passage of this legislation will continue Congress' commitment to our veterans and their families. It is my belief that part of the cost of our military readiness is providing for those who have given so unselfishly in the past for their country. Our veterans answered the call to defend America and are indeed entitled to unanimous approval of this legislation.

Title IV is of utmost importance to the veteran. This provision is identical to the legislation I introduced earlier this year and provides for congressional oversight of any plans to consolidate, eliminate, abolish or redistribute the functions of any VA office or facility. I am pleased that H.R. 3995 contains this language because it will allow Congress to monitor the VA offices and hospitals which are of major concern to our veterans.

Briefly, title IV provides that any major reorganization plans be submitted to the Congress and our Veterans' Affairs Committees for review. The bill provides for a 60-day review period and a one House veto of any plan if Congress so desires.

Finally, I would like to compliment the leadership of the Veterans' Committee for bringing this bill forth. The efforts of Chairman MONTGOMERY and JOHN PAUL HAMMERSCHMIDT are deeply appreciated. Certainly the efforts by the chairman of the Subcommittee on Compensation, Pension and Insurance, SAM HALL, should not go unnoticed. Chairman HALL's efforts, and those of the ranking minority member, CHALMERS WYLIE, should be known by all. I have the utmost respect for these four gentlemen and all our veterans owe them a debt of gratitude.

Mr. MONTGOMERY. Mr. Speaker, I thank the gentleman.

I would also like to thank the gentleman from Louisiana (Mr. BREAUX) and the gentleman from North Carolina (Mr. JONES) who have the next four bills to follow the Veterans' Affairs Committee. They have kindly let us move ahead with this legislation.

At this time I would yield 7 minutes to the gentleman from Wisconsin (Mr. ASPIN).

Mr. ASPIN. Mr. Speaker, I would just like to make some remarks concerning the bill and the proposition which is before us this afternoon. As has been pointed out by both sides of the aisle, this bill is within the budget resolution and there is no question about that.

But this is big money, Mr. Speaker. We are talking about nearly $1 billion for the next 4 years, and, after all, we do face new circumstances. When we passed that budget resolution, we were looking at a deficit of $42.5 billion, as projected by the administration. But now that budget deficit is beginning to look bigger and the administration is looking for more places to cut back.

As I look at this sheet, they are looking for places to cut back in the area of entitlements, in the area of cost of living increases. Here we have an 11.3 percent cost of living increase, not an outrageous increase to be sure, [given the rate of inflation. But the issue I would like to raise is one of concern, that here we are dealing with this issue before we have heard where the President is going to make his cuts. It concerns me that perhaps we are going to face cuts in cost-of-living and in social security and other areas after we have passed this bill. We have not waited to see whether the President asks for a reduction in the cost-of-living in this particular bill. Maybe he will not, but maybe the Congress might want to make it consistent with other cuts in the cost of living.

So the concern I have, and the concern I would like to register with my colleagues here on the floor, is that we really are treating this cost-of-living hike quite different from other cost-of-living hikes. I do not think we would be bringing this up under suspension of the rules if it were an increase in the cost-of-living allowances for other programs, because the point would naturally be raised: "Wait a minute; the President might want to cut back on the cost of living."

Here we are doing it for the veterans, a very worthy group, to be sure; but why are we treating these people so differently?

Mr. MONTGOMERY. Mr. Speaker, will the gentleman yield to me?

Mr. ASPIN. I yield to the chairman of the committee (Mr. MONTGOMERY).

Mr. MONTGOMERY. I would make a comment and then would like the gentleman to also yield to the chairman of the subcommittee to make a comment.

This is for the service-connected veterans, and I have always felt that if Government really had an obligation to anybody it was for the person who was wounded or hurt during service, and that is really the key obligation for all of these programs.

Mr. ASPIN. I understand.

Mr. MONTGOMERY. A person who loses his leg, a person who is paralyzed.

Mr. ASPIN. I understand.

Mr. MONTGOMERY. But I would point out to the gentleman further that we do not look at the Veterans' Administration or veterans programs as being a sacred cow.

We accepted, and the veterans organizations accepted in the first budget, a cut of over $440 million. If we have to take other cuts, we will take a good, hard look at them. But I do not think that this is the right place.

Mr. ASPIN. If I could respond to the chairman of the committee before yielding to the chairman of the subcommittee, I agree. Everyone has their

own arguments. People say, well, we should not cut the cost of living for social security because they are senior citizens, or you do not cut here, and for every one of these you cannot cut entitlements, the cost-of-living increase, or you would be hurting somebody.

I understand these are disabled veterans and they are worthy folk, but they are worthy on other grounds. The Veterans' Committee did accept their cuts in the first round of the budget. The point I am making now is that we are about to have a second round of budget cuts on the 1982 budget and $16 billion is the number bandied about. Sometime this week, Wednesday, Thursday, sometime the President is scheduled to make a speech and lay out his cuts.

The point I am making is if we pass this bill here and we give these folks an 11.3-percent increase, maybe we are going to cut someplace else and we are going to be inconsistent. We are treating the veterans different with this bill. I do not think there is any question about that.

Mr. SAM B. HALL, JR. Mr. Speaker, will the gentleman yield?

Mr. ASPIN. I yield to the gentleman from Texas (Mr. SAM B. HALL, JR.).

Mr. SAM B. HALL, JR. For just one moment I would like to point out that in the Carter budget, Mr. Carter's budget summation requested an increase of 12.3 percent in the rates of compensation and dependency and indemnity and compensation. As the gentleman knows, this was reduced down to 11.3 percent in this bill.

In a letter to Chairman MONTGOMERY on April 3, 1981, from Rufus Wilson, Acting Administrator, it was stated, and I am reading from page 37 of the report:

Advice has been received from the Office of Management and Budget that there is no objection to presentation of this report from the standpoint of the administration's program.

I do not believe that there will be any cuts made in this entitlement program for the reasons as outlined in this letter, and as indicated by Chairman MONTGOMERY.

Mr. ASPIN. I appreciate the gentleman's comments.

I appreciate the fact that they did move from 12.3 down to 11.3. Of course, that is more consistent. It is more consistent with the cost of living which really has occurred in the period that we are covering. So it is an adequate compensation. It is just that we are treating the veterans differently and we are going to be in the position of cutting some entitlements.

I will bet my colleagues we end up cutting and there are going to be proposals to cut social security, the cost-of-living increases, and to defer or reduce those payments in other entitlement programs that are covered and that are not cost of living, and that are going to be dealt with in the President's next round of cuts.

It would have been nice to be able to deal with these all together and to treat them all together, to look at them as one package and treat them equally. If social security is going to have to do with a 9-percent increase, perhaps the veterans ought to do with a 9-percent increase, too.

All I was arguing for was consistency. By bringing this matter up now, by bringing it up under suspension, we are not really treating the matter consistently. That is the point I wanted to make.

□ 1350

Mr. MONTGOMERY. Mr. Speaker, we think we have an excellent bill and we hope that it will be adopted unanimously.

● Mr. SANTINI. Mr. Speaker, I thank my colleague from Texas for the opportunity to express my support for his bill that we are now considering. I also wish to mention my understanding that Congressman HALL and the members of the conference that will eventually rectify differences between his bill and the similar Senate bill, will make the commitment to retain the language of the Senate bill which renames the VA center in Reno, Nev., to the Ioannis A. Lougaris Veterans' Administration Medical Center.●

● Mr. CORRADA. Mr. Speaker, I rise in support of H.R. 3995, legislation which provides cost-of-living increases in certain benefits for disabled veterans and survivors of disabled veterans.

The bill consists of four titles: Title I increases compensation for service-connected disabled veterans, depending on the degree of disability, by an average of 11.3 percent. Title II increases dependency and indemnity compensation for survivors of veterans who died from service-connected causes, by 11.3 percent. Title III increases servicemen's group life insurance and veterans' group life insurance coverage from $20,000 to $35,000. It permits the beneficiaries of Government life insurance to receive insurance proceeds in a lump sum unless the insured selected some other mode of payment. Title IV assures the availability of appropriations and of funded personnel ceilings. It intends to insure that the VA is staffed at the level specified by the Congress, by requiring the OMB to make available to the VA the funds appropriated by the Congress for such personnel. It also prohibits the Veterans' Administration from exercising any authority to consolidate, eliminate, abolish, or redistribute the functions of any regional office, hospital, outpatient clinic, or any other facility unless Congress approves such action. Other provisions of title IV would extend to officers the bar on receipt of veterans' benefits when the active service has been for less than 2 years, which currently applies to enlisted men only; revise rules of eligibility applicable to certain servicemen released with honorable discharges; and prevent the loss of pension benefits for non-service-connected disabled veterans after extended care in a VA blind rehabilitation center.

War is always a horrible and harrowing experience that can be fully comprehended only by those who have lived it. Having to live with just the recollection of it must be awful. Having to live with the scars left by it is heroic.

It is more than a matter of lending a hand; it is a matter of compensating this. This bill is simply a way to help restore what inflation has taken away from those that gave us so much of themselves that we might all have what we have in this Nation.

It is only fitting that we take this opportunity to insure that their compensation be maintained against the erosion caused by inflation.

I urge my colleagues to vote to approve this legislation.●

● Mr. GILMAN. Mr. Speaker, I want to express my support for H.R. 3995, the Veterans' Compensation Act of 1981. I fully support the passage of this bill, which authorizes an 11.3 percent cost-of-living increase in the rates of compensation for disabled veterans and in the rates of indemnity compensation for survivors of deceased veterans.

Our disabled veterans have demonstrated a strong interest in the well-being of our Nation. These men, in defending our Nation, sacrificed their productive capacity. In recognition of their service and sacrifice in the name of national defense, it is extremely important that we fulfill our commitment to our disabled veterans and their families to insure their financial security.

LEGISLATIVE HISTORY

Traditionally, Congress has increased compensation rates whenever there has been an appreciable increase in the cost-of-living index. The last increase went into effect October 1, 1980.

DISABILITY COMPENSATION

The disability compensation program set forth in this measure provides our disabled veterans with a measure of relief from impaired earning capacity resulting from military service. By law, the degree of disability is required to represent the extent to which the veteran's earning capacity in civilian occupations is impaired. Basic compensation varies according to the degree of disability, ranging from 10 to 100 percent disabled; higher payments are made to those with more serious disabilities.

DEPENDENCY AND INDEMNITY COMPENSATION

The dependency and indemnity compensation (DIC) program provides partial compensation to the designated survivors (the spouse and/or children) of a veteran for the loss of financial support provided by the veteran should he die of service-connected causes. Payments are determined on the basis of the deceased veteran's military pay grade, with supplemental DIC payments awarded according to the number of dependents.

PROVISIONS

COST-OF-LIVING INCREASES

H.R. 3995 provides a cost-of-living increase in the basic disability compensation paid to veterans with service-connected disabilities. While the increase averages 11.3 percent, it is targeted to adjust the scale to correct past inequities. The bill also authorizes an 11.3 percent across-the-board increase for: other disability compensation benefits; annual clothing allowances for veterans whose disabilities require prosthetic or orthopedic appliances; dependency and indemnity compensation paid survivors of veterans whose deaths were service-connected; and supplemental DIC payments made for dependent children.

VA STAFFING

H.R. 3995 also contains language intended to prevent funds appropriated for VA staff from being used for other purposes. The bill requires future VA appropriations to specify a personnel ceiling. OMB is mandated to provide the VA funds for that personnel level and certify to Congress and the comptroller general that it has done so within 30 days of enactment of the appropriation or the first 10 days of the fiscal year. The comptroller general also is directed to submit a statement to Congress certifying OMB's compliance. The bill provides that VA appropriations may remain available until expended.

INSURANCE

H.R. 3995 increases maximum coverage of Servicemen's Group Life Insurance (SGLI) and Veterans' Group Life Insurance from $20,000 to $35,000, and assigns to DOD the responsibility of collecting, accounting for, and transferring to the VA funds necessary to operate SGLI. The committee anticipates this action will eliminate the problems of delinquent premium payments, currently totaling in the millions.

The bill also provides for lump-sum payment of National Service Life Insurance and U.S. Government Life Insurance claims, instead of the 36 monthly payments required under current law, unless otherwise specified by the insured.

BAR TO BENEFITS

Because of the high attrition rate in the volunteer force, no benefits are available under existing law to enlisted personnel who fail to complete 2 years of service, except when discharged for disability. H.R. 3995 eliminates certain inequities regarding this bar, which applies only to enlisted personnel.

Effective upon enactment, the bar will apply equally to officers, enlisted personnel, and volunteers and reservists called to extended duty. The bar will not affect personnel discharged prior to completion of 24 months of duty as long as they were discharged for the convenience of the Government.

OTHER PROVISIONS

H.R. 3995 also: Insures that the pension of a blind veteran receiving care in a VA center operated exclusively for the rehabilitation of the blind shall not be reduced; bars the VA from consolidating, abolishing, or otherwise reorganizing its offices, organizations, and agencies unless the plan is submitted to and not disapproved by Congress (one-House veto) within 60 days; and resolves certain inequities and duplications in DIC payments for dependent children.

The passage of H.R. 3995 serves as an important reminder to our disabled veterans and their families that our Nation has not forgotten them. These cost-of-living increases are vital to their families.

Veterans have given so unselfishly of themselves in the name of their country; in return, it is our country's highest obligation to insure that they continue to be compensated for their service.

I am deeply concerned that the United States honor its commitment to those who have given of themselves for our Nation.

The Veterans' Compensation Act of 1981 has been supported by the administration and will fulfill that commitment, and I am pleased to add my voice today in favor of its passage.●

Mr. MONTGOMERY. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. MURTHA). The question is on the motion offered by the gentleman from Mississippi (Mr. MONTGOMERY) that the House suspend the rules and pass the bill, H.R. 3995.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

Mr. MONTGOMERY. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 917) to amend title 38, United States Code, to increase the rates of disability compensation for disabled veterans; to increase the rates of dependency and indemnity compensation for their surviving spouses and children; to authorize the Administrator of Veterans' Affairs to guarantee home loans with provisions for graduated-payment plans; to increase the maximum amount payable in Veterans' Administration specially adapted housing assistance; to expand eligibility for memorial markers; and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 917

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That (a) this Act may be cited as the "Veterans' Disability Compensation, Housing, and Memorial Benefits Amendments of 1981".

(b) Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of title 38, United States Code.

TITLE I—VETERANS' DISABILITY COMPENSATION BENEFITS

RATES OF DISABILITY COMPENSATION

SEC. 101. (a) Section 314 is amended—

(1) by striking out "$54" in subsection (a) and inserting in lieu thereof "$60";

(2) by striking out "$99" in subsection (b) and inserting in lieu thereof "$110";

(3) by striking out "$150" in subsection (c) and inserting in lieu thereof "$167";

(4) by striking out "$206" in subsection (d) and inserting in lieu thereof "$229";

(5) by striking out "$291" in subsection (e) and inserting in lieu thereof "$324";

(6) by striking out "$367" in subsection (f) and inserting in lieu thereof "$408";

(7) by striking out "$434" in subsection (g) and inserting in lieu thereof "$483";

(8) by striking out "$503" in subsection (h) and inserting in lieu thereof "$559";

(9) by striking out "$566" in subsection (i) and inserting in lieu thereof "$629";

(10) by striking out "$1,016" in subsection (j) and inserting in lieu thereof "$1,130";

(11) by striking out "$1,262" and "$1,768" in subsection (k) and inserting in lieu thereof "$1,403" and "$1,966", respectively;

(12) by striking out "$1,262" in subsection (l) and inserting in lieu thereof "$1,403";

(13) by striking out "$1,391" in subsection (m) and inserting in lieu thereof "$1,547";

(14) by striking out "$1,581" in subsection (n) and inserting in lieu thereof "$1,758";

(15) by striking out "$1,768" each place it appears in subsection (o) and (p) and inserting in lieu thereof "$1,966";

(16) by striking out "$759" and "$1,130" in subsection (r) and inserting in lieu thereof "$844" and "$1,257", respectively;

(17) by striking out "$1,137" in subsection (s) and inserting in lieu thereof "$1,264"; and

(18) by striking out "$219" in subsection (t) and inserting in lieu thereof "$244".

(b) The Administrator of Veterans' Affairs may adjust administratively, consistent with the increases authorized by this section, the rates of disability compensation payable to persons within the purview of section 10 of

Public Law 85-857 who are not in receipt of compensation payable pursuant to chapter 11 of title 38, United States Code.

RATES OF ADDITIONAL COMPENSATION FOR DEPENDENTS

SEC. 102. Section 315(1) is amended—

(1) by striking out "$62" in clause (A) and inserting in lieu thereof "$69";

(2) by striking out "$104" in clause (B) and inserting in lieu thereof "$116";

(3) by striking out "$138" in clause (C) and inserting in lieu thereof "$153";

(4) by striking out "$173" and "$34" in clause (D) and inserting in lieu thereof "$192" and "$38", respectively;

(5) by striking out "$42" in clause (E) and inserting in lieu thereof "$47";

(6) by striking out "$77" in clause (F) and inserting in lieu thereof "$86";

(7) by striking out "$111" and "$34" in clause (G) and inserting in lieu thereof "$123" and $38, respectively;

(8) by striking out "$50" in clause (H) and inserting in lieu thereof "$56";

(9) by striking out "$112" in clause (I) and inserting in lieu thereof "$125" and;

(10) by striking out "$94" in clause (J) and inserting in lieu thereof "$105".

CLOTHING ALLOWANCE FOR CERTAIN DISABLED VETERANS

SEC. 103. Section 362 is amended by striking out "$274" and inserting in lieu thereof "$305".

INCREASE COMPENSATION PAYABLE TO CERTAIN SEVERELY DISABLED VETERANS

SEC. 104. Section 314 is amended—

(1) by striking out "both hands, or" in subsection (l);

(2) by amending subsection (m) by inserting "of both hands, or has suffered the anatomical loss or loss of use" after "use";

(3) by amending subsection (n)—

(A) by inserting "or loss of use of both arms at a level, or with complications, preventing natural elbow action with prosthesis in place, or has suffered the anatomical loss" after "loss" the first place it appears; and

(B) by inserting a comma after "appliance"; and

(4) by inserting after the comma following "less" in subsection (o) "or if the veteran has suffered the anatomical loss of both arms so near the shoulder as to prevent the use of a prosthetic appliance,".

## TITLE II—SURVIVORS' DEPENDENCY AND INDEMNITY COMPENSATION BENEFITS

RATES OF DEPENDENCY AND INDEMNITY COMPENSATION FOR SURVIVING SPOUSES

SEC. 201. (a) Subsection (a) of section 411 is amended to read as follows:

"(a) Dependency and indemnity compensation shall be paid to a surviving spouse, based on the pay grade of the person upon whose death entitlement is predicated, at monthly rates set forth in the following table:

| "Pay grade | Monthly rate |
|---|---|
| E-1 | $415 |
| E-2 | 428 |
| E-3 | 438 |
| E-4 | 466 |
| E-5 | 479 |
| E-6 | 490 |
| E-7 | 514 |
| E-8 | 542 |
| E-9 | [1]567 |
| W-1 | 525 |
| W-2 | 546 |
| W-3 | 562 |
| W-4 | 595 |
| O-1 | 525 |
| O-2 | 542 |
| O-3 | 580 |
| O-4 | 613 |
| O-5 | 676 |
| O-6 | 761 |
| O-7 | 824 |
| O-8 | 903 |
| O-9 | 970 |
| O-10 | [2]1,061 |

"[1] If the veteran served as sergeant major of the Army, senior enlisted adviser of the Navy, chief master sergeant of the Air Force, sergeant major of the Marine Corps, or master chief petty officer of the Coast Guard, at the applicable time designated by section 402 of this title, the surviving spouse's rate shall be $610.

"[2] If the veteran served as Chairman of the Joint Chiefs of Staff, Chief of Staff of the Army, Chief of Naval Operations, Chief of Staff of the Air Force, or Commandant of the Marine Corps, at the applicable time designated by section 402 of this title, the surviving spouse's rate shall be $1,138.".

(b) Subsection (b) of such section is amended by striking out "$43" and inserting in lieu thereof "$48".

(c) Subsection (c) of such section is amended by striking out "$112" and inserting in lieu thereof "$125".

(d) Subsection (d) of such section is amended by striking out "$56" and inserting in lieu thereof "$62".

RATES OF DEPENDENCY AND INDEMNITY COMPENSATION FOR CHILDREN

SEC. 202. Section 413 is amended—

(1) by striking out "$189" in clause (1) and inserting in lieu thereof "$210";

(2) by striking out "$271" in clause (2) and inserting in lieu thereof "$301";

(3) by striking out "$350" in clause (3) and inserting in lieu thereof "$389"; and

(4) by striking out "$350" and "$71" in clause (4) and inserting in lieu thereof "$389" and "79", respectively.

RATES OF SUPPLEMENTAL DEPENDENCY AND INDEMNITY COMPENSATION FOR CHILDREN

SEC. 203. Section 414 is amended—

(1) by striking out "$112" in subsection (a) and inserting in lieu thereof "$125";

(2) by striking out "$189" in subsection (b) and inserting in lieu thereof "$210"; and

(3) by striking out "$96" in subsection (c) and inserting in lieu thereof "$107".

## TITLE III—AUTOMOBILE ASSISTANCE AND ADAPTIVE EQUIPMENT AMENDMENTS

SEC. 301. Section 1902 is amended—

(1) by striking out "he" each place it appears and inserting in lieu thereof "the Administrator";

(2) by striking out "$3,800" in subsection (a) and inserting in lieu thereof "$5,000"; and

(3) by amending subsection (b)—

(A) by inserting "(1)" before "The";

(B) by striking out "his" and inserting in lieu thereof "such person's"; and

(C) by adding at the end the following new paragraph:

"(2) In the case of any veteran (other than an eligible person) who is entitled to compensation under chapter 11 of this title for ankylosis of one or both knees, or one or both hips, the Administrator, under the terms and conditions set forth in section 1903 (a), (c), and (d) of this title and under regulations which the Administrator shall prescribe, shall provide such adaptive equipment to overcome the disability resulting from such ankylosis as is (A) necessary to meet the applicable standards of licensure established by the State of such veteran's residency or other proper licensing authority for the operation of such veteran's automobile or other conveyance by such veteran, or (B) determined to be necessary by the Chief Medical Director for the safe operation of such automobile or other conveyance by such veteran.".

SEC. 302. Section 1903(b) is amended by striking out "he" and inserting in lieu thereof "the Administrator" and striking out "his" both places it appears and inserting in lieu thereof "such person's".

## TITLE IV—VETERANS' ADMINISTRATION HOUSING BENEFITS AMENDMENTS

ESTABLISHMENT OF GRADUATED-PAYMENT PLANS IN VETERANS' ADMINISTRATION LOAN GUARANTY PROGRAM

SEC. 401. Section 1803(d)(2) is amended—

(1) by inserting "(A)" after "(2)"; and

(2) by adding at the end the following new subparagraphs:

"(B) The Administrator may guarantee loans with provisions for various rates of amortization corresponding to anticipated variations in family income. With respect to any loan guaranteed under this subparagraph—

"(i) the initial principal amount of the loan may not exceed the reasonable value of the property as of the time the loan is made; and

"(ii) the principal amount of the loan thereafter (including the amount of all interest to be deferred and added to principal) may not at any time be scheduled to exceed the projected value of the property.

"(C) For the purposes of subparagraph (B) of this paragraph, the projected value of the property shall be calculated by the Administrator by increasing the reasonable value of the property as of the time the loan is made at a rate not in excess of 2.5 per centum per year, but in no event may the projected value of the property for the purposes of such subparagraph exceed 115 per centum of such reasonable value. A loan made for a purpose other than the acquisition of a single-family dwelling unit may not be guaranteed under such subparagraph.".

SEC. 402. Section 1828 is amended—

(1) by inserting "(1)" after "constitution or law"; and

(2) by inserting "(2) restricting the manner of calculating such interest (including prohibition of the charging of interest on interest), or (3) requiring a minimum amortization of principal," after "lenders,".

INCREASE IN MAXIMUM AMOUNTS OF VETERANS' SPECIALLY ADAPTED HOUSING ASSISTANCE

SEC. 403. Section 802 is amended—

(1) by amending subsection (a)—

(A) by striking out "$30,000" and inserting in lieu thereof "$35,000";

(B) by striking out "him" each place it appears and inserting in lieu thereof "such veteran"; and

(C) by striking out "his" in clause (3) and inserting in lieu thereof "such veteran's"; and (2) by striking out "(2)" in subsection (b).

TECHNICAL AND CONFORMING AMENDMENTS

SEC. 404. Section 1826 is amended—

(1) by striking out subsection (a) in its entirety; and

(2) by striking out "(b)" in subsection (b).

EXTENSIONS OF MAXIMUM TERMS OF VETERANS' ADMINISTRATION-GUARANTEED LOANS FOR MOBILE-HOME PURCHASES

SEC. 405. Paragraph (1) of section 1819(d) is amended to read as follows:

"(d)(1) The maturity of any loan guaranteed under this section shall not be more than—

"(A) fifteen years and thirty-two days, in the case of a loan for the purchase of a lot;

"(B) twenty years and thirty-two days, in the case of a loan for the purchase of—

"(i) a single-wide mobile home; or

"(ii) a single-wide mobile home and a lot;

"(C) twenty-three years and thirty-two days, in the case of a loan for the purchase of a double-wide mobile home; or

"(D) twenty-five years and thirty-two days, in the case of a loan for the purchase of a double-wide mobile home and a lot.".

## TITLE V—MISCELLANEOUS PROVISIONS

### CONTINUED PAYMENT OF PENSION TO CERTAIN HOSPITALIZED VETERANS WHO ARE UNDERGOING A PRESCRIBED PROGRAM OF REHABILITATION

SEC. 501. Paragraph (1) of section 3203(a) is amended by adding at the end the following new subparagraph:

"(D) For the purposes of subparagraphs (B) and (C) of this paragraph, no period of time that does not exceed one hundred and eighty days within any twelve-month period shall be counted as time during which a veteran is being furnished hospital or nursing home care if the Administrator determines that the primary purpose for the furnishing of such care during such period of time is for the Veterans' Administration to provide such veteran with a prescribed program of rehabilitation services, under chapter 17 or 31 of this title, designed to restore such veteran's ability to function within such veteran's family and community.".

### HEADSTONES AND MARKERS IN CERTAIN CASES

SEC. 502. Subsection (b) of section 906 is amended to read as follows:

"(b) The Administrator shall furnish, when requested, an appropriate memorial headstone or marker to commemorate any veteran—

"(1) whose remains have not been recovered or identified;

"(2) Whose remains were buried at sea, whether by the veteran's own choice or otherwise;

"(3) whose remains were donated to science; or

"(4) whose remains were cremated and the ashes scattered without interment of any portion of the ashes,

for placement by the applicant in a national cemetery area reserved for such purposes under the provisions of section 1003 of this title, or in any private or local or State cemetery.".

SEC. 503. Subsection (a) of section 1003 is amended to read as follows:

"(a) The Administrator shall set aside, when available, suitable areas in national cemeteries to honor the memory of veterans—

"(1) who are missing in action;

"(2) whose remains have not been recovered or identified;

"(3) whose remains were buried at sea, whether by the member's own choice or otherwise;

"(4) whose remains were donated to science; or

"(5) whose remains were cremated and the ashes scattered without interment of any portion of the ashes.".

### RADIATION LITERATURE REVIEW

SEC. 504. (a)(1) The Administrator of Veterans' Affairs shall conduct a comprehensive review and scientific analysis of the literature covering studies already conducted or underway relating to the long-term adverse health (including genetic and psychological) effects in humans of exposure to radiation, including nuclear device, medical, and occupational exposures.

(2) The Administrator may, in carrying out the review and analysis of the literature provided for in paragraph (1), enter into such contracts or agreements with private or public agencies or persons for such necessary services, including the conduct of, in whole or in part, such review and analysis, as the Administrator considers appropriate.

(b) In conducting the review and analysis of the literature provided for in subsection (a), the Administrator shall provide for all appropriate coordination and consultation with other departments, agencies, and instrumentalities of the Federal Government that are conducting or have conducted scientific studies relating to the adverse health effects in humans of exposure to radiation.

(c)(1) Not later than ninety days after the date of the enactment of this Act, the Administrator shall submit to the appropriate committees of the Congress a report containing a description of the steps taken and plans made to assure the coordination and consultation required under subsection (b).

(2)(A) Not later than eighteen months after the date of the enactment of this Act, the Administrator shall submit to the appropriate committees of the Congress a report on the literature review and analysis conducted under subsection (a), together with such comments and recommendations for administrative or legislative action, or both, as the Administrator considers appropriate, including recommendations regarding the need for the Administrator to carry out additional research in any areas in which the Administrator determines that the report indicates such research is necessary for the resolution of questions as to whether certain significant adverse long-term health effects result from exposure to radiation.

(B) The Administrator shall submit copies of such report to the departments, agencies, and instrumentalities described in subsection (b) and shall recommend to the appropriate such departments, agencies, and instrumentalities that they carry out any such additional research.

(3)(A)(i) Not later than ninety days after the submission of the report required by paragraph (2), the Administrator shall, based on the information described in such report, develop and publish in the Federal Register, for public review and comment, proposed regulations containing proposed guidelines, standards, and other criteria (together with an explanation of the bases for such proposed guidelines, standards, and criteria) for resolving claims for benefits administered by the Veterans' Administration based on exposure during service in the Armed Forces of the United States to radiation from nuclear devices.

(ii) Proposed regulations developed and published pursuant to division (i) of this subparagraph shall include specification of any presumptions (including any presumptions regarding service and exposure) to be applied to the resolution of the claims to which such proposed guidelines, standards, and criteria in such proposed regulations apply.

(B)(i) Not later than ninety days after the completion of the public review and comment process provided for in subparagraph (A)(i), the Administrator shall publish in the Federal Register final regulations containing the guidelines, standards, and other criteria (together with an explanation of the bases for such guidelines, standards, and criteria) for resolving the claims involved.

(ii) On the same day as final regulations are published as required by division (i) of this subparagraph, the Administrator shall submit to the appropriate committees of the Congress any recommendations for legislative action that the Administrator considers appropriate in light of the guidelines, standards, and criteria contained in such regulations, the report submitted pursuant to paragraph (2) of this subsection, and any other available pertinent information.

(C) Nothing in subparagraph (A) shall be considered to limit in any way the discretion and authority of the Administrator to promulgate or prescribe regulations, guidelines, standards, or other criteria for resolving any claims described in subparagraph (A)(i) at any time earlier than the time prescribed in subparagraph (A) for the publication of the proposed regulations described in such subparagraph.

### MINIMUM ACTIVE-DUTY SERVICE REQUIREMENT

SEC. 505. (a) Chapter 53 is amended by inserting after section 3103 the following new section:

"§ 3103A. Minimum active-duty service requirement

"(a) Notwithstanding any other provision of law, the requirements for eligibility for or entitlement to any benefit under this title or other laws administered by the Veterans' Administration based on the duration of the active duty in one of the Armed Forces of a person who initially enters such active duty after September 7, 1980, shall be exclusively as prescribed in this title.

"(b)(1) Except as provided in paragraph (2) of this subsection, a person who initially enters active duty in one of the Armed Forces after September 7, 1980, shall not, by reason of such active duty, be provided with any benefit under this title or other laws administered by the Veterans' Administration—

"(A) if such person's initial period of enlistment or other initial period of obligated service is for twenty-four or more months of active duty and such person is discharged or released from active duty before completing at least twenty-four months of such person's obligated period of active duty; or

"(B) if such person's initial period of enlistment or other initial period of obligated service is for less than twenty-four months of active duty and such person is discharged or released from active duty before completing the full period of such enlistment or other obligated service.

"(2) Paragraph (1) of this subsection shall not apply to—

"(A) any person who is discharged or released from active duty (i) under section 1171 or 1173 of title 10, or (ii) because of a service-connected disability;

"(B) any person who has a disability that the Administrator has determined to be compensable under chapter 11 of this title;

"(C) a commissioned or warrant officer who initially enters a period of active duty prior to October 1, 1981;

"(D) the provision of any benefit for or on account of any service-connected disability or condition;

"(E)(i) the continuation of insurance pursuant to section 768(a)(1)(A) of this title; or

"(ii) the right to designate or change the designation of a beneficiary or beneficiaries pursuant to section 770(a) of this title; or

"(F) any benefit provided under applicable law prior to October 1, 1981.

"(c)(1) Except as provided in subsection (b)(2) of this section and paragraph (2) of this subsection, no dependent or survivor of a person as to whom paragraph (1) of subsection (b) of this section requires the denial of benefits shall, by reason of such person's period of active duty, be provided with any benefit under this title or other laws administered by the Veterans' Administration.

"(2) Paragraph (1) of this subsection shall not apply to—

"(A) the survivors or dependents of a person to whom paragraph (1) of subsection (b) of this section is made inapplicable by paragraph (2)(A), (B), or (C) of such subsection;

"(B) benefits under chapter 13, 17, 35, and 37 and sections 907 and 908 of this title; or

"(C) the payment of insurance pursuant to section 768(a)(1)(A) of this title.

"(d) For the purposes of this section, the term 'benefit' includes a right or privilege but does not include a refund or payment, pursuant to section 1623, 1624, or 1625 of this title, of a participant's contributions to the educational benefits program provided by chapter 32 of this title.".

(b) No provisions of the amendment made by subsection (a) of this section shall be construed as requiring (or as authorizing any official or employee of the Federal Government to request) any person to repay the United States Government for a benefit, right, or privilege which was provided prior to October 1, 1981.

(c) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 3103 the following:

"3103A. Minimum active-duty service requirement.".

DELIMITING DATES FOR SURVIVING SPOUSES OF CERTAIN SERVICE-CONNECTED DISABLED VETERANS

SEC. 506. (a) Section 1712(b)(1) is amended—

(1) by striking out "or" at the end of clause (A);

(2) by amending clause (B) to read as follows:

"(B) the date of death of a veteran who dies while a total disability evaluated as permanent in nature was in existence, or"; and

(3) by adding at the end the following new clause:

"(C) the date on which the Administrator determines that the person from whom eligibility is derived died of a service-connected disability.".

(b) Subsection (f) of section 2 of Public Law 90-631 (82 Stat. 1331) is amended—

(1)(A) by striking out "(f) In" and inserting in lieu thereof "(f)(1) Except as provided in paragraph (2) of this section, in", (B) by striking out "(C)" and inserting in lieu thereof "(D)", and (C) by striking out "eight" and inserting in lieu thereof "ten"; and

(2) by adding at the end the following new paragraph:

"(2) Where the death of the person from whom such eligibility is derived occurred before December 1, 1968, and the date on which the Administrator of Veterans' Affairs determines that such person died of a service-connected disability is later than December 1, 1968, the delimiting period referred to in section 1712(b) of such title shall run from the date on which the Administrator makes such determination.".

WAIVER OF PRO RATA REFUND REQUIREMENT IN THE CASE OF CERTAIN INSTITUTIONS

SEC. 507. Section 1776 is amended by adding at the end the following new subsection:

"(d) The Administrator may waive the requirements of subsection (c)(13) of this section in the case of an institution of higher learning which—

"(1) is operated by an agency of a State or of a unit of local government,

"(2) is located within such State or, in the case of an institution operated by an agency of a unit of local government, within the boundaries of the area over which such unit has taxing jurisdiction, and

"(3) is a candidate for accreditation by a regional accrediting association,

if the Administrator determines, pursuant to regulations which the Administrator shall prescribe, that such requirements would work an undue administrative hardship because the total amount of tuition, fees, and other charges at such institution is nominal.".

IOANNIS A. LOUGARIS VETERANS' ADMINISTRATION MEDICAL CENTER

SEC. 508. The Veterans' Administration Medical Center in Reno, Nevada, shall hereafter be known and designated as the "Ioannis A. Lougaris Veterans' Administration Medical Center". Any reference to such center in any law, regulation, map, document, record, or other paper of the United States shall after such date be deemed a reference to the Ioannis A. Lougaris Veterans' Administration Medical Center.

TITLE VI—EFFECTIVE DATES

SEC. 601. (a) Except as provided in subsections (b) and (c) of this section, the amendments made by this Act shall take effect on the date of enactment of this Act.

(b) The provisions of titles I and II and sections 301, 401, 402, 403, and 405 shall take effect on October 1, 1981.

(c) The amendments made by sections 502 and 503 shall take effect on October 1, 1981, and shall apply with respect to veterans dying before, on, or after such date.

MOTION OFFERED BY MR. MONTGOMERY

Mr. MONTGOMERY. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MONTGOMERY moves to strike out all after the enacting clause of the Senate bill, S. 917, and to insert in lieu thereof the provisions of the bill, H.R. 3995, as passed by the House.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill to amend title 38, United States Code, to provide a cost-of-living increase in the rates of disability compensation for disabled veterans and in the rates of dependency and indemnity compensation for survivors of disabled veterans, and for other purposes."

A motion to reconsider was laid on the table.

A similar House bill (H.R. 3995) was laid on the table.

## AUTHORIZATION FOR CONSERVATION PROGRAMS ON MILITARY AND OTHER PUBLIC LANDS

Mr. JONES of North Carolina. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1952) to authorize appropriations to carry out conservation programs on military reservations and public lands during fiscal years 1982, 1983, and 1984, as amended.

The Clerk read as follows:

H.R. 1952

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That section 101 of the Act of September 15, 1960 (commonly known as the Sikes Act, 16 U.S.C. 670a) is amended—

(1) by amending the second sentence thereof—

(A) by striking out "and (3)" and inserting in lieu thereof "(3)"; and

(B) by inserting immediately before the period the following: ", and (4) specific habitat improvement projects and related activities and adequate protection for species of fish, wildlife, and plants considered threatened or endangered"; and

(2) by adding at the end thereof the following new sentence: "Cooperative plans agreed to under the authority of this section and section 102 shall not be deemed to be, nor treated as, cooperative agreements to which the Federal Grant and Cooperative Agreement Act of 1977 (41 U.S.C. 501 et seq.) applies.".

SEC. 2. Section 106 of the Sikes Act (16 U.S.C. 670f) is amended—

(1) by inserting "and not to exceed such sums as may be necessary for each of fiscal years 1982, 1983, and 1984," immediately after "September 30, 1981," in each of subsections (b) and (c); and

(2) by adding at the end thereof the following new subsection:

"(d) The Secretary of Defense and the Secretary of the Interior may each use any authority available to him under other laws relating to fish, wildlife, or plant conservation or rehabilitation for purposes of carrying out the provisions of this title.".

SEC. 3. The second sentence of section 201 of the Sikes Act (16 U.S.C. 670g) is amended by inserting "of fish, wildlife, and plants" immediately after "species".

SEC. 4. Section 202 of the Sikes Act (16 U.S.C. 670h) is amended by adding at the end thereof the following new subsection:

"(d) Agreements entered into by State agencies under the authority of this section shall not be deemed to be, or treated as, cooperative agreements to which the Federal Grant and Cooperative Agreement Act of 1977 (41 U.S.C. 501 et seq.) applies.".

SEC. 5. Section 209 of the Sikes Act (16 U.S.C. 670o) is amended—

(1) by inserting "and not to exceed such sums as may be necessary for each of fiscal years 1982, 1983, and 1984," immediately after "September 30, 1981," in each of subsections (a) and (b); and

(2) by adding at the end thereof the following new subsections:

"(c) The Secretary of the Interior and the Secretary of Agriculture may each use any authority available to him under other laws relating to fish, wildlife, or plant conservation or rehabilitation for purposes of carrying out the provisions of this title.

"(d) The Secretary of the Interior and the Secretary of Agriculture may each make purchases and contracts for property and services from, or provide assistance to, the State agencies concerned, if such property, services or assistance is required to implement those projects and programs carried out on, or of benefit to, Federal lands and identified in the comprehensive plans or cooperative agreements developed under section 202, without regard to title III (other than section 304) of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 251-260). Contract authority provided in this Section is effective only to such extent or in such amounts as are provided in appropriation acts."

The SPEAKER pro tempore. Is a second demanded?

Mr. FORSYTHE. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from North Carolina (Mr. JONES) will be recognized for 20 minutes, and the gentleman from New Jersey (Mr. FORSYTHE) will be recognized for 20 minutes.

The Chair recognizes the gentleman from North Carolina (Mr. JONES).

Mr. JONES of North Carolina. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 1952 authorizes such sums as may be necessary to carry out the fish and wildlife conservation and recreation programs on military and other Federal lands provided for in what is commonly known as the Sikes Act. The purpose of the legislation is first, to assure that funding will be available to the Secretaries of the Interior, Defense, and Agriculture over the next 3 fiscal years to implement these programs; second, to encourage these Departments to expand their efforts to protect wildlife and to make these lands available to the public for hunting, fishing and other outdoor recreational experiences; and third, to clarify certain ambiguities in the act resulting from the passage of other laws since this law was enacted.

Originally, the Sikes Act was passed to take advantage of the tremendous fish and wildlife and outdoor recreation potential on some 26 million acres of military property throughout our Nation. It was later amended to include 620 million acres of other Federal lands—primarily Forest Service and Bureau of Land Management properties—with equal potential for these public uses. For many communities in our Nation, these lands represent the only nearby opportunity for wildlife oriented recreation and, wherever feasible, such lands should be made available to the general public, as well as to military personnel, for these healthful and enjoyable activities.

In addition, these lands contain large populations of fish, wildlife, and plant species—some of which are endangered. The Federal Government, with the encouragement of my committee, spends a good bit of money to acquire wildlife habitat to protect these precious natural resources. The Sikes Act expresses the strong congressional intent that the landlords of other federally owned properties pay serious attention to their responsibilities for the conservation of fish, wildlife, and plant resources so that we do not inadvertently wipe out with one hand what we are protecting with the other.

Mr. Speaker, the purposes and the results of this act have been widely acclaimed both by those who carry it out and by those who have enjoyed its benefits. Certainly its purposes are in line with the expressed desire of the present administration for multiple uses of public lands and taking better care of the lands which we currently own. Controversy arises only with regard to funding authorities with the Departments claiming that other laws provide sufficient authorities under which they can carry out Sikes Act programs. We do not believe that this is true or, more importantly, that without the authorities provided by the Sikes Act what has been accomplished would have occurred. Recognizing the current political and budgetary climate, however, we have acceded to the administration's wishes by deleting specific funding authorization amounts from the bill before us. At the same time, the committee has specifically authorized the use of other authorities to carry out these programs.

Mr. Speaker, these are important programs—important to the protection of our fish, wildlife, and plant resources; important to the conservation of our public lands; and important to the health and welfare of our citizens. I urge my colleagues to adopt H.R. 1952 so they may be continued.

Mr. Speaker, I yield such time as he may consume to the chairman of the Subcommittee on Fisheries and Wildlife Conservation and the Environment, the gentleman from Louisiana, (Mr. BREAUX) who will spell out in more detail the provisions of H.R. 1952 and the programs carried out under the Sikes Act.

Mr. BREAUX. I thank the gentleman for yielding.

Mr. Speaker, I rise in support of H.R. 1952, as amended, a bill to reauthorize appropriations to carry out conservation programs on military reservations and other public lands during fiscal years 1982, 1983, and 1984, and for other purposes.

This legislation, commonly known as the Sikes Act, has been in effect since 1960. Title I of the act authorizes the Secretary of Defense to carry out programs of fish and wildlife conservation and rehabilitation on military reservations in accordance with cooperative plans agreed to by the Secretary of Defense, the Secretary of the Interior, and the appropriate State agency. It was amended in 1968 to include the development of public outdoor recreation programs.

Title II of the act, established in 1974, directs the Secretaries of the Interior and Agriculture, in cooperation with appropriate State agencies, to plan, develop, maintain, and coordinate programs for the conservation and rehabilitation of fish and wildlife on Bureau of Land Management and Forest Service lands. It also directs the Secretary of the Interior to adopt, modify, and implement such conservation and rehabilitation programs on lands under the jurisdiction of the Department of Energy and the National Aeronautics and Space Administration, with the prior written approval of those agencies.

Mr. Speaker, prior to 1968 no moneys were authorized to carry out programs under this act but since that time the authorized amounts have increased steadily to the existing levels which include $1.5 million for the Department of Defense and $3 million for the Department of the Interior annually under title I, and $10 and $12 million to the Bureau of Land Management and the Forest Service, respectively, each year to carry out title II activities.

Despite these authorization levels, nearly all of the agencies involved, with certain limited exceptions, have chosen not to request funding under the authority of the Sikes Act but to earmark funds received under other authorities for Sikes Act activities.

As introduced, H.R. 1952, would have continued the existing authorization levels. However, during hearings before the Subcommittee on Fisheries and Wildlife Conservation and the Environment each of the agencies involved presented testimony opposing H.R. 1952 since they could continue to carry out the programs under other funding authorities. At the same time, these agencies reaffirmed their belief in and support for the purposes of the Sikes Act and the programs carried out under it. In addition, no money has been included in the budget for the Sikes Act. Accordingly, the committee amended the bill to provide only for such sums as may be necessary to carry out these programs.

In addition, H.R. 1952 amends both titles of the act to provide adequate protection for endangered or threatened species of fish, wildlife, and plants, to clarify that cooperative agreements referred to in this act are documents in which Federal and State agencies mutually agree in principle on wildlife programs—rather than legal instruments as defined under the Federal Grant and Cooperative Agreements Act—and to specifically author-

ize the use of any authorities available under other laws relating to fish, wildlife, or plants to carry out the provisions of this act.

Finally, Mr. Speaker, the bill would amend title II of the act to permit the Secretary of the Interior and the Secretary of Agriculture to make purchases and contracts from, or to provide assistance to, the State agencies without going through the advertising and competitive bidding requirements under the Federal Property and Administrative Services Act.

Mr. Speaker, the lands covered by this act include some 26 million acres of military reservations and well over 600 million acres of other public lands. Much of this acreage constitutes valuable fish, wildlife, and plant habitat. A large number of endangered species may be found on these lands and they offer high potential for public outdoor recreation at a time when the more traditional sources of such recreation, like the National Park Service, are suffering from overuse.

Under this act, approximately 240 individual cooperative agreements have been negotiated between military bases, the Fish and Wildlife Service and the relevant State fish and game agencies to establish conservation programs and provide hunting and fishing opportunities for military personnel and the general public. Under the agreements, 130 fishery projects and 257 wildlife-related projects were carried out on military installations by the Fish and Wildlife Service in 1980. In addition, proceeds from the sale of hunting and fishing permits on Army, Navy, and Air Force bases, amounting to $950,000 in 1981, have been used for related programs.

The BLM has placed primary emphasis on completing inventories on some 39 million acres but, as of the end of 1980, it has also spent some $6.9 million to complete or implement habitat management programs on 26.7 million acres in 15 States which have signed cooperative agreements. Comprehensive conservation plans have been jointly prepared with 41 of the 42 States containing Forest Service lands where the primary emphasis is given to fish and wildlife habitat improvement projects.

Mr. Speaker, much important conservation work has been carried out under the authority of the Sikes Act—much more needs to be done. The present administration wishes to place emphasis on improving the existing public lands and multiple uses of those lands. That is exactly what the Sikes Act is about.

The administration claims that this legislation is unnecessary because the programs can be carried out under other authorities. The question is whether they will be carried out without the impetus provided by the congressional directives contained in the act. I doubt it and many persons involved in carrying out these programs doubt it as well. In addition, I believe it is important to reauthorize funding under this act to provide for future needs, to reiterate our commitment to the conservation of our Nation's fish and wildlife resources on public lands and to provide for continued oversight over these important programs, however they are funded. My subcommittee intends to follow their direction very closely over the next 3 years.

Mr. Speaker, I urge the adoption of H.R. 1952.

Mr. FORSYTHE. Mr. Speaker, I yield myself such time as I may consume.

□ 1400

Mr. Speaker, I join my colleague in supporting H.R. 1952. This legislation would authorize appropriations in order to continue to carry out fish, wildlife, plant conservation and rehabilitation programs on military reservations and other public lands.

The Bureau of Land Management, the Forest Service, the National Aeronautics and Space Administration and the Energy Department together control over 600 million acres of public land, much of which provides habitat for important fish, wildlife, and plant species. Many of these species are listed as endangered or threatened. Our military and public lands also contain a great deal of potential for the development of public outdoor recreation programs.

The Sikes Act recognizes the importance of Federal and State cooperation in carrying out the conservation, rehabilitation, and recreation programs on these lands. The act requires the development of comprehensive plans for such programs and encourages State participation in these programs through cooperative agreements with the appropriate Federal agencies.

Although the Departments of Defense, Interior, and Agriculture do not request funds under the authority of the Sikes Act to carry out these programs, they are, nevertheless, using funds under their other authorities to carry out the activities called for under the act. These agencies have indicated their support for the program and would like to see it continued, even though they have not requested any funds in their fiscal year 1982 budget.

I do not normally support open-ended authorizations. However, in this case I take exception because it is important that we maintain our congressional oversight responsibility for those programs carried out under the act. A 3-year authorization will accomplish that purpose. As a matter of formality, the bill would authorize such sums as necessary under the Sikes Act for each of fiscal years 1982, 1983, and 1984. It would also authorize the various agencies to use their other existing funding authorities to carry out such programs—as is already being done. We have included a number of other provisions in our amendment which will conform the different titles and simplify administration and implementation of the act.

Mr. Speaker, if we are to encourage the comprehensive management of fish, wildlife, and plant species on the public lands, then enactment of this legislation will provide a big step toward that goal. It is for these reasons that I support H.R. 1952 and want to encourage my colleagues to do the same.

Mr. JONES of North Carolina. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from North Carolina (Mr. JONES) that the House suspend the rules and pass the bill, H.R. 1952, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The title was amended so as to read: "A bill authorizing appropriations to carry out conservation programs on military reservations and public lands during fiscal years 1982, 1983, and 1984, and for other purposes.".

A motion to reconsider was laid on the table.

## GENERAL LEAVE

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed, H.R. 1952.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

## COMMERCIAL FISHERMEN REIMBURSEMENT

Mr. JONES of North Carolina. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3016) to give permanent effect to the provisions of the Fishermen's Protective Act of 1967 relating to the reimbursement of United States commercial fishermen for certain losses incurred incident to the seizure of their vessels by foreign nations, as amended.

The Clerk read as follows:

H.R. 3016

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That section 7 of the Fishermen's Protective Act of 1967 (22 U.S.C. 1977) is amended—

(1) by adding immediately after the fourth sentence of subsection (c) the follow-

ing new sentence: "Those fees not currently needed for payments under this section shall be kept on deposit or invested in obligations of, or guaranteed by, the United States and all revenues accruing from such deposits or investments shall be credited to such separate account."; and

(2) by striking out "The provisions of this section shall be effective until October 1, 1981; except that payments" in subsection (e) and inserting in lieu thereof "Payments".

The SPEAKER pro tempore. Is a second demanded?

Mr. FORSYTHE. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from North Carolina (Mr. JONES) will be recognized for 20 minutes, the gentleman from New Jersey (Mr. FORSYTHE) will be recognized for 20 minutes.

The Chair recognizes the gentleman from North Carolina (Mr. JONES).

Mr. JONES of North Carolina. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 3016, a bill to give permanent effect to section 7 of the Fishermen's Protective Act, which relates to the reimbursement of U.S. commercial fishermen for losses incurred incident to seizure of their vessels by foreign nations. There have been 178 of these seizures since section 7 went into effect in 1969. It provides indemnity for actual losses, including damage to vessel and gear and loss of catch by confiscation or spoilage. It does not indemnify for payment of fines, license fees or other charges paid to secure release of vessel or crew. These items are insured under a separate program not affected by this bill.

For a U.S. fisherman to be entitled to indemnity under section 7, the foreign seizure of his vessel must be illegal under U.S. laws and treaties as defined in the Fishermen's Protective Act.

Mr. Speaker, section 7 has been renewed and extended in 1972, 1976, and 1977, with the consistent support of the Merchant Marine and Fisheries Committee, which I chair, this House, and the Congress. It is the purpose of H.R. 3016 to make permanent those provisions of the act which provide the protection which we have outlined so that it will not be necessary to periodically reinstate the program hereafter.

Mr. Speaker, in addition to extending and making permanent the provisions of section 7 of the Fishermen's Protective Act, H.R. 3016 authorizes the Secretary of Commerce to invest fees paid by U.S. fishermen in interest bearing obligations of the United States. These fees provide more than 60 percent of the cost of the program. This and other features of the bill will be explained in greater detail by Congressman BREAUX, chairman of the subcommittee which conducted the hearings and developed his legislation.

The tuna and shrimp fleets of the United States are an important part of our national economy. Since there is no private insurance to protect fishermen from loss due to illegal foreign seizure of their vessels and section 7 is due to terminate on October 1, 1981, enactment of H.R. 3016 is timely and necessary. It has the full support of the committee, which I chair. It deeply affects the economic security and well-being of our fishing industry. I urge my colleagues to vote for this bill.

Mr. Speaker, I now yield such time as he may consume to the gentleman from Louisiana (Mr. BREAUX), chairman of the Subcommittee on Fisheries and Wildlife Conservation and the Environment.

Mr. BREAUX. Mr. Speaker, I rise in support of H.R. 3016, a bill giving permanent effect to those provisions of the Fishermen's Protective Act which relate to the reimbursement of U.S. commercial fishermen for certain losses incurred incident to the seizure of their vessels by foreign nations.

Section 7 of the Fishermen's Protective Act (FPA), the section that is given permanent effect by H.R. 3016, is considered essential to the well-being and continued viability of our distant water fishing fleets.

During hearings that were held this spring on the reauthorization of this program, administration witnesses confirmed that it is still the position of the U.S. Government to support and protect the free operation of U.S.-flag fishing vessels outside national fisheries jurisdictions recognized by the United States. Since highly migratory species, such as tuna, are not subject to national fisheries jurisdiction, U.S. Government policy also supports the free operation of those vessels beyond 12 nautical miles from the baseline from which the territorial sea is measured. Absent the continuation of this policy, both the international legal rights maintained by the Government and the further development of the distant water American fishing industry will suffer.

The fisheries that would be most adversely affected by our failure to act on this legislation, the distant water tuna and shrimp fleets of the United States, make substantial contributions to our national economy. That contribution has been established at close to $1 billion. Industry witnesses who testified at our hearings submitted evidence that no private insurance is currently available to protect against the threat of illegal foreign seizure. A failure to continue the section 7 insurance program beyond its current October 1, 1981, expiration date will certainly result in the loss to the United States of these valuable fleets.

After receiving unanimous support for the extension of this valuable program, first enacted in 1968 and extended in 1972, 1976, and 1977, we determined that it should be given permanent effect. That decision was unanimously endorsed by the Fisheries Subcommittee which I chair and the full Merchant Marine and Fisheries Committee.

Mr. Speaker, H.R. 3016 was unanimously adopted as I have indicated with one important amendment, offered by my good friend and colleague, the ranking member of the subcommittee, Mr. FORSYTHE. His amendment would allow the Secretary of Commerce, who administers this program and enters into the insurance arrangements with concerned U.S. fishermen, to invest the fees paid by such fishermen in interest-bearing accounts or obligations of the U.S. Government. Through such an investment scheme, we hope to further defray the minimum cost that has been incurred by the Government throughout the history of this program.

Mr. Speaker, some Members might express concern over the permanent authorization of a program. That should not be the case with regard to this program which, since 1967, has been largely a pay-as-you-go program. From the date of enactment 178 claims for reimbursement have been made under section 7. Of the $4.357 million that has been paid, $2.628 million or 60.3 percent of the total has been fully paid by fishing industry fees and assessments. Industry fees have also paid for the total cost of the administration of the program—as specified in the law itself.

Mr. Speaker, this bill enjoys not only the full support of the Merchant Marine and Fisheries Committee but our distant water fishing fleet. I urge the full House to adopt this important legislation.

Mr. FORSYTHE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I join my distinguished chairman in supporting H.R. 3016. I support this legislation because it is essential to the continued economic existence of a U.S. distant water fishery.
distant water fishery.

H.R. 3016 would give permanent effect to section 7 of the Fishermen's Protective Act—which provides for a cooperative insurance program to allow American fishing vessel owners to recoup economic losses resulting from the illegal seizure of their vessels by foreign countries. H.R. 3016 would also amend the Fishermen's Protective Act to allow the Secretary of Commerce to invest the fees from this insurance program into interest-bearing accounts. Interest derived from these

investments would then be used to reduce the need for appropriations to carry out section 7.

The reason we are extending section 7 is that the United States does not recognize national fisheries jurisdiction over highly migratory species, such as tuna. Since some Central and South American countries have claimed national jurisdiction over tuna, the U.S. tuna fleet is subject to illegal seizures in their traditional fishing grounds. To remove the protection against economic losses provided by the section 7 insurance program could ultimately result in the loss of portions of our tuna fleet as they are driven from these grounds.

I am concerned with what the ramifications of a decline in the tuna industry would mean to our economy. The tuna industry provides direct employment for over 30,000 people and indirect employment for thousands more in support industries such as shipbuilding, engineering, scientific research, and food wholesaling and retailing. The annual payroll for just those employed directly in the tuna industry amounts to over $200 million. Overall, the industry contributes over $1.2 billion to the gross national product.

The Fishermen's Protective Act benefits another valuable fishing industry which is subject to illegal seizures—the distant water shrimp industry. This fleet constitutes a small, but significant part of the shrimp industry. In 1979 the U.S.-shrimp catch in international waters was 18.6 million pounds and was valued at over $31 million. As is the case with the tuna industry, the protection against economic losses provided by the insurance program of section 7 helps insure that the distant water shrimp fleet will continue this valuable contribution to the U.S. economy.

Mr. Speaker, section 7 is essential to the successful efforts of both the shrimp and tuna distant water fishing fleets. It provides protection to U.S. fishermen as they continue their historic efforts to harvest the fishery resources of the high seas—and H.R. 3016 will insure that this protection will continue to be available. H.R. 3016 will also insure that the cost of this protection to the American public will be significantly reduced.

For these reasons, I urge my colleagues to join me in supporting H.R. 3016.

Mr. JONES of North Carolina. Mr. Speaker, I have no further requests for time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from North Carolina (Mr. JONES) that the House suspend the rules and pass the bill, H.R. 3016, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The title was amended so as to read: "A bill to give permanent effect to the provisions of the Fishermen's Protective Act of 1967 relating to the reimbursement of United States commercial fishermen for certain losses incurred incident to the seizure of their vessels by foreign nations; and for other purposes."

A motion to reconsider was laid on the table.

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 1191) to extend for 1 year the authority of the Secretary of Commerce to reimburse commercial fishermen of the United States for certain losses incurred as the result of the seizure of their vessels by foreign nations, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1191

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That section 7 of the Fishermen's Protective Act of 1967 (22 U.S.C. 1977) is amended—

(1) in subsection (c) by inserting the following new sentence immediately after the fourth sentence thereof: "Those fees not currently needed for payments under this section shall be kept on deposit or invested in obligations of, or guaranteed by, the United States, and all revenues accruing from such deposits or investments shall be credited to such separate account."; and

(2) in subsection (e) by striking "October 1, 1981," and substituting "October 1, 1982,".

MOTION OFFERED BY MR. JONES OF NORTH CAROLINA.

Mr. JONES of North Carolina. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. JONES of North Carolina moves to strike out all after the enacting clause of the Senate bill, S. 1191, and to insert in lieu thereof the provisions of the bill, H.R. 3016, as passed by the House.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read a third time, and passed.

The title of the Senate bill was amended so as to read: "A bill to give permanent effect to the provisions of the Fishermen's Protective Act of 1967 relating to the reimbursement of United States commercial fishermen for certain losses incurred incident to the seizure of their vessels by foreign nations; and for other purposes."

A motion to reconsider was laid on the table.

A similar House bill (H.R. 3016) was laid on the table.

GENERAL LEAVE

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill first passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

## OFFICE OF ENVIRONMENTAL QUALITY REAUTHORIZATION

Mr. JONES of North Carolina. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1953) to authorize appropriations for the operations of the Office of Environmental Quality and the Council on Environmental Quality during fiscal years 1982, 1983, and 1984, as amended.

The Clerk read as follows:

H.R. 1953

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That section 205 of the Environmental Quality Improvement Act of 1970 (42 U.S.C. 4374) as amended—

(1) by striking out "; and" at the end of paragraph (a) and inserting in lieu thereof a period; and

(2) by adding at the end thereof the following:

"(c) $44,000 for the fiscal years ending September 30, 1982.

"(d) Such sums as may be necessary for each of the fiscal years ending September 30, 1983, and September 30, 1984.".

The SPEAKER pro tempore. Is a second demanded?

Mr. FORSYTHE. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from North Carolina (Mr. JONES) will be recognized for 20 minutes, and the gentleman from New Jersey (Mr. FORSYTHE) will be recognized for 20 minutes.

The Chair recognizes the gentleman from North Carolina (Mr. JONES).

Mr. JONES of North Carolina. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 1953, a bill to authorize appropriations for the operation of the Office of Environmental Quality and the Council on Environmental Quality for each of the fiscal years 1982, 1983, and 1984.

The Council on Environmental Quality, consists of three members appointed by the President. It is located within the Executive Office of the President. It came into existence under the National Environmental Policy Act of 1970. Its purpose is to provide to the President and the Congress advice on environmental issues,

to supervise the operation of the National Environmental Policy Act, and to conduct studies and provide reports on environmental issues.

The Council is partially funded under the National Environmental Policy Act which provides a continuing authorization of $1 million per year. This authorization is not affected by H.R. 1953, Heretofore, however, the Council and its staff have received an additional $3 million per year authorization under the Environmental Quality Improvement Act of 1970. H.R. 1953 reauthorizes appropriations under that act but reduces the reauthorization to $44,000 per year, this being the amount requested by the President.

The Merchant Marine and Fisheries Committee originally recommended a total authorization of $1,500,000 consisting of the $1 million already authorized under the National Environmental Policy Act and $500,000 under H.R. 1953 for each of the 3 fiscal years 1982, 1983, and 1984. Recent events have prompted us to reduce that authorization to the level requested by the administration, that being the total sum of $1,044,000. We urge our colleagues to support H.R. 1953 in the amended form which incorporates the administration's request for the funding of the Council on Environmental Quality and its staff.

Mr. Speaker, I now yield such time as he may consume to the chairman of the Subcommittee on Fisheries and Wildlife Conservation and the Environment, the gentleman from Louisiana (Mr. BREAUX), who will explain in greater detail the provisions of H.R. 1953, as amended.

□ 1410

Mr. BREAUX. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, this bill, H.R. 1953, would provide continuing authority for appropriations under the Environmental Quality Improvement Act of 1970 to provide for the Office of Environmental Quality. This office provides the staff support for the Council on Environmental Quality.

The Council on Environmental Quality and its staff receive funding authorizations under both the National Environmental Policy and Environmental Quality Improvement Acts. The former provides a continuous authorization of $1 million per year for an unspecified period. The authorization of the Environmental Quality Improvement Act, currently set at $3 million per year, will expire at the end of this fiscal year.

The Council on Environmental Quality was established by the National Environmental Policy Act. This three-member Council, located within the Executive Office of the President, provides advice to the President and Congress on environmental issues, oversees the operation of NEPA, and conducts studies on environmental issues. The Reagan administration at first considered abolishing the Council but later decided to maintain it at a substantially reduced level. They have also changed their mind regarding the level of funding, at first requesting a total authorization level for 1982 of $2,044,000, then changing that figure to $1,044,000. The Merchant Marine Committee, in order to provide the administration some flexibility if it decided to change its mind again, passed out a bill which would have provided a total authorization level of $1,500,000.

Since the time we reported out the bill, two events have occurred which have encouraged us to reduce that authorization to the level requested by the administration. First, the administration decided to fire not only the Council members, but also the entire professional staff of that organization, some of whom had served through three administrations, two of them Republican. This will, in my opinion, considerably lessen the effectiveness of CEQ and the quality of the advice that it will provide to the executive branch. Second, the House of Representatives, in passing the HUD-independent agencies appropriations bill, voted to provide CEQ with the same level of funding as requested by the administration. In light of those events, we have decided to reduce the authorization level and the bill we are considering reflects that change.

I still believe that the Council on Environmental Quality can play an important role in the executive branch if they are listened to. I urge my colleagues to support this legislation.

Mr. FORSYTHE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I join my distinguished chairman in supporting H.R. 1953. I support this legislation because it will permit the continued operation of one of the most effective protectors of environmental quality in our country—the Council on Environmental Quality.
vironmental Quality.

Although my colleagues are probably aware of many of CEQ's achievements, I feel it is important to mention some of the most notable ones as we consider this authorization. CEQ has, for example, prepared 11 annual reports on the state of the national and global environment which are widely circulated reference works serving several Federal agencies, the Congress, international and educational institutions, and the general public. These reports have had a major influence in directing this Nation's efforts to improve the quality of our environment. CEQ has also prepared special reports on matters of exceptional national and international importance, such as the Global 2000 Report to the President and OCS Oil and Gas—An Environmental Assessment.

In addition to its duties as an environmental affairs think tank, CEQ has been given the responsibility for implementing the environmental impact statement requirements of the National Environmental Policy Act. Recognizing the need to make this process more responsive to the real needs of decisionmakers CEQ, in 1979, established a new set of regulations. These new regulations, which are now widely acclaimed for improving the impact statement process, have reduced delays and paperwork and made the impact statement process more useful for agency decisionmakers.

During hearings on H.R. 1953, the Subcommittee on Fisheries and Wildlife Conservation and the Environment found that the Council on Environmental Quality had discharged its duties well. Not only has CEQ provided high quality scientific data to the President, but the agency has also insured that environmental issues are considered in the decisionmaking process of the highest councils of Government. CEQ performs the invaluable function of providing the President with its analysis of issues so that the President is fully informed of the environmental implications of pending issues.

The General Accounting Office, which recently conducted an independent audit of CEQ, has also concluded that CEQ's performance deserves national acclaim. The GAO report states, in part:

> CEQ's role is perceived as unique and important. It enjoys a reputation for being an effective agency that addresses environmental issues from other than a regulatory perspective. Most believe that another agency would not be as effective in carrying out CEQ's mandate and responsibilities.

Mr. Speaker, I believe that the mandates Congress gave CEQ are important. However, if CEQ is to continue fulfilling those mandates it must be provided with adequate funding. In fact, as the administration continues to review and streamline the regulations and programs of various agencies it may find additional uses for the expertise which CEQ can provide.

The role the Council has played in policy analysis and in the coordination of Federal environmental initiatives has been a valuable one to previous administrations and to the Congress. Although CEQ's role may be reduced, I believe that the Council on Environmental Quality can still be very useful to this administration. Because the Council itself is not a regulatory agency it could provide impartial advice regarding ways to reduce Federal regulations without sacrificing our national commitment to environmental quality.

Mr. Speaker, I have given considerable thought to the authorization levels provided by H.R. 1953 and believe they are adequate, but not excessive. I believe we should give the administration as much latitude as possible during its first year and keep opportunities open for it to utilize all the assistance which is available to it. I urge my colleagues to join me in supporting H.R. 1953.

Mr. Speaker, I yield 5 minutes to the gentleman from California (Mr. DANNEMEYER).

Mr. DANNEMEYER. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I rise in opposition to this bill now before the House, H.R. 1953, for one very fundamental simple reason.

The bill reauthorizes this program for an additional 3 years. For 1982 it authorizes the sum of $44,000. For 1983 and 1984 it authorizes such sums as are necessary to perform its functions.

Now, if the bill before us only authorized the sum of $44,000 for 1982, this Member from California would not now be objecting to the bill. The basis of my objection is that it permits this agency to go on in the years 1983 and 1984. I think that is where the policy error is made with respect to this legislation.

I may point out to the Members that the Senate version of this issue for the Council on Environmental Quality limits the reauthorization to 1 year. That is what I think this House should be doing.

Unfortunately, the Senate version, rather than having $44,000 in its bill, has another $1½ million for a total of $2½ million for 1982. I think the amount is wrong, but at least their reauthorization period is correct.

When you look at what the Council on Environmental Quality has done, I would like to draw the Members' attention to a book written by Donald Lambros, entitled, "Fat City." He identified 100 programs whereby the taxpayers of this country could save $100 billion a year. The Council on Environmental Quality is mentioned on page 360, in which he suggests that the historical origin for the council was more political than anything to do with reality. I will quote a very brief portion of what he said:

> They were particularly popular in the Nixon administration. For a while it seemed that for every major Government department there was a special council of independent advisers in the Nixon White House. Such councils gave the appearance that the White House was giving special priority to certain issues, issues that affected powerful interest groups. The House Appropriations Committee said the Council's only significant activity is to prepare the annual environmental quality report of the President summarizing major developments of the past year.

Mr. Speaker, there are certain fundamental duties which this Council has that I think should be transferred to existing institutions of Government, such as the EPA. If we limit the authorization of this Council to an additional year, the Congress can then look at the transfer of those duties to other agencies in Government which can well perform them.

I direct the attention of Members to certain functions of this Council on Environmental Quality. Listen to this:

To advise the President on environmental policy.

To oversee the implementation of NEPA.

To review and appraise Federal programs.

To analyze important environmental conditions.

To assist and advise the President.

To undertake investigations.

To undertake other duties as are directed by the President.

To recommend to the President, determine the need for new policies, advise and assist the President—and so it goes on and on.

When the Members reflect that we are borrowing in this fiscal year some $87 billion, this is one small area where I believe the House can reduce some of this deficit spending that goes on year after year.

We are only talking about $44,000, but we would send a signal to the administration that this House is dedicated to finding ways to reduce the unreasonable expenditure of public money and we can perform the functions that this agency is now performing by transferring its activities to the EPA, which is where I think it belongs.

Mr. FORSYTHE. Mr. Speaker, I have no further requests for time. I yield back the balance of my time.

Mr. JONES of North Carolina. Mr. Speaker, I yield such time as he may consume to the gentleman from Louisiana (Mr. BREAUX).

Mr. BREAUX. I will just say briefly, partly in response to the gentleman from California, that one of the reasons why in the outyears we have authorized such money as may be deemed necessary is for a very simple reason. We are trying to give the administration an opportunity to really make a final decision as to what their feelings are on the Council of Environmental Quality.

For instance, they could next year come back with a request for zero funding. If that would be their request, that would be the sum that probably would be authorized and we would see the elimination of the CEQ.

On the other hand, they might decide that it is something that is very important to them, to their programs, and the council can in fact be used as a means of modifying potential environmental problems before they occur, which would in effect save a great deal of money for many of the projects that they would like to have adopted.

Therefore, we are just merely giving the administration an opportunity to try to set the course that they want to with this particular agency. That is why we did that.

Mr. LEVITAS. Mr. Speaker, will the gentleman yield?

Mr. BREAUX. I would be glad to yield to the gentleman.

□ 1420

Mr. LEVITAS. I thank the gentleman for yielding.

I would like to endorse the gentleman's statement. I think that one of the important purposes that can be served by this Council which was created during a Republican administration, is to oversee the National Environmental Protection Act, to see that it is uniformly and appropriately administered, and to serve as a tool for this or any other administration to carry out sound, reasonable, and effective environmental policy.

To suggest, as did the gentleman from California, that this is a way we can go about balancing the budget is not realistic and obscures both the issue dealing with the need to balance the budget and the issues dealing with CEQ. Of course a penny saved is a penny earned, but given the $88 billion deficit for this year alone, if we go about saving $44,000, as the gentleman from California suggests, and reducing the deficit at $44,000 a whack, it would take us, if we did it every day, including Saturdays, Sundays, and holidays, 2 million days at this rate to eliminate the deficit for just this 1 year alone. That is, at this rate, it would take almost 5,600 years to eliminate this year's deficit and an eternity to eliminate the rest of the $1 trillion national debt.

So there may be policy reasons to do something about the Council on Environmental Quality, but if you are talking about 2 million days, Saturdays, Sundays, and holidays included, or over 5,000 years as a means of getting at the deficit, we have got to make more realistic and effective efforts in that regard, rather than approaching it on the basis of $44,000 a clip. That sort of has the implication of show rather than substance. I have voted for real and deep spending cuts to reduce the deficit and we need more at that, but I think we need to get on with the substance of balancing the budget and dealing with these substantive policy issues.

I thank the gentleman.

Mr. BREAUX. I thank the gentleman for his comments. I would only point out further that the last authorization and appropriation was $6 million. That the committee wound up reporting a $1,044,000 authorization, I

think, is a reflection of the fact that we, too, are committed to working toward a balanced budget and that is indicated by the substantial cut in authorization level that we are reporting to this House.

I thank the chairman.

Mr. JONES of North Carolina. Mr. Speaker, I have no further requests for time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from North Carolina (Mr. JONES) that the House suspend the rules and pass the bill, H.R. 1953, as amended.

The question was taken.

Mr. DANNEMEYER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were refused.

Mr. DANNEMEYER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Pursuant to clause 5, rule I, and the Chair's previous announcement, further proceedings on this motion will be postponed.

The point of no quorum is considered withdrawn.

## MARINE MAMMAL PROTECTION ACT AMENDMENT

Mr. JONES of North Carolina. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 4084) to improve the operation of the Marine Mammal Protection Act of 1972, and for other purposes, as amended.

The Clerk read as follows:

H.R. 4084

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. OPTIMUM SUSTAINABLE POPULATION

(a) BASIC AMENDMENT.—Paragraph (8) of section 3 of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1362(8)) (which Act shall hereafter in this Act be referred to as the "Act of 1972") is repealed.

(b) CONFORMING AMENDMENTS.—(1) Section 2(6) of the Act of 1972 (16 U.S.C. 1361(6)) is amended by striking out "optimum carrying capacity" and inserting in lieu thereof "carrying capacity".

(2) Section 3 of the Act of 1972 (16 U.S.C. 1362) is further amended—

(A) by amending paragraph (1) to read as follows:

"(1) The term 'depletion' or 'depleted' means any case in which—

"(A) the Secretary, after consultation with the Marine Mammal Commission and the Committee of Scientific Advisors on Marine Mammals established under title II of this Act, determines that a species or population stock is below its optimum sustainable population;

"(B) a State, to which authority for the conservation and management of a species or population stock is transferred under section 109, determines that such species or stock is below its optimum sustainable population; or

"(C) a species or population stock is listed as an endangered species or a threatened species under the Endangered Species Act of 1973.";

(B) by striking out "the optimum carrying capacity of their habitat" in paragraph (2) and inserting in lieu thereof "their optimum sustainable population";

(C) by redesignating paragraphs (9) through (15) as paragraphs (8) through (14), respectively;

(D) by striking out "optimum carrying capacity" in paragraph (8) (as so redesignated) and inserting in lieu thereof "carrying capacity"; and

(E) by amending paragraph (13) (as so redesignated) to read as follows:

"(13) The term 'United States' includes the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands of the United States, American Samoa, Guam, and Northern Mariana Islands.".

SEC. 2. MORATORIUM ON TAKING AND IMPORTING MARINE MAMMALS

Section 101 of the Act of 1972 (16 U.S.C. 1371) is amended—

(1) by amending subsection (a)—

(A) by striking out the first four sentences of paragraph (2) and inserting in lieu thereof the following: "(2) Marine mammals may be taken incidentally in the course of commercial fishing operations and permits may be issued therefor under section 104 subject to regulations prescribed by the Secretary in accordance with section 103. In any event it shall be the immediate goal that the incidental kill or incidental serious injury of marine mammals permitted in the course of commercial fishing operations be reduced to insignificant levels approaching a zero mortality and serious injury rate; provided that this goal shall be satisfied in the case of the incidental taking of marine mammals in the course of purse seine; fishing for yellowfin tuna by a continuation of the application of the best marine mammal safety techniques and equipment that are economically and technologicaly practicable.",

(B) by striking out "is classified as belonging to an endangered species or threatened species pursuant to the Endangered Species Act of 1973 or" in paragraph (3)(B), and

(C) By adding at the end thereof the following new paragraphs:

"(4)(A) During any period of five consecutive years, the Secretary shall allow the incidental, but not the intentional, taking, by citizens of the United States while engaging in commercial fishing operations, of small numbers of marine mammals of a species or population stock that is not depleted if the Secretary, after notice and opportunity for public comment—

"(i) finds that the total of such taking during such five-year period will have a negligible impact on such species or stock; and

"(ii) provides guidelines pertaining to the establishment of a cooperative system among the fishermen involved for the monitoring of such taking.

"(B) The Secretary shall withdraw, or suspend for a time certain, the permission to take marine mammals under subparagraph (A) if the Secretary finds, after notice and opportunity for public comment, that—

"(i) the taking allowed under subparagraph (A) is having more than a negligible impact on the species or stock concerned; or

"(ii) the policies, purposes and goals of this Act would be better served through the application of this title without regard to this subsection.

Sections 103 and 104 shall not apply to the taking of marine mammals under the authority of this paragraph.

"(5)(A) Upon request therefor by citizens of the United States who engage in a specified activity (other than commercial fishing) within a specified geographical region, the Secretary shall allow, during periods of not more than five consecutive years each, the incidental, but not intentional, taking by citizens while engaging is that activity within that region of small numbers of marine mammals of a species or population stock that is not depleted if the Secretary, after notice (in the Federal Register and in newspapers of general circulation, and through appropriate electronic media, in the coastal areas that may be affected by such activity) and opportunity for public comment—

"(i) finds that the total of such taking during each five-year (or less) period concerned will have a negligible impact on such species or stock and its habitat, and on the availability of such species or stock for taking for subsistence uses pursuant to subsection (b) or section 109(f); and

"(ii) prescribes regulations setting forth—

"(I) permissible methods of taking pursuant to such activity, and other means of effecting the least practicable adverse impact on such species or stock and its habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance; and

"(II) requirements pertaining to the monitoring and reporting of such taking.

"(B) The Secretary shall withdraw, or suspend for a time certain (either on an individual or class basis, as appropriate) the permission to take marine mammals under subparagraph (A) pursuant to a specified activity within a specified geographical region if the Secretary finds, after notice and opportunity for public comment (as required under subparagraph (A) unless subparagraph (C)(i) applies), that—

"(i) the regulations prescribed under subparagraph (A) regarding methods of taking, monitoring, or reporting are not being substantially complied with by a person engaging in such activity; or

"(ii) the taking allowed under subparagraph (A) pursuant to one or more activities within one or more regions is having, or may have, more than a negligible impact on the species or stock concerned.

"(C)(i) The requirement for notice and opportunity for public comment in subparagraph (B) shall not apply in the case of a suspension of permission to take if the Secretary determines that an emergency exists which poses a significant risk to the well-being of the species or stock concerned.

"(ii) Sections 103 and 104 shall not apply to the taking of marine mammals under the authority of this paragraph."; and

(2) by amending subsection (b)—

(A) by amending the matter preceding paragraph (1) to read as follows: "Except as provided in section 109, the provisions of this Act shall not apply with respect to the taking of any marine mammal by any Indian, Aleut, or Eskimo who resides in Alaska and who dwells on the coast of the North Pacific Ocean or the Arctic Ocean if such taking—"; and

(B) by amending paragraph (1) to read as follows:

"(1) is for subsistence purposes; or".

SEC. 3. PROHIBITIONS AND PENALTIES

(a) PROHIBITIONS.—(1) Section 102(a) of the Act of 1972 (16 U.S.C. 1372(a)) is amended—

(A) by inserting "109," immediately after "104," in the matter preceding paragraph (1);

(B) by redesignating paragraph (4) as paragraph (5); and
